

First Edition Conversion Rules (1/2/09)

This document provides rules needed to mix Second Edition cards with First Edition cards in games using First Edition rules. Only Second Edition cards that have a First Edition Compatible indicator in the lower left corner may be used with First Edition rules.

* The rules in this document only apply to Second Edition cards played in a First Edition game. Any card title reference applies only to the Second Edition cards with that title, not to any First Edition cards with the same title, unless specifically called a First Edition card. For example Spock refers to the Second Edition cards titled Spock, not the card Spock from the First Edition Two Player Game.

These rules do not replace any existing rules governing First Edition cards unless explicitly stated. For example, the rules provided for dilemmas apply only to Second Edition cards, and do not replace normal dilemma resolution rules for existing First Edition cards.

Entries that are new, changed, or expanded since the last version of this document (6/2/05) are marked in red with an asterisk (*) before the topic.

abilities – See **personnel**.

Astrometrics – See **skills**.

* **Avert Solar Implosion** – Erratum: The “or” in this mission’s game text is not bold.

Bajoran Resistance – First Edition cards which refer to Resistance (such as Palukoo or Bajoran Resistance Cell) require First Edition personnel who have that skill, and cannot be used with Second Edition personnel who have the Bajoran Resistance **keyword**.

battle – The word “combat” means “personnel battle.” The word “engagement” means “ship battle.”

When a card describes an effect “if you win” a battle, carry out that effect after any other effects of that battle, such as randomly selecting a personnel to be killed in a personnel battle, or placing Tactic cards as damage markers in a ship battle.

Borg affiliation cards – All Borg affiliation cards are treated as if they had a [DQ] icon.

All Borg personnel are treated as if they had a subcommand icon **instead** of a staff or command icon. The 1EC icon of Borg personnel is color-coded to indicate which subcommand icon the personnel receive: blue indicates Communication, green indicates Navigation, and red indicates Defense.

brig – This word refers to your brig, as identified by Holding Cell Door or Security Holding Cell.

When a card instructs you to place a personnel in your brig, move the personnel directly to your brig. If you do not have a brig in play, use the capturing card as a “trap card” instead.

capturing-related card – Any card using the keyword Capture or Punishment is a capturing-related card. See **Evek, Attaché to the Demilitarized Zone**.

classification – See **personnel**.

* **Cloaked Mission** – This rule has been moved to the CRD.

Cluttering Irrelevancies – Erratum: When your Hologram is facing a dilemma, name a skill. That Hologram gains that skill and is attributes +2 until the end of that dilemma. At the end of this mission attempt, return that Hologram to its owner’s hand.

combat – See **battle**.

command – This word means “have in play.” – See **take command**.

commander – This keyword establishes a personnel as the matching commander of the specified ship.

Consume – Ignore all Consume related game text on backwards compatible Second Edition dilemmas.

* **cost** – Most Second Edition cards have a cost printed in the top left before the card’s title. You do not pay this cost in First Edition, and you may not use any effect that requires you to pay this cost or that would modify this cost. An effect requiring a cost may not target a card with no printed cost (Example: A personnel with no cost may not be downloaded as a personnel who costs one or less). If a card’s cost is

examined and the target card has no printed cost, treat that card’s cost as an undefined attribute (see “Undefined Attributes” in the glossary).

damage – Each damage card on a ship reduces its HULL integrity by 35%. This effect is the same whether you are using rotation damage (one “hit” plus any two damage cards would destroy a ship) or Tactic cards (the effects of the damage markers are added to those of the Second Edition damage cards).

deck – This word means “draw deck” and does not refer to any side decks.

* **Deliver Ancient Artifact** – Erratum: The “or” in this mission’s game text is not bold. This Second Edition card represents the same location as the First Edition card Observe Ritual. See **missions**.

destroy – This word means “discard” when used on a card to refer to itself. It means “nullify” when used on one card to refer to a different card. For example, the phrase “destroy this event” means “discard this event,” while the phrase “destroy an event” means “nullify an event.”

dilemmas – The phrase “returns to its owner’s dilemma pile” means “is replaced under the mission” (to be encountered again). Do not replace any dilemma under a mission unless this phrase is used, even if its conditions were not met.

Failing to meet the conditions of a dilemma does **not** stop your personnel. A dilemma does not stop any personnel unless it specifically says so.

Dominion affiliation cards – All Dominion affiliation cards that do not have the Alpha keyword are treated as if they had a [GQ] icon. See **Jem’Hadar**.

engagement – See **battle**.

Evek, Attaché to the Demilitarized Zone – This personnel cannot download First Edition capturing-related cards.

* **Good Shepherd** – See **cost**.

Headquarters Mission – This term means “mission with a headquarters facility on it.”

Holodeck – See **ships**.

Hologram – All Hologram personnel are treated as if they had a [Holo] icon.

I.K.C. and I.K.S. – See **persona**.

* **icons** – Many icons have a revised look on Second Edition cards. Such icons are treated as the First Edition version of those icons for all purposes such as compatibility, probing, and staffing ships.

The Second Edition Alternate Universe, Future, and Past icons are treated as a First Edition Alternate Universe icon.

The Second Edition TOS icon is treated as a [OS] or [CF] icon. When you play a card with this icon, choose whether the icon is [OS] or [CF]. You may change this choice at any time.

Do not convert any other icons found only on Second Edition cards (such as the Deep Space Nine, Earth, The Next Generation, and Voyager icons) to First Edition icons. – See **Voyager icon**.

Infiltrator – Second Edition personnel with the Infiltrator keyword have no infiltration icon and thus cannot infiltrate your opponent’s cards. Second Edition infiltrators can still be targeted by cards that require an infiltrator (such as Dial Martok for Murder) but they cannot be targeted by cards that require an infiltrator that is infiltrating (such as Treacherous Advice).

Intelligence – See **skills**.

* **Investigate Alleged Murder** – This Second Edition card represents the same location as the First Edition card Expose Plot. See **missions**.

* **Ixtana’Rax, Honored Elder** – Erratum: When this personnel uses one of his skills to complete a mission, he is killed.

Jem’Hadar – All Jem’Hadar personnel are treated as if they had a [GQ] icon. See **Dominion affiliation cards**.

Khan Noonien Singh - This persona is the same as the First Edition persona “Khan.” See **persona**.

Keywords – Keywords are used the same as in Second Edition. See **Bajoran Resistance, Commander, personnel**.

Kira Nerys, Colonel Kira – This personnel is “Colonel Kira” for Treaty: Romulan/Bajoran.

* **James T. Kirk** – This persona is the same as the First Edition persona “Captain Kirk.” See **persona**.

* **Jeffrey Pierce, On The Edge** – See **cost**.

* **Malcolm Reed, Weapons Expert** – Erratum: This personnel’s special skill is deleted.

* **missions** – A mission’s game text (including requirements) and span are treated as though they were repeated identically on the opponent’s end of a mission. The icons identifying which affiliations can attempt a mission are converted to the two corresponding versions of those icons (for both ends of the mission).

Some Second Edition missions represent the same location as an existing First Edition mission. For example, Deliver Ancient Artifacts and Observe Ritual both occur at Vulcan. Thus, you may not include both versions in your mission selection and if one player seeds Deliver Ancient Artifacts and the other seeds Observe Ritual, they both overlap each other because they are duplicates of Vulcan. When you attempt such a mission, you use the requirements (or any alternate requirements in game text) printed on your mission card. If you solve such a mission, you score the points on your mission card. Both players may make use of game text (other than alternate requirements) printed on the mission card regardless of which version they seeded.

* **Observe Kazon Ritual** – This Second Edition card represents the same location as the First Edition card Combat Training. See **missions**.

* **Obtain Advanced Technology** – This Second Edition card represents the same location as the First Edition card Acquire Technology. See **missions**.

* **once per game icon** – Some Second Edition cards possess a 1EC icon with a small number 1 inside a circle. The special skills on that card may only be used once per game in First Edition, no matter how many copies of that card you use during the game.

Order – As in Second Edition rules, any game text beginning with the word “Order –” (including that on Interruption cards) can be used only during the Execute Orders segment of your own turn.

persona – Use the card title of a Second Edition personnel or ship to determine if it is a version of a First Edition persona. For example, Elim Garak, Agent of the Obsidian Order, is the same persona as the First Edition cards Elim, Elim Garak, and Plain, Simple Garak (but not Garak, from the First Anthology, The Dominion, and Reflections sets).

Klingon ships use the designation “I.K.S.” in Second Edition. This is treated as “I.K.C.” in the First Edition for determining persona. For example, the **I.K.S. Lukara** is the same persona as the **I.K.C. Lukara**.

personnel – Second Edition personnel have no classification. They receive no benefits and suffer no penalties from cards affecting classifications. If a Second Edition personnel has one of the personnel types listed as a skill (ENGINEER, MEDICAL, OFFICER, SCIENCE, or SECURITY), it is a skill, not a classification. See **skills**.

Any keywords listed on a personnel are treated as though they were in that personnel’s lore for purposes of any First Edition cards. For example, the keyword “High Council Member” on Duras, Son of a Traitor allows him to report for free at the Great Hall (which allows personnel with “High Council” in lore to play for free). Any abilities on a personnel are treated as one special skill with no skill dot.

plays in your core – This phrase means “plays on table.”

* **Preeminent Precision** – Erratum: “... Range +2 until the end of this turn.”

Programming – See **skills**.

remove from the game – This phrase means “place out-of-play.”

* **Revised text** – The following cards have revised game text. See each individual entry for the actual revision.

Avert Solar Implosion
Cluttering Irrelevancies
Deliver Ancient Artifact
Ixtana'Rax, Honored Elder
Malcolm Reed, Weapons Expert
Preeminent Precision

Rule – Any card with the Rule keyword is treated as if it had a [Rule] icon.

ships – Each Second Edition ship with staffing requirements has a Tractor Beam. They do not have a Holodeck (though you may play Holodeck Door on such a ship to add one). See **persona**.

skills – Each new skill used in the Second Edition corresponds to a specific First Edition skill.

Astrometrics – This skill is treated as Astrophysics or Stellar Cartography. You choose one of those two skills each time you encounter a dilemma referring to Astrometrics or use a non-dilemma card providing (or requiring) Astrometrics. You do not have to choose in advance whether an Astrometrics personnel has Astrophysics or Stellar Cartography, and you may choose differently each time you use the skill. If a personnel has 2 or more Astrometrics (or a dilemma requires 2 or more Astrometrics), each level of Astrometrics can be assigned differently as either of the two First Edition skills.

Intelligence – This skill is treated as Klingon Intelligence when used on a Klingon-affiliation personnel, Obsidian Order when used on a Cardassian-affiliation personnel, Section 31 when used on a Federation-affiliation personnel, Tal Shiar when used on a Romulan-affiliation personnel and FCA when used on a Ferengi-affiliation personnel. A card’s printed affiliation is used to make this determination; for example, the skill is not changed or lost if a personnel becomes Non-Aligned. If the printed affiliation of the card has no counterpart for Intelligence in First Edition, the Intelligence skill is treated simply as Intelligence. Klingon Intelligence, Obsidian Order, Section 31, Tal Shiar, and FCA may be used to meet Intelligence requirements on Second Edition missions and dilemmas.

Programming – This skill is treated as Computer Skill.

Telepathy – This skill is treated as Empathy.

Transporters – This skill is treated as Transporter Skill. When you add or change a skill using a First Edition card (such as Reflection Therapy or Frame of Mind), you cannot select one of these Second Edition skills to add or change to.

* **Spock** – This persona is the same as the First Edition persona “Mr. Spock.” See **persona**.

* **Stopped** – The previous entry has been deleted.

take command – When a player takes command of an opponent’s personnel by using a Second Edition card, they now control that personnel as if they had reported it. This does not eliminate affiliation-mixing restrictions. When a Borg player takes command of personnel, those personnel are assimilated as drones.

Telepathy – See **skills**.

Tractor Beam – See **ships**.

Transporters – See **skills**.

uniqueness – Non-unique personnel and ships are universal, and treated as though they had the universal symbol (♠) at the beginning of their card title.

Unique personnel, ships, and missions are treated as such, though the dots (·) at the beginning of their titles are ignored.

If an event card is marked unique (•), treat it as though it had the word “(Unique.)” at the end of its game text.

* **U.S.S. Enterprise** – This persona is the same as the First Edition persona “Starship Enterprise” and not a version of the First Edition “U.S.S. Enterprise” persona. See **persona**.

* **U.S.S. Enterprise -D** – This persona is the same as the First Edition persona “U.S.S. Enterprise.” See **persona**.

Voyager Icon - All ships and personnel with the Voyager Icon are treated as if they had a [DQ] icon.

* **Warrior's Resolve** – See **cost**.

when – As in Second Edition rules, you may use text beginning with this word only once each time the described trigger occurs.

Winn Adami – This persona is the same as the First Edition persona “Vedek Winn.” See **persona**.
