

Star Trek™ Customizable Card Game™ GLOSSARY

Version 1.8 – August 2002

This document is comprehensive; it contains all *Star Trek* Customizable Card Game rules and rulings as of August 2002. We recommend that you discard all rules documents (booklets, supplements, FAQs and Current Rulings) dated prior to August 2002 and refer to this Glossary for all rules questions. Periodic updates to the Rulebook and Glossary will be published in a separate Current Rulings document.

Supplemental rules documents available on the Decipher website include the Dilemma Resolution Guide (application of the dilemma resolution rules to each dilemma). Many players find these optional documents to be useful references. In addition, the Official Tournament Guide includes full details of tournament scoring.

How to use the Glossary – You do *not* need to read this document from cover to cover. Instead, use it as you would a dictionary, to learn as you go. For example, if you have a gameplay question about a card (or card combination), look up the card title(s) first; if you don't find your answer there, look up the concept or gameplay term you are questioning (battle, capturing, card play, affiliation, skills, downloading, probing, etc.). In many cases, we have included cross-references in **boldface** type to help you find your way.

Entries are arranged alphabetically, ignoring apostrophes and quotation marks and treating hyphens, dashes and colons as spaces (e.g., the entry for Q-Flash is sorted as "Q Flash" and appears before Qapla!, while K'chiQ is sorted as "KchiQ" and appears after Kahless). Entries for card titles starting with "The" are sorted under the second word of the title (e.g., the entry for The Emissary is in the E's, not the T's). Universal Borg drones are listed by their designations (e.g., Interlink Drone, not Nine of Eleven); unique drones are listed by their card titles (e.g., Seven of Nine).

Some Glossary entries provide revised game text or lore for cards. In most cases, these revisions merely make the proper gameplay of a card more clear, or implement a rule or ruling directly on the card itself. In other cases, the game text revisions represent gameplay changes relative to earlier versions of the cards, in order to correct a wording error, address a gameplay concern, or correct some other problem. These revisions are marked "Errata" and printed in **gray type**, with the most relevant changes **highlighted** (or **struck-out** in the case of a deletion). All such revised cards are listed in Appendix A.

A few cards have been reprinted (1995 "beta" printing of the Premiere set, black-border printings of preview cards, reprints in pre-constructed decks, foil versions, and Voyager versions with new lore and images) to use the revised wordings. Other cards will use the newer wordings in any future printings. In either case, the game text provided here defines the correct gameplay for all versions of the clarified cards as of August 2002.

Other cards have received very slight wording changes, primarily for consistency (for example, changing "All attributes +3" to "Attributes all +3") or to correct typographical errors. Such changes do not change a card's gameplay or understandability, and are not included in this Glossary.

Text in square or angle brackets represents an icon. Icon abbreviations are listed in Appendix B.

GLOSSARY

1 Tribble – See **once per turn**.

10 and 01 – See **Bynars card, dual-personnel card, gender**.

10/20 rule – See **Warp Speed**.

30/30 rule – Your **seed deck** may contain no more than 30 seed cards (not counting missions and sites, which seed for free) and your **draw deck** may contain no fewer than 30 cards.

35th Rule of Acquisition – You may not use this event for a download or card draw at the end of your first turn. Playing a 35th Rule card nullifies all 34th Rule cards already in play, and vice versa. A 35th Rule card in play does not prevent the play of a 34th Rule card (or vice versa). See **turn**.

'45 Dom Perignon – Discarding this equipment to replace a ship is not a valid response to any other action (such as battle) and does not suspend play. You may replace a ship with one of different affiliation only if the class name is identical *and* any personnel aboard are compatible with the new ship (you may not place them under **house arrest**). You may not replace one "UNKNOWN CLASS" ship with another (e.g., Mercenary Ship with Fesarius). See **ship class, exchanging cards**.

62nd Rule of Acquisition – This event is nullified if you play or have played Scan or Full Planet Scan on *any* mission, or if you begin an attempt of the mission on which it is played with <3 or >7 personnel. Attempts of other missions have no effect on this event.

75th Rule of Acquisition – See **helps**.

1962 Roger Maris Baseball Card – You may not trade this artifact for another unless you are immediately able to play that artifact as your own (this does not count as your normal card play). Traded artifacts are returned to their owners at the end of the game. See **in play**.

A Fast Ship Would Be Nice – When encountering this dilemma, you may not substitute a ship for the victim if your opponent is **playing Borg**. See **commandeering**.

Abandon Ship! – For this dilemma, you may choose which of your personnel will fulfill the staffing requirements. A [Cmd] personnel may fill a [Stf] requirement. In addition to printed staffing requirements (if any), a ship requires at least one **matching** personnel aboard to be staffed.

You may not rescue or capture the abandoned personnel during a mission or scouting attempt or during your opponent's turn.

See **damage, attribute modifiers, capturing, quarantine, ship staffing**.

abduction – Cards such as Assimilate Counterpart, the Talon Drone (Three of Nineteen), or Reassimilate Lost Drone may allow your Borg to *abduct* a personnel. If this occurs during personal combat, both combatants cease to participate in the battle and may immediately beam away (if possible), but are still "stopped."

The abducted personnel is *escorted* by your Borg present and may be moved around like equipment. If the abducted personnel is ever unescorted, your opponent can rescue them with his own personnel present.

Abducted personnel are **disabled**, and do not participate in battles. They are not captives and are not affected by cards that affect captives, such as Rescue Captives. An abducted personnel who becomes assimilated is no longer considered abducted.

aboard – See **present**.

Access Denied – See **Ferengi Ingenuity**.

acquired – See **artifact**.

actions – An action is one operation that you perform in the game. Examples of actions include playing, drawing, or discarding *one* card, moving a ship from one location to another (possibly passing other locations on the way), moving personnel by beaming or other means, using a personnel's special skill (except automatic modifiers), battle (from initiation until a winner has been determined and damage or deaths have been resolved), and attempting or scouting a mission.

Applying **automatic modifiers** (e.g., "your personnel are STRENGTH +2 where present") and checking conditions (e.g., battle affiliation restrictions) are not actions.

actions – group – An action may cause other actions to occur within itself. For example, a personnel battle includes sub-actions of creating a combat pile, individual personal combat engagements, determining the winner of the battle, and discarding killed cards. An action in place of your normal card play, in place of a card draw, etc. may also consist of several sub-actions (such as playing multiple cards under Red Alert!). This is called a *group action*, and until it has finished, neither player may initiate any other actions except actions that suspend play, or responses to the group action or a sub-action.

Valid responses may be made to each sub-action of a group action. For example, when a ship is reporting with crew, a player may choose to play an Energy Vortex on the ship, or on a specific personnel being reported. Likewise, you may play Android Headlock or use Hypospray's text in response to a specific combat pairing.

actions – interrupting – You may not interrupt an action by another action, unless the second action:

- is a *valid response* to the first action or one of its sub-actions; or
- explicitly "suspends play" (according to a card text or rule).

For example, you may make valid responses to the encounter of specific dilemmas during a mission attempt, but you may not play interrupts between dilemma encounters. See **actions – step 2: responses**.

actions – sequence of steps – Every action has three steps that must occur in order:

1. Initiation (declaring the use of a multi-function card, meeting conditions, choosing targets, and paying costs).
2. Optional responses (attempts to cancel or modify the action).
3. Results (gameplay consequences of the action).

These steps are described in more detail in the following sections.

actions – step 1: initiation – Initiating an action may include any or all of the following, in this order:

- declaring the use of a multi-function card (e.g., you may play Going to the Top to return a personnel to hand OR to download a personnel; you may discard a Space-Time Portal from the table for one of five possible results);
- meeting conditions of rules and game text (e.g., battle affiliation restrictions; an open Alternate Universe Door to play an [AU] card; game text such as "plays at start of battle");
- choosing **targets** (e.g., selecting a player to draw cards with Kivas Fajo – Collector, an outpost at which to report a personnel; choosing a ship to attack, or a drone to download from your draw deck with the Borg Queen's skill); and

- paying costs required by rules or game text (e.g., using your normal card play to report a personnel card; forfeiting a card draw to initiate a download; using a special download icon).

Once you begin to choose targets for an action, you must complete the initiation of that action (if legal). For example, if you start looking through your draw deck for a target card to download with the Ops text, you may not decide to abort the download by not selecting a target; if you have any valid target card available, you must select one and complete the download. See **showing your cards**.

Dilemma encounters – The initiation of a dilemma encounter is complete (i.e., it has been “just encountered” and may be responded to) once any targets for the dilemma have been chosen and you have checked to see if the crew or Away Team can meet the dilemma’s conditions (if any). If the dilemma requires a trigger or specifies targets with specific features which are not present, the dilemma will have no effect, but the initiation is still complete. (See **dilemma resolution**.)

For example, your Away Team encounters Nausicaans. The target must be selected and you must check the Away Team’s total STRENGTH to see if it is greater than 44 before you may nullify the dilemma with Interphase Generator or your opponent may respond by replacing the dilemma with a Q-Flash (using Beware of Q).

Some cards, such as Mission Fatigue and Cyrus Redblock, add a sub-action to dilemmas, randomly selecting a personnel to be “stopped” or killed before the dilemma’s own game text is resolved. The dilemma has been “just encountered” and may be responded to after you complete initiation of this sub-action (choosing a target to be “stopped” or killed). If the opponent responds by swapping the dilemma for a Q-Flash, the personnel is not “stopped” or killed because no results are obtained from the dilemma.

actions – step 2: responses – After an action has been initiated and before its results begin, optional responses are allowed. A valid response must specifically relate to (modify, cancel, nullify, or prevent) the action.

For example, if you initiate a personnel battle at a site, any action that says it “plays at start of battle,” occurs “during battle,” “cancels (or prevents) a personnel battle,” plays when an adversary is “just engaged,” etc. would be a valid response. Smoke Bomb and Phaser Burns are valid responses to personnel battle. Going to the Top is *not* a valid response to personnel battle; although returning a personnel to hand or downloading one could affect the outcome of the battle, going to the Top does not specifically say that it is related to battle.

Likewise, Hugh is a valid response to the attack of a Borg Ship dilemma just encountered, because it nullifies that attack. Playing Temporal Rift on the ship and returning the ship to your hand by discarding a Space-Time Portal are *not* valid responses to encountering a Borg Ship (or any other dilemma).

A card play or other action that may occur at any time (e.g., playing an Interrupt card, revealing a hidden agenda) is not a valid response to an action unless it specifically relates to that action. For example, a card may not be played via “Devidian Door” to an Away Team during a mission attempt or battle.

A card which says it *suspends play* may be played at any time (not just during the response step of an action), and may temporarily suspend any action, whether related or not. (The suspending action may be responded to normally, and after it is complete, the suspended action resumes.)

Using a special download icon also suspends play. Thus, a personnel’s special download icon may be used to download a card during a mission attempt or battle, and Launch Portal may be used to download and launch a shuttle during battle. See **downloading**.

More than one valid response may be made to an action. For example, if I play Palor Toff, you may respond first with Countermanda to place three cards out of play, and then with Amanda Rogers to nullify Palor Toff.

Interrupts and skills that “prevent” an action may be used as a response to that action. If the action thus prevented is a card play, it nullifies that card play. For example, if I play You Dirty Rat on Anya to morph her into a rat, you may respond with Howard Heirloom Candle to prevent her from morphing and nullify You Dirty Rat. (See **battle**.)

When all responses are over, or if neither player chooses to respond, the action has its result.

If a properly initiated card play is nullified, any costs paid are not recovered, but all results of the card play are canceled. For example, you play Q’s Tent and I nullify it with Wrong Door. You cannot play another Q’s Tent this turn (a cost of playing the card), but you do not lose the ability to draw cards this turn (part of the results of the Q’s Tent).

Responses modifying targets or conditions – If a **hidden agenda** is activated as a response to an action, all of its effects are retroactive to the start of the initiation of the action, as if the hidden agenda had already been revealed before the action was initiated. Thus, if the hidden agenda invalidates a condition for an action, the action becomes illegal. If the action was a card play, the card returns to your hand. For example, you initiate the play of Activate Subcommands, and I respond by activating Computer Crash. Since Activate Subcommands requires a download, it is now illegal and returns to your hand.

If a condition for an action becomes invalid before the action resolves, for any reason other than the activation of a hidden agenda (e.g., through the play of another card in a Manheim effect “hiccup”), it has no effect on the initiation. For example, if you initiate the play of K’chiQ, and I close your Alternate Universe Door with a Revolving Door during a “hiccup,” you can still play K’chiQ because the condition was met during the initiation and is not re-checked.

If a target of an action becomes invalid after the action is initiated, then the action is “played out” without results. If the action is a card play, that card is discarded. For example, if you target an outpost to play K’chiQ, and I then destroy the outpost with a Supernova during a Manheim “hiccup,” you must discard K’chiQ.

actions – step 3: results – When an action begins to have its results, this typically causes one or more other actions to occur. For example, the result of playing Kivas Fajo – Collector is that the target player must draw three cards. Each of the three card draws is an action with its own three steps, and each may be responded to (e.g., with Subspace Schism). However, no more responses to the original action (the card play) are allowed between those actions, because Kivas Fajo – Collector’s optional responses step is past and it is currently having its result.

When you play a card that is discarded after use (e.g., most interrupts), it is discarded *after* it has its results.

actions – taking turns – Players alternate initiating actions. You may initiate the first action of your turn. After your action has had its result or is cancelled, then your opponent may initiate the next action, and so on. Whenever it is your turn to initiate an action, if you do not wish to do so you may “pass.” You

must allow your opponent ample time to initiate an action or “pass.”

When an action you initiated is in its optional responses step, your opponent has the first opportunity to initiate a response; when that response is complete you may initiate a response, and so on. Whenever both players pass consecutively during the optional responses step of an action, that action proceeds to its result.

In the rare case where both players initiate an action at the same time (e.g., revealing adversaries for a combat pairing), and both players wish to respond to that action, the player whose turn it is may initiate a response first; players then alternate actions as usual. For example, if both players wish to make a response to a combat pairing (such as playing an interrupt or using a personnel’s “stun” skill), the player whose turn it is may respond first.

You cannot initiate any action (including using your personnel’s skills which are not **automatic modifiers**) during your opponent’s turn except:

- you may make valid responses;
- you may play interrupts (between other actions or as valid responses); and
- you may play a card or use game text that specifies it may be used “at any time” or “every turn,” that “suspends play,” or that in some other way indicates that the action may be taken on the opponent’s turn.

See **skills – using**.

actions – “just” – Some actions may be initiated only just after some other action or condition has occurred, before anything else can intervene (except another “just” action). These are typically indicated by the word “just” in game text. It may be a response to another action (e.g., “just initiated,” “just played”), or it may be a new action that follows the result of the other action (e.g., “just completed,” “just reported”). An action may be responded to or followed by any number of applicable “just” actions.

“Just” actions always take place before non-“just” actions. This may allow or require you to initiate an action when it would otherwise be your opponent’s turn to do so. For example, you initiate a planet mission attempt and solve the mission. Although it is normally your opponent’s turn to initiate the next action, you may first play Particle Fountain (“play...on just completed planet mission”).

actions – required – Required actions are usually indicated by “must” or “must do nothing but.” There are two types of required actions, moving and non-moving.

Moving required actions include Cytherians (you must travel to the end of the spaceline), Incoming Messages (you must return to an outpost), and Conundrum (you must target and “chase” a ship).

Additional personnel and equipment may be brought aboard the ship by beaming, reporting (e.g., to a Borg Cube), or any other method that does not require the ship and crew to take an action such as docking. Personnel and equipment may not be removed from the ship by any means.

The only other action the ship and crew may perform is moving. (“Ship must do nothing but...” means “ship and crew must do nothing but...”.) It may not cloak, phase, or initiate battle, including a counter-attack (though it may return fire if attacked). The crew may not initiate battle against an intruder, but may defend themselves if attacked. The ship may not time travel to a time location, even with the intention of time-travelling to the end of the spaceline on the next turn (e.g., with Orb of Time).

When a moving required action states that a ship must travel at “normal speed” or “full speed,” it means you must use all of its available RANGE each turn (assuming that

the ship is staffed to move), including any **automatic modifiers** such as a Plasmadyne Relay aboard, even if this will place the ship at a hazard such as Gaps in Normal Space. You may stop at intermediate locations.

You may use Lakanta's or The Traveler's skills, Where No One Has Gone Before, Wormholes, Transwarp Network Gateways, or other such means to shorten the travel. You are not required to do so.

The ship can be affected by cards played on it or encountered on the spaceline, such as Wormholes, Gaps In Normal Space, etc.

Non-moving required actions include Samaritan Snare (you must attempt the mission, if Federation) and Conundrum after you reach the targeted ship (you must attack the ship).

If a ship is targeted by a non-moving required action, you must perform that action as soon as possible, typically as your next action. Responses to that action (e.g., battle-related cards or Senior Staff Meeting) may be played.

When your cards are required to take more than one action, you may choose the order in which to take those actions. For example, if your Federation ship affected by Cytherians is at Samaritan Snare, you may choose whether to move the ship (if you have available RANGE) or attempt the mission as your next action.

A ship under the influence of a required action remains under that influence after it is commandeered or assimilated; the new controller must complete the action.

Activate Subcommands – This event may download a drone which has all three subcommand icons (e.g., Seven of Nine) as any one of the three subcommands. You must also download two other drones of the other two subcommands.

Activate Tractor Beam – The first function of this interrupt allows you to tow one ship for the extent of your available RANGE on the current turn; the interrupt is then discarded. When played for the second function, the interrupt remains on the ship to add the Tractor Beam permanently. You may play two copies of this interrupt on a ship, one to add a Tractor Beam and one to tow a ship. See **towing**.

active – An *active* personnel is one which is not "stopped," not disabled, and not in stasis.

Adapt: Modulate Shields – See **immune, Remodulation**.

Adapt: Negate Obstruction – Revised text: *Nullifies a dilemma (except a Q-related dilemma) just encountered ...*

A dilemma may be nullified by this interrupt *only* just after it is **encountered** in a Borg scouting attempt. You must play another copy of the interrupt each time you encounter another copy of a dilemma that you wish to adapt to. See **Q-related dilemma**.

Add Distinctiveness – For this incident, seed cards (which must be placed **out-of-play**) include missions, dilemmas, artifacts, and any other card which is *only* seedable (has no normal "play" function). See **outside the game**.

Any non-Borg personnel or ships obtained from an expansion pack with this incident are considered assimilated as drones (see **assimilation – personnel**) before you report them for duty. You may report such cards immediately (ships to any spaceline location or your Borg Outpost; personnel to any of your ships or outposts or to a planet) without regard to [AU] icons or **native quadrant**. If you place them in your hand to play later, you must obey all normal reporting requirements.

If you obtain Jean-Luc Picard from an expansion pack using this incident, you may not play him immediately if you have Locutus

of Borg in play, but may later perform a **persona** exchange with the two cards.

adjacent – Two spaceline locations are *adjacent* to each other if there is no other **location** between them (even if a card which does not form a location, such as Q-Net, is between them.)

Admiral Riker – This personnel's special download requires him to be aboard your **matching** facility. The Reflections foil version requiring a compatible facility is a misprint (not errata).

affiliation – There are 13 affiliations: Bajoran, Borg, Cardassian, Dominion, Federation, Ferengi, Hirogen, Kazon, Klingon, Neutral, Non-Aligned, Romulan, and Vidian. Each affiliation has a distinct border color (but see **Captain Proton cards**) and a unique **affiliation icon** in the upper left corner of each Personnel or Ship card (lower left corner of each Facility card). A few cards are **multi-affiliation**. (Equipment and Site cards have no affiliation.)

Cards from different affiliations are not normally **compatible**, except Non-Aligned and Neutral cards which are compatible with any affiliation except Borg. Special cards such as **treaties**, The Kazon Collective, Emblem of the Alliance, and Temporal Micro-Wormhole may make two or more affiliations compatible, allowing them to mix and work together.

affiliation and ship origin – Some cards, such as tactics, affect "Klingon ships," "Romulan ships," etc. These cards apply to ships currently holding that affiliation as well as ships that "originated" with that affiliation. A ship's class or lore may indicate that its origin is different from its affiliation. For example, the *B'Rel*, a Ferengi-affiliation ship identified in its lore as a "Klingon Bird-of-Prey," is both a Klingon ship and a Ferengi ship. The *Cha'Joh* is a **multi-affiliation** [Rom][Klg] ship of Klingon origin ("Bird-of-Prey"); thus, it is a Klingon ship regardless of its current affiliation mode, but a Romulan ship only in Romulan affiliation mode. A Romulan ship commandeered by Klingons is both a Romulan ship and a Klingon ship. The *Naprem* (K'Vort-class "Bird-of-Prey") is of Klingon origin; the *Stolen Attack Ship* ("Jem'Hadar attack ship") is of Dominion origin.

affiliation and species – Cards that affect "Klingons," "Romulans," etc. apply to personnel of that affiliation as well as that **species** (including hybrids). Thus, *Worf*, *K'Ehleyr*, and *Quark Son of Keldar* (in Klingon mode) all are Klingons for *Klingon Death Yell*. *Ba'el* and *Simon Tarses* are Romulans for *D'Tan's INTEGRITY* enhancement. *Miles O'Brien* (Fajo Collection) will not work with *Garak* (in either mode), *Dukat*, or *Evek*. A "non-Klingon" personnel is neither Klingon by species nor Klingon affiliation.

Espionage cards and cards that refer to an affiliation by its icon (such as *Kira Nerys*) refer only to affiliation, not to species.

affiliation attack restrictions – See **battle**.

affiliation icon – A round icon in the upper left corner of a Personnel or Ship card or lower left corner of a Facility card, indicating the card's affiliation. Also, a rectangular icon on a Mission card indicating which affiliations can attempt the mission.

Airlock – Either player may use the text of this doorway if his personnel is present with an appropriate target, but only on each of his own turns. An **opposing** personnel must have lower STRENGTH or CUNNING than the personnel tossing him out. A Rogue Borg must have lower STRENGTH. See **battle** – non-battle cards.

Ajur and Boratus – To use their special skill, your *Ajur* or *Boratus* must be on a planet with only one other of your personnel, who has the skill of Archaeology. They are considered to

be "with" the Archaeology personnel even if one of them is "stopped." Likewise, they are not "alone with Archaeology" if there is any other personnel (even "stopped"), belonging to either player, on the planet.

They may destroy only cards that are seeded face down under the mission, and only if there more than three; you cannot use the skill solely to shuffle three or fewer seed cards. See **once per game, mis-seeds**.

Select the three cards to be retained as for any other random **selection**, by shuffling the cards and allowing the opponent to select three. If the cards' ownership is identifiable, they must be concealed (e.g., by having the tournament director assist with the selection).

Alien Abduction – Revised text:

Most CUNNING Away Team member (owner's choice if tie) is held by aliens until mission completed OR 3 Leadership present.

Alien Parasites – This entry covers both the original Alien Parasites dilemma and the version included in the combo dilemma Alien Parasites & REM Fatigue, whether encountered on a planet or in space.

When you encounter this dilemma and fail to meet its conditions, the mission or scouting attempt immediately ends. At a planet mission, beam the Away Team back to the ship or facility with which they are associated, if any (if not, they remain on the planet surface) or have them reboard their landed ship without transporters. At a space mission, the crew remains aboard their ship.

Your opponent then chooses whether or not to take control of the ship/facility and the crew or Away Team. If he chooses to take control, your turn is suspended (you may not initiate actions except as normally allowed during your opponent's turn) while he temporarily controls the ship or facility (if any), the Away Team or crew which encountered the dilemma, and any other personnel aboard that ship or facility. (If any personnel aboard are already "stopped," they remain so unless your opponent plays a card that "unstops" them, such as *Distortion of Space/Time Continuum*; they then join the rest of the crew.) He does not control any other ship or facility at the location or any personnel who were previously "stopped" on the planet. He may not take any actions that would normally occur only during his turn, except those using your ship and crew which he controls.

Your opponent may take legal actions (see **control** for limitations) with the ship and crew until they become "stopped" (he may not then take any action to "unstop" them) OR he cannot take any further meaningful actions with them (e.g., he may not simply beam them up and down endlessly) OR he chooses not to take any further actions with them. Then control returns to you and your suspended turn resumes.

If the ship and crew are not already "stopped" (or if your opponent chose not to take control), the personnel who originally encountered the dilemma (and the ship, if encountered at a space mission) are now "stopped" by their failure to overcome it. The dilemma is replaced under the mission to be encountered on the next mission or scouting attempt.

If your opponent's Borg scout fails to overcome this dilemma, you must follow all **Borg** Away Team and battle restrictions, and the Borg may not attempt missions. You may use the controlled Borg to scout for your own current objective if you are playing Borg.

If you are playing Borg and control a non-Borg ship and crew, they may attempt and solve a mission, but neither player scores the mission points.

Alien Probe – See **Telepathic Alien Kidnappers, Battle Bridge side deck, Tribble side deck**.

All Threes – To play this interrupt, you must have at least six cards in your draw deck to reveal. Reveal the first three cards and the next three cards from the top of your draw deck in two sets, which you may not rearrange. See **any, in play**.

Alliance Interceptor – See **interceptor**.

Alternate Universe Door – A seeded copy of this doorway allows your [AU]-icon cards to enter play. See **Alternate Universe icon**. You may not play or download this doorway to the table for this purpose.

You may play this doorway to nullify a Temporal Rift only during your own turn (unless downloaded by discarding a Space-Time Portal). This use is a **card play** that returns to your hand rather than discarding (not "showing a card") and may be affected by Energy Vortex.

Alternate Universe icon [AU] – You may normally seed or play cards with this icon *only* if you have an open Doorway or other card which allows such cards to enter play, such as **Alternate Universe Door**, **Space-Time Portal**, or the Seal Rift mission. (Using "**Devidian Door**" to report a card also requires such a Doorway card at the time the reporting function is used.) **Time locations** also allow certain cards "native to the timeline" to report there without such a Doorway card.

If the card allowing your [AU] cards to play is closed or discarded, you may not play additional [AU] cards until it is re-opened or replaced. [AU] cards already in play or already seeded are unaffected by closed or discarded doorways. If the doorway is closed (or has been discarded) when a legally seeded [AU] card is encountered, the [AU] card still has its normal effect. However, if an earned [AU] artifact goes to your hand, you *do* need an open doorway to play it later.

Altonian Brain Teaser – On this dilemma, the phrase "if their CUNNING <15" means "if that personnel's CUNNING <15." If the affected personnel's CUNNING is less than 15, any bonus points (positive or negative) scored at that location are not lost or cancelled, but are not counted in your final score for the game, whether scored before or after the dilemma was encountered. See **points, Balancing Act, In the Zone, dual-personnel cards**.

- The points from Cytherians are affected by an Altonian Brain Teaser only at the far end of the spaceline where the points are scored, not at the location where the Cytherians was encountered.
- Music personnel are not worth points for a Ressian Flute while at the location where the Altonian Brain Teaser was encountered, regardless of where the Flute was earned.

Amanda Rogers – Errata:

Nullifies any one Interrupt card just played (except Kevin Uxbridge or another Amanda Rogers card) OR any ~~one artifact~~ other card just played as an Interrupt card.

An Artifact or Doorway card is "played as an Interrupt card" only if its text specifically says so. For example, Space-Time Portal may be discarded from the table to "play as a second Wormhole interrupt." See **card types**.

Amanda's Parents –

Plays on table until any Q-Flash. Each time you play an Amanda Rogers card (except to nullify a [Q] icon card) opponent may take that Amanda Rogers (and any two other cards) from your discard pile and place all three out-of-play.

This Q-icon event appeared in two slightly different versions in the original print run. The correct gameplay is indicated above.

Ambush Ship – See **WEAPONS**.

Anastasia Komananov – To use her special skill, this personnel must have been aboard

the opponent's ship (like an infiltrator) since the start of the opponent's last turn.

android – "Android" is a **species**. The term includes any personnel identified in its title or lore as an android (such as any **Soong-type android**), **Exocomps**, and Commander Data. Androids are affected normally by *all* cards unless otherwise specified.

ANIMAL – This classification has several important differences from other classifications. ANIMAL may not be selected as a skill or classification. In addition, ANIMALs may not

- attempt missions alone;
- meet ship staffing requirements, including the matching affiliation requirement;
- enable the use of hand weapons or initiate battles;
- commandeer, or apply their affiliation to a commandeered ship or facility;
- use their classification to staff a Kurlan Naikos; or
- be assimilated or targeted for assimilation.

A personnel of this classification remains an animal even if its classification is removed or changed, and is subject to all the normal restrictions on ANIMALs. Otherwise, ANIMALs are affected normally by all cards.

Anti-Matter Spread – The phrase "opposing ships' WEAPONS" on this interrupt refers to ships that are **opposing** the ships of the player playing the card. You may not play it on behalf of the Borg Ship dilemma to reduce the WEAPONS of your opponent's ships being attacked by the dilemma.

The reduction of WEAPONS for personnel with CUNNING<8 applies only to Ship cards, including Borg-affiliation ships. The reduction of WEAPONS to 16 applies only to the Borg Ship dilemma.

Anti-Time Anomaly – Revised text:

Plays on table. Kills literally ALL personnel in play (both players' cards) at the end of your third full turn, unless anti-time anomaly destroyed first.

This event kills all personnel (not Rogue Borg interrupts) on or off the spaceline in all quadrants, at timeline locations, in a Penalty Box, being held by aliens, in **stasis**, etc. (Holographic personnel deactivate as usual instead of being killed.) The only personnel who are protected are those who are time-traveling into the future (i.e., in a Temporal Rift or Time Travel Pod) at the time the Anti-Time Anomaly resolves. See **in play**.

any – If a card refers to a specific Star Trek character using the word "any" (e.g., "any Miles"), it refers to any Personnel card representing the specified character, including [AU], [MQ], and [Holo] personnel (but not impersonators). Thus, both Chief O'Brien and Smiley are "any Miles;" and both Montgomery Scott and Mr. Scott are "any Scotty;" but Odo Founder is not "any Odo."

"Any *Enterprise*" is any ship with "*Enterprise*" in its card title. "Any Nor" is any station identified in its title or lore as a Nor (including Deep Space 9).

For equipment, "any" (or "a", "an", or "one") refers to any Equipment card (or artifact used as Equipment) designated by the given **characteristic** in its card title or lore. For example, "any disruptor" includes Varon-T Disruptor, Klingon Disruptor Rifle, and Breen CRM114.

For other card types (e.g., events and interrupts), "any", "a", "an", and "one" refer to any card with the designated words in its card title. For example, "Any Emblem card" includes Emblem of the Empire and Emblem of the Alliance (but not cards displaying the icons representing those emblems); "any Bynars card" includes Bynars Weapons Enhancement and Bynars Data Transfer (but not a Personnel card depicting Bynar personnel).

When a card refers to a specific card title without a modifier such as "any", it refers *only* to a card of that exact title (or a member of that **card title** group). For example, Investigate Coup requires Tomalak and cannot be solved by Ambassador Tomalak.

anywhere – When a card allows a personnel or tribble to report, beam, or relocate to "anywhere," it must be aboard a ship or facility, or on a planet surface. You may not report, beam, or relocate personnel or tribbles off the spaceline or timeline (such as to a Penalty Box) or into space.

Aphasia Device – See **quarantine**.

acquired – See **artifact**.

Arachnia – See **Borg** (Borg-affiliation ships).

Arbiter of Succession – The two Klingons targeted by this interrupt may belong to the same player.

Arne Darwin – This personnel does not allow you to draw a card for his own report aboard K-7.

Art of Diplomacy, The – This incident allows your personnel to use 2 Treachery as if it were 1 Diplomacy (either one personnel with Treachery x2, or two personnel, each with Treachery). For example, two personnel who have Treachery and another who has Treachery x2 can provide 2 Diplomacy (if any are mission specialists, this counts as using their skill to meet a mission requirement for the Assign Mission Specialists objective). A personnel may not use their skill as Treachery and Diplomacy at the same time. You do not have to declare in advance how you are using the 2 Treachery; when a requirement for Diplomacy arises, you may meet that requirement by showing 2 Treachery on qualifying personnel in the crew or Away Team.

artifact – A card type representing a rare object with special powers. Artifacts must be seeded during the dilemma phase, under planet missions only, unless a card allows or requires seeding at a space mission, and you may seed only one artifact under each mission unless otherwise specified (see **mis-seeds**). A seeded artifact is **earned** when the mission is completed, not when the artifact is **encountered**. (The Borg must complete an objective that allowed scouting a location before the Survey Drone can **acquire** any artifacts seeded at that location.) "Earned" is synonymous with "acquired." Cards seeded like artifacts are earned or acquired in the same way as artifacts. See **scouting**.

Artifacts cannot be used until they have been earned, for example:

- by completing the mission (or, with the Survey Drone, a Borg objective which allowed scouting that location);
- with a card such as The Charybdis or HQ: Return Orb to Bajor; or
- with a card that allows an artifact to be earned without seeding, such as Reclamation or Starry Night.

An artifact may be downloaded *only* by a card that specifically downloads artifacts (e.g., Secret Compartment) or that has a special download icon for a named artifact (e.g., James Tiberius Kirk for Tantalus Field). For example, Bareil may *not* download a Varon-T Disruptor. When a card specifically downloads an artifact, that artifact is earned.

If an artifact leaves play, it cannot be brought back into play unless it is earned again (for example, by re-seeding under Q's Planet and completing that mission, or with one of the cards listed above). See **Masaka Transformations**.

An artifact that is "used as equipment" joins your crew or Away Team when earned; some artifacts are placed in your hand to play later; and others are resolved immediately, according to their game text.

When you acquire multiple artifacts or cards seeded like artifacts at a single mission, you may generally resolve them in any order you choose. For example, if you acquire your opponent's Magic Carpet Ride OCD and your own Varon-T Disruptor, you may choose to have the Varon-T Disruptor join your Away Team before your opponent may relocate your ship and Away Team.

However, if two copies of a non-duplicatable card are earned, the first one encountered is acquired and the second copy is discarded. For example, if both you and your opponent seed a copy of Ressian Flute under a mission, you acquire only the first copy encountered and discard the second. (This also applies if you acquire another instance of a persona which you already have in play, or a Borg counterpart when you already have a counterpart in your collective.)

Artificial Intelligence, The – This personnel's "NO STRENGTH" is an **undefined attribute**.

Assign Mission Specialists – Errata and clarifications:

Seeds or plays on table. You may download to one of your outposts up to two different mission specialists (personnel whose only skill is a regular skill) that you do not already have in play. Also, while in play, each of your mission specialists scores 5 points whenever they use their skill to meet a mission requirement. You may voluntarily discard objective at start of any of your turns. (Captain's Order, Unique.)

This objective has two effects. First, it allows a one-time download of two mission specialists to an outpost (not to any other type of facility). If you choose to use the optional download, you must do so immediately upon seeding or playing the objective. (The mission specialists are not seed cards.) If you wish to play another Assign Mission Specialists later to download two more specialists, you must first discard the one in play at the start of your turn. (See **unique and universal**.) If the download of the mission specialists is prevented by the activation of **Computer Crash**, the objective remains in play on the table for its second function. The download opportunity is permanently lost.

Second, while you have any Assign Mission Specialists card in play, any mission specialists you have in play (regardless of whether downloaded or played normally) score 5 points when using their skill to complete a mission.

You decide which of your personnel present use their skills to meet mission requirements. Multiple copies of the same mission specialist may not score points for the same mission, even if multiples of that skill are required. See **cumulative**.

For example, the mission Reported Activity requires Navigation + Honor x2. It is solved by the following Away Team: mission specialists B'iJik (Navigation), Konmel (Navigation), Kahless (Honor x2), and two copies of Batrell (Honor), plus non-mission specialist Governor Worf (Honor x2 plus other skills). A maximum of 15 extra points may be scored (5 by Kahless, 5 by one copy of Batrell, and 5 by either B'iJik or Konmel, but not both). Kahless is *not* forced to meet the entire Honor x2 by himself, nor is Governor Worf required to use his Honor at all.

A **skill** with a multiplier, such as Honor x2, is one skill. Any special skill, including a special download, disqualifies a personnel from being a mission specialist. For example, Tarus (Stellar Cartography) and Kahless (Honor x2) are both mission specialists. John Doe, whose only skill is a special skill, and Madam Guinan, who has two skills (one regular and one special), are *not* mission specialists.

You cannot create a mission specialist by removing skills from a multi-skilled personnel

(e.g., with Tsiolkovsky Infection). If a card replaces a mission specialist's single skill with another regular skill (e.g., Reflection Therapy), that personnel remains a mission specialist. If a personnel loses mission specialist status due to a card such as a Medical Kit or Mot's Advice, he regains it if separated from the kit or if the card is nullified.

Assign Support Personnel – A skill with a multiplier, such as Honor x2, is one skill. Any special skill, including a special download, disqualifies a personnel from being a support personnel for this objective. See **Major Rakal**.

If a multi-affiliation personnel has different skill sets for each affiliation, the skill set for the affiliation selected for reporting determines support personnel status. For example, Stefan de Seve is a support personnel if reported in Romulan mode, but not in Federation mode.

Assimilate Counterpart – Participating in any battle at the location of the target prevents you from **probing** to complete this objective, even if the target is no longer at the location of that battle. Simply placing an unabdected target on an Assimilation Table (e.g., by relocating him there with Mysterious Orb) is not sufficient to allow you to probe. You must first battle and abduct the target as stated. See **drone, showing your cards**.

Assimilate Homeworld – If the target of this objective is destroyed (e.g., by a Supernova), discard the objective (and any Stop First Contact or Build Interplanetary Beacon suspending it) immediately. See **mirror universe**.

Assimilate Planet – Revised text:

Plays on table. Target an unassimilated, non-homeworld planet mission with a point box showing at least 35 points. Your Borg may scout that planet. After scouting complete, if you have Borg at that location, you may probe ...

See **point box**.

Assimilate Species – You may not target an unnamed **species** with this objective (e.g., Vekor, Fennim). Your opponent need not show you his personnel until after you have targeted a species. See **showing your cards**.

Assimilate Starship – Revised text:

Plays on table. Target an opponent's ship. Your Borg may scout that ship. (Whenever no active Borg aboard target during your turn, you may beam one scout aboard.) After scouting complete, if your Borg have Computer Skill aboard that ship, you may probe ...

See **active, showing your cards**.

assimilated counterpart – See **assimilation – personnel, counterpart, He Will Make An Excellent Drone**.

assimilation – You may assimilate planets or your opponent's personnel and ships by using Objective and other cards that allow assimilation. You may assimilate only cards which you do not already control, and only if a card or rule allows it. Assimilated cards undergo specific transformations detailed in the following sections.

assimilation – personnel – When your Borg assimilate an opposing personnel, it becomes a Borg *drone* under your control (however, your opponent must still obey the **persona** rule and may not report another instance of a non-universal persona) and it undergoes the following transformations:

- Its affiliation changes to [Borg].
- Its gender becomes irrelevant to the Borg.
- Its classification (if any) becomes its first-listed regular skill.
- It retains any existing subcommand icons. If it was non-Borg-affiliation, its staffing ability changes to a subcommand icon, as follows:

<u>Old Staffing</u>	<u>New Icon</u>
[Cmd]	[Com/Blue]

[Stf]	[Nav/Green]
Neither icon	[Def/Red]

A drone will never have more than one copy of each subcommand icon. For example, if [NA][Fed] Seven of Nine is assimilated as a drone, her [Stf] icon is lost rather than converted.

- Its attributes adapt to service the collective based on its subcommand icons, as follows:

[Com] icon sets INTEGRITY to 7
[Nav] icon sets CUNNING to 7
[Def] icon sets STRENGTH to 7

 Any attribute not set by a subcommand icon is set to 5.

Borg do not assimilate (or target for assimilation) ANIMALs or holographic re-creations. Such personnel are excluded from any selections for abduction or assimilation. *All* other personnel, including androids, changelings, and your opponent's Borg, may be assimilated normally unless otherwise specified by a card. For example, if your opponent has The Kazon Collective in play, his Kazon are immune to assimilation.

In addition to drone assimilation, you may assimilate a male personnel as a *counterpart* by completing the Assimilate Counterpart objective. When this occurs, the counterpart undergoes the same transformations as a drone, with the following exceptions:

- He retains his gender for Borg-related cards only. For example, a counterpart is not affected by Male's Love Interest.
- His staffing ability adapts to service the Collective by changing to all three subcommand icons ([Com][Nav][Def]). His INTEGRITY and CUNNING remain the same, and his STRENGTH is +3 (if he was already a **counterpart**, all attributes remain the same).
- His previous affiliation remains relevant for all cards requiring a matching counterpart, such as Assimilate Homeworld or Service the Collective. If he is multi-affiliation, all of his affiliation icons may be used for this purpose.

Your Collective is limited to one counterpart (or personnel targeted as such) at a time. While any personnel is targeted to become a counterpart, that personnel may not be assimilated as a drone and is excluded from all such selections. Dual-personnel cards may not be targeted for assimilation as a counterpart. A counterpart may be converted to a drone with **He Will Make an Excellent Drone**.

Any cards already played or placed on the personnel before assimilation remain in play (you do not recheck the conditions or targets for playing that card).

The Borg overlays from the Enhanced Premiere product do not allow assimilation of cards and cannot be placed on non-Borg cards to allow them to be stocked in your deck. They may be sleeved with Personnel cards you assimilated as a memory aid for the transformations.

assimilation – ship – When your Borg assimilate an opposing ship, you take control of that ship (but your opponent must obey the persona rule) and it undergoes the following transformations:

- Its affiliation changes to [Borg].
- Borg staffing requirements do not change. Non-Borg staffing requirements adapt to service the Collective:

<u>Old Requirement</u>	<u>New Requirement</u>
[Cmd]	[Com]
[Stf]	[Nav]
Other icon	[Def]
Other requirementsIrrelevant	

Any carried ships aboard are assimilated (but personnel and equipment aboard are not). Any cards played on or placed on the ship prior to

assimilation (such as a Kurlan Naikos) come under your control.

assimilation – planet – When you assimilate a planet, any opposing personnel, equipment, and landed ships on that planet are assimilated. Any opposing facilities at that location, all personnel and equipment in or aboard a facility, and all ships docked at a facility are also assimilated. Personnel and equipment aboard a docked or landed ship are *not* assimilated. The affiliation of an assimilated facility changes to [Borg], and you may **report** cards to it in accord with normal native quadrant reporting rules.

If your Survey Drone, Sixteen of Nineteen, is on the planet when it is assimilated, it may acquire any seeded artifacts. If not, any artifacts (or cards seeded like artifacts) are placed face up on the planet and may be later acquired by your Survey Drone or by any non-[Borg] personnel present.

Mission attempts may not be made at assimilated planets, and the mission affiliation icons become irrelevant (facilities requiring a matching affiliation icon may no longer be built there).

assimilation – facility – See **assimilation – planet**.

Asteroid Sanctuary – This interrupt is a valid response to the initiation of a ship battle. It cancels the **battle** (but all cards involved are still “stopped”). See **actions – step 2: responses**. It may not target a **docked ship**.

at any time – This phrase indicates that an action may be used during any phase of either player’s turn (except start-of-turn or end-of-turn), between other actions or as a valid response. It may not interrupt other unrelated actions. See **actions – step 2: responses**.

Atmospheric Ionization – This event allows up to 3 personnel to beam, up or down, every turn (e.g., 2 down and 1 up or any other combination).

ATTACK bonus – A feature of **Tactic** cards. In a ship battle, the ATTACK bonus on your current tactic (if any) is added to the total WEAPONS of your ships firing to calculate your ATTACK total. The ATTACK bonus is *not* an **attribute enhancement**. See **battle – ship**.

attempt – Non-Borg affiliations may make **mission attempts** and **commandeering** attempts. Borg may make **scouting** attempts.

attribute – A feature of Personnel, Ship, and Facility cards. Personnel have three attributes – INTEGRITY, CUNNING, and STRENGTH. Ships have three attributes – RANGE, WEAPONS, and SHIELDS. Facilities may have WEAPONS and/or SHIELDS. See **attribute enhancements, attribute modifiers, undefined attribute, variable attribute**.

attribute enhancements – Attribute enhancements refer only to positive changes in the attributes of a ship or personnel. SHIELD extension from a facility and ATTACK and DEFENSE bonuses are not attribute enhancements; thus, Shipwreck and Weak Spot do not affect a facility’s ability to extend its SHIELDS around ships. See **attribute modifiers, battle – ship**.

The attributes of ships with a restriction box such as the *Keldon Advanced* are not enhanced by the presence of the required skill or characteristic aboard (in this case, Obsidian Order); rather, they are reduced if the required skill or characteristic is *not* aboard.

attribute modifiers – If more than one card modifies an **attribute** of a ship or personnel, add or subtract first, then multiply. (The order in which the cards were played is irrelevant.) For example, if you have both a Plasmadyne Relay (RANGE and SHIELDS +2) and a Kurlan Naikos (all attributes x3) on the *U.S.S. Enterprise* (9-8-9), which also has Strafing

Run on it as a damage marker (all attributes –1), its attributes would be:

RANGE and SHIELDS: $(9 + 2 - 1) \times 3 = 30$
WEAPONS: $(8 - 1) \times 3 = 21$.

However, if a card or rule *changes* an attribute to a specific value (rather than adding or subtracting), treat it as if the changed value were printed on the card. For example, if Data (8-12-12) is affected by Frame of Mind (sets attributes to 3-3-3) and has a phaser (STRENGTH +2), his STRENGTH will be 5. Rotation **damage** to a ship, which reduces its RANGE to 5, is a rule that sets a value rather than modifying it.

When resolving dilemmas, determining STRENGTH in battle, etc., always apply any relevant modifiers to cards in play. Modifiers do not affect cards in your hand (e.g., for Royale Casino dilemmas). See **automatic modifiers**.

An attribute is considered *reduced* (for cards such as Abandon Ship! or U.S.S. Enterprise-B) if it is affected by a card that says it is reduced (e.g., Baryon Buildup), is –X (Vole Infestation), or is “disabled” (“Pup”), even if it is also affected by a card that enhances that attribute by the same amount (Plasmadyne Relay). Also, the RANGE of a ship that has rotation **damage** applied is reduced. A ship that “cannot move” (Menthar Booby Trap) does *not* have its RANGE reduced. Attributes may not be reduced to less than 0. An **undefined attribute** may not be modified.

automatic modifiers – Any modifier which simply states that it occurs, without a word such as “may” to indicate that it is optional, is automatic and mandatory. For example, “While on your ship, RANGE is +1” is an automatic modifier, whereas “if on a ship, may reduce RANGE or WEAPONS by 2 until end of turn” is optional.

Away Team and crew – When your personnel are aboard a ship or space facility that you control, they are a crew. *In all other situations*, they are an Away Team. When aboard a ship or facility controlled by your opponent, they are also **intruders**. (Equipment cards may be carried by crews or Away Teams, but an Away Team or crew must contain at least one personnel.)

Your opponent may not look at the cards in your Away Team or crew, except when necessary for verification. See **showing your cards**.

Borg-affiliation personnel may not form Away Teams unless counter-attacking or allowed by game text. **Holographic personnel and equipment** may exist only on ships or facilities, unless a card such as Mobile Holo-Emitter or **Holo-projectors** allows them to exist on a planet surface.

Cards referring to an Away Team normally do not include crew. For example, a Genetronic Replicator prevent deaths only in your Away Team, not in your crew. (A few [S/P] dilemmas which incorrectly refer either to a ship’s crew or to an Away Team have been revised to include both.)

All your **compatible** personnel aboard one ship or facility (at one site, if a Nor), or on one planet (outside a facility or landed ship) form a single Away Team or crew, except personnel who are “stopped”, disabled, or in stasis, who form a separate group during your turn. When a dilemma “stops” some of your personnel, they temporarily form a separate Away Team or crew which does not participate in the mission attempt. See **dilemma resolution**. Any such separate groups automatically rejoin with other compatible Away Teams or crews present when your turn ends.

An Away Team can be associated with only one ship or space facility at a time. If you beam Away Teams from multiple ships or facilities to the same planet, you must

designate which single ship or facility the new combined Away Team will be associated with.

An Away Team remains associated with the ship it beamed (or disembarked) from until they board another of your ships or space facilities, become associated with another ship by joining that ship’s Away Team, or are separated by the departure of the ship or the Away Team from that location (including the ship time-traveling into the future via Temporal Rift). For example, if you play Memory Wipe on your ship, beam an Away Team to a planet, and move the ship to another location, those personnel revert to their normal affiliations.

Away Team battle – This phrase (or “Away Team or Rogue Borg battle”) on a card is synonymous with “personnel battle,” which may include Away Teams, crews, and/or Rogue Borg.

Bajoran – An affiliation and a species. See **affiliation and species**.

Bajoran Civil War – Both downloaded personnel must be ♦, whether they are OFFICER, SECURITY, or Resistance personnel. See **Computer Crash**.

Bajoran Interceptor – See **interceptor**.

Bajoran Raider – See **report with crew**.

Bajoran Resistance Cell – Revised text (correction of typographical error):

...may download a Bajoran espionage card to one of your missions...

A Resistance personnel is one with Resistance skill. See **Espionage cards**.

Bajoran Shrine – “Using a disruptor at an adjacent site,” which can destroy this site, means that a personnel is present there with a disruptor which he can legally use (see **equipment**). For example, a Klingon could destroy the site if he is carrying a Klingon Disruptor, but not a Romulan Disruptor. The disruptor does not have to be used in battle, nor does destroying the Shrine count as a battle.

The “other Bajoran” who must be present for the Prylar, Vedek, or Kai to conduct services may be any other Bajoran Personnel card, including another Prylar, Vedek, or Kai (even a copy of the first one).

Bajoran Wormhole – Whenever you play or download this doorway to the Alpha Quadrant, you *must* use its text to download another copy to the Gamma Quadrant (creating that spaceline if there are no missions there yet). The Alpha Quadrant Bajoran Wormhole card must be placed or inserted adjacent to a Bajor Region location if any are on the spaceline. If not, the doorway may be inserted anywhere on the spaceline that is not within another region, creating a Bajor Region. If one end of the Bajoran Wormhole is destroyed, the other end is discarded also. See **doorways, wormholes – movement through**.

Bajoran Wormhole: Mirror Universe –

When you seed or play this doorway, you are not required to download [DS9] **Bajoran Wormhole**, but if you fail to do so, the download opportunity is lost. Only one player may download [DS9] Bajoran Wormhole; the player who seeded or played Bajoran Wormhole: Mirror Universe gets the first opportunity to do so. This doorway is *not* discarded if the [DS9] Bajoran Wormhole is destroyed. See **between, card titles**.

Balancing Act – The point loss for this dilemma is not scored at any specific location and thus is not affected by Altonion Brain Teaser.

To see if you are affected by this dilemma, count all your missions with point boxes in all quadrants. A dual-icon mission is both [S] and [P] and is counted twice. A mission location destroyed by a Supernova is not counted at all. Examples:

5[P]–1[S] or 5[S]–1[P] = 4. You lose points.

4[P]-2[S] or 4[S]-2[P] = 2. No point loss.

1[S][P] + 4[S] + 1[P] = 5[S]-2[P] = 3. You lose points.

banned cards – The only card banned from tournament play is Raise the Stakes. All other issued cards, in all border colors, including foils, are allowed in tournament play.

Barash icon [Bar] – This icon, found on cards such as Admiral Picard, is used by the Barash Personnel card and a few other cards.

Barclay Transporter Phobia – This interrupt plays as a response to the initiation of transport. The affected personnel refuses all beaming, including the transport just initiated. Place the interrupt on the affected personnel as a marker.

Bareil – This personnel cannot download an artifact used as equipment.

Bareil of Borg – See counterpart.

Barzan Wormhole – Reporting a ship with crew is a result of playing this doorway, which you may do at any time during your turn. It does not use your normal card play. See **between**, **Supernova**, **report with crew**.

Bashir Founder – This personnel cannot use his special download while aboard a cloaked or phased ship. See **cloaking and phasing**, **WEAPONS**.

battle – A conflict you initiate during the executing orders segment of your turn. Two types of battles can occur: ship battles (which may also involve facilities or the Borg Ship dilemma) and personnel battles (which may also involve Rogue Borg). (“Personnel battle” is synonymous with “Away Team battle” or “Away Team or Rogue Borg battle.”) The following rules are common to both types of battles:

- You may initiate battle only during your own turn.
- You may attack only cards which you do not control, unless a card or rule requires or allows you to attack your own cards. (The Borg Ship dilemma and Rogue Borg are considered *self-controlled*.) You may attack an opponent’s ship or facility even if you have intruders aboard.
- You may attack only cards which are **present** with your cards (for personnel battle) or at the same **location** (for ship battle). Personnel and Rogue Borg are present together if they are on the same planet, ship, facility, or site. Ships, space facilities, and the Borg Ship dilemma may attack other ships or facilities in space, or planet facilities, at the same location. Landed ships may not attack or be attacked unless a card specifically allows it.
- Each of your non-[Borg] ships, facilities, or Away Teams that wishes to initiate an attack must have a leader present (if playing [Borg], each must have a [Def] personnel present instead). A *leader* is any personnel with Leadership skill or any OFFICER. Each ship or facility must also have at least one personnel of **matching affiliation** aboard (which may or may not be the leader). If the facility is a Nor, the leader and matching personnel must be in Ops.
- No other **actions** can occur during a battle unless they are a valid response or suspend play, or a card specifically allows them. For example, you cannot beam personnel off your ship during a battle without a card such as Emergency Transporter Armbands.
- When a battle is over, all cards involved in the battle are “**stopped**.” If a properly initiated battle (or “attack”) is cancelled, prevented, or nullified (e.g., with Hugh or I’m a Doctor, Not a Doorstop), all cards involved have still participated in a battle and are “stopped.”
- If your opponent attacks you, during your next turn you may initiate one or more *counter-attacks* against any or all of your

opponent’s ships, Away Teams, facilities, crews (if you have a way to beam through the SHIELDS), etc. which are still at the location of the opponent’s attack, regardless of the form of the original attack. (You may bring additional forces to the location.)

When you counter-attack, no leader or [Def] personnel is required and no affiliation restrictions apply. Your opponent, on his next turn, may then initiate his own counter-attack, and so on. Counter-attacking is always optional. A counter-attack is a new battle, not a “continuation” of the previous battle.

Non-battle cards – Cards that kill personnel or damage and destroy ships do not constitute a battle unless they specify that they include a battle or attack involving your opponent’s personnel or ships, or Rogue Borg or the Borg Ship dilemma. For example, destroying a ship with Romulan Ambush or a Nemesis icon is not a ship battle; tossing a personnel out an Airlock is not a personnel battle. A dilemma such as El-Adrel Creature, which “attacks” your personnel, is not a battle.

battle – affiliation restrictions – Most affiliations have restrictions on whom they may attack. Normally, an affiliation may attack any affiliation other than their own. There are exceptions:

- *Klingon, Kazon, Non-Aligned, and Neutral* forces may also attack their own affiliations.
- *Federation* forces cannot attack any affiliation (except Borg).
- *Borg* forces may not initiate battle except when allowed or required by a card. When allowed to initiate battle, they may attack any affiliation including opposing Borg.

A mixed **force** is subject to *all* the attack restrictions of its members. For example, a mixed Away Team of Federation and Non-Aligned personnel, or a Federation crew aboard a Non-Aligned ship, is a Federation force, and may not initiate a battle (except against Borg). A Romulan crew aboard a Non-Aligned ship is a Romulan force, and may not be attacked by other Romulans. (The Borg Ship dilemma and Rogue Borg interrupts are always able to initiate battle.) Aboard a Nor you control, your affiliation battle restrictions are determined by all your personnel aboard who are compatible with the station’s affiliation.

If a card allows you to attack a specific affiliation, then you may attack any forces that include that affiliation, even if other cards are working with them. For example, Admiral Leyton allows you to attack a Dominion/Cardassian force.

When a card, such as Emblem of the Empire, removes affiliation attack restrictions from a group of cards, they may attack any affiliation, including their own. If cards from that group mix with other cards whose affiliation attack restrictions have not been removed, the entire force is subject to the restrictions of the second group. A card that allows a specific attack (e.g., **Captain Kirk** may initiate battle against non-[Fed]) does not remove affiliation attack restrictions.

battle – personnel – Personnel battles may also include Rogue Borg. Throughout this section, “personnel” should be taken to mean “personnel or Rogue Borg.” See **Rogue Borg Mercenaries**. Special rules also apply to **holographic personnel**.

1. Announce your attack. Identify which one of your Away Teams or crews is attacking and which one of your opponent’s Away Teams or crews they are attacking. (The group that you attack may include personnel which are disabled, though they do not engage in personal combat, but not those in stasis.) The battle has now been initiated.
2. You and your opponent may now use any cards that apply at the start of battle.

These responses to the battle initiation may include an interrupt such as Vulcan Nerve Pinch or equipment that may report to a just-initiated battle such as D’k Tahg. See **Emergency Transporter Armbands**.

3. Shuffle your personnel (not including any which are **disabled**, **stunned**, or **mortally wounded**) and place them face down to form a “combat pile.” Your opponent does likewise.
4. You and your opponent then simultaneously turn over the top card of your combat piles, and these two *adversaries* engage in personal combat. Compare their individual STRENGTH attributes (applying relevant modifiers such as phasers or Lower Decks):
 - If one personnel’s STRENGTH is greater than the other’s, the higher-STRENGTH personnel may choose to *stun* his adversary (temporarily rotate the adversary card 90 degrees).
 - If one personnel’s STRENGTH is more than double the other’s, that personnel may choose to *mortally wound* his adversary (temporarily rotate the adversary card 180 degrees).
 - If the two combatants have equal STRENGTH, neither may stun or mortally wound the other.

Repeat this step until one player’s combat pile runs out. Any cards remaining in the other player’s combat pile are then turned face up.

If both cards in a combat pairing have a stun effect, or if both players wish to make a response to a combat pairing, the player whose turn it is has the first opportunity to do so. For example, your Data just engaged your opponent’s Fek’Ihr who has ‘45 Dom Perignon present. You wish to play Android Headlock, while your opponent wishes to use the ability of the ‘45 Dom Perignon. If it is your turn, you may play Android Headlock first.

5. To determine the winner of the overall personnel battle, compare your total remaining STRENGTH to your opponent’s (or the Rogue Borg’s) total remaining STRENGTH (applying relevant modifiers). Stunned and mortally wounded cards do not add their own STRENGTH to the total, but may still modify other cards (e.g., a stunned Shakaar Edon still makes other Bajorans stronger). The force with the higher total is the winner, and immediately kills one opposing personnel (random selection from among those not mortally wounded, but including those who are stunned or disabled). If the STRENGTH totals are equal, no one wins or loses the overall battle.
6. After the personnel battle is over, mortally wounded cards die (discarded), stunned cards recover from being stunned, and all survivors of the battle are “stopped.”

battle – ship – Ship battles may also include facilities or the Borg Ship dilemma. These rules apply whether **Battle Bridge side decks** are being used by zero, one, or both players.

1. Announce your attack, then identify which of your ships and/or facilities will be firing and which enemy ship or facility they are targeting. You can use any or all of your compatible ships/facilities at that location, but can target only *one* enemy ship or facility per battle. (Borg Ship dilemmas and Borg-affiliation ships with a Multiplexor Drone aboard are allowed to fire WEAPONS against two or more targets in the same battle. See **battle – ship – multiple targets**.) If the card you are targeting had been “stopped,” it is “unstopped” for this battle. Each of your ships or facilities that will be firing WEAPONS must have WEAPONS>0, be “unstopped,” undocked, uncloaked, and

- unphased, and have a leader and a personnel of matching affiliation aboard.
- If your opponent wishes to return fire during this battle, he must also now identify which *one* of your ships or facilities (involved in the initial attack) he will be targeting, and which of his ships and/or facilities there will be returning fire against that target. Each of your opponent's ships and facilities that returns fire must also have WEAPONS>0, be "unstopped," undocked, unclocked, and unphased, and have a personnel of matching affiliation aboard (but no leader is required). The battle has now been initiated.
 - You and your opponent may now use any cards that apply at the start of the battle. These responses to the battle initiation may include cards which will allow you to draw extra Tactic cards in the next step, such as Battle Bridge Door or Attack Pattern Delta.
 - Each player who has a Battle Bridge side deck may do the following:
 - draw up to two Tactic cards (or more if allowed by a card played in step 3) from the top of his side deck (he may look at each one before deciding whether or not to draw the next);
 - choose *one* of those Tactic cards (regardless of how many ships are firing) to play face down on the table as his *current tactic* (optional); and
 - place his unplayed Tactic card(s) face-up underneath his side deck. (Used Tactic cards never go to your discard pile. Instead, whenever one of them is discarded or otherwise leaves the table, place it *face up* underneath your side deck. When your Battle Bridge side deck runs out of face-down Tactic cards, shuffle the face-up cards and place them face down again underneath your seeded Battle bridge door.)
- Any current tactics played on the table are then revealed at the same time.
- If you choose to use a special download icon for a Tactic card, you must do so at the time you would normally draw Tactic cards, and you must use the downloaded tactic as your current tactic.
- You may use a current tactic even if your only card participating in the battle is a facility. ATTACK and DEFENSE bonuses work normally; if the facility has no usable WEAPONS, it cannot target an opponent's card and thus cannot use the ATTACK bonus.
- Compute your ATTACK total by adding together the total WEAPONS power of all your attacking cards (counting all applicable **attribute enhancements** from other cards) plus the ATTACK bonus from your current tactic (if any). (The ATTACK bonus is added only once, not once for each ship.) Your opponent computes his DEFENSE total by adding the SHIELDS of his targeted ship or facility (counting all applicable enhancements) to the 50% facility SHIELDS extension (if the target is a docked ship) plus the DEFENSE bonus from his current tactic (if any). Now compare the two totals to see if you score a hit (but damage is not applied until *after* your opponent's return fire, if any).
 - If your ATTACK total is greater than your opponent's DEFENSE total, you score a *hit*.
 - If your ATTACK total is more than double your opponent's DEFENSE total, you score a *direct hit*.
 - If your ATTACK total is less than or equal
- to your opponent's DEFENSE total, the target is not hit.
- If your opponent announced during the initiation of the battle that he would return fire, he does so now. He computes his ATTACK total (including his current tactic's ATTACK bonus) and you compute your DEFENSE total (including your current tactic's DEFENSE bonus). Your ship may suffer a hit or direct hit as described above.
 - Apply any damage caused by either or both players. If you scored a hit or direct hit on your opponent's ship or facility, indicate the damage as follows:
 - If you are *not* using a Battle Bridge side deck, apply *rotation damage* – rotate the target 180 degrees to indicate that it is damaged, with these effects: RANGE is reduced to 5 (if it is already less than 5, it remains the same), Cloaking Device is off line and HULL integrity is reduced by 50%. (If it is damaged again before being repaired, reducing the HULL integrity to 0, it is destroyed.) If you scored a direct hit, HULL integrity is reduced by 100% and the target is thus immediately destroyed.
 - If you are using a Battle Bridge side deck, the *amount* of damage to your opponent is determined by symbols on your current tactic, and the *kinds* of damage are marked by one or more of your Tactic cards (which are referred to as *damage markers*).
 - ↯ This symbol on your current tactic means you place this card on the target as a damage marker.
 - ↰ This symbol on your current tactic means you draw a new Tactic card from your side deck to place on the target as a damage marker.
 - If you are using a Battle Bridge side deck, but you chose not to play a current tactic in this battle (or it was nullified), your opponent suffers *default damage*. Default damage is two cards from your side deck (↰ ↰) for a hit, or four cards (↰ ↰ ↰ ↰) for a direct hit.
- If your side deck is completely out of Tactic cards, you will be unable to further damage your opponent until some of your damage markers return to your side deck. See **damage** for further details.
- The player whose ships and/or facilities sustain the least HULL integrity loss (maximum of 100% loss per ship or facility) during that battle is the winner. (If the HULL integrity losses are equal, there is no winner or loser.)
- At the end of the battle, discard your current tactic (face-up under your Battle Bridge side deck) unless it was used as a damage marker. Destroyed ships and facilities (and all cards aboard them) are discarded and all surviving ships, facilities, and crews involved in that battle are "stopped." Ships which had been docked at a destroyed facility are *not* destroyed (unless landed on Docking Pads).
- battle – ship – multiple targets** – Borg Ship dilemmas and Borg-affiliation ships with a Multiplexor Drone aboard are allowed to fire WEAPONS against two or more targets in the same battle. This expands the fire (or return fire) portion of the battle into two or more engagements. Each engagement has only one target, but it is possible to have multiple cards firing upon that target.
- Compute separate ATTACK and DEFENSE totals for each engagement, repeatedly using the appropriate bonuses from each player's current tactic each time. In other words, each player is limited to one current tactic for the battle, but it will apply to each engagement.
- If your multiplexed Borg ship scores a hit (or direct hit) against two or more targets and

your current tactic has a ↯ symbol, use that card as the damage marker for one of those targets (your choice) and treat that symbol as ↰ for damage to each remaining target. All damage markers drawn from your side deck must be placed on the hit targets randomly, without looking at the markers before placing them; choose a ship, draw and place the markers for it, choose another ship, and so on. Because ships and facilities destroyed in battle are not discarded until the end of the battle, you cannot retrieve any damage markers from targets at -100% HULL integrity to use in separate engagements of the same battle.

Battle Bridge Door – The second function of this doorway enhances the WEAPONS of only those ships and facilities involved in the battle, and only for the duration of that battle.

Battle Bridge side deck – This side deck is made up of Tactic cards which increase your offensive and/or defensive capabilities during ship battle and also indicate **damage** affecting your opponent's ships and facilities. You can have as many Tactic cards in your side deck as you like, even duplicates. The side deck is activated during the doorway seed phase by a Battle Bridge Door card placed face up on top of the side deck. See **battle – ship**.

Your Tactic cards are not part of your hand, and thus are not affected by cards such as Alien Probe and Energy Vortex. Your used Tactic cards do not go to your discard pile. Instead, whenever one of them is discarded or otherwise leaves the table, place it *face up* underneath your side deck. When your side deck runs out of face-down Tactic cards, shuffle the face-up cards and place them face down again underneath your seeded Battle Bridge Door.

beaming – Beaming uses transporters to transfer personnel, equipment, and tribbles over short distances. All ships and facilities have their own transporters unless the card indicates otherwise. To beam to or from a ship or facility, its SHIELDS must be conceptually dropped by a player, or a card or rule must specifically allow dropping or beaming through the SHIELDS. Transporters and SHIELDS may be operated by the player who controls a ship, or by any player who is allowed to use a **facility**. (You need not have a Personnel card aboard a ship or facility in order to use its transporters.) For example, you may normally beam cards to or from your opponent's headquarters, but *not* to or from your opponent's ship or outpost which is protected by SHIELDS. If SHIELDS=0 or are disabled or off line, you may beam freely.

You may beam cards between two ships and/or facilities that you control or are allowed to use, or between a ship or facility and a planet surface. The starting and ending point of the transport must be at the same **location** and a ship or facility must be **compatible** with any personnel beaming aboard, unless you are invading an opponent's ship or facility that you are not allowed to use. (Equipment cards have no affiliation.) You may not use the transporters of one ship or facility to transport cards directly between a planet and another ship or facility without transporters. You may not beam any card into space unless a card specifically allows you to do so.

Because dropping a large space station's SHIELDS to permit beaming is risky, you are not allowed to beam cards (except **tribbles**) to, from, or within a Nor unless a card allows it. Thus, you cannot normally beam from a ship docked at the Nor to the planet it orbits, between two docked ships, or between a docked ship and an undocked one. (If a card allows you to beam aboard a Nor, personnel need not be compatible with the Nor.)

To beam cards, announce the beaming, remove the cards from the ship, facility, or

planet, and move them to their destination, placing them under a ship or facility or on top of a planet. All cards in a group beam simultaneously unless you specify otherwise. There is no limit to the number of times you can beam during your turn.

Special beaming cards such as Near-Warp Transport or Emergency Transporter Armbands, or dilemmas such as Extradition, do not overcome obstacles to beaming, such as Atmospheric Ionization, Katherine Pulaski's beaming restriction, Barclay Transporter Phobia, or being "stopped," and do not provide transporters, allow you to use your opponent's transporters, or allow beaming from a Nor unless specified.

between – When a card allows a ship or personnel to move *between* one location and another, it may move in either direction. For example, Bajoran Wormhole: Mirror Universe allows a ship to move "between here and a [DS9] Bajoran Wormhole." The ship may move either from or to the [DS9] Bajoran Wormhole.

Beware of Q – When you seed this objective (and have a **Q-Continuum side deck**), you must declare which function you are seeding the card for. If you wish to use the first two functions, you must have two copies in play. The first function does not require a Q-Continuum side deck or a seeded Q-Flash. It allows seeding of Q-icon dilemmas only (not other Q-icon card types).

Using this objective to replace a dilemma with a Q-Flash is a valid response to the initiation of the dilemma encounter. See **actions – step 1: initiation**. If you replace a dilemma with a Q-Flash at a location where you seeded another Q-Flash, the second one revealed is discarded as a **mis-seed**. The second function of this objective can be used to replace a dilemma seeded at **Empok Nor**.

If a mission has already been solved (or a Borg objective allowing it to be scouted has been completed), seeding a Q-Flash under it does not allow it to be solved again, or targeted with another Borg objective.

See **encountered, Q-icon cards, scouting locations**.

Beyond the Subatomic – If the last card in your deck is the card type you named when you played this interrupt, you do *not* lose the game.

Big Picture, The – Once you have solved (or scouted) both a space mission and a planet mission (either before or after The Big Picture is played), this event no longer affects you. See **victory conditions**.

Birth of "Junior" – Revised text:

Place on ship. End of each turn, RANGE reduced by 1; if reduced to 0, ship destroyed. Nullify with 3 ENGINEER.

A ship whose RANGE is **disabled** by "Pup" has *not* been reduced to 0 by Birth of "Junior," and thus is not destroyed.

Black Hole – This doorway may only be played between two of the missions named ♠ Space, not other universal [S] missions.

This doorway will pull in all cards (including ships) at the **adjacent** location even if a Q-Net is between the Black Hole and the adjacent location. If it pulls in the last location on either end of the spaceline, it stops alternating and continues to pull in locations from the remaining side. Cards that can close a **doorway** (e.g., Revolving Door) suspend the Black Hole's game text and are not pulled in.

When a ship in a Temporal Rift (or Time Travel Pod) is located at a spaceline location that is pulled into a Black Hole, the ship is not immediately discarded, because the ship is time traveling and thus not at that location "in the present"; the card only indicates where it will eventually reappear. Move the ship to the Black Hole location itself until it reappears.

Blended – This dilemma's requirement of "any Scotty" refers to any representation of the Montgomery Scott character.

Blood Screening – On this event, "pooling skills" refers to two or more personnel combining their skills together for a dilemma, mission, etc.

Bok – See **characteristics, Non-Aligned**.

bonus point area – When you score points from any non-mission card with a **point box**, that card (unless it remains on a target) is placed in a bonus point area near your discard pile, as a reminder of those points, even if the card says to discard it. This is not part of your discard pile and is unaffected by cards such as Res-Q or Fire Sculptor.

Cards in the bonus point area are no longer in **play** unless otherwise specified. For example, if a unique captive is placed in the point area using Relics of the Chase, its owner may report another copy of that personnel.

If points are scored from a card without a point box (such as Lack of Preparation), that card is discarded when resolved, not placed in the point area. You must keep track of such points by another method.

bonus points – See **points, bonus point area, Altonian Brain Teaser, Intermix Ratio**.

Boratus – See **Ajur and Boratus**.

Borg – There are a number of important differences between the Borg and other affiliations. An overview is presented here. Although "Borg" is considered both an affiliation and a species, unless otherwise specified, throughout this section, the term "Borg" refers to cards of [Borg] affiliation.

The Collective and Hive – All of your Borg-affiliation cards in play make up your *Borg collective*. All of your Borg-affiliation cards at one spaceline location (or time location), whether in space, on a planet, aboard a ship or facility, etc., make up a *Borg hive*.

Borg Personnel – Most Borg Personnel cards represent **drones**. A drone's lore identifies it as such and lists its species of origin (or "Biological Distinctiveness"). The Borg Queen, assimilated **counterparts** such as Locutus of Borg, and former Borg of non-[Borg] affiliations are not drones. A Borg is considered to be both Borg species and its species of origin.

Gender is irrelevant to the Borg. Borg-affiliation cards are not affected by gender-related game text on non-Borg-related cards (e.g., Love Interests, Matriarchal Society, Arachnia).

Borg personnel have no classifications, though several of the personnel types appear as **skills**. Regular skills (including the Borg Queen's selected skill) may be shared throughout a Borg hive using the Interlink Drone's skill or the Borg Vinculum. (See **skill-sharing**.) Your Borg may also share **CUNNING** using the **Unity Drone's** skill.

Each Borg personnel has an icon identifying which *subcommand* ([Com] Communication, [Nav] Navigation, or [Def] Defense) it is assigned to within the Borg collective. Subcommand icons are used primarily to staff Borg ships, but also have other uses indicated by cards. Some Borg, such as the Borg Queen, have more than one subcommand icon, but may each contribute only one icon at a time to meet **ship staffing** requirements unless otherwise specified. See **Seven of Nine**.

Borg-Affiliation Ships – Each Borg ship has a bonus point box. These bonus points do not contribute to a Borg player's score, but are earned by your non-Borg opponent whenever he destroys your Borg ship in battle (and *only* in battle).

Borg-affiliation ships are not affected by Plasma Fire, Warp Core Breach, Isabella, Into The Breach, Hugh, or the second function of

Anti-Matter Spread. (They are affected normally by the first function of Anti-Matter Spread, like any other ship.)

Cooperation – Borg don't mix or cooperate with cards of other affiliations (they are not **compatible** with them). A player using [Borg]-affiliation cards may not stock *any* non-[Borg]-affiliation personnel, ships, or facilities in their game deck or any side decks, including former Borg such as One, or a **Mission II** with a built-in non-Borg outpost (even if they do not use that function of the card). If a player has [Borg] and non-[Borg] cards present together (The Naked Truth, Frame of Mind, etc.), normal **house arrest** rules apply. (A card bearing the "Borg Use Only" [BO] icon in its title bar can be stocked in your deck and used *only* when playing the Borg affiliation.) See **playing Borg**.

Objectives – Unlike other affiliations, Borg never attempt missions. Instead, a Borg player uses Objective cards to accomplish goals such as destroying a ship, scouting a space location, or assimilating a planet. Some Borg objectives score points; others confer different benefits, such as disrupting the timeline (see **Stop First Contact**).

When you are playing Borg and you have an uncompleted [BO] (Borg Use Only) Objective card face up in play, this is defined as your *current objective*. You are limited to one [BO] current objective at a time. You may have any number of non-[BO] objectives in play at a time. (You may also have other [BO] cards such as incidents in play.)

When you play (or activate) a [BO] Objective card, you must immediately target an appropriate location, ship, personnel, etc., as specified by the objective. Objectives may target solved or unsolved mission locations. The objective then allows your Borg to scout the ship or location, initiate battle, abduct a target, etc. See **scouting, scouting locations, scouting ships**.

Your Borg must complete scouting (if an objective involves scouting) and meet any other listed requirements (such as having Borg present at the location) before you may *probe* (usually at the end of your next turn) to determine your current objective's outcome and score its points, if any. See **probing**.

Scoring points – A Borg player scores points, both positive and negative, *only* from [BO] cards and cards which specify that they affect Borg. When you or your Borg are confronted with any other card which is point-related, play out the card but ignore the points. If that card presents a choice, you must choose an option which is not point-related, if possible. Points you score from completing [BO] objectives are non-bonus points. *Any* other points you score are bonus points (for example, points from the [BO] Add Distinctiveness incident or the negative points from Balancing Act).

Assimilation – You may assimilate planets or your opponent's personnel and ships by using Objective and other cards that allow **assimilation**. (Also see **abduction**.)

Borg Away Team Restrictions – Your Borg may not form *Away Teams* (either on a planet or on an opponent's ship or facility) except when counter-attacking or when allowed by your current objective or another card (e.g., Emergency Transporter Armbands, Near-Warp Transport, Ionian Gateway, Devidian Door).

Borg Battle Restrictions – Your Borg may not initiate battle except when counter-attacking or when allowed or required by your current objective (e.g., Assimilate Counterpart, Eliminate Starship) or another card (e.g., Conundrum, The Issue Is Patriotism). When allowed to initiate battle, they may attack any affiliation, including Borg.

Other Borg Restrictions – Borg do not commandeer (they assimilate instead), and do not use hand weapons for any purpose.

Borg-affiliation ships – See **Borg**.

❖ **Borg Cube, Locutus' Borg Cube, Queen's Borg Cube** – Revised text:

...Your equipment and Borg personnel may report aboard...

These ships allow reporting of any equipment aboard (not just [BO]). Personnel may report to this ship using its game text even while affected by a moving required action. See **actions – required**.

Borg Nanoprobes – This Equipment card is not a **hand weapon**. A "Species 8472-related dilemma" is one that mentions Species 8472 in its lore. See **drone**.

❖ **Borg Outpost** – Revised text:

Seed one at any [S] mission with no affiliation icons OR build at such a mission (or at an assimilated planet) where you have a Borg ENGINEER. [SD] Transwarp Network Gateway

Borg Queen – See **enigma icon, unique and universal, skills – modifying, skill-sharing**.

Borg Scout Vessel – See **report with crew**.

Borg Ship – This dilemma attacks *only* when it is first encountered; when it moves to a new location at the end of every turn; and when a target arrives or appears at its location. (It does not attack when reappearing from a Temporal Vortex.) A "target" is any ship or facility that may normally be targeted in a ship battle. When encountered and when it moves to a new location, it attacks *all* targets at that location. When a target arrives at (and stops at) or appears at its location, it attacks *only* that target. (A moving ship may fly past the dilemma without being attacked.) A target may "appear" by decloaking, dephasing, reappearing from a Temporal Rift, time travel, or reporting.

If you have "unstopped" ships at the location of a Borg Ship dilemma during your turn, they may attack the dilemma. It will return fire against all ships (and facilities) that attacked it (but not other targets that were not involved in the attack).

The battle is conducted according to normal ship battle rules, with the exception that the Borg Ship dilemma fires on multiple targets (see **battle – ship – multiple targets**). Hits, direct hits, and damage to the dilemma are calculated and applied as if it were a ship. Its bonus points are earned when a non-Borg player destroys the dilemma in battle (and *only* in battle).

Battle Bridge side decks affect this dilemma as follows:

- When battling the Borg Ship dilemma, you may use a current tactic and may place damage markers on the dilemma if appropriate.
- The dilemma does not use either player's Tactic cards; thus, your ships and facilities it hits suffer *default damage* (two damage markers for a hit, four for a direct hit) if your opponent is using a Battle Bridge side deck, or card rotation **damage** if your opponent is not.
- When the dilemma is attacking both players' cards, it does so as two separate battles. The player whose turn it is chooses which happens first.
- If both players have damaged the Borg Ship dilemma but only one of them has a Battle Bridge side deck, some of the dilemma's damage will be indicated by damage markers and some of it will be indicated by card rotation. The card rotation damage is equivalent to HULL -50% and combines with the damage markers to determine whether the Borg Ship dilemma is destroyed.

The Borg Ship dilemma attacks Borg-affiliation cards normally. It is not a ship and is not affected by cards that affect ships (such as Calamarain, Q-Net, Wormholes, etc.) or by Plasma Fire, Warp Core Breach, Isabella, Into

The Breach, or the first function of Anti-Matter Spread. See **Hugh**.

Borg subcommand icons – See **Borg**.

Borg Tactical Cube – This ship is a "Borg cube" (for cards such as Commandeer Ship or Harness Particle 010) but may not be downloaded by Retask (which downloads the ship named ❖ Borg Cube).

Borg Use Only icon [BO] – A card bearing this icon in its title bar can be stocked in your deck and used only when **playing Borg**.

Borg Vinculum – See **skill-sharing**.

bottom seed card – The bottom seed card at a mission is the card on the bottom of the mission stack (the first card you would encounter if attempting the mission).

Brain Drain – See **showing your cards**.

Brainwash – This event does not change a captive's affiliation, but makes it **compatible** with your personnel and removes *all* affiliation-based restrictions on using the Brainwashed personnel as your own. (See **capturing**.) Examples:

- Galen will work with the Federation if Brainwashed, or with a Brainwashed Federation personnel (even if not Brainwashed himself).
- A Brainwashed captive in your crew or Away Team does not add affiliation-based attack restrictions (e.g., a Brainwashed Federation captive will not prevent your Klingons from initiating battle).
- A non-Borg captive Brainwashed by the Borg is not assimilated and thus may not share skills or scout, but may attempt missions of his affiliation (the Borg may not join the mission attempt and the Borg player may not score the mission points). The captive's skills may be used for other purposes, such as using SCIENCE to enhance SHIELDS with Metaphasic Shields.
- A Borg captive, Brainwashed by a non-Borg captor, will work with that affiliation, but may not join mission attempts. The captive's skills may be used in other ways, such as using Transporter Skill to nullify an Anti-Matter Pod. A Brainwashed Talon Drone could assimilate an opposing personnel stunned in battle (it would immediately be placed under house arrest or would become a separate Away Team).

Breen CRM114 – This Equipment card may report wherever your Breen or arms dealer is present, and *only* where your Breen or arms dealer is present, even when reporting by using another card (e.g., Devidian Door, Security Office). A Breen or arms dealer need not be present to acquire a Breen CRM114 seeded at Search for Weapons.

Using this disruptor to damage a planet facility or landed ship is a special kind of attack (battle), requiring a leader in the Away Team and subject to all normal attack restrictions. The attack automatically succeeds; place one **damage** marker on the target from your **Battle Bridge side deck** (no damage is applied if you aren't using the side deck). Cards involved in the attack are "stopped" and your opponent is allowed to counter-attack there normally. See **once per turn**.

B'Rel – See **affiliation and ship origin**.

brig – See **capturing**.

Brun't's Shuttle – See **report with crew**.

Build Interplexing Beacon – See **Stop First Contact**.

Bynars card – A "Bynars card" is any card with "Bynars" in its title. See **any, card titles**.

Caithlin Dar – See **Release This Pain**.

Calamarain – This event's owner moves it in the same way as he would move a ship, but it is not a ship, is not affected by cards that affect ships, such as Q-Nets or Wormholes, and cannot move through the Bajoran

Wormhole. Discard the event after either use (damaging a ship or killing Mortal Q). Calamarain cannot damage a cloaked or phased ship. See **cloaking and phasing, Explore Interstellar Matter**.

This event may not cause damage that will destroy a ship. When used with a Battle Bridge side deck, it causes *default damage*. Draw the two **damage** markers from your side deck, one at a time, and place each one on the ship unless it would destroy that ship (in which case discard that damage marker instead).

cancel – Act of preventing an action (such as a card play or a battle) from having its result. Any costs paid to initiate that action remain paid. When you cancel an action that was limited to once per turn, that action may not be initiated again during that turn. See **nullify**.

Captain Kirk – This personnel's special skill, "May initiate battle against non-[Fed]," allows *only his* ship to initiate battle. Your other Federation ships (or ships with any Federation crew) present may not participate in that battle. (He may also lead an Away Team or crew in personnel battle.) See **battle – affiliation restrictions**.

Captain Proton cards – Several cards in the Holodeck Adventures set represent people and things from Tom Paris' hologram based on the 1930s sci-fi serial, *The Adventures of Captain Proton*. Like the world of Captain Proton itself, these cards are entirely in black-and-white. Any icons appearing on them should be treated as normal, color versions of those icons. Thus, Captain Proton is treated as a normal, Non-Aligned personnel; also, if you are probing for Omega Directive and reveal him as your probe card, his special download icon triggers the "Threat eliminated" outcome.

Captain's Log – Errata:

Plays on table. ~~Any of your personnel aboard a ship he or she commanded or captained (as referenced in ship lore) raises SHIELDS +3 and WEAPONS +3. (Not cumulative.) Each of your ships with its matching commander aboard is WEAPONS and SHIELDS +3. (Captain's Order.)~~

See **matching commander**.

Captain's Order – In addition to the cards marked with this phrase, Captain's Log, Lower Decks, Yellow Alert, and Senior Staff Meeting are also Captain's Order cards. You need not have Ready Room Door or Commander's Office (which list this definition) in play for these cards to be Captain's Orders and downloadable by James T. Kirk.

Red Alert is *not* a Captain's Order.

captives – Personnel who are "held" by a dilemma are not captives. See **capturing**.

capturing – Some cards and rules allow you to capture your opponent's personnel (never a personnel you control). Captives are **disabled** (unless a card such as Brainwash specifies otherwise). The captives are *escorted* by your personnel as follows:

- Upon capture, captives are immediately relocated to one of your crews or Away Teams at that location, if possible (to the specific crew or Away Team making the capture, if any, such as when using Ilon Tandro or Captured).
- Otherwise, the capturing card remains in play and serves as a temporary "trap" to hold the captives on your side of that location until your personnel can arrive to take them into custody. (If there is a planet at that location, the trap is on the planet.) Your ship with transporters (in space) or your Away Team (on a planet) can subsequently take custody of the captives if present with the trap, then discard the trap card.

Each of your crews and Away Teams may escort any number of captives, and may move them like Equipment cards.

At any given time a captive can be in one of three conditions: (1) *held* by a trap, in a Brig, or by escorting personnel, (2) *Brainwashed*, or (3) left *unattended*. You may change the captive's condition during your turn.

A trap card placed on a captive is not **in play**; it is a marker of captive status and can no longer be nullified. For example, you may nullify Mandarin Bailiff with Q2 or Q-Flash when it is encountered (after the captive is selected but before placing the card on it as a trap), but not later.

You may not initiate battle against personnel you have captured, unless a card allows or requires it. See **White Deprivation**.

All captured cards are returned to their owner at the end of the game.

Brigs – Some cards allow you to add a Brig to a ship or facility. While you control the ship or facility, you may move captured personnel into and out of the Brig during your turn (while in the Brig they are *held* but not *escorted*). If your opponent commandeers or assimilates the ship or facility, his personnel may subsequently release any of his other personnel held captive in the Brig (if present).

Rescue – Captives that are *held* or *Brainwashed* may be rescued only by using a card that specifically rescues or releases captives (such as *Rescue Captives*, *His Honor The High Sheriff of Nottingham*, or *Prisoner Exchange*). *Unattended* captives, however, are conceptually “tied up and left behind” and thus may be rescued by their owner's other personnel present, without any special card. Whenever a captive is rescued or released, all **capturing-related cards** played on that captive are discarded.

capturing-related card – This phrase, used on *Prepare the Prisoner*, includes any card that

- captures personnel or prevents their capture;
- specifically affects captives or allows them to be used in any way;
- has an effect when a captive is taken or escorted; or
- downloads, nullifies, or modifies another capturing-related card (specified by title).

Examples of capturing-related cards include *Thine Own Self*, *Ilon Tandro*, *Wolf*, *Brainwash*, *Rescue Captives*, *Impersonate Captive*, *Holding Cell Door*, *Fajo's Gallery*, *Gul Madred*, and *Madred*.

card draw – A *card draw* refers to any card drawn from your draw deck (or from your discard pile, if using *Carlos's* skill; but not from a **side deck**), either as the player's end-of-turn draw(s) or through the use of a card that specifies that you “draw cards,” such as *Kivas Fajo* – Collector. (Cards chosen from your deck using a *Betazoid Gift Box* are not “drawn.”) Each card draw is a separate action.

An action that is “in place of one card draw” may replace any card draw. Unless the action is explicitly restricted to once per turn, you may replace as many card draws as you are entitled to. For example, downloads with the *Borg Queen's* special skill may replace any or all of the three card draws from *Kivas Fajo* – Collector. The replacement action must be performed at the time you would normally make that card draw.

You may perform as many actions as you like each turn that have the restriction “draw no cards this turn” (e.g., playing a *Q's* Tent, downloading with *Ops*). You may not then draw any more cards for the remainder of the turn, by any means (normal card draw, *Kivas Fajo* – Collector, *Masaka Transformations*, etc.), or use an ability (such as the *Borg Queen's* special skill) that allows you to perform an action in place of a card draw.

However, if the first action you perform imposing a restriction of “draw no cards this turn” triggers a “just” action or valid response of drawing a card, the “just” action or valid response occurs before the restriction takes effect. See **turn, actions** – “just”

card play – A *card play* refers to any card played by any means (normal card play for the turn, normal interrupt or doorway play, a card played “for free,” downloaded into play, *Devidian Door*, etc.), except those “drawn” from a **side deck** (such as a *Tactic* card drawn from a *Battle Bridge* side deck). Card plays are of two types: **Personnel**, **Ship**, **Equipment**, and **Tribble** cards **report** (for duty), while all other card types are simply “played.” See entries for specific card types for details of playing that card type.

Your *normal card play* is defined as the one card play you are allowed each turn by rule. Although optional, this must take place before **executing orders**. Interrupts and doorways do not use up (or count as) your normal card play. All other playable card types use your normal card play unless otherwise specified, or unless brought into play via a mechanism such as **downloading** or as the direct result of playing an interrupt or doorway (such as *Barzan Wormhole*). If you are allowed to report a card using ongoing game text of a card that remains in play, such as *Caretaker's Array*, then that report uses your normal card play (unless otherwise specified).

Cards are always played face up, unless they have a **hidden agenda** icon. Except when playing a hidden agenda card, announce the name of the card when you put it into play. Your opponent may examine any card that you play face up at the time of play, but not later unless allowed by a rule or card. (See **showing your cards**.)

An action that is “in place of your normal card play” must be performed when you would make your normal card play. Such an action may be a *group action* with several sub-actions; interrupts may not be played between those sub-actions. See **actions** – **group**. Only one such “replacement” action may be performed each turn. For example, two *Spacedoors* will not allow you to download two ships.

card titles – Cards (other than **Personnel** and **Ship** cards) are grouped together in terms of their interactions with other cards by their card titles.

A *card title group* consists of a card with a basic card title, plus one or more cards with the same basic card title followed by a colon or dash and an additional phrase. (Cards such as “HQ:” cards also form a card title group, even though there is no card named “HQ:”) When a card refers to the basic card title of a card title group (e.g., nullifies it, downloads it, is immune to it, plays on it), it applies to *all* cards in that card title group. Examples:

- *Calamarain* is immune to both *Kevin Uxbridge* and *Kevin Uxbridge: Convergence*.
- *Incoming Message: Attack Authorization* and *Incoming Message* – *Federation* are both nullified by *Subspace Interference*.
- *Bajoran Wormhole* and *Bajoran Wormhole: Mirror Universe* may both be downloaded by *Ultimatum* or *The Emissary*.

If one card title includes another, but they are not differentiated by a colon or dash, those cards do *not* form a card title group.

Examples:

- *Neela* cannot download *Bajoran Phaser Rifle*.
- *Long-Range Scan* cannot be used to initiate battle at *Nebula*.

Sometimes a card or rule will refer to the titles (or part of the titles) of cards that are not part of a card title group. These references are preceded by the word “a”, “an”, “any”, or “one”,

or are followed by the name of a card type or by the word “card.” Examples:

- *Open Diplomatic Relations* may retrieve either *Organian Peace Treaty* or any “Treaty:” card, such as *Treaty: Federation/Romulan*.
- *Orb of Time* and *Mysterious Orb* are both “Orb artifacts”.
- *Yint* may download any **Equipment** card with “Disruptor Rifle” in its title (*Klingon Disruptor Rifle*, etc.).
- *Disrupt Alliance* may download either *Emblem of the Empire* or *Emblem of the Alliance*.

Personnel and **Ship** cards do not belong to card title groups; they are covered by the **persona** rule. A **Personnel** card is never grouped with a non-**Personnel** card. For example, *Jovis* cannot download *Kivas Fajo* – Collector. See “any”.

Words in lowercase (e.g., “disruptor”) are not necessarily references to card titles; they refer to any card with those **characteristics**.

card types – The current card types are **Artifact**, **Doorway**, **Dilemma**, **Equipment**, **Event**, **Facility**, **Incident**, **Interrupt**, **Mission**, **Objective**, **Personnel**, **Ship**, **Site**, **Tactic**, **Time Location**, **Tribble**, and **Trouble**.

The following are *not* separate card types: cards of different affiliations; **Outpost**, **Station**, and **Headquarters** (all are **Facility** cards); **Q**-icon cards (a **Q**-icon dilemma is a **Dilemma** card, etc.); **Mission II** (**Mission** cards); and **Combo dilemmas** (**Dilemma** cards).

A card that says it is “played as” or “used as” another card type counts as both card types for all purposes. (But a card that “seeds like” a dilemma does *not* count as a dilemma, and a card that is “moved like” equipment or a ship does not count as an **Equipment** or **Ship** card.) For example, an artifact that plays as an **Event** card can be nullified by *Kevin Uxbridge: Convergence*. An artifact that is used as an **Equipment** card may be stolen by a *Procurement Drone*, discarded to satisfy *Rebel Encounter*, or (if reclaimed from discard pile with *Reclamation*) reported in any way that an **Equipment** card may be reported. Artifacts must still be earned legally before use.

Cardassian – An **affiliation** and a **species**. See **affiliation** and **species**.

Caretaker's Array – This incident allows a ship to relocate here from *any* **Badlands Region** location in any quadrant. It allows *any* ship with fewer than four staffing icons to **report with crew** here, regardless of the native quadrant of the ship or crew members (but you may not disregard [AU] icons or ship text restricting where it may **report**). Reporting with crew uses your normal **card play** and may not be combined with other reporting mechanisms (e.g., the *Delta Flyer* may not report with crew for free aboard your *Voyager* at the *Caretaker's Array*). The ship may not report landed, but may report docked at your compatible outpost there.

Cargo Bay – You begin a *cargo run* (as described on this site) when one or more of your personnel aboard a facility pick up one or more **Equipment** cards aboard that facility and carry them directly aboard your ship at the same location. You must announce the run and show your opponent which personnel and equipment are involved (but you do not have to specify now which personnel, equipment, or **Cargo Bay** you will use to complete it). When that ship arrives at a different facility any number of turns later, any of those same personnel who has been a member of the ship's crew since the run was announced may carry any of those equipment cards directly to the **Cargo Bay** to complete the cargo run.

You may not begin or complete a cargo run by beaming a crew member with equipment between universes with a **Multidimensional**

Transport Device, or by beaming them aboard a ship with Invasive Transporters and then to Cargo Bay. You may not complete a cargo run begun by your opponent (e.g. if you take control of the ship with Neural Servo Device).

Your ship can take any path from the starting facility to the ending facility, giving you credit for each mission passed (except starting and ending locations). You may count each mission only once per cargo run. See **passing locations**.

While you may have multiple ships making cargo runs concurrently, a single ship's crew can complete only one at a time, earning card draws or Latinum downloads for only one piece of equipment. To deliver any additional equipment, a crew must begin a new cargo run.

See **report**.

Cargo Rendezvous – Revised text:

*ENGINEER + Physics + INTEGRITY>30
OR Greed + Treachery + CUNNING>32*

cargo run – See **Cargo Bay**.

Carlos – This personnel's special skill has no effect on probing or any other function that involves the draw deck, other than drawing cards.

carried ships – One ship may not be carried aboard another ship unless a card, such as Engage Shuttle Operations or Borg Sphere, allows it. If the "mother ship" is destroyed, any ship it carries is also destroyed. If a carried ship is destroyed, the "mother ship" is damaged.

Game text that allows you to launch carried ships also allows you to load or recover such ships. For example, Engage Shuttle Operations allows you to launch shuttlecraft from, and re-load them aboard, your ships with Tractor Beam and ENGINEER. Launching and loading require full staffing (see **movement**).

Personnel aboard a carried ship are also part of the crew of the carrying ship, or are intruders if the carrying ship is controlled by a different player.

Cards that may not target **docked ships** also may not target carried ships.

If you launch a carried ship into space from a landed ship, it counts as both launching and taking off; reloading a ship aboard a landed ship counts as both reloading and landing. For example, to launch the Delta Flyer from your landed U.S.S. Voyager, you must have a card such as Blue Alert to allow it to take off, using 2 RANGE.

Cha'Joh – See **multi-affiliation cards, affiliation and ship origin**.

Chamber of Ministers – The text "A Nor may coexist here" on this facility overrides the normal rule that you may not establish more than one facility at a location. However, Chamber of Ministers is not required in order to seed Deep Space 9/Terok Nor at Bajor. "A Nor" is a reference to the type of station (allowing Deep Space 9 or Terok Nor to seed there), not to the card named "Nor," which may not be established at a Bajor region location. This facility can play (but not seed) on the Mirror Universe Bajor. No cards may **report** there because the facility is not in its native quadrant.

chameloid – See **shape-shifter**.

changeling – A species. All changelings are **shape-shifters**. (But not all shape-shifters are changelings.) See **assimilation** – **personnel**.

characteristics – Personnel, Ship, and Equipment cards have game-relevant features called characteristics (e.g., human, female, admiral, leader, shuttlecraft, Jem'Hadar ship, disruptor). Some characteristics (**species, gender, ship origin**) are determined from a combination of affiliation, appearance (card image), and lore. Others are defined by a rule

or card text, based on skills or other features of the card (e.g., a leader is any personnel with OFFICER or Leadership). However, many characteristics, especially ranks and titles, are printed on the cards, usually in the card title, ship class, or lore. For example:

- The characteristic "admiral" is found in Admiral McCoy's card title and Norah Satie's lore.
- The characteristic "Nagus" is found in Krax's special skill.
- The characteristic "shuttlecraft" is found in the class of Quark's Treasure and Romulan Shuttle, and in the lore of Type 18 Shuttlepod.
- The characteristic "Jem'Hadar ship" is found in the card title of Jem'Hadar Attack Ship and the lore of Stolen Attack Ship.
- The characteristic "disruptor" is found in the title of Romulan Disruptor Rifle and the lore of Breen CRM114.

Context determines whether a word actually defines a characteristic or not. For example, the phrase "Uses the same hull as the Cardassian shuttlecraft" in the lore of Patrol Ship does not make this ship a shuttlecraft.

A personnel may be identified in its card title or lore as currently or formerly having a characteristic. A title with the prefix "vice" counts as that title. For example, Alynna Nechayev ("Vice-Admiral") counts as an Admiral for Going to the Top or Office of the President; Bok ("former Ferengi DaiMon") is enhanced by Calandra.

Information on other cards (such as a Ship card) may not be used to define a characteristic for a personnel (except for **matching commander**, which may use information from either the personnel or ship lore). Thus Alidar Jarok ("Conscientious admiral...") may report for free to the Office of the Proconsul, but not Mendak, who is not identified in his card title or lore as an admiral (although the *Devoras* identifies him as Admiral Mendak).

The presence in lore of a word or phrase that is the name of a skill is not a characteristic and does not confer that skill on a personnel. For example, Jaron ("former member of the Tal Shiar") does not have Tal Shiar skill and is not a "Tal Shiar personnel" (e.g., for Continuing Committee).

Characterize Neutrino Emissions – You may seed any number of *different* Orb artifacts (no duplicates) under this mission, regardless of whether the artifacts may normally be seeded in space, in place of the single artifact normally allowed at a mission.

Chief O'Brien – See **once per turn**.

Children of Light – This incident allows you to capture your opponent's [Holo] personnel present with *your* Iden (or aboard a damaged ship at his location).

Chinese Finger Puzzle – Revised text:

If android present, crew or Away Team is stopped until end of turn and androids are stopped for X full turns, where X = number of androids present. Discard dilemma.

Chula: The Abyss – If more than one Quark's Bar is in play, the player encountering this dilemma chooses which one to relocate his personnel to.

Chula: The Chandra – For a personnel to continue past this dilemma, at least one attribute number must match the *same* attribute on the randomly selected personnel (e.g., INTEGRITY must match INTEGRITY). Apply all relevant **attribute modifiers**. See **dual-personnel cards**.

Chula: The Way Home – If more than one Quark's Bar is in play, the opponent of the player encountering this dilemma chooses which one to relocate the personnel to.

Chula: Trickery – For this dilemma, your opponent "recites [the personnel's] attribute

numbers" by reading the printed attributes off the card, in order (INTEGRITY, CUNNING, STRENGTH), without applying modifiers. Attributes of dual-personnel cards are not added together, but are read as printed, for example, 3+3, 8+8, 5+5.

Clan People – Revised text:

To get past, must have Kai Opaka present OR CUNNING>38 from up to five Away Team members.

clarifications – See **revised text**.

class – See **ship class**.

Classic Communicator – The skill added by a personnel with this Equipment card is retained only while that personnel is present with the communicator and the personnel from whom the skill was added remains at the same location, or until you re-select the skill. See **skills** – **modifying**.

Because this card is not **cumulative**, you may not use two copies to add two skills to the same personnel, but you may use two copies to add a skill (the same or different) to two different personnel (even in the same crew or Away Team).

Classic Films icon [CF] – This icon (formerly known as the Excelsior icon) appears on personnel and ships from the "Classic Films" era of the late 23rd century. It is used as a special **ship staffing** icon and for other purposes defined on various cards.

Classic Medical Tricorder – This Equipment card works like the **Classic Tricorder**.

Classic Tricorder – When this Equipment card joins your crew or Away Team, select which skill the [OS] ENGINEER- and SCIENCE-classification personnel present add. They retain that skill until they are no longer present with the tricorder, or until you re-select the skill added by that tricorder (see **skills** – **modifying**). If more personnel of appropriate classification join the crew or Away Team, they add the same skill already selected.

Because this card is not **cumulative**, you may not use two copies to add two skills to the same personnel. If you combine two personnel groups, each with a skill added from a Classic Tricorder, choose one tricorder to add its selected skill to all applicable personnel.

classification – A personnel's classification is found only in their classification box. A **personnel type** such as MEDICAL in the skills box is a skill, not a classification. A card referring to "MEDICAL-classification personnel" refers *only* to personnel who have MEDICAL in their classification box. Borg personnel have no classification. See **skills**.

cloaking and phasing – A ship may cloak or phase if it has a Cloaking Device or Phasing Cloak (either in its game text or added by another card). To cloak or phase a ship, turn the Ship card face down; to decloak or dephase, turn it face up. You may cloak, decloak, phase, or dephase your ship only during your own turn, unless a card allows otherwise, and only if it is not "stopped." A ship may perform only one cloaking, decloaking, phasing, or dephasing action each turn and it may not be cloaked and phased at the same time. A ship may not enter play cloaked or phased.

Cloaking and phasing are different game conditions. Cards that specifically affect cloaked ships, such as Tachyon Detection Grid, La Forge Maneuver, T'Rul, and the Tachyon Drone, do not affect phased ships. Engage Cloak specifically states that it applies to both cloaking and phasing.

A cloaked or phased ship is invisible; in addition, a phased ship is "out of phase" with the universe and thus can fly through planets and other obstructions and cannot interact in any way with the rest of the universe. While phased, the ship receives a RANGE

enhancement as indicated on the card providing the phasing ability.

A cloaked or phased ship (and its crew) cannot be affected by any external action that would require that a lifeform could see or sense the ship. For example, the ship may not be attacked, boarded (e.g., with Invasive Beam-In), or targeted with Establish Tractor Lock, Long-Range Scan, Romulan Ambush, Rogue Borg, or Isabella; a crew member may not be targeted by Protection Racket (unless the threatening Ferengi is aboard the ship); the Tantalus Field on a cloaked ship may not be used to kill a personnel outside that ship.

A cloaked ship can be affected by cards representing external cosmic phenomena, spontaneous events, or inanimate objects that are independent of the visibility of the ship. For example, a cloaked ship may not pass through a Q-Net and may be damaged by Stellar Flare or Anti-Matter Pod, destroyed by Supernova or Black Hole, disappear into a Temporal Rift, or be returned to hand with a Space-Time Portal. However, a phased ship is *not* affected by any external phenomena such as these. Both phased and cloaked ships are vulnerable to global effects caused by changes in the timeline, such as Anti-Time Anomaly and Stop First Contact. A cloaked or phased ship may also receive communications that do not depend on the visibility of the ship (e.g., an Incoming Message).

A cloaked ship may execute all normal movements, including docking, undocking, landing, taking off, launching, and loading, using RANGE, Wormholes, Transwarp Network Gateways, or Bajoran Wormhole. A phased ship may move only by using RANGE; for example, it may not move through the Bajoran Wormhole. A phased ship may not dock, land, or load; if it phases while docked, landed, or carried, it “passes through” the ship or planet and ends up in space. Your opponent may verify the RANGE of your cloaked or phased ship.

A cloaked or phased ship, and its crew, may not affect anything external to the ship. Thus, it may not initiate battle, attempt or scout a mission, allow probing for an objective with an external target (e.g., Assimilate Planet, Establish Gateway), provide opposition for Patrol Neutral Zone or a ship presence to maintain Post Garrison, prevent your opponent from passing Quantum Fissure, play Hail on a passing ship, use a tractor beam, or load or unload personnel or equipment (either by beaming or by walking on or off while docked at a facility) or a carried ship; a Borg crew may not share skills with other Borg not aboard. It may scan a mission, because the scan does not affect the mission.

A cloaked or phased ship is affected normally by cards or actions that are internal to the ship. For example, Plasma Fire and Auto-Destruct Sequence may be played on a cloaked or phased ship, and you may probe to complete Assimilate Counterpart if the target is on an Assimilation Table aboard the ship. Also, cards may report to a cloaked or phased ship (when reporting is allowed by a card such as Ready Room Door, Borg Cube, The Emissary, Dr. Telek R'Mor, Assign Support Personnel, etc).

Unless otherwise specified here, any Glossary reference to cloaking applies to phasing as well.

cloaking device – When engaged, this special equipment makes a ship invisible and invulnerable to attack. See **cloaking and phasing**.

Clone Machine – This incident does not allow you to have more than one *version* of a **persona** in play at one time. Boreth is the premiere mission Investigate Disturbance. No mission at Mariposa exists yet.

Clown: Playing Doctor, The – See **skills** – First-listed skill.

Coalescent Organism – This dilemma can be passed on to *anyone* who is present at the end of the turn, regardless of ownership. The dilemma is played on the selected personnel. Discard it if the personnel dies alone or from some other cause.

collective – All of one player's [Borg] affiliation cards in play.

Colony – The Away Team must be “in” this facility to score points.

combo dilemma – A combo dilemma is a two-dilemma combination in one Dilemma card. (See **card type**.) Encountering a combo dilemma is like encountering two separate dilemmas: if you meet the conditions of the first half, you continue on to face the second half; if not, you place the card back under the mission and will have to face the first half again. However, some combo dilemmas with conditions say “not repeatable” in the first half; this phrase takes the place of “discard dilemma” and means that the first half is conceptually discarded after you face it; when you or your opponent encounter that same exact card on another attempt, the first half of the combo is skipped. If the first half has no conditions (e.g., Male's Love Interest), it is *always* conceptually discarded after it has its effect. See **dilemma resolution**.

Cards that specifically affect the first half of a combo dilemma do not automatically affect the second half. For example, if Male's Love Interest is replaced by Beware of Q, overridden by Jealous Amanda, discarded by Senior Staff Meeting, or nullified by Kareen Brianon, you still encounter the Tarellian Plague Ship half of the card. Similarly, if you fail to overcome Alien Parasites and your opponent uses your personnel to re-attempt the mission, they will begin by facing REM Fatigue Hallucinations. However, Mission Fatigue “stops” a personnel before each subsequent dilemma, so one personnel will be “stopped” before each half of the combo.

You may not legally seed a combo dilemma at the same location as either of the original dilemma cards on which it is based; the second one encountered would be a **misseed**. (See **copy**.) If the misseed is the first half of a combo dilemma, place it “conceptually” out-of-play while you encounter the second half, then place it physically out-of-play (instead of discarding it) once the second half has been resolved.

Commandeer Ship – The personnel who commandeers a ship with this objective may meet any three staffing icon requirements, whether he has those icons or not. For example, Christopher Hobson may commandeer the Decius and meet its entire staffing icon requirement of [Cmd][Stf][AU].

commandeering – When your opponent first establishes a facility or reports a ship, he controls it. (It is also controlled by the affiliation printed on the card.) You may subsequently commandeer that facility or ship using a card that allows commandeering. For example, you may commandeer a Nor by having any of your Computer Skill personnel **unopposed** at its Ops site, as stated in the Ops text (a Nor without an Ops site may not be commandeered). You may commandeer a ship using a card such as Commandeer Ship or Outgunned.

When you commandeer a ship or facility, it comes under your control, and its affiliation changes to match the affiliation of one of the non-ANIMAL commandeering personnel (your choice) in the Away Team (e.g., Ops or Commandeer Ship) or crew(s) (e.g., Outgunned). If you have no personnel at the location (e.g., A Fast Ship Would Be Nice), the ship's affiliation does not change until your personnel arrive to take custody of the ship. You do not take control of any opposing personnel or equipment aboard unless

otherwise specified by the card allowing you to commandeer.

You continue to maintain control of the facility or ship, even if you have no personnel aboard. However, your opponent may retake control by bringing unopposed Computer Skill to Ops, or by using a ship-commandeering card.

You may commandeer only cards which you do not control (including a Nor or ship that your Borg opponent assimilated from you), and only if a card allows it. (Borg may not commandeer a ship or facility; instead, they must use a card that allows them to assimilate it.) See **facility** – Control of facilities, **Empok Nor, docking, actions** – required.

Commander Data – This personnel is an **android**.

compatible – Your cards of different affiliations may mix and work together only if they are *compatible*.

- Cards with the same affiliation icon are compatible with each other.
- Non-Aligned and Neutral cards are compatible with *all* affiliations except Borg.
- Borg cards are not compatible with *any* other affiliation.
- If a card allows cards of different affiliations to “mix” (or “mix and cooperate”), it makes those cards compatible with each other. Some cards that make different affiliations compatible are Treaty cards, Brainwash, Ferengi Trading Post (only while aboard), The Kazon Collective, Temporal Micro-Wormhole, and Memory Wipe (seeded).

Compatible personnel may mix in the same crew or Away Team and board compatible ships and facilities. Personnel and ships may report to compatible facilities. However, you must still have a personnel of **matching affiliation** when required by a card or rule.

Example: If you have a Treaty:

Romulan/Cardassian in play, your Romulan, Cardassian, and Non-Aligned cards are compatible with your Cardassian Outpost, with Central Command, and with a Cardassian Nor, but your Klingon cards are not. Only your Cardassian cards match the facilities.

- Your Romulan and Non-Aligned cards may report to your Cardassian Outpost, to Central Command, or to a Cardassian Nor (but may not be downloaded using the Ops text, which requires a matching affiliation).
- Your Romulan and Non-Aligned personnel may supply staffing icons for your [Car] ship, if at least one [Car] personnel is aboard (see **ship staffing**).
- You may attempt a mission using a mixed Romulan/Cardassian/Non-Aligned crew or Away Team as long as at least one personnel matches one of the mission's affiliation icons.
- Your Romulan forces may assist your Cardassian forces in battle, but your Klingon forces may not.

If a card allowing compatibility is nullified or destroyed, incompatible personnel aboard a ship or facility are placed under **house arrest**. If a mixed Away Team is on a planet, the incompatible personnel form a separate Away Team and cannot return to the ship.

The text **does not work with** means the cards are incompatible.

Compromised Mission – You may attempt this **mission** with a crew containing a personnel of the affiliation matching an icon on the end facing you.

Computer Crash – You may activate this **hidden agenda** event as a response to an attempt to play a Q's Tent or a card requiring downloading (e.g., Activate Subcommands), or an attempt to download a card (e.g., by using the Borg Queen's skill or any special download icon), but not during the seed phase. The Q's Tent or card requiring

downloading becomes an illegal card play and returns to the owner's hand; an attempted download is simply aborted (and does not use up any resource). See **actions – step 2: responses**.

If you initiate the play of a multi-function card such as *Bajoran Civil War*, and select a function that requires a download, it may be responded to by the activation of this event. The card returns to your hand; you may then play it for its other function, but you are not required to do so.

A card may allow but not require downloading, and thus may be played despite *Computer Crash*. For example, if *Computer Crash* is activated in response to an attempted download with *Assign Mission Specialists*, the download is prevented, but the card remains in play.

You may not suspend the activation of this event by using a special download icon.

Construct Depot – This mission may not be attempted or scouted by the opponent. You may not download a Remote Supply Depot if you already have a facility at this mission location.

Construct Starship – This objective allows you to download a facility only if it has text allowing it to play (or be built). For example, *Husnock Outpost* cannot be downloaded because it may only be seeded.

Containment Field – If this incident is discarded or placed beneath the draw deck using Q the Referee, any cards stacked on it are likewise discarded or placed beneath their owners' draw decks. See **Devidian Door**.

Activating this incident will nullify a *Destroy Radioactive Garbage Scow* that is already in play on a mission. The mission's point value is restored (even if it has already been solved) and the owner of the *Destroy Radioactive Garbage Scow* places the interrupt in his bonus point area to score –10 points.

control – Some cards allow you to take control of an opponent's cards permanently (by capturing, commandeering, assimilating, or stealing) or temporarily. (All controlled cards are returned to their owners at the end of the game.)

If you control your opponent's ship, any cards "played on" or "placed on" the ship (such as *Kurlan Naikos* or *Cytherians*) come under your control also. Cards that are *aboard* the ship (personnel, equipment, carried ships) do not come under your control unless specifically stated by the card or rule giving you control. If you control your opponent's personnel, any cards "played on" or "placed on" the personnel (such as *Ocular Implants* or *Mobile Holo-emitter*) come under your control.

Only your own treaties, ship enhancement cards, etc. apply to the controlled cards. Thus, your *Bynars Weapons Enhancement* would increase the ship's WEAPONS, while your opponent's *Metaphasic Shields* would not increase its SHIELDS.

Temporary control – When you temporarily control a ship and crew with a card such as **Alien Parasites** or *Neural Servo Device*, treat the ship and personnel as if they were your own with regard to attempting missions, encountering dilemmas and Q-Flashes, scoring points, playing cards that play on "your ship" (such as *Auto-Destruct Sequence*), etc. The only exception is that you may not bring the personnel aboard one of your ships or facilities and you may not bring your personnel aboard their ship.

You may use only "legal moves" – e.g., the ship and crew must still obey affiliation attack restrictions and *Borg Away Team* restrictions, may attempt only missions of appropriate affiliation, etc. Within those constraints, you may move the ship, abandon personnel on planets, engage in battle, attempt missions (if

you solve a mission, you score its points unless playing *Borg*), etc.

Conundrum – When you fail to overcome this dilemma, your ship and crew are "stopped" and you must immediately target one of your opponent's ships. (If there is no valid target, the dilemma is immediately discarded without effect and your cards are not "stopped.") Once "unstopped," the ship and crew must chase and attack that target. This is a *required action* (see **actions – required**), and must be carried out alone; your other ships at the location may not join the battle.

Cloaked, phased, or landed ships, or ships in a *Temporal Rift* or *Time Travel Pod* are invalid targets. You may change targets at any time. If the selected target at any time becomes invalid or leaves play, you must target a different ship. If at any time there are no valid targets in play, the dilemma is discarded. Moving to a different spaceline or to a time location does not invalidate the target. Once you have attacked a target ship, the dilemma is "cured" and discarded.

cooperate – See **mix**.

copy – A copy (or *duplicate*) of a card is defined by its card title and, for personnel and ships, its game text. Different images, copyright dates, lore, expansion icons, affiliation border colors, or property logos do not affect whether cards are copies.

Personnel and ships: Two Personnel or Ship cards are copies of each other if their card titles and game text are the same (taking into account revised titles and game text of reprinted cards). Examples of copies:

- *Alyssa Ogawa (First Contact)* is a copy of *Alyssa Ogawa (Trouble With Tribbles starter deck reprint with a tibble in the card image)*. *Alyssa Ogawa (Premiere)* is not a copy of this card because her game text is different (they are two versions of the same **persona**).
- *Quark Son of Keldar (First Anthology preview)* is a copy of *Quark Son of Keldar (Blaze of Glory reprint)* despite a minor rewording of his game text and the *Blaze of Glory* expansion icon.
- *Tasha Yar – Alternate (Alternate Universe)* is a copy of *Tasha Yar – Alternate (Reflections foil)*. Her special skill was changed by errata.
- *Lwaxanna Troi (Premiere alpha printing)* is a copy of *Lwaxanna Troi (Premiere beta printing)*.
- *B'Elanna Torres (blue Federation border)* is a copy of *B'Elanna Torres (gold Non-Aligned border)*. See **multi-affiliation cards**.

Other cards: Other than personnel and ships, two cards are copies of each other if their card titles are the same (taking into account revised titles of reprinted cards). Also, each half of a **combo dilemma** is considered a copy of the original dilemma on which it was based (the "card title" included in its game text). Examples of copies:

- *Radioactive Garbage Scow (Premiere)* is a copy of *Radioactive Garbage Scow (Voyager)* and of the *Radioactive Garbage Scow* half of *Female's Love Interest & Garbage Scow*. You may not seed more than one of these under one mission; your *Borg* could Adapt to any of them after encountering any version.
- *Medical Kit (Premiere)* is a copy of *Medical Kit (Voyager)*. You may not use a copy of each to add two MEDICAL skills to your OFFICER.
- *Ready Room Door (First Contact)* is a copy of *Ready Room Door (Voyager)*. You may not play both during one turn.
- ♦ *Klingon Outpost (Trouble With Tribbles starter deck reprint)* is a copy of the *Outpost* card titled "Klingon" (Premiere). The card titles of most outposts have been revised. You may seed only one.

corresponding – The corresponding spaceline location for a time location is the mission with the same location in its lore. For example, the mission *Agricultural Assessment (Sherman's Planet)* corresponds to the time location *Sherman's Peak (2267 Sherman's Planet)*.

A corresponding location or region in an "opposite quadrant" is a location or region with the same name. For example, *Bajor* in the normal universe (Alpha Quadrant) corresponds to *Bajor* in the mirror universe (Mirror Quadrant).

Council of Warriors – This objective may not be nullified once it is relocated to your point area. Bringing a non-Klingon personnel into play by **persona** exchange, earning a *Cryosatellite*, or switching the affiliation of a multi-affiliation personnel is not "playing a non-Klingon personnel." See **card play, report, affiliation and species**.

countdown icon [1][2][3][4][X] – When your card with a countdown icon enters play (is played face up, activated, or encountered), it nullifies itself and is discarded at the end of the specified number of your turns (regardless of when it is played or activated or who encounters it). If the card enters play during your turn, it counts down at the end of that turn. For example, your card with a countdown of 3 nullifies itself at the end of your third turn. A convenient way to keep track of your countdown icons is to turn the card 90 degrees at the end of each of your turns.

counter-attack – See **battle**.

Countermanda – This interrupt is not an "Amanda Rogers card." See **card titles, discard pile**.

counterpart – A counterpart is a *Borg* personnel with "assimilated counterpart" in his lore, or a personnel assimilated with the objective *Assimilate Counterpart*. An "assimilated counterpart" may be used as a "matching counterpart" for the objective *Assimilate Homeworld*. However, when a card requires that a counterpart match the affiliation of a homeworld, it must also match the homeworld's universe. See **mirror universe**. A counterpart may not be downloaded or affected by cards that specify drones.

Your collective is limited to one counterpart in play at a time. Thus, if you have one counterpart in play, you may not play or assimilate another, and if you acquire another one (e.g., from a **Cryosatellite**), the second one must be discarded. A counterpart may be converted to a drone with **He Will Make an Excellent Drone**.

The assimilated counterparts are native to the Alpha or Gamma Quadrant and may not report to a *Borg Outpost* in any quadrant (see **facility, native quadrant**).

An assimilated counterpart's skill that enhances their ship's WEAPONS and SHIELDS +4 against their former affiliation works against any **force** that includes that affiliation. For example, *Locutus of Borg's* skill would enhance his ship against a *Non-Aligned* ship with some Federation crew or a mixed fleet of Federation and other ships under treaty.

counting cards – At any time, you may count the cards in your own hand. You may request that your opponent count his own hand and tell you the correct count. You may also count the seed cards under a mission and check their orientation to determine the owners.

Covert Installation – Revised text (lore):

Neutral Zone Region • Devora

crew – See **Away Team and crew**.

Crew Reassignment – The ship to which a personnel may report using this event must have the icon as one of its staffing icons. For example, [AU] personnel without an [OS] icon may not report to *Starship Enterprise (Trouble*

With Tribbles) using Crew Reassignment. See **ship staffing**.

Crisis – Because the ship at the location is not actually attempting the mission, the ship and crew are not “stopped” if this dilemma is not overcome. Only the attempting Away Team is “stopped.”

Crosis – See **Rogue Borg Mercenaries**.

Crossover – When this incident allows your [MQ] personnel to ignore their [MQ] icon when reporting, treat them as if they have no quadrant icon (i.e., as if native to the Alpha Quadrant). Thus they may report to a native Alpha Quadrant facility, or (if [AU][OS]) to Sherman’s Peak.

The incident is discarded only when you report a Multidimensional Transport Device as your normal card play and then download one of the listed personnel to that Device.

If you report Ezri without this incident in play, and immediately use her special download for Crossover, you cannot then use Crossover to download a Multi-Dimensional Transporter Device to Ezri because it is no longer “just after” she reported. See **actions** – “just”.

Cryosatellite – Revised text:

Seed at a space location. May seed one additional artifact and up to 3 [AU] personnel here. They are earned when Cryosatellite earned; then discard Cryosatellite.

All cards seeded with this **artifact** count as seed cards. They are seeded one at a time, not as a group. See **personnel** – **seeded**.

Crystalline Entity – This dilemma is an exception to the normal rule that dilemmas affect only the personnel in the crew that encounters the dilemma. It “kills all life on ship,” including tribbles, intruders, and personnel who are “stopped,” disabled, etc., and not participating in the mission or scouting attempt. (However, it does not kill personnel in **stasis**.)

If this dilemma is encountered after DNA Clues with **Lore** in play, 6 **MEDICAL** and 2 **SCIENCE** are required to pass the dilemma. See **dilemma resolution**.

cumulative – If a card is *cumulative*, multiple copies of the card can have the same effect on the same **target(s)** at the same time. Damage markers (Tactic cards) are cumulative, as are cards specifically marked “cumulative.” All other cards are *not cumulative*.

While you may have multiple copies of a non-cumulative card in play, they cannot have the same effect on the same targets at the same time. Also, multiple copies of a non-cumulative card “played” or “placed” on the same card may not have the same effect at the same time, even on different targets.

Targets may include cards (e.g., personnel, ships) or a player. An action (such as beaming, ship movement, a battle, or a mission attempt) is not a target.

Examples of *effects* include modifying skills, attributes, or mission or dilemma requirements; killing a personnel; damaging a ship; and generating benefits (such as card draws or points) for a player.

For purposes of cumulativity only, all end-of-turn actions (or start-of-turn actions) are considered to occur “at the same time.” Multiple responses to a single action (such as a battle) generally resolve one at a time, and thus are not restricted by cumulativity rules (unless they generate a continuing effect).

Cards that may be played or have effects “once per (each, every) turn” are covered by the “**once per turn**” rule.

Examples:

- HQ: War Room: Multiple copies may not enhance the attributes of the same personnel at the same time.
- Science Kit: Multiple copies may not add

multiple **SCIENCE** skills to the same personnel at the same time.

- Reflection Therapy: Multiple copies may not replace multiple skills on one personnel at the same time.
- Process Ore, Colony: You may not process ore at more than one Nor or score points at more than one Colony (start-of-turn actions) each turn. (The player is the target.)
- Telepathic Alien Kidnappers, The Traveler: Transcendence: Multiple copies of each card do not allow you to “guess” multiple cards or draw multiple extra cards (end-of-turn actions) each turn.
- Transwarp Conduit: This card generates a continuing effect (for the rest of the turn). A second copy played on the same ship while the first is still in effect will not quadruple its **RANGE**.
- Automated Security System, Dal’Rok, Establish Tractor Lock: If multiple copies are played or placed on the same Ops, mission, or ship, only one copy of each card can kill a personnel each turn or immobilize a ship, even if different targets are present.
- Fajo’s Gallery: Multiple copies will not generate additional card draws when you capture a unique personnel.
- REM Fatigue Hallucinations: If two copies on the same group of personnel are cured at the same time, only one will score points.
- Personnel: Multiple copies of the same personnel (whether universal or unique) may not score points for Colony, Ressian Flute, or Assign Mission Specialists, or extra points for missions such as Establish Settlement or A Good Day to Live, at the same time. (But they *may* be used to meet mission or dilemma requirements.)
- Romulan Disruptor: This card is marked “cumulative.” Each personnel present with three disruptors will be **STRENGTH +6**.
- Android Headlock, Antique Machine Gun, Barclay Transporter Phobia: The effects of multiple copies of each of these cards occur as separate actions (not at the same time) and have different targets, and are thus not restricted by cumulativity rules.
- Alas Poor Drone, Cybernetics Expertise, Borg Nanoprobes: Although these cards are not restricted by cumulativity, they have “**once per turn**” effects that are governed by that rule.

current objective – See **Borg, objective**.

Cyber Drone (Five of Eleven) – This personnel’s special skill only prevents Borg personnel from entering **stasis**, and cannot release them from **stasis** once established. For example, a Cyber Drone in a group of Borg relocated to an unsolved Qualor II Rendezvous would prevent them from entering **stasis**, but it cannot release them if brought there after the relocation.

It does not prevent ships from being placed in **stasis** (e.g., by the Quantum Singularity Lifeforms dilemma), though it can prevent the Borg personnel aboard from entering **stasis**.

Cybernetics – This skill no longer has a built-in function, but is utilized by the incident Cybernetics Expertise.

Cyrus Redblock – This personnel’s special skill includes dilemmas with variants such as “murdered” and “murderous” in title or lore (but not synonyms such as “assassinated”). See **actions** – **step 1: initiation**.

Cytherians – This dilemma represents a *moving required action*. When it is encountered, the mission or scouting attempt immediately ends. If Mission Debriefing is in play, the crew is “stopped” before they can use any remaining **RANGE** to move that turn. The dilemma does not relocate your ship; you must use normal ship **movement** to move to the far end of the **spaceline**. Once the far end of the spaceline is identified (i.e., right or left end), that destination does not change even if

the spaceline is rearranged with **Q**. See **actions** – **required, ties**.

Cytoplasmic Life-form – For this dilemma, “different personnel” may include multiple copies of a personnel. For example, a mission with requirements of Computer Skill x2 + Navigation would require three personnel to complete, and could be solved with three copies of Sam Lavelle. A “skill requirement” includes skills that are **personnel types**, such as **MEDICAL**.

Dabo – While you may have a copy of this incident in play on each of two Quark’s Bars, you may not get probe results using both copies at the end of a turn. See **cumulative, probing, Writ of Accountability**.

Dal’Rok – This dilemma is an exception to the rule that dilemmas affect only the personnel in the encountering crew or Away Team. Even at first encounter, *all* personnel at the location (including the opponent’s) must be checked for lowest total attributes. The total attributes >150 required to nullify the dilemma must be in one crew or Away Team. See **ties**.

damage – When you are using a **Battle Bridge side deck**, any damage to your opponent’s ships or facilities, whether from a hit in battle, dilemmas, or other causes, is indicated by damage markers, which are Tactic cards from your side deck. The damage results appear at the bottom of each Tactic card. See **battle** – **ship**.

Some damage results are immediate and have a one-time effect (such as killing a crew member or downloading a Warp Core Breach). Other damage results have an ongoing effect (such as reduced attributes or off-line transporters) as long as that damage marker is in play. Most damage markers also specify a reduction to **HULL** integrity. When a ship’s or facility’s **HULL** integrity is reduced to 0%, it is destroyed.

Multiple copies of the same damage marker are **cumulative**, including reductions to attributes and **HULL** integrity.

If your side deck is ever completely out of Tactic cards (because they are all in play as damage markers), you will be unable to further damage your opponent until some of your damage markers return to your side deck. You may not mix damage markers and rotation damage on your opponent’s ship.

Rotation damage – If you are *not* using a **Battle Bridge side deck**, any damage to your opponent’s ship (from a hit in battle or from a card such as a dilemma) is indicated by rotating the target 180 degrees to indicate that it is damaged, with these effects: **RANGE** is reduced to 5 (if it is already less than 5, it remains the same), **Cloaking Device** is off line, and **HULL** integrity is reduced by 50%. If you scored a direct hit in battle, **HULL** integrity is reduced by 100% and the target is thus immediately destroyed. If a ship with rotation damage is damaged again before it is repaired, the additional **HULL** integrity reduction of 50% also destroys the ship.

A ship is damaged (for dilemmas such as **Abandon Ship!**) if it has any damage markers on it (even if there is no **HULL** damage), or has received rotation damage. Reduction of attributes from other causes is not “damage.”

You may never substitute rotation damage for damage marker symbols (e.g., **Breen CRM1 14, HQ: Orbital Weapons Platform**). To use such symbols you must have a **Battle Bridge side deck**.

Off line – When a damage result indicates that something is *off line*, the affected item may not be used in any way as long as that damage marker is in play. **Attribute enhancements** being off line affects all enhancements to the specified attribute.

Default damage – When you are using a **Battle Bridge side deck**, sometimes your opponent’s ship or facility will be damaged

when you do not have a current tactic (such as when encountering a dilemma or during a battle in which you choose not to play a current tactic). Whenever this occurs, the default damage is two cards from your side deck, or four cards for a direct hit. (Default damage should not be confused with "card rotation" damage, which applies *only* when you are not using a Battle Bridge side deck.)

Order of damage results – In most cases, the sequence in which you apply damage results will not matter. Occasionally the order may be significant. In these cases, carry out immediate damage results first and check the HULL reduction last.

For example, suppose the HULL integrity of your opponent's ship has already been reduced by 80% when it is damaged again, and the two damage markers from your side deck each specify one casualty and HULL - 30%. If your opponent wants to play an Escape Pod, he must suffer both casualties first, so the Escape Pod saves only the remaining crew.

See **repair**.

Data's Body – This personnel counts as a seed card if "reported" at your outpost during the seed phase.

When your Data's Body is present with your Data's Head, you may declare them to be attached (or detached) as desired during your turn. See **disabled**. When attached, Data's Head is no longer treated as an artifact (and thus is immune to Disruptor Overload, for example); instead, the two cards together are used as a single Personnel card. If the combination is discarded, the two cards are no longer attached and Data's Head is again treated as an artifact. Like any other **artifact**, Data's Head must be earned before use.

Data's Head – See **Data's Body**.

Data's Medals – See **battle – personnel, battle – ship**.

Dathon – This personnel is the matching commander of the **Tama**. His special skill nullifies El-Adrel Creature and Shaka, When the Walls Fell.

David Marcus – This personnel's special skill allows you to ignore the text "If not playing [Fed]" on the **Genesis Device** if you place it on a planet you seeded.

D'deridex Advanced – This ship is considered D'deridex-class for any card that requires that class of ship, such as Romulan Ambush, unless otherwise specified. See **attribute enhancement, skills – using**.

deactivated – See **holographic personnel and equipment**.

Dead End – This dilemma is discarded only if the player first encountering it overcomes it by having at least 50 points. Otherwise, it is placed atop the mission and remains there permanently (unless nullified by Dropping In); you may re-attempt the mission if you have more than 50 points, but this does not nullify or discard the dilemma. Although it will "stop" a Borg scout on initial encounter, it does not prevent later scouting.

Dead in Bed – You choose the personnel in **stasis** to be killed when you play this interrupt.

Deanna Troi (First Contact) – This personnel must be part of the "stopped" Away Team to "unstop" them. For example, if two other personnel in her Away Team are "stopped" by Parallel Romance, they become a separate Away Team. She may not "unstop" them because she is not part of that Away Team. See **once per game**.

death – See **discarding**.

deck – There are two parts to every game deck: the **seed deck** and the **draw deck**. In addition, you may have one or more optional **side decks**.

Deep Space 9 – Deep Space 9 and Terok Nor are two versions of the same conceptual station, which is not duplicatable (see **unique and universal**). Thus, if a player seeds Deep Space 9 during the dilemma phase, his opponent may not seed Terok Nor during the facility phase; it is instead placed out-of-play. See **Chamber of Ministers**.

This station has no **matching commander**, which are defined only for ships.

Deep Space Station K-7 – Like all stations, this station has no built-in reporting, docking, or repair functions. No sites may play here. However, because this station is at a **time location**, compatible personnel and equipment native to the timeline may report aboard the station using the time location's reporting function.

default damage – See **damage**.

Defend Homeworld – When this objective allows a download of personnel and ships in response to battle, it is to a specific destination ("download there") and thus the cards may report anywhere at the location (e.g., personnel may report aboard ships), ignoring quadrants. However, a SECURITY personnel downloaded with the objective's final function must be reported to a facility or other place where that personnel may normally report, because no destination is specified. See **downloading**. If a facility or site provides the place for the downloaded SECURITY personnel to **report**, both the personnel and facility must be in their native quadrant. You may not download cards with this objective when your opponent attacks your Non-Aligned ship at your homeworld, even if there are crew members aboard matching the homeworld's affiliation. The specific card that is attacked (the ship) must match the homeworld and its universe (see **mirror universe**).

An attack by a Borg Ship dilemma or Rogue Borg, which are self-controlled, will not allow the download. Your opponent must attack your card with his ships or personnel.

DEFENSE bonus – A feature of **Tactic** cards. In a ship battle, the DEFENSE bonus on your current tactic (if any) is added to the SHIELDS of your ship that is being fired upon (plus any SHIELDS extension from a facility where the ship is docked), to calculate your DEFENSE total. The DEFENSE bonus is *not* an **attribute enhancement**. See **battle – ship**.

Dejaren – See **dilemma resolution – Targets**.

Deliver Supplies – The freighter or transport used to solve this mission must be in orbit with Transporter Skill aboard. See **dual-icon missions**.

Delta Quadrant – A "Delta quadrant mission" is one with a Delta Quadrant Δ icon in its point box.

Delta Quadrant icon Δ [DQ] – Personnel, ships, and facilities with this icon are native to the Delta Quadrant. See **native quadrant**.

Delta Quadrant Spatial Scission – This incident does not allow you to have more than one version of the same **persona** in play at one time. When you use it to place a card out-of-play, you may choose to do one of the following: play two cards OR draw two cards OR play one card and draw one card (in any order). You may *not* draw two cards AND play two cards.

Denevan Neural Parasites – See **dual-personnel cards**.

destroy – See **nullify**.

Destroy Radioactive Garbage Scow – You may not reduce the same mission's points more than once with multiple copies of this interrupt. See **cumulative**. The points are not bonus points because the mission's value is reduced. If the **mission** has already been completed, no points are lost. See **Containment Field**.

Devidian Door – Although this doorway is never "played," it has an [AU] icon and represents the use of an [AU] effect. Thus, you must have an open doorway (e.g., Alternate Universe Door or Space-Time Portal) which allows the play of [AU] cards in order to play a personnel or equipment card with a Devidian Door. (The use of the [AU] function counts toward your limit of one [AU] card per turn allowed by a Space-Time Portal, so you may not report an [AU] card using only the Spocetime Portal.) If the doorway is closed afterwards, you may still show the Devidian Door on your next turn. "Showing" the Devidian Door cannot be affected by an Energy Vortex.

You may show the Devidian Door **at any time** during your next turn. If the game ends on or before your next turn, you must immediately show the doorway from your hand. If you do not show the door when required, or must skip that turn because of **Containment Field**, you automatically **lose the game** with a 0(-100) score. If you report multiple cards by saying "Devidian Door," you must show the same number of Devidian Doors from your hand during your next turn.

You may not play a card by "Devidian Door" when playing in a restricted environment where this doorway is not a legal card.

See **anywhere, Ophidian Cane, Persistence of Memory, report**.

Deyos – Using this personnel's special skill to draw a card is a "just" action; it must be used immediately after the non-Youth Jem'Hadar enters play at his location, even if that Jem'Hadar enters play as a sub-action of a group action (e.g., multiple reports under Red Alert). See **actions – group, actions – "just", card draw**.

dilemma – A type of card hidden beneath Mission cards, which create hidden challenges to be dealt with when attempting missions. Dilemmas must be seeded during the dilemma **seed phase**. There are three types: planet [P], space [S], and space/planet [S/P]. See **combo dilemma**.

Dilemmas are **encountered** and resolved one at a time during a mission or scouting attempt. Each dilemma describes what happens when your crew or Away Team encounters it. It may list certain skills, attributes, equipment, or other requirements to overcome, cure, or nullify the dilemma; specific types of personnel that it affects; and various results such as damaging or destroying a ship or "stopping," disabling, or killing personnel. Some dilemmas have **bonus points** that you score when you overcome the dilemma. See **dilemma resolution, dilemma timing**.

dilemma resolution – This section applies to dilemmas seeded under a mission (or Empok Nor), including Q-icon dilemmas seeded as [S/P] dilemmas (e.g., Hide and Seek, or with Beware of Q). It does *not* apply to Q-icon dilemmas encountered during a Q-Flash. Unless otherwise specified, all references in these sections to a "mission attempt" include scouting or commandeering attempts. An overview explaining how to apply the rules in this section can be found under **dilemma resolution – summary**. Also see the supplemental Dilemma Resolution Guide for application of the rules to specific dilemmas. Dilemmas are **encountered** and resolved one at a time. (Some special rules apply to **combo dilemmas**.) When you attempt a mission, slide out the bottom seed card under the mission, turn it over, and read it. (Dilemmas are meant to be read by the encountering player. See **your**.)

Each dilemma may have one or more of these features, described in more detail below: a **trigger, targets, a nullifier, conditions, and/or a cure**. Nullifiers, conditions, and cures are collectively referred to as **requirements**. For example, Ancient Computer, Isolinear Puzzle,

and Phased Matter all include requirements for ENGINEER (conditions, nullifier, and cure, respectively). However, No Loose Ends targets ENGINEERS but does not require that skill.

A requirement such as STRENGTH>40 refers to the total STRENGTH of the Away Team or crew. When requirements or targets include attributes, apply any relevant attribute modifiers, such as Lower Decks, phasers, The Emissary, etc. A requirement for a personnel type, such as MEDICAL, may be met by either a skill or a classification, unless otherwise specified. A requirement for multiples of a skill, such as "2 Navigation", may be met by two personnel with Navigation or by one personnel with Navigation x2. (However, a requirement for "a personnel with 2 Navigation" must be met by a single personnel.)

If a card "doubles a dilemma's effects" (Howard Heirloom Candle), it doubles only the results, e.g., kills two personnel instead of one. If a card "doubles a dilemma" (Taar, Lore), it doubles all features of the dilemma (requirements, results, point values). If a dilemma is affected by a card that adds or subtracts requirements and another that doubles requirements, add or subtract first, then double. A requirement may not be reduced below zero.

Only personnel in the crew or Away Team attempting the mission may trigger, be targeted by, overcome, nullify, or cure a dilemma *during the mission attempt*. Personnel who are "stopped," disabled, in stasis, intruders, etc. are not affected by dilemma text targeting "crew," "entire crew," "all crew," "Away Team," or "entire Away Team" (which refer *only* to the crew or Away Team facing the dilemma). If a dilemma "stops," disables, or places in stasis part of the crew or Away Team, they are no longer participating in the attempt and thus may not affect or be affected by subsequent dilemmas. If personnel are placed or "held" with a dilemma atop a mission, "held by aliens," etc., they may not use (or share) their skills or attributes.

Only dilemmas using broader terms such as "all life on ship" or "personnel at this location" can affect personnel not involved in a mission attempt, when the dilemma is encountered. Dilemmas that enter play and have continuing effects may affect other personnel, even the opponent's, after the mission attempt is over. See **Crystalline Entity, Dal'Rok, present, "stopped."**

If a dilemma states that it "damages" your ship, apply default **damage** of two damage markers (if your opponent is using a Battle Bridge side deck) or "rotation" damage (if he is not).

Triggers – A *trigger* is an element that must be present (or a situation that must exist) for the dilemma to have any effect. This is stated at the beginning of the dilemma and is often preceded by the word "if." If the trigger is not present, discard the dilemma immediately without effect (unless it has an "otherwise" clause with an alternate effect). Examples:

"If the Traveler: Transcendence is affecting you..."

"If this is a Federation Ship..."

"Stops" SECURITY androids and OFFICER androids, if any present. Otherwise, kills one non-android Away Team member..."

Targets – The *targets* of a dilemma include the cards it affects (e.g., personnel selected to die), a personnel, ship, or facility that the dilemma is placed on, or a target destination for a relocation.

Targets may be chosen by random **selection**, opponent's choice, or owner's choice. When a dilemma specifies a superlative such as "strongest," "most CUNNING," or "highest total attributes," and there is a tie, the

opponent of the player encountering the dilemma gets to choose.

If no personnel remain to be targeted by a dilemma just encountered, because you used game text that allows you to remove them, replace that dilemma under the mission (the mission attempt ends). For example, Elim Garak ("May avoid any random selection") encounters Armus – Skin of Evil. If you choose to have Elim Garak avoid the random selection, there is no one left to be targeted by Armus, and it is replaced under the mission. Another card that might remove all personnel before you can resolve a dilemma is Flight of the Intruder.

However, if a dilemma targets cards with specific features (e.g., a personnel with Empathy, a male, a non-Cardassian), and there are no cards present with those features, discard the dilemma immediately without effect, as when a trigger is not present. (This does not include personnel with specific features which are required as a condition for overcoming the dilemma. See Conditions below.) If two targets with different specific features are specified (e.g., one [Holo] personnel and one non-[Holo] personnel), and only one is present, target that one. A specified number of personnel is not a "specific feature;" if a card specifies that two target personnel are to be selected but only one personnel is present, it selects that one. Also discard the dilemma if there is no ship or facility to place the dilemma on, or no destination for a relocation (e.g., "furthest planet" when there is no other planet on the spaceline).

Nullifiers – A dilemma may list skills, attributes, other characteristics, personnel, equipment, an action, or a card play that can *nullify* the dilemma. Also, another card may state that it nullifies a dilemma. (Some form of the word "nullify" is *always* used; conditions and cures are not nullifiers.) Nullifying a dilemma is a valid response to the initiation of the dilemma encounter. See **actions – step 1: initiation**. If the nullifier is present (or a nullifier card is played) when the dilemma is encountered, the dilemma is discarded and has no effect. Some dilemmas that enter play or have a lasting effect on a personnel or ship may also be nullified after the initial encounter. (Such a nullifier acts similar to a cure.) A dilemma with a **countdown icon** self-nullifies after the specified number of turns of the player who seeded it, and is discarded at that time. Examples:

"Nullify dilemma with Shelby OR 4 SECURITY"

"To nullify, evacuate ship at your outpost until end of turn."

"Nullify with Plexing"

"Nullifies Tamarian-related dilemmas where present." [Dathon]

Conditions – One or more skills, personnel, equipment, attribute totals, or other characteristics that must be present to avoid the ill effects of a dilemma, often indicated by "unless" or requirements "to get past" the dilemma. A few dilemmas have conditions that apply to the player rather than the Away Team (see last example). Examples:

"Unless SECURITY and MEDICAL present..."

"To get past requires Empathy, Diplomacy, Morn or any Scotty."

"To get past, most CUNNING MEDICAL present must help aliens (relocated with dilemma...)" [Note: the MEDICAL is not considered a target for purposes of dilemma resolution.]

"Unless you have at least 50 points..."

Not all uses of "unless" identify conditions. If a dilemma has a delayed effect "unless" the required skills, etc. are present by a specified time, that is a cure, not conditions. See the last example under Cure.

If your Away Team or crew can meet the conditions of a dilemma, they automatically overcome and discard it. You cannot choose not to overcome a dilemma with conditions. See **meeting requirements**.

Cures – One or more skills, personnel, equipment, or other characteristics that, if present, will cancel a dilemma's ongoing or delayed effect. Diseases most commonly have cures. An action, such as playing a card or returning a ship to the outpost, can also be a cure. When the requirements for a cure are met, the dilemma is discarded. Examples:

"Cure with 2 MEDICAL and Biology"

"Cure with Emergency Transporter Armbands, Timepod Ring, or new ENGINEER arriving"

"[Ship] is destroyed at the end of your second full turn unless 2 SCIENCE OR 2 ENGINEER aboard by that time."

When a dilemma has an effect that can be cured, that effect happens; then, if the required skills are still present, it is cured immediately, before proceeding to the next dilemma. This is different from a dilemma with a nullifier, which is discarded before taking effect.

"Stopping" – A dilemma only "stops" the Away Team or ship and crew if it has *conditions* and you fail to overcome those conditions. (See **"stopped"**.) A dilemma without conditions never "stops" your cards unless it explicitly says it does. If not "stopped," the remaining Away Team or crew must continue the mission attempt.

Entering play – Any dilemma with a **long-term effect** "enters play." The dilemma may state that it is played on table or placed on a personnel, ship, facility, mission, or the spaceline; or it may be implied that it enters play as a marker for an ongoing effect. A dilemma that enters play may have a continuous effect or one that occurs at the start (or end) of each **turn** of the player encountering it or every turn of both players. Such a dilemma will be discarded when it is nullified, cured, expired, or otherwise destroyed. For example, when a dilemma is placed on a personnel, it will be discarded if the personnel is discarded for any reason. Examples of dilemmas that enter play are Borg Ship, Harvester Virus, Nitrium Metal Parasites, Rascals, Hyper-Aging, Lethan Telepathic Attack, and Interphasic Plasma Creatures.

Discarding – A dilemma is discarded without effect if a required trigger or a target with specific features is not present, or if it is nullified.

If a dilemma has conditions, and you do not overcome it, replace the dilemma under the mission to be encountered again, unless it enters play or says "discard dilemma" or "mission continues." When you overcome the dilemma, discard it. For example, if you do not overcome the following dilemmas: Ancient Computer is replaced under the mission; Gravitic Mine ("Discard dilemma") and Garanian Bolites ("Mission continues") are discarded; Lethan Telepathic Attack is placed on a personnel; Interphasic Plasma Creatures plays on the table.

If a dilemma has no conditions, it is discarded after you follow its instructions (unless it enters play), whether it has any effect or not. Examples include Maman Picard, Ooby Dooby, and Shot in the Back.

Choices – Some dilemmas require the player to make a choice between ways to resolve the dilemma. Once you make your choice, carry out that part of the game text and ignore the other choice. Examples:

"Abandon mission attempt until any player has completed a different mission OR continue but lose points if you fail this turn."

"One Away Team member is killed OR beam up that personnel at a penalty."

Dilemmas with choices do not generally have conditions. See **Tarellian Plague Ship**.

Point boxes – A dilemma may have a positive or negative bonus point box. The points are scored when you overcome its conditions (e.g., Chalnoth), when you cure it (e.g., Hyper-Aging), or according to the dilemma's instructions (e.g., Cytherians, Borg Ship, Edo Probe). Place the dilemma in your bonus point area, even if says to discard it. (Discard the dilemma if you are playing Borg.) You do not score bonus points for a dilemma that is nullified or discarded for lack of a trigger or targets, or when you fail to meet its conditions or cure it.

Scouting vs. mission attempts – Dilemma text such as "mission continues" or "abort mission" refers to both mission and scouting attempts (for the Borg, they mean "scouting the mission continues" and "abort scouting of the mission"). However, dilemma text referring to "mission attempts," "attempting a mission," or "solving a mission" does *not* include scouting attempts.

dilemma resolution – summary – Resolve a dilemma by checking its features in the following order.

1. If a required *trigger* is not present (and there is no "otherwise" clause), OR if the dilemma specifies *targets* with specific features, and no such target is present, discard the dilemma without further effect, and continue the mission attempt.
2. If the dilemma has *conditions*, check to see if the crew or Away Team meets the conditions.
 - If you meet the conditions, discard the dilemma (place in your bonus point area if it has a point box). The crew or Away Team must proceed with the mission attempt.
 - If you do not meet the conditions, carry out the dilemma's instructions. The Away Team or ship and crew are "stopped" and the mission attempt ends (unless the dilemma says "mission continues"). Unless the dilemma says "Discard dilemma" or "mission continues," or it enters play (placed on a mission, ship, personnel, or the spaceline), replace it under the mission, face down under the stack, to be encountered again.
3. If the dilemma does *not* have conditions, carry out the dilemma's instructions. The ship and crew or Away Team are not "stopped" (unless the dilemma explicitly "stops" one or more cards), and remaining personnel must continue the mission attempt. Discard the dilemma unless it enters play (place in your bonus point area if it has a point box).
4. If you *nullify* the dilemma with skills, personnel, etc. present, or by playing a card or taking a specified action, discard it without further effect, and continue the mission attempt.
5. If the dilemma has a *cure*, first it takes effect. Then, if the skills still remain in the crew or Away Team to cure it, discard the dilemma (place in your bonus point area if it has a point box) before proceeding with the mission attempt. Any temporary effects such as disabling are cancelled when you discard the dilemma.

Note: this summary assumes that your opponent does not make any responses to the dilemma encounter (such as replacing it with a Q-Flash using Beware of Q). A dilemma may be responded to only after any targets for the dilemma have been chosen (or a trigger/target has been found to be absent) and you have checked to see if the crew or Away Team can meet the dilemma's conditions (if any). See **actions – step 1: initiation**.

dilemma timing – A mission, scouting, or commandeering attempt is a single action,

with sub-actions of encountering seed cards (and for a mission attempt, completing (solving) the mission). An attempt may not be interrupted except by valid responses and actions that suspend play. See **actions – interrupting**.

You may make valid responses to the encounter of specific dilemmas during the attempt or to the results of a dilemma. For example, Eyes in the Dark is a valid response to any dilemma, Q2 to any Q-related dilemma, and Howard Heirloom Candle to Anaphasic Organism, Empathic Echo, or Coalescent Organism; Strike Three is a valid response to a battle initiated by the Cardassians downloaded with Sleeper Trap. A dilemma may also be interrupted by a card or action that "suspends play." See **actions – step 2: responses**.

Diplomatic Conference – Revised text:

One V.I.P. from each of three aligned affiliations + one Non-Aligned V.I.P.

This mission creates a temporary "all-way treaty" on the planet surface, but only during the mission attempt (it does not extend to other actions, such as building a Colony with Gi'ral and Tokath). Form your Away Team with personnel from any affiliations (at least one personnel's affiliation must match one of the mission icons) and attempt the mission normally. The three V.I.P.s of different aligned affiliations may be from any three affiliations, not just the affiliations whose icons appear on the mission.

direct hit – If your ATTACK total is more than twice your opponent's DEFENSE total, you score a *direct hit* on the target ship. See **battle – ship, damage**.

disabled – A disabled personnel is conceptually unconscious. Personnel may be disabled by a rule (e.g., Hypospray, Ktarian Game) or by a card (e.g., captives are disabled unless Brainwashed). They remain disabled until the card or effect is cured or nullified. Also, **holographic personnel** who are deactivated are treated as if disabled.

Disabled personnel may not be used in any way (including game text, attributes, icons, lore, skills, traits such as gender, species, or matching commander status, etc.), may not enable game text requiring that personnel to be **in play**, and may not perform any actions. They may be beamed or moved in the same way as Equipment cards (but are not treated as equipment in any other way).

For example, a disabled Treachery personnel does not allow you to download personnel there with Recruit Mercenaries; a disabled android aboard a ship at Paxan "Wormhole" cannot prevent that ship from being relocated; and a disabled Data does not allow you to choose for All Threes. See **present**. (If a personnel worth bonus points when killed, such as Aamin Marritza, is killed while disabled, the disabling effect ends when he is killed and the points are scored.)

When a crew or Away Team that includes disabled personnel is attacked in personnel battle, the disabled personnel do not engage adversaries, but may be randomly selected to die at the end of the battle.

Though similar in some ways to personnel in **stasis**, disabled personnel are not affected by cards that specifically affect personnel in stasis.

A ship attribute that is "disabled" (e.g., by "Pup") is an **undefined attribute**. When **special equipment** is disabled (e.g., by Vole Infestation), it is "off line" and not usable for any purpose (see **damage**). A disabled attribute or special equipment does not disable the ship itself.

discard pile – You may not rearrange or look through cards in any player's discard pile unless a card allows you to. For example, Palor Toff – Alien Trader allows you to look

through (but not rearrange) your discard pile to choose a target card. You must discard face up, and any time you retrieve a card from your discard pile (except for seed cards to be placed under a mission such as Q's Planet, or with Hide and Seek), you must show it to your opponent.

When you play a card which allows you to "exchange" it for a card in your discard pile (e.g., Palor Toff – Alien Trader, Res-Q), the two cards trade places: the card from the discard pile goes into your hand, and the card you played takes the position of that card in the discard pile. Selecting the target card is part of the results step of the action. (Only the discard pile itself is targeted in the initiation step.) For example, you initiate the play of Res-Q without naming an intended target; your opponent may respond with Countermanda, removing three cards from your discard pile before you look through the pile and select a card to exchange for.

Unless otherwise specified, *all* discarded cards (except those which enter play from certain **side decks**) go to the original **owner's** discard pile. (Cards with point boxes for which you score the points discard to your **bonus point area**.)

A discarded **artifact** may not be reused, even if returned to your hand, unless you re-earn it. When a card is discarded, *all* effects on that card end and are not reactivated if the card is retrieved and replayed. For example, if a personnel affected by Frame of Mind is killed and discarded, he is no longer affected by Frame of Mind if he is replayed. (But **once per game** text may not be used again.)

discarding – You may not discard cards from your hand or from the table unless a card or rule allows or requires you to do so. Discarded cards normally go to the owner's **discard pile**, unless a point box or other card allows or requires you to discard it to your **bonus point area**, under The Next Emanation, or elsewhere. (Also see **side decks**.)

When multiple discards result from the same action (e.g., you discard a destroyed ship and all cards aboard; you discard your entire hand using Handshake), place the cards in your discard pile one at a time (allowing your opponent to see them), in the order you choose.

When a mission allows or requires you to discard a card as part of its requirements, or for extra points, that card must come from the crew or Away Team attempting the mission, not from your hand, at the time the mission is solved. All other discards (e.g., for Static Warp Bubble) come from the hand unless otherwise specified. A single discard cannot satisfy two discard requirements. For example, the required discard for Static Warp Bubble cannot also be used to reopen a Spacedoor.

Cards that have a **long-term effect** on one or more personnel, such as Barclay's Transporter Phobia or Brain Drain, are "played on" the affected personnel, even if the card text does not say so explicitly. The card functions as a reminder of the effect, and will only be discarded if nullified, cured, or expired, or if the personnel is discarded.

A personnel who is "discarded" according to the text of a dilemma or other card is not considered to die or be killed unless the card causing the discard specifically says so (**Yuta** is an exception).

See **in play**.

Discommendation – See **battle – personnel, battle – ship**.

Disrupt Alliance – See **card titles**.

Disruptor Overload – Errata:

Plays on any ship or Away Team. One Equipment card OR one artifact played as an Equipment card is destroyed at that location. Where present, destroys one Equipment card

or one card used as an Equipment card (random selection).

This interrupt is *not* a valid response to the play of an Equipment card.

Distortion Field – Errata:

Plays crosswise face up on any planet location. ~~On each of your turns~~ Once each turn, flip card over. While face up, prevents any beam down/up here unless Pattern Enhancers in play all beaming up/down here. (Cumulative.)

This event must be flipped during the turn on which you play it.

Distortion of Space/Time Continuum – Revised text:

Plays on any ship. “Unstops” ship, crew and ship’s Away Teams and restores any of this turn’s RANGE already used by that ship.

See **Away Team and crew**.

Dixon Hill – This personnel’s skill allows you to ignore the requirements of a mission only when solving it. Ignoring requirements is not the same as meeting requirements. For example, if his Away Team encounters Lack of Preparation and would not have been able to meet the requirements at the start of that mission attempt, they lose points and are “stopped.”

Dixon Hill’s Business Card – In Federation Standard, this interrupt/event would read:

Interrupt: If any personnel (except a Borg) was just killed and there were no other personnel present, select any other personnel controlled by the same player. That personnel is captured.

Event: Plays on table. The opponent’s next personnel to report for duty must be universal or a holographic re-creation. Then place this card out-of-play. (Event is not duplicatable.)

If you play this card as an interrupt when one of your own personnel was killed, the selected personnel is captured by your opponent. See **reporting for duty, capturing**.

DNA Clues – Once this dilemma is placed on the mission and the choice is made either to continue or to “stop” (if possible), the altered MEDICAL requirements for further dilemmas encountered at that location affect both players. The DNA Clues dilemma is not encountered again, so no future Away Team or crew can alter those requirements. The dilemma remains on the mission even after it is solved. The MEDICAL requirements may be reduced to zero.

do not count toward winning – See **points**.

docked ship – The following cards may *not* target a docked ship (or a **carried ship**): Asteroid Sanctuary, Loss of Orbital Stability, Near-Warp Transport, Temporal Rift, Wormhole (on a ship as it undocks or launches), and Temporal Wake (to force it to follow another time-traveling ship). All other cards that target a ship may target docked or carried ships (if applicable) unless otherwise specified on the card. See **docking**.

docking – You must indicate which of your ships are docked (placed under an outpost, or on top of docking site at a Nor) and which are undocked (placed on the spaceline). When a space facility allows a ship to report there, the ship must report docked. Docking or undocking is a form of **movement** and requires the ship to be staffed. Docked ships are protected by extension of 50% of the facility’s SHIELDS, but may not attempt missions or fire WEAPONS. Docked ships are *not* damaged or destroyed when the facility is destroyed (unless landed on Docking Pads). Certain cards may not be played on a **docked ship**.

Any card or rule that requires a ship to “return to” a space facility implies that it must dock at that facility. For example, a ship must dock at

an outpost to be repaired by a Spacedock there or to cure REM Fatigue Hallucinations.

You may not undock a ship docked at an opponent’s facility (even a commandeered ship) unless specific game text allows it (e.g., Croden’s Key, Docking Ports).

When compatibility with a facility is required to dock a ship, only the ship itself must be compatible with the facility; incompatible crew members aboard do not prevent docking. Such personnel cannot board an outpost from the ship, but they may board a Nor.

Docking Pads – Errata:

This site is located on the **Habitat Ring**.

No other cards (such as Establish Landing Protocols) are needed to enable ships with no staffing requirements to land (dock) and take off (undock) at this site. The site itself allows the ship to land and take off. A ship docked at the Docking Pads site is both docked and landed, and is subject to the rules applying to **landed ships**.

While a docked ship is normally not affected when the facility is destroyed, a ship docked at Docking Pads is actually “aboard” the Nor and thus would be destroyed along with the facility and discarded.

Doctor, The – This personnel is not a version of the E.M.H. Program persona and cannot be downloaded by Beverly Crusher.

does not use – See **equipment**.

does not work with – A card that “does not work with” a particular group (affiliation, species, specific skills) cannot mix or cooperate with cards of that group in any way, in the same way that cards of incompatible affiliations cannot work together without a treaty (see **compatible**). For example:

- Lore “Does not work with [Fed] affiliation.” He doesn’t mix with [Fed] personnel, cannot board a [Fed] ship, and cannot report to or board a [Fed] facility.
- Miles O’Brien “does not work with Cardassians.” He doesn’t mix or cooperate with personnel of Cardassian species or affiliation, even under treaty. If he is aboard your ship, it cannot assist another of your ships in battle if it has Cardassians aboard.

If a personnel is inadvertently placed in a situation where he is mixing with cards that he “cannot work with,” he will form a separate Away Team or (on your ship or facility) be placed under **house arrest**. For example, Solkar “does not work with personnel who have Treachery.” If your opponent boarded your ship and played Reflection Therapy on one of your crew to give him Treachery, Solkar would be placed under house arrest. You may not deliberately place your personnel in such a situation.

“Does not work with” restrictions that are completely affiliation-based are overcome by any card that allows cards to mix “regardless of affiliation,” such as Brainwash and Temporal Micro-Wormhole.

Dominion – An affiliation.

Dominion War Efforts – See **multi-affiliation cards**.

doorway – A card type representing a physical door or a passage to another time or place in the space/time continuum. A seedable Doorway card must be seeded during the **doorway phase**, unless otherwise specified. Playable doorway cards do not use your normal card play and may play whenever an Interrupt card play is legal, but *only during your own turn*, unless its text explicitly states that it **suspends play** or may play **at any time**. There is no limit to the number of Doorway cards you may play per turn, unless stated otherwise on a card.

Doorways that remain in play may be “closed” (made inactive) by other cards. A card that closes a Doorway card (such as Door-Net or Revolving Door) may be played on a doorway

that is already closed. When a doorway is closed, its ongoing game text related to its “doorway functions” is not active. For example, no cards may be taken from a closed side deck, a closed Ready Room Door does not protect an event from nullification; a doorway with a countdown icon stops counting down (the countdown resumes if the doorway is reopened). Game text relating to how the doorway is played (e.g., creating a spaceline location and its span) or nullified, terms such as “Not duplicatable,” “Unique,” or “Limit one,” and icons such as [AU] or [Ref] that are not part of the game text are not affected. Thus, while a ship may not pass through the Bajoran Wormhole if either end is closed, it may still stop at the location and requires 1 RANGE to move to the location. Also, another Bajoran Wormhole may not be played in either quadrant if the existing one is closed.

Doppelganger – With this event in play, if two copies of a unique Personnel card are in play at two different locations, and one moves to the **location** of the other, the non-moving one is discarded. If the two cards are always at the same location (even if they are moving simultaneously), no one is discarded.

Reporting, beaming from a planet to a ship, or moving from one site to another is not “moving to a location.”

A “duplicate” is equivalent to a **copy**. Other instances of the same **persona** (even with the same card title) are not duplicates. For example, Jean-Luc Picard (Premiere) is not a duplicate of Jean-Luc Picard (First Contact) or Galen.

double turn – When a card allows you take double turns, you take one complete turn from beginning to end, then another complete turn from beginning to end (not one turn with two card plays, two end-of-turn card draws, etc.). A double turn counts as two of your full turns.

doubling – When numerical values, such as attributes or point boxes, are simultaneously modified by a card that adds or subtracts and another card that doubles (or triples) that value, add or subtract first, then multiply. See **skills – modifying**.

downloading – When you download a *target card*, you first look through any or all of four places: your hand, draw deck, Zalkonian Storage Capsule, and Q’s Tent (if open). (If there is more than one possible target card for the download, you do not name a specific target before looking for and choosing one.) When you choose the target card you must show it to your opponent (even if it has a hidden agenda icon), then you must immediately play or report the card, *unless* the card allowing the download:

- requires or allows you to download to hand (e.g., Quark’s Isolinear Rods, 1st Rule of Acquisition); or
- works “in place of one card draw” (e.g., Blood Oath, Borg Queen), in which case you may either play the card or place it in your hand (however, you may not download from your hand to your hand).

If you are required to play the card but cannot, the download is invalid.

An **artifact** may be downloaded *only* by a card that says it downloads artifacts, or that names a specific artifact.

Other rules for downloading are as follows:

- A card or rule may allow or require a download from another source, such as your discard pile (Examine Singularity) or from a side deck (Storage Compartment Door; also see **Tactic**).
- Downloading does not count as your *normal* card play (unless so specified), and is not considered a **card draw**. If the card is played or reported for duty, this **card play** is subject to all normal responses, such as nullification. It is “played from” the source it was downloaded from, e.g., “played from

your hand" or "played from your draw deck."

- If a card says "download in place of one **card draw**," you may use this ability each time you are allowed to draw a card.
- If the downloaded card has a hidden agenda icon, you may not activate it as part of the download (unless it is a valid response, or was downloaded by a *special download* icon).
- Although some downloads are optional, others *require* you to download a certain target card (or group of target cards). If you cannot do everything required, the entire download is invalid. To verify that you could not carry out the download, your opponent is allowed to look through your hand, draw deck, Zalkonian Storage Capsule, and Q's Tent (if open), or any other source specified for the download.
- Attempting a download usually requires the expenditure of some resource such as playing a card, using a special icon, or forfeiting a card draw. That resource remains used even if the download is invalid.
- If you attempt a download using a resource such as your card draw and the download is invalid because no target card is available, you may not attempt to use that download again unless a downloading source is replenished (discard pile regenerated into the draw deck) or reopened (a closed Q's Tent).
- If any player looks through your draw deck or any side deck during a download, you must reshuffle it afterwards.
- If you can download multiple cards to a specific destination, you must download all cards to the same destination.
- A download does not suspend play, except for *special downloads* and cards that specify that they suspend play.
- Downloads allowed by a special download icon ▼ have special requirements. See **downloading – special download**.

When a card is downloaded into play, you must obey all normal requirements for playing that card, whether stated in the rules or the card's game text.

Downloading Ships, Personnel, and Equipment: When the text of a facility or site allows you to download and report a Ship, Personnel, or Equipment card, both the facility and the downloaded card must be in their native quadrant and all other applicable requirements for reporting (such as a doorway that allows [AU] cards to report) must be met. For example:

- Ops allows you to download a matching SECURITY-classification personnel to Security Office; that personnel (and the Nor) must be its native quadrant.
- Empok Nor, when commandeered, allows each player to "download to station any number of different compatible Site and Equipment cards." You must obey the site restrictions for downloading equipment (e.g., MEDICAL-related equipment to Infirmary).

When a card *other than* a facility or site allows you to download a Ship, Personnel, or Equipment card, but *does not specify where* you may report it, you must obey all normal reporting requirements and report the card to a place that card could normally report (e.g., to a compatible facility and/or an appropriate site, in its native quadrant). For example, Defend Homeworld allows you download a SECURITY personnel, but does not specify a destination. You must report the personnel someplace it could normally report. In most cases this will be a compatible facility in its native quadrant; however, a Borg player could download a SECURITY Borg aboard a Borg Cube (which allows reporting aboard), and a downloaded Luther Sloan could report **anywhere**, as specified by his skills.

When a card *other than* a facility or site allows you to download and report a Ship, Personnel, or Equipment card to a *specific destination* (such as "download to here," "to this location," "to one of your ships," "to an outpost," etc.), you must report the card where specified; normal reporting requirements related to *where* you play the card (e.g., a facility, appropriate site, native quadrant) do not apply. A special download [SD] icon also implies a specific destination ("here"). For example:

- Assign Mission Specialists allows you to download two mission specialists "to one of your outposts." Neither the personnel nor the outpost needs to be in its native quadrant.
- Recruit Mercenaries allows you to download certain Treachery personnel "to where you have Treachery present," whether they are aboard a facility or ship or on a planet, in any quadrant.
- Anya has a special download icon for Salia. You may report Salia anywhere at Anya's location, aboard a facility or ship or on a planet surface, in any quadrant.

You must still obey any reporting restrictions on the downloaded card, such as an [AU] card requiring an open doorway that allows such cards to report, and personnel played aboard your ship or facility must be compatible with that ship or facility (and any other cards aboard).

If a card allows you to download a personnel or equipment card during a mission attempt, it cannot join the attempt unless downloaded by a special download icon at the mission location.

Downloading Facilities: When a card allows you to download a facility to a location, you must meet all normal requirements for building (playing) the facility, unless *specifically* overridden by the card text. These requirements include a non-homeworld, matching affiliation mission for outposts, no other facility controlled by you at the location, and any play requirements in the facility's game text (such as an appropriate ENGINEER for building an outpost). Examples:

- You may not download Primary Supply Depot with Establish Dominion Foothold, because that outpost may only be seeded, not built. You may download Remote Supply Depot only to a non-homeworld, [Dom] mission where you have no other facility and where you have a Dominion ENGINEER.
- Subjugate Planet specifically states that you may download Remote Supply Depot to the non-homeworld, non-[Dom] planet mission targeted by the objective. This overrides the matching affiliation requirement, but not the requirement for a Dominion ENGINEER.

Downloading Sites: When a card allows the download of a Site card to a facility, the site must be allowed to exist on that facility. For example, you may not download Garak's Tailor Shop to Empok Nor, because that site plays only on Terok Nor or DS9.

downloading – special download – A card with a special download icon ▼ allows you to suspend any play phase action at any time (even during your opponent's turn) while you download the specified target card and immediately play it. Special downloads may not be used during the **seed phase**. If the card is played at (or to affect something at) one particular spaceline or timeline location, the special download icon must be at that location. (If it is not possible to play the card according to these rules, then the target card may not be downloaded.) For example, Arandis may download Jamaharon at any time to nullify a Horga'hn (because that artifact is not specific to any location), but may download it to relocate a male to Risa only if she is at his location. See **suspends play**. When you use a special download icon to download a **hidden agenda** card, you must

play that card to the table, then immediately activate it and follow its game text (targeting something at the location of the special download icon if applicable).

A card with this icon allows a special download only **once per game**, no matter how many copies of that card you use during the game. On a Personnel card, this icon is defined as a special **skill**.

Dr. Farek – See **Non-Aligned**.

Dr. McCoy (The Motion Pictures) – This personnel's special skill allows you to look through your discard pile (without rearranging it) until you find the topmost personnel (it need not be the topmost card).

Dr. Q, Medicine Entity – This Q-icon interrupt may affect Event cards on ships, personnel, or any other cards present at a spaceline location.

Dr. Reyga – See **Non-Aligned**.

Dr. Soong – This personnel may "reprogram" only those **androids** which have variable features chosen when it reported for duty. He may replace the classification and/or gender of the ♠ Soong-type Android, and may replace one or both of Lal's two selected skills with regular skills present with her at the time of reprogramming. He may reprogram androids belonging to either player, but only once during each of his owner's turns. See **skills – modifying**.

Dr. Soong's "nemesis" is Lore. See **nemesis icon**.

draw – See **card draw**.

draw deck – Your draw deck may be of any size, as long as it contains *at least* 30 cards. You may put any card in your draw deck (except **Tactic**, **Tribble**, **Trouble**, and **Q-icon cards**), although you should avoid cards that must be *seeded* rather than *played* – such as dilemmas – because normally there is no way to use them in your draw deck. You may include as many copies of each card as you like.

draw no cards this turn – See **card draw**.

drone – A Borg drone has "Drone" as part of its Identification. All personnel your Borg assimilate are drones unless assimilated as a counterpart using the Assimilate Counterpart objective. The Borg Queen, counterparts, and non-[Borg]-affiliation personnel who are Borg or former Borg are not drones and may not be downloaded or affected by cards that specify drones. A Borg drone has no **gender** and may not be targeted with Assimilate Counterpart or any card that specifically targets a male or female personnel.

Drought Tree – This event is discarded and its points are lost if the mission it is played on is destroyed.

D'Tan – This personnel's special skill works on himself as well as on others, giving him an INTEGRITY of 8.

dual-affiliation – See **multi-affiliation**.

dual-icon missions – Dilemmas of all types, and Q-Flashes, may be seeded at a dual-icon mission. To begin or continue a mission or scouting attempt, or to solve such a mission (even using alternate requirements provided by an objective such as Subjugate Planet), you must have both a crew on a ship in orbit and an Away Team on the planet (each group must have a personnel whose affiliation matches one of the mission's icons). If either the crew or the Away Team is "stopped," disabled, killed, or otherwise removed, the attempt immediately ends. (If either group is "stopped," the other group is also "stopped.")

Space dilemmas affect the ship and crew. Planet dilemmas affect the Away Team. When a Space/Planet dilemma (or a Q-icon card) is encountered, the player attempting the mission chooses whether it applies to the crew or to the Away Team. (When a Q-Flash is

encountered, X = the number of personnel in the crew and Away Team combined.)

See **scouting locations, mission attempt.**

dual-personnel cards – A dual-personnel card, such as Sons of Mogh, is one *card* that includes two *personnel*. Classifications, staffing icons, and attributes on a dual-personnel card appear in the same order as the individual personnel's skills are listed. For example, on Sons of Mogh, Kurn's skills, classification (OFFICER), and STRENGTH (8) are listed before Worf's.

Anything that happens to one of the individuals on a dual-personnel card automatically happens to the other. For example, if one individual is selected to die, the other individual also dies. If the card is dual-affiliation, both personnel must have the same affiliation at the same time, and cards that affect the affiliation of one of the personnel on the card affect the affiliation of both personnel. Thus, Data and Picard both become Non-Aligned if Lore's Fingernail is in play. See **Q-Type Android**.

Random selections – To make a random selection from a group including one or more dual-personnel cards, select the appropriate number of *cards* (as if all were single personnel) and apply the results to all personnel selected. Examples:

- Armus – Skin of Evil randomly selects one personnel to die. Select one card; both personnel will die.
- Denevan Neural Parasites randomly selects "half the Away Team." If your Away Team contains six personnel cards, your opponent will select three *cards*. All are killed, regardless of the total number of personnel affected. (Two phasers or disruptors are required to protect both personnel on a dual card.)
- If a dual-personnel card is randomly selected for Chula: The Chandra, all personnel with at least one attribute number matching *either* of the dual personnel would continue. (If a single personnel is randomly selected, a dual-personnel card will follow him if either of the dual personnel has an attribute that matches.)

If a card targets a personnel of a specific gender, include a male/female dual-personnel card in the selection regardless of gender. For example, if Beverly and Will are in the Away Team encountering Parallel Romance, include the card in the selections of both the male *and* the female. If Will is selected as the male to be "stopped," Beverly is also "stopped," regardless of who is selected as the female to be "stopped."

Opponent's or owner's choice – When a selection is made by choice, select the appropriate number of *personnel*, which may include one individual on a dual-personnel card. The result of the selection will then affect the other personnel on the card as well. Examples:

- Outpost Raid allows your opponent to choose two personnel to be killed. He may select Lursa (on Sisters of Duras) and Tomalak. B'Etor will also be killed along with Lursa and Tomalak.
- Mercenary Ship requires [Stf][Stf] for staffing. For the Abandon Ship! dilemma, you may choose Beverly (on Beverly and Will) and Narik to staff it. Since Beverly must remain on the ship to staff it, Will remains also.
- With Extradition, your SECURITY personnel capture both personnel on a dual-personnel card if their STRENGTH exceeds that of either individual.
- You select Lursa (on Sisters of Duras) to be controlled by a Ceti Eel. B'Etor is also controlled by the same Ceti Eel card.

Specific criteria – If a dilemma targets a personnel who meets specific criteria, such as

the "most CUNNING" or "lowest STRENGTH," examine the relevant attribute of each individual on a dual-personnel card. If either individual meets the criteria, both personnel are affected by the dilemma. For example, if the "most CUNNING" personnel in your Away Team is Nog (on Jake and Nog), then both Jake and Nog are "stopped" by Altonian Brain Teaser. (They pool their CUNNING for the "If their CUNNING <15" clause.)

Reporting and downloading – If one of the personnel on a dual-personnel card can be reported for free (e.g., an android with Cybernetics present) or downloaded (e.g., a SECURITY personnel with Defend Homeworld), the other individual is also reported for free or downloaded.

Costs and benefits – If you pay a cost for reporting or downloading a dual-personnel card, you pay that cost only for the individual(s) to whom the costs apply. See **Ferengi Conference**. If you gain a benefit (such as scoring points) based on the features of an individual personnel, you get that benefit only for the individual(s) on the card with those features. See **No Way Out**.

Personnel battle – Both individuals on the card jointly engage a single adversary, combining their STRENGTH values together to determine the outcome of the personal combat.

Assimilation – Dual-personnel cards may not be targeted for assimilation as a counterpart. If one individual is assimilated as a drone, the other is also assimilated. Each individual's staffing icons and attributes are adjusted separately. See **assimilation – personnel**.

Personas – Some dual-personnel cards contain versions of single-card personas. For example, you may not have Sisters of Duras in play at the same time as Lursa and/or B'Etor. **Persona** replacement must include both individuals.

Dukat of Borg – See **counterpart**.

duplicate – See **copy**.

duplicable – See **unique and universal**.

Duranja – See **in play**.

each turn – See **turn**.

earned – See **artifact**.

Earring of Li Nalas, The – This artifact must have been brought into play prior to completing Rescue Prisoners in order to double its point box. The doubling effect remains even if the Earring leaves play. See **once in play**.

E.C.H., The – This personnel can download any card with "Maneuver" in the title. See **any, card titles**.

Echo Papa 607 Killer Drone – This Equipment card does not engage adversaries in personal combat. It is used only at the end of a personnel battle to increase your total STRENGTH. It cannot contribute STRENGTH for other purposes (overcoming dilemmas or solving missions). It is not a hand weapon. The STRENGTH goes up by 10 after each separate personnel battle.

Edo Probe – Revised text:

Abandon mission attempt until any player completes a different mission OR continue but lose points if you do not solve mission this turn.

Because this dilemma has no conditions, the Away Team or crew is not "stopped" and the dilemma should not be returned under the mission. Place it on top of the mission to serve as a marker until the dilemma is resolved, then discard it.

Edo Vessel – Any time this ship is fired upon (even by return fire), there is a 50/50 chance that the attack is nullified. You may determine the 50/50 chance by any agreeable, random method (e.g., coin toss).

Eli Hollander – This personnel is "any Data," but is not a version of the Data **persona**.

Elim Garak – This personnel is removed from the selection pool before any random selection is made. Even if he is the only personnel present, it is still considered a random selection, which he can avoid, if a card specifies a random selection. See **mission attempt, dilemma resolution – targets**.

The personal combat phase of a personnel battle is not considered a random selection, so he cannot avoid personal combat and may be **stunned or mortally wounded** in battle. He may avoid the random selection for death at the end of the battle if he is not stunned or disabled.

Eliminate Starship – See **showing your cards**.

Emblem of the Empire – This incident gives immunity to Navigate Plasma Storms to your [TE] facilities and [TE] ships. It removes affiliation attack restrictions only from [TE] cards and the four personnel listed, not from other cards that they mix with. For example, while Benjamin Sisko has no affiliation attack restrictions, he cannot initiate ship battle while aboard the *U.S.S. Defiant*, because the ship is subject to normal Federation attack restrictions.

E.M.H. Program – Although this **holographic personnel** may be downloaded to an outpost, he will be deactivated until taken aboard a ship or facility with a holodeck. If downloaded to a ship with a holodeck during a mission attempt, he joins the crew attempting that mission, even during a dilemma. A Mobile Holo-Emitter or Holo-projectors does not overcome his restriction box. See **Doctor, The**.

Emergency Transporter Armbands – Errata: *Beam your Personnel up or down at any time, except during a dilemma (unless specifically permitted). May be used during battle before the winner is determined.*

With the exception of Firestorm, this interrupt may not be used to escape a dilemma.

Beaming your personnel "up or down" includes beaming them between ships or between a ship and facility at the same location (including a landed ship).

You may play this interrupt at any point from the initiation of a personnel battle up to the point of determining the winner, either before or between combat pairings. You may not interrupt a combat pairing. If you remove all your personnel from a personnel battle with this interrupt before any personal combat takes place, the battle is cancelled and there is no winner or loser, but all participants are "stopped."

You may play this interrupt to beam personnel to or from the ship after the initiation of a ship battle and before the actual attack, between the attack and the return fire, or after damage is assigned and before the ship is destroyed.

Emissary, The – See **affiliation and species, in play, report, Ops**.

Emperor's New Cloak, The – See **stealing**.

Empok Nor – This facility allows both players to seed dilemmas that are "related to Empok Nor" (i.e., have "Empok Nor" in their lore) underneath the Facility card, which must then be encountered and resolved before the facility can be commandeered. To do so, simply announce that your Away Team in Ops is making a "commandeering attempt," then encounter and resolve the dilemmas as you would for a mission or scouting attempt. Once there are no longer any dilemmas to be encountered, the attempt ends, and any player's Away Team may subsequently commandeer Empok Nor normally with a Computer Skill personnel unopposed in Ops. (The actual commandeering is a separate

action from the commandeering *attempt*, which does not require Computer Skill.)

You may deliberately mis-seed cards that are not Empok Nor dilemmas under this facility as a bluff. When discovered, such mis-seeds are placed out of play as usual. However, if you reveal your own mis-seeded card when making a commandeering attempt, you may not commandeer Empok Nor as long as it remains uncontrolled. (If your opponent commandeers it, you may then commandeer it from him.)

"No reporting aboard" means that you may not use the text of any site cards to report cards aboard. Another card's text may allow a card to report aboard. For example, Luther Sloan "may report anywhere," including to a site on an uncommandeered Empok Nor. The game text on all Site cards on Empok Nor is inactive until it is commandeered, other than the Ops text allowing commandeering, docking site text allowing docking and undocking, and any text related to the placement of the sites (including the module locations and the Commander's Office placement restriction). (However, a card that plays on a site, such as Weapons Locker, may be played on an uncommandeered Empok Nor site.) All non-Borg affiliations are **compatible** with the Neutral uncommandeered station.

When this station is first commandeered and flipped over, each player may download to the station any number of different compatible Site and Equipment cards. The commandeering player performs all of his downloads first, then the opponent. While the downloaded cards must all be different for each player, both players could download copies of the same card (but not the same unique site). These downloads are all results of the action of commandeering the station. Thus, a Computer Crash will cancel all downloads attempted at that time.

Even though Empok Nor seeds uncontrolled, for purposes of seeding or building other facilities there, you remain its owner, and may not seed or build another facility at the same location (unless Empok Nor is commandeered by your opponent).

empty ship – An *empty ship* has no personnel or Rogue Borg aboard. See **occupied ship**.

encountered – Seed cards are *encountered* only during a mission, scouting, or commandeering attempt. A card is not encountered when looked at outside of a mission, scouting, or commandeering attempt, such as with a Scan card or Ocular Implants. Dilemmas that enter play, such as Cytherians, Borg Ship, Coalescent Organism, and Friendly Fire, are not considered encountered when they affect you later on the spaceline. See **actions – step 1: initiation**.

Normally, an **artifact** is moved to the back of the seed stack when encountered. It is not earned until the mission is completed, unless a card allows it.

A **mis-seed** is not encountered when revealed. For example, a [P] dilemma mis-seeded at a [S] mission may not be replaced by a Q-Flash with Beware of Q, and does not use up the effect of a Senior Staff Meeting if it is the first dilemma revealed. Also, an Orb artifact mis-seeded at a [S] mission could not be earned with HQ: Return Orb to Bajor.

A dilemma is not considered to be encountered if it is a unique dilemma which is discarded because another copy is already in play (e.g., Dead End). See **unique and universal**.

end of spaceline – See **spaceline**.

end of turn – See **turn**.

End Transmission – You may repeatedly postpone the same end-of-turn actions by playing additional copies of this interrupt on successive turns. Because the effects of multiple copies are not happening at the same

time, this is not affected by the **cumulative** rules.

energy dampener – A type of ship's **special equipment**. It has no built-in functions but is used by the Breen Energy-Weapon Dampener card.

Energy Vortex – You may play this interrupt to prevent the play (but not the activation) of a hidden agenda card. Thus, you will not know the identity of the card whose play you prevent. It may not be played to stop the "showing" of a Devidian Door or when a card is downloaded or played from any place except the hand. See **downloading, Battle Bridge side deck, Tribble side deck**.

The replacement card may be a copy of the original. The replacement card play may in turn be interrupted by another Energy Vortex; in that case, the original card may now be played.

If you have any card in your hand that you may legally play, you *must* play it. For example, if your only card is Kevin Uxbridge, you must play it if there is any legal target event in play. But if you have already used your normal card play this turn and play a Doorway card which your opponent interrupts with Energy Vortex, you may not play an Event card instead. If you have no legal card to play, you must allow your opponent to verify it by looking through your hand. See **verification**.

Engage Cloak – When a cloaked or phased ship placed on this objective is about to decloak and is returned to its former location, it decloaks *after* it makes any of the allowed movements. No other actions may be performed between the movements or between the last movement and decloaking. See **cloaking and phasing**. The objective does not itself allow you to decloak or dephase a ship on your opponent's turn (but does have its effect if another card allows or requires the ship to decloak at that time).

The movements allowed for each full turn on the objective are separate movements of up to the ship's RANGE. For example, a ship with RANGE 8 which stays on Engage Cloak for three full turns may make three separate movements of up to RANGE 8 each (not a single movement of RANGE 24).

A ship on Engage Cloak is not on the spaceline. It may be targeted by any card which may normally target a cloaked ship and which does not require the ship to be present or at the same location with anything else. For example, it may be targeted by Tachyon Detection Grid but not by La Forge Maneuver. If the ship's original location is destroyed by a Black Hole, upon decloaking the ship must be returned to the Black Hole location.

Engage Shuttle Operations – This event allows shuttles to be loaded and carried aboard, and launched from, a ship with Tractor Beam and an ENGINEER aboard. Launching a shuttle from the ship uses no RANGE. Landing on or taking off from a planet requires the full movement RANGE of the shuttle (including any modifiers). Launching, loading, landing, and taking off require full staffing. See **movement, characteristics, carried ships**.

Engage Shuttle Operations: Dominion – Jem'Hadar attack ships, which may be carried aboard another ship using this event, include Dominion ships with "attack ship" in the ship name or class. Any card which affects **Engage Shuttle Operations** by name (such as Launch Portal) also affects this card. See **card titles, characteristics**.

enhancements – See **attribute enhancements**.

enigma icon * – This symbol represents things whose nature is mysterious or unexplained, such as the Borg Queen and Fontaine. Each player may have only one copy of each enigma card (or the same persona) in play at any time. However, such cards are

neither unique nor universal, and thus are not affected by cards that specifically affect unique or universal cards.

Ensign Tuvok – Revised text:

Once per game, may cancel ship battle at same nebula.

See **nebula, battle – ship**.

Equinox Doctor – This personnel's "NO INTEGRITY" is an **undefined attribute**.

equipment – A card type, representing devices such as phasers, tricorders, and plasmadyne relays which enhance the performance of your Away Team, crew, or ship. (A Ship card's **special equipment** is listed in game text and is not related to the Equipment card type.)

Most Equipment cards are not carried by a specific personnel, but "belong to" the entire crew or Away Team (see **Away Team and crew**), and are "**stopped**" by the same circumstances that "stop" personnel cards. (A few Equipment cards are "worn" or "placed on" a personnel. See **Data's Head, Mobile Holo-emitter**.) If an entire Away Team is killed, the equipment remains, but may not be taken or used by the opponent unless a card allows it. (See **stealing**.)

Equipment can "work" unattended unless its text requires the presence of personnel. For example, you may discard '45 Dom Perignon to replace a ship without any personnel present, and a Plasmadyne Relay enhances the SHIELDS of an empty ship.

Because Equipment cards have no affiliation icons, they may be reported and carried in Away Teams or aboard ships (even by Borg) without regard to compatibility. Thus, a Bajoran Phaser may be reported to a Federation Outpost and carried by a Federation Away Team.

However, to *use* equipment that is restricted to the use of a specific affiliation/species, the Away Team or crew must contain at least one member of that affiliation or species. (See **affiliation and species, Procurement Drone**.) Once any requirements to *use* the equipment are met, it enhances *all* personnel specified by the card (e.g., "each of your personnel present"), not just the affiliations required to use the card.

Thus, Cardassian Disruptor ("Cardassian and Non-Aligned use only") enhances the STRENGTH of *all* personnel of any affiliation in an Away Team or crew containing any Cardassian by affiliation or species OR any Non-Aligned personnel. Bat'leth, on the other hand, has no restrictions on who may "use" it (e.g., anyone could discard it for points at Kressari Rendezvous), but it enhances *only* Klingons (by affiliation or species) in the Away Team or crew.

"Using" affiliation/species-specific equipment means deriving any benefit from it, including its stated game text purposes (e.g., enhancing STRENGTH), overcoming a dilemma (Zaldan), solving a mission (Samaritan Snare), or increasing its points (Kressari Rendezvous). Borg-affiliation personnel do not use hand weapons in any way, even if stolen.

A personnel whose restriction box states that he "does not use" a type of equipment may be in the same Away Team with it but may not enable its use and is not affected by it. For example, Odo's STRENGTH is not enhanced by hand weapons in his Away Team.

If an Equipment card, such as a Tricorder, grants a skill to personnel of a particular classification, *only* that classification (not a skill) will allow the equipment to function, and only a skill is granted (not a classification). Borg may not gain skills from such equipment, because they have no classifications, but they could use a Tricorder to pass Alien Labyrinth.

An Equipment card is "related to" a **personnel type** if it has that personnel type in its game text. For example, an Engineering Tricorder is

both MEDICAL-related and ENGINEER-related; a Plasmadyne Relay is not related to any personnel type.

See **movement**.

equipment – ship – See **special equipment**.

erase – See **holographic personnel and equipment**.

errata – See **revised text**.

Espionage cards – These events allow you to attempt a mission with personnel of a different affiliation from that printed on the Mission card. (Normally, a personnel of **matching affiliation** must be in the crew or Away Team.) They do not override cards that prevent you from attempting or solving an opponent's mission, such as Treaty: Federation/Romulan/Klingon. The affiliation reference does not include species (see **affiliation and species**).

A "Bajoran espionage card" is one that allows Bajorans to attempt another affiliation's missions. For example, Espionage: Bajoran on Cardassian is a Bajoran espionage card, while Espionage: Cardassian on Bajoran is a Cardassian espionage card.

Espionage Mission – Revised lore:

Sector 001 Region • Earth

You may attempt this mission if

- you play an Espionage: [your affiliation] on Federation card on the mission (e.g., Espionage: Klingon on Federation allows your [Klg] Away Team to attempt the mission); or
- you have Selok in your Away Team; or
- an objective specifically allows you to attempt it (e.g., HQ: Secure Homeworld allows your [Fed] Away Team to attempt it); or
- a card allows you to add your affiliation icon to the mission (e.g., Bribery adds a [Fer] icon which allows your [Fer] Away Team to attempt it).

Establish Gateway – Revised text:

Seeds or plays on table. Target a space mission with a point box, if not yet scouted. Your Borg may scout that location. After scouting complete, if you have Borg at that location, you may probe ...

Establish Tractor Lock – A cloaked or phased ship may not be targeted with this objective. Phasing an already-targeted ship breaks the tractor lock and discards the objective; cloaking an already-targeted ship does not. See **cloaking and phasing**.

Establish Trade Route – See **mission attempt**.

Evek – See **Non-Aligned**.

event – A card type representing an event that took place in the Star Trek universe. It may play on and affect another card, or may play on the table to have a widespread effect on various aspects of the game. While most events have a lasting effect on the game (unless the card is nullified or destroyed), a few say to discard them after use. A seedable event may be seeded during any **seed phase** unless otherwise specified. Playing an Event card uses your normal card play.

every turn – See **turn**.

exchanging cards – When a card in play is exchanged for another card (e.g., persona replacement, one Founder morphing into another, Young Jem'Hadar exchanged for a universal Jem'Hadar) or replaced (discarded) by a downloaded card, any cards already played on, placed on, or aboard the card that is leaving play transfer to the replacement card unless their results are now inapplicable. You do not re-check the conditions (or targets for playing a card) for such cards.

For example, you would discard Adapt: Modulate Shields from an Equipment card that morphed into a Founder using In the Bag, or discard Reflection Therapy if the skill it was

replacing did not exist on a new version of a persona just exchanged. However, damage can apply to both a Borg Ship dilemma and a Borg Cube, so any damage would transfer when **Retask** is played; and when a ship is transformed by '45 Dom Perignon, its crew transfers to the new ship.

When a card in play is *exchanged* for a card in hand (either by **persona** replacement or with a card that allows such an exchange, such as In the Bag), the new card is *not* reporting for duty. When a card in play is *discarded* and replaced by a card downloaded into play (e.g., Transporter Mixup), the downloaded card *is* reporting for duty.

executing orders – Following the card play segment of your **turn** (during which you may only play cards, download cards, and perform actions that suspend play or may occur "at any time"), you may optionally *execute orders* – that is, perform actions such as movement or a mission attempt, using your cards already in play. Using game text such as "cycling" a [Ref] card with Q the Referee is also executing orders. There is no limit on the number of orders you may execute in one turn. Executing orders includes (but is not limited to) the following actions during your turn:

- Moving personnel and equipment (see **movement, beaming, walking**)
- Staffing and moving ships (see **ship staffing, movement**)
- Attempting missions (see **mission attempt**)
- **Scouting** locations or ships (if playing Borg)
- **Commandeering** facilities or ships
- Initiating **battle**

Actions that are permitted **at any time** may be performed during your card play segment or your executing orders segment. Actions that you take during your opponent's turn are not executing orders.

Exocomp – See **android, gender**.

Explore Gamma Quadrant – See **Gamma Quadrant**.

Explore Interstellar Matter – If you have more than one copy of this mission on the table when you play Calamarain, your opponent may start your Calamarain at any one of those missions. See **for free**.

Extradition – You may take only one personnel captive with this dilemma, regardless of the number of SECURITY personnel you beam onto the ship. The captive must have lower STRENGTH than the *total* of the SECURITY personnel. See **dual-personnel cards**.

The dilemma does not allow a download of the SECURITY personnel, provide transporters or allow you to use your opponent's transporters, or allow **beaming** from a Nor. For example, the Cardassians downloaded to a planet or site with a preceding Sleeper Trap may not be used to take a captive with Extradition.

Eyes In The Dark – This interrupt adds the regular **skills** and attributes to the crew or Away Team as a whole, not to a single personnel. For example, if Kova Tholl is selected from the opponent's ship, your crew's total INTEGRITY is +8, total CUNNING is +6, and total STRENGTH is +2, plus one Diplomacy skill is added to the crew's pool of skills.

Ezri – See **Crossover**.

facility – A card type representing installations throughout the galaxy. There are three kinds of facilities: outposts, headquarters, and stations. (These are not considered separate card types.)

- Your *outpost* represents a remote space facility where your personnel, ships, and equipment may report for duty, and where ships may dock and be repaired.
- A *headquarters* represents an affiliation's center of government on its **homeworld**, where both players' personnel, ships, and equipment may report for duty.

- A *station* represents any one of a variety of installations such as mining stations, colonies, etc. The Cardassian-origin mining facilities of the same design as Deep Space 9 are referred to collectively as "Nors" and are always used in conjunction with another card type, **sites**. Stations do not allow reporting, docking, or repairs unless specified by game text on the station or its sites.

Card references to the "outpost phase" mean the facility phase. However, card references to the outposts (or stations) themselves do *not* include other facilities. For example, a Spacedock may be played *only* on an outpost, not on a station or headquarters.

Seeding and building facilities – Seedable facilities seed during the facility **seed phase** unless otherwise specified (e.g., Deep Space 9). Most outposts state "seed one" in game text, allowing each player to *seed* only one copy of that Outpost card. A few just say "seed," allowing you to seed multiple copies. Additional copies may be *built* during the play phase if the game text allows it, using your normal card play. The game text of each headquarters (and some stations) specifies that it is *not duplicatable*. A station that is not so labelled may be seeded or built in multiple. (See **unique and universal**.)

You may seed facilities (and build stations and headquarters) of any affiliation regardless of the affiliation(s) you are playing. All outposts that read "Seed one if playing [affiliation] OR build..." have received errata and now read "Seed one OR build..." You may build an outpost where you have a compatible ENGINEER of the specified affiliation or species at a suitable mission location. (See **affiliation and species**.)

Facilities may seed only in their **native quadrant** (but may be built during the play phase in any quadrant, if appropriate). You may seed or build an outpost only at a mission (either [P] or [S], belonging to either player) with a **matching affiliation icon** (unless the outpost's text specifies otherwise, such as the Neutral Outpost). You may not seed or build any outpost at any **homeworld** mission, regardless of affiliation icon, unless a card or rule specifies otherwise (e.g., a Borg Outpost may be built at an assimilated planet, even a homeworld). A headquarters may be seeded or built *only* on the specified homeworld. Stations may be established only at the locations specified on the cards. You may not seed or build any facility at a location where you already have a facility, unless one allows another to "co-exist" there (e.g., Chamber of Ministers). (However, you could have two facilities at a location as a result of moving or commandeering one.)

Most facilities (including all outposts) are conceptually located "in space," even when seeded or built at a planet location. (A few, such as headquarters, specify that they are seeded or built on a *planet*.) Only space facilities allow ships to dock.

Using facilities – You may not use your opponent's outposts (or operate their SHIELDS, transporters, holodecks, or other features), unless a card allows it. Both players may use headquarters and stations, regardless of ownership, unless otherwise specified. Your cards must be **compatible** with a facility (except a Nor) to report to, dock at, or enter the facility. They may report to or dock at any Nor according to the text of its site cards. They may board a Nor and exit from any facility even if incompatible with the facility. (See **beaming**.)

Whenever you have personnel or ships aboard (or docked at) a facility, stack them on top of the appropriate site (for a Nor) or underneath the Facility card (for any other facility). Stack personnel aboard a ship docked at an outpost underneath the Ship card; stack personnel

aboard the outpost itself between the Ship card and the Outpost card.

For personnel to use a planet facility (such as by scoring points at a Colony), you must indicate that they are "in" the facility by stacking the Away Team under the Facility card, rather than on top of the Mission card.

All facilities have transporters, unless otherwise specified. However, you may not beam cards (except tribbles) to, from, or within a Nor unless a card allows it. See **beaming**.

All outposts allow ships to dock. Other space facilities allow **docking** only if specified in their text (or the text of a docking site). When docked at a space facility, a ship is protected by the extension of 50% of the facility's SHIELDS (the number is added to the docked ship's DEFENSE total; the facility's SHIELDS are not reduced), but may not attempt missions or fire its WEAPONS, even in retaliation. Ships cannot dock at a planet facility and receive no protection from its SHIELDS.

Damaged ships may be repaired by docking at an outpost or Docking Pylons site for a period of time. See **repair**. No other facilities can make repairs unless specified in their game text.

Control of facilities – When you seed or build a facility, you control it, and it is under the control of the affiliation whose icon is printed on the card, regardless of the affiliations you are playing or treaties in effect. (**Empok Nor** seeds uncontrolled.) Thus, Deep Space 9 is under Bajoran control when you seed it, even if you are playing Federation (with or without a treaty).

When you commandeer a Nor, it is under the control of the **commandeering** affiliation. For example, if you commandeer your opponent's Deep Space 9 with your Romulan Away Team, its affiliation changes to Romulan, as though it were printed on the card. (Though it is flipped to the Terok Nor side, its affiliation is *not* Cardassian.) See **Ore Processing Unit**.

Reporting cards for duty – When a facility (or its site) allows you to **report** a card for duty, you may do so only if that card *and* the facility are both in their **native quadrant**. Equipment cards are native to all quadrants and thus may report to any appropriate facility that is in its native quadrant.

You may report any **compatible** cards to your outpost. Ships report docked.

Headquarters cards allow both players to report any compatible cards and to use the game text on the headquarters card. Reporting is *not* restricted to the cards listed on a Headquarters card, such as Cardassian Guls and Legates, which may report for free. (See **characteristics**.) Ships report in orbit of the planet.

You may report cards to sites only in accordance with the text of the Station and Site cards (**matching affiliation**, **compatible**, or "regardless of affiliation"; if not specified, compatibility is not required). Each site lists in its game text what kinds of cards may report to that site (personnel classifications, types of equipment, staffing requirements for ships). Ships report docked at an appropriate docking site. Reporting cards to *any* site is allowed *only* if that Nor has at least one docking site. Stations without sites (such as Colony and Deep Space Station K-7) do not allow cards to report unless the station itself has text explicitly allowing reporting.

Battle – Facilities participate in battle and are damaged or destroyed in the same manner as ships. See **battle – ship, damage**. When a facility is destroyed, all personnel aboard or "in" the facility are killed. Ships docked at the facility are *not* destroyed (except those landed on Docking Pads).

facility phase – See **seed phases**.

Fair Play – Revised text:

Seeds or plays on table; may not be nullified. No player may solve an opponent's unique mission unless its point box shows at least 40 points OR both players have a copy of it in play.

Activating this hidden agenda event is a valid response to solving a mission, a sub-action of the mission attempt. After the last seed card has been resolved, check conditions (having a matching affiliation personnel and the mission requirements present) for solving the mission, after which your opponent may respond by activating Fair Play, which prevents solving the mission. It is not a valid response to the initiation of a mission attempt, because it does not specifically modify a mission attempt. See **actions – step 2: responses**.

You may not solve your opponent's unique mission without a **point box** (e.g., Q's Planet). **Espionage cards** or other cards that allow you to attempt missions of other affiliations will *not* allow you to solve an opponent's unique mission if this event is in play.

Fajo's Gallery – The card draws allowed by this event are a "just" action that must be performed immediately after the action occurs which allows the card draws. See **actions – "just"**.

far end of spaceline, farthest planet, etc. – When a dilemma is to be placed at or move toward the far end or long end of the **spaceline**, once determined (see **ties**) the far end or long end does not change. That is, if the far end is the left end, it remains the left end even if the spaceline is rearranged.

Federation – An affiliation.

♦ **Federation Outpost** – See **outpost**.

Feedback Surge – This incident causes your opponent to lose 10 points for each seed card he discards using the listed cards, whether you reseed them or not.

Ferengi – An affiliation and a species. See **affiliation and species**.

Ferengi Bug – See **Telepathic Alien Kidnappers**.

Ferengi Conference – If you download a **dual-personnel card** with this objective, only the [Skill] icons of Ferengi CIVILIANS on the card count toward the maximum of 11. For example, if you download The Trois, only Deanna's [Skill] icons count, but if you download Jake and Nog, all their [Skill] icons count.

Ferengi Financial Data Net – "Unique" means "non-universal" (not "the only copy in play"). For example, this event allows you to draw a card for each copy of Quark you have in play.

Ferengi Ingenuity – When affected by Access Denied, this dilemma reads as follows: "If one personnel present has 3 Computer Skill, discard dilemma. Otherwise, to get past, place on 2 most CUNNING Computer Skill personnel present ("stopped" during countdown)."

Ferengi Trading Post – Both players may use this outpost regardless of ownership. Your cards (including ships) may report and mix aboard (i.e., they are compatible with each other and with the outpost), board and disembark from your own ships, dock and undock, and beam to and from the outpost.

FGC-47 Research – The minimum span for this mission is 0.

Fifth – This personnel cannot return to hand a [BO] objective which has been completed and relocated. See **in play**.

Firestorm – Errata:

Kills all Away Team members with INTEGRITY<5 ~~unless thermal defectors present~~ (but Away Team may escape using Emergency Transporter Armbands). Discard dilemma.

The original text on this dilemma referring to Thermal Defectors is redundant; that event specifies that it nullifies Firestorm.

For Cardassia! – You may play multiple copies of this objective on multiple legates. If they all help complete HQ: Secure Homeworld, you may discard each objective; only one may place cards out-of-play to score points, while the rest may each download two Cardassians with Honor. See **helps**.

for free – A card that plays (or reports) *for free* does not count as your normal card play. It must be played during the card play segment of your **turn**, unless otherwise specified.

for uniqueness only – See **in play**.

force – A group of cards belonging to one player which may participate in a **battle**. In personnel battle, a force may be an Away Team or crew. In ship battle, a force may consist of one or more ships and/or facilities, including their crews (or your Away Team in your planet facility).

A force may include one or more affiliations which can restrict it from initiating battle or prevent it from being attacked. For example, any force which includes at least one Federation-affiliation card, such as a Non-Aligned ship with a mixed Non-Aligned/Federation crew, is a Federation force and may not initiate battle except against Borg. A Klingon ship with a mixed Klingon/Romulan crew is both a Klingon force and a Romulan force. It may not initiate battle against Romulans or be attacked by the opponent's Romulan force.

Forced Labor Camp - This objective refers to two planet locations: Cardassia IV (Rescue Prisoners) and Ligos VII (Distress Mission). See **mission attempt**.

Founder – This characteristic is a "political" designation, not a species. A personnel is identified as a Founder in its name (card title). Although Founders are changelings (a species) and shape-shifters, the terms are not interchangeable. For example, Odo is a changeling but not a Founder. A card that refers to a Founder (e.g., "your Founder") means any Founder, not necessarily the card named ♦ Founder.

Fractal Encryption Code – A ship affected by this interrupt may move by a means that does not require use of RANGE (e.g., Wormholes, time travel).

Frame of Mind – Revised text:

One personnel present (random selection) now becomes Non-Aligned with attributes of 3-3-3 and only two skills (opponent's choice). Cure with 3 Empathy present.

The personnel affected by this dilemma **loses affiliation** (as with Memory Wipe). All skills are lost and any two regular skills in the game may be selected. See **timeline disruption, skills – modifying**.

Frank Hollander – This personnel is "any Data," but is not a version of the Data persona.

Friendly Fire – This dilemma is discarded immediately if its conditions (2 Leadership and 2 SECURITY) are met when encountered. It is not placed on the mission to count down. See **dilemma resolution**. When placed on **Empok Nor**, it prevents both commandeering attempts (dilemma encounters) and actual **commandeering**.

Full Planet Scan – Revised text:

Glance at all seed cards located under one planet mission for twenty seconds.

full speed – See **actions – required**.

full turn – See **turn**.

game deck – See **deck**.

game text – Gameplay information in the large text block at or near the bottom of each card (or on each end of a Mission card). See **mission**.

Gamma Quadrant – A “Gamma Quadrant mission” is a mission with a Gamma Quadrant Γ icon in its point box.

Gamma Quadrant icon Γ [GQ] – Personnel, ships, and facilities with this icon are native to the Gamma Quadrant. See **native quadrant**.

Gaps In Normal Space – This event creates a spaceline location of unspecified type. If the event is nullified (discarded), the “gap” in the spaceline is closed. Any cards played directly on the event are also discarded. Any ships or other cards at that spaceline location are relocated to one adjacent spaceline location by the player who nullified the event.

Garak – Errata:

May replace anyone **present** randomly selected to die **here**.

Garak Has Some Issues – The personnel affected by this dilemma is “stopped” only until the beginning of the next turn, as usual.

Gegis – This personnel’s special skill makes all your [Holo] and [Fer] personnel at his location **compatible**.

gender – Gender may be male, female, or neuter (which includes androgynous, such as Soren). Borg drones have no gender, even if gender-specific pronouns are used in their lore. Whenever a personnel’s gender is not indicated by the card’s image, game text, title, or lore, that personnel is considered to be male.

General Korrd – See **Release This Pain**.

Genesis Device, The – Once placed atop a mission, this artifact is no longer being used as an Equipment card, may not be destroyed by Disruptor Overload, stolen, etc., and may not be removed from the mission like equipment. It cannot be used to alter the point value of a mission that is already solved. See **playing an affiliation, point box**.

Genetronic Replicator – This event affects only Away Teams, not crews. (See **Away Team and crew**.) Thus, it can prevent the death of your personnel aboard an opponent’s ship, but not aboard your own ship. The 2 MEDICAL required to prevent deaths must be present in the Away Team with the personnel selected to die (e.g., in the combat group for a personnel battle, or in the Away Team facing a dilemma), and must not themselves be stunned, disabled, mortally wounded, or otherwise selected to die. For example, Genetronic Replicator cannot save anyone from Barclay’s Protomorphosis Disease because all MEDICAL present are targeted to die. See **battle – personnel**.

Personnel are not “stopped” by the use of this event, although they may be “stopped” by the action or card that would have caused their deaths (e.g., battle, failing to overcome a dilemma).

George and Gracie – Gracie’s special skill works while this **dual-personnel card** is on planet at Espionage Mission (Earth) or at any time location identified as Earth (unless its text says otherwise, such as Cetacean Institute). See **ANIMAL**.

Gift of the Tormentor – You cannot encounter this Q-icon interrupt from your own **Q-Continuum side deck**. See **Q-icon cards**. Because it specifies that it is placed in a discard pile, this card overrides the rule to replace it face up beneath your Q-Continuum side deck.

Gi’ral – This personnel must be made **compatible** with Tokath to build a Colony with him.

Going To The Top – In order to download a personnel with this interrupt, the personnel card must be identified by one of the listed **characteristics** in its card title or lore. Thus, Kahless may be downloaded (“Installed as a ceremonial Emperor...”), but not Gowron, whose lore does not state that he is a

chancellor. The downloaded personnel must be compatible with the two [Cmd] personnel.

Gomtuu – This ship’s WEAPONS are an **undefined attribute**.

In a ship battle that includes Gomtuu, determine your ATTACK total normally, with Gomtuu contributing 0. Regardless of whether you score a hit, determine at this time (before damage is applied) whether Gomtuu is able to “hurl” the target; it may do so only if the target’s SHIELDS (*not* the DEFENSE total) are less than 9. If so, “hurl” the ship after any damage for a hit or direct hit is applied.

“Hurling” a ship does not in itself damage the target. Gomtuu cannot target or “hurl” any facility. See **battle – ship**.

Empathy x2 is a staffing requirement, not a special ability of the ship.

Gowron of Borg – See **counterpart**.

Grebnedlog – If this personnel captures an ENGINEER who received that skill from an Equipment card, the Equipment card is *not* relocated along with the captive.

group actions – See **actions – group**.

Guardian of Forever, The – To use this doorway to “return here from there,” at least one of the personnel returning from the time location must have originally time traveled to that time location from planet Gateway using The Guardian of Forever. They may perform other actions (including other forms of time travel) between the original time travel and the return. To draw cards, your Archaeology or Anthropology personnel must **time travel** to, and return from, a time location using the Guardian.

Guest Quarters – “Not cumulative” on this site means that if you have two Guest Quarters sites in play, you may not use the text of both sites to replace one card draw with a double draw. If you are entitled to two card draws during a turn, you could replace each of them with the double draw from one of the two Guest Quarters sites.

Guramba – A Nausicaan skill from a word meaning “courage.” Wherever your crew or Away Team has Guramba, your opponent must have two **leaders** present (Borg must have two [Def] personnel instead) in order to initiate a *personnel* battle (unless counter-attacking). Guramba has no effect on ship battle.

Hail – Although the ship targeted by this interrupt is not “stopped” (e.g., it may initiate battle or attempt a mission), it may not move this turn. See **passing locations**.

hand weapon – A hand weapon is any Equipment card (or card “used as equipment”) which is identified in its title or lore as a phaser, disruptor, blade weapon, or weapon (if it is clear from the lore, game text, and/or image that it is used as a hand weapon). **Echo Papa 607 Killer Drone** and **Borg Nanobrobes** are not hand weapons.

Handshake – When you play this incident for its first function, the number of cards you have in hand includes the Handshake card.

Harness Particle 010 – This objective does not work with Service the Collective or Population 9 Billion – All Borg, because it does not target a mission (it targets an **Omega Particle**). However, because the objective allows **scouting** of the location, your Borg may acquire any **artifact** or card seeded like an artifact if the Survey Drone is present when you complete Harness Particle 010. See **doubling**.

Hate Crime – See **species**.

Hawk – See **nebula**.

He Will Make An Excellent Drone – Converting a **counterpart** to a drone with this interrupt (either a Borg pre-assimilated counterpart or your opponent’s personnel that you assimilated as a counterpart) transforms the counterpart as if he were being

assimilated as a drone. That is, it retains its existing three subcommand icons and its attributes become 7-7-7. See **assimilation – personnel**.

headquarters – A kind of **facility**. When a headquarters allows a Personnel card to play “here” for free, that personnel must report *inside* the headquarters (as with normal reporting using your card play). The term “here” applies to the free play of HQ cards, which can play anywhere at that location (e.g., on the homeworld, or on a personnel aboard a ship or facility at the homeworld).

helps – A personnel *helps solve* a mission or *helps complete* an objective if he actively contributes a skill, attribute, or characteristic required by the mission or objective. Just being in the Away Team or crew is not “helping.”

here – In the context of a specific site, the word “here” (or “there”) means at that site. In the context of a spaceline location or timeline location, it means anywhere at that **location** (e.g., on the planet, aboard a ship in orbit, on a facility there). See **headquarters**.

Hero of the Empire – The mission point adjustments from this objective apply to all missions completed during that game, even those completed before the timeline disruption. Because the mission points are changed, the adjustments are non-bonus points. See **objective, mission**.

hidden agenda [HA]– Cards with this icon represent secret objectives or other clandestine strategies. When you seed or play such a card, announce it as a hidden agenda card and place it face down on the table, normally without showing it to your opponent (if downloaded or played for free, e.g., using Q the Referee, the card must be shown for verification purposes). This counts as your turn during that seed phase, or as your normal card play, as appropriate. While face down, it is not **in play**, its identity is concealed, and it is immune to general-use cards (e.g., Kevin Uxbridge).

You may *activate* a hidden agenda card by turning it face up at any time, between other **actions** or as a valid response to another action (see **actions – step 2: responses**). Activating a hidden agenda does *not* suspend play. (A seeded hidden agenda may not be activated until after the play phase begins.) This immediately activates the card’s game text. If there are any conditions specified by the card, you must meet them at this time (if you cannot, you must immediately turn the card face down again). Once activated, the card remains face up.

When you use a special download [SD] icon to download a hidden agenda card, you must play that card to the table, then immediately activate it and follow its game text (targeting something at the location of the special download icon if applicable).

If you seed or play a card as a hidden agenda when it does not bear a hidden agenda icon, you **lose the game**. Upon request, you must show any such cards at the end of the game to verify their status.

If a card such as The Line Must Be Drawn Here or Mirror Image is activated in response to the play of one of the cards affected by it, it takes effect immediately in reference to that card play. For example, if you activate The Line Must Be Drawn Here in response to your opponent playing Kevin Uxbridge, he loses 5 points for playing that card (even if it is then nullified).

Hidden Fighter – This interrupt downloads a ship to your Away Team on a planet surface (outside a facility or landed ship).

Hide and Seek – This Q-icon dilemma/event can be used in three different ways:

1. Seed it directly under a mission like a normal dilemma.

- Seed it face down on the table as a hidden agenda event.
- Stock one or more copies in your **Q-Continuum side deck**; whenever your opponent faces one, you decide whether it is a dilemma or an event (the latter is played face up on table).

The first two uses do not require you to have a Q-Continuum side deck or a seeded Q-Flash doorway.

If you encounter one copy of this card seeded under a mission as a dilemma, and another copy during a Q-Flash encountered under the same mission, both cards have their effect. A second copy would be discarded only if both were seeded under the mission, or if both were encountered during a single Q-Flash. See **Q-icon cards**.

The universal personnel which triggers discarding of the dilemma is "stopped."

When your opponent overcomes his own Q dilemma, you activate this card seeded as an event *after* he discards the remaining dilemmas, which may be among those you seed under the mission.

Hippocratic Oath – This dilemma may not relocate across quadrants except when the Aid Fugitives mission is in play (in which case, it *must* relocate there). See **movement between quadrants**. If there is no other planet on the spaceline where this dilemma is encountered (and Aid Fugitives is not in play), discard the dilemma for lack of a target planet.

To pass this dilemma, the most CUNNING MEDICAL personnel must be able to relocate to another planet and still have MEDICAL skill after relocating. If he is unable to meet these conditions (e.g., a **holographic personnel** without a Mobile Holo-Emitter, or a Borg which has MEDICAL skill through skill-sharing), or if there is no MEDICAL present, the Away Team or crew is "stopped" and the dilemma is replaced under the mission. (You may not choose to relocate a MEDICAL of lower CUNNING.) If the most CUNNING MEDICAL is an OFFICER enhanced by a Medical Kit, the Medical Kit must relocate with him. See **quarantine**.

Hirogen – An affiliation and a species. See **affiliation and species**.

His Honor, The High Sheriff Of Nottingham – When you choose the second option on this Q-icon dilemma ("return a captive to this location"), you select one of your personnel held captive by your opponent to be returned to the location of your crew or Away Team which encountered the dilemma. The dilemma has no effect on any of your opponent's personnel whom you are holding captive. See **capturing**.

hit – If your ATTACK total is more than your opponent's DEFENSE total, you score a *hit* on the target ship. "If you hit" means "if you score a hit or direct hit." See **battle – ship**.

hive – All of one player's [Borg] affiliation cards at one location, whether in space, on a planet, aboard a ship or facility, etc.

holodeck – A type of **special equipment**, found on ships and a few facilities, which permits **holographic personnel and equipment** to be used aboard.

Holodeck Door – This doorway in play on a facility allows your compatible [Holo] cards to **report** aboard regardless of quadrant.

holographic personnel and equipment – Holographic [Holo] personnel and equipment can only exist aboard ships and facilities unless a card such as **Holo-projectors** allows it to exist elsewhere; they are deactivated if the ship or facility they are aboard does not have a Holodeck they are allowed to use. (A deactivated personnel is **disabled**; a deactivated Equipment card may not be used in any way.) However, a hologram who is wearing a Mobile Holo-Emitter does not need

a Holodeck and is not confined to ships and facilities. If their Emitter is removed when they are not aboard a ship or facility (or on a planet with Holo-projectors), they are erased (discarded).

A hologram is deactivated when reported, and may be activated on the same or a subsequent turn (if aboard a ship or facility with a Holodeck, or wearing a Mobile Holo-Emitter) by any of your "unstopped" personnel present (even another active hologram). If your hologram is later deactivated, it may be reactivated in the same way during one of your subsequent turns (not on the same turn it deactivates).

- **Death and Destruction:** When a holographic personnel would normally be killed (or a holographic Equipment card would be destroyed), whether by battle or by a card, they are instead deactivated. (A hologram that is "discarded" or "erased" goes to the discard pile.) If a ship or facility is destroyed, any holographic cards aboard are discarded.

- **Dilemmas:** If a dilemma (or other card, such as Escape Pod or Penalty Box) requires a hologram to leave a ship, facility, or planet with Holo-projectors, without immediately boarding another ship or facility, they instead deactivate (unless they are wearing a Mobile Holo-Emitter).

- **Battle:** "Holographic safety protocols" normally prevent holograms from killing other personnel. They may stun (but not mortally wound) non-holographic adversaries. If total STRENGTH at the end of a battle is entirely derived from holograms, they may win the battle but may not kill an opposing personnel.

- **Assimilation:** Borg do not assimilate (or target for assimilation) holographic personnel. Exclude holographic personnel from any selections for abduction or assimilation.

- **Capturing:** A hologram without a Mobile Holo-emitter may be captured if it can be relocated to the opponent's crew aboard a ship or facility at the same location; otherwise it deactivates because the trap card would remove it from the ship. (A hologram with a Mobile Holo-emitter is captured normally.) See **capturing**.

Except as noted above, holographic personnel should be treated exactly like normal personnel. They do not require any "supervision" from other personnel when staffing ships, attempting missions, etc.

Regardless of their appearance or lore, the gameplay **species** of all holographic personnel is "hologram." Thus, Sumeck may not use a Vulcan Nerve Pinch, nor may Data if a [Holo] icon has been added to him by Hologram: 221B Baker Street. Holograms may use game text relating to affiliation. For example, when in [Hir] mode, Iden may use a Hirogen Talon.

Hologram: 221B Baker Street – When a personnel is placed on this incident, your copies do not have a [Holo] icon until they are in play; you may not report them as [Holo] personnel (e.g., to a ship with a Holodeck Door).

Hologram: The Office of Dixon Hill – If your opponent chooses the first option when you use this incident to request "the item," and you cannot legally play the card (or choose not to), you may not draw a card.

Holo-projectors – Errata:

Plays on table. This technology allows your holographic re-creations to be projected and used on any of your ships or Away Teams. (Immune to Kevin Uxbridge.) Plays on a planet mission. [Holo] cards may exist on this planet.

This event, like a Holodeck, allows [Holo] cards to be active on a planet surface or

inside any facility or landed ship on that planet. It affects both players' [Holo] cards. If the event is nullified while [Holo] cards are on the planet without a Mobile Holo-Emitter, they are erased. See **holographic personnel and equipment**.

Holosuite – This site allows only personnel native to the quadrant to **report**.

Home Away From Home – See **infiltration icon**.

Homefront – This incident has no effect on headquarters game text allowing seeding or playing of the headquarters or co-existence with another facility, or on normal reporting to the headquarters. A player without 4 SECURITY on the planet is prevented only from using text allowing free card plays and The Great Link's text keeping Ketracel-White from counting down.

A SECURITY personnel downloaded with this incident may not report for free using the text of a headquarters or other card. Your normal card play is an explicit cost of the download. The personnel must match both the affiliation and universe of the homeworld. See **mirror universe**.

homeworld – Most affiliations have their own homeworld, as indicated in the lore of the relevant Mission cards:

- Alter Records – "Bajor ... Bajoran homeworld"
- Orb Negotiations – "Cardassia Prime ... Cardassian homeworld"
- Intelligence Operation – "Founders' homeworld ... Dominion homeworld"
- Espionage Mission – "Earth ... Federation homeworld"
- Deliver Message – "Ferenginar ... Ferengi homeworld"
- Expose Covert Supply – "Qo'noS ... Klingon homeworld"
- Cloaked Mission – "Romulus ... Romulan homeworld"
- Disrupt Alliance – "Mirror Universe ... Bajor ... Bajoran homeworld"

The affiliation "matching a homeworld" (e.g., for HQ: Secure Homeworld) is the affiliation to whom the homeworld belongs, not the affiliation(s) whose icons may be printed on the mission. To match a homeworld affiliation, a personnel or ship must also match that homeworld's universe. See **mirror universe**.

Only affiliations have homeworlds. For example, Symbiont Diagnosis, Observe Ritual, and Liberation are not homeworlds because Trill, Vulcan, and Ocampo are not affiliations.

No outposts may be seeded or built on any homeworld. Other facilities may be established there if the location meets the requirements of the Facility card.

Horga'hn – When you earn this artifact, you may take another turn immediately following your current turn.

You "use" the Horga'hn (for purposes of cards such as Temporal Narcosis and Writ of Accountability) each time you choose to take a **double turn**. You are not required to take double turns.

house arrest – Your personnel may mix only if they are **compatible**. If you have personnel of different affiliations together aboard your ship or facility, and the treaty or other card that is making them compatible is nullified, the personnel who are incompatible with the ship or facility are placed under *house arrest*. If all are compatible with the ship or facility, or at the same site on a Nor, or aboard your opponent's ship or facility, the minority group is placed under house arrest. (Incompatible personnel on a planet surface split into two Away Teams instead.) They remain under house arrest until they are transferred to a planet or to your compatible ship or facility, or they walk to another site.

Personnel under house arrest may not staff a ship, attempt missions, participate in battle, etc. (See **present**.) You place under house arrest only cards you control – never your opponent's intruders, captives, etc.

House arrest may also occur when you acquire an incompatible personnel aboard a ship (e.g., from a Cryosatellite or The Naked Truth). However, you may not *voluntarily* place your personnel in a house arrest situation. For example, without a treaty, you may not report a Klingon to a Romulan Outpost or Romulan headquarters (or to a Neutral Outpost where you have Romulans present), beam your Klingons aboard your Romulan ship, allow your Klingons and Romulans to stop at the same site, report Dr. Telek R'Mor aboard your Klingon ship, or switch Major Rakal's affiliation to Federation while she is aboard a Romulan ship. See **treaties**.

HQ: Defensive Measures – For this objective, "attempting" to seed a copy of a mission means seeding a copy. For example, if both you and your opponent seeded ♠ Patrol Neutral Zone, he may attempt your copy. (Duplicated unique missions which are stacked are always considered "your mission.")

HQ: Ferengi Credit Exchange – This incident has three separate options: "score 2 points," "draw one card," and "place any one card from discard pile beneath draw deck." You may choose only one option for each Latinum discarded.

HQ: Orbital Weapons Platform – This incident may "fire upon" a target even if you do not have **damage** markers to place on it (you may not apply rotation damage instead), and may still exclude the target from battle. It may "fire upon" an opposing ship that was not participating in the attack; that ship becomes involved in the battle (and is therefore "stopped" afterward).

HQ: Return Orb to Bajor – The Mysterious Orb may be earned upon encounter by the [Orb] personnel affected by this objective, but it may not be "returned to Bajor" for the card draw or points, because it cannot be "present" with that personnel on Bajor. See **encountered**, **present**, **stealing**.

HQ: Secure Homeworld – See **mission attempt**.

HTSBEG – Holographic Tal Shiar Barbering and Engineering Guild. Covert intelligence agency jointly operated by Romulans, Bolians, and disguised quantum singularity lifeforms. Rumored to have infiltrated Sector 001 Headquarters and to have significant influence on expansion plans in the quadrant. Recently scored a major coup by gaining control of communications and intelligence.

Hugh – This interrupt nullifies the attack of the Borg Ship dilemma (for the rest of the turn), not the Borg Ship dilemma itself. All cards targeted by the cancelled attack are "stopped." See **battle**.

HULL integrity – If a ship or facility (or the Borg Ship dilemma) has its HULL integrity reduced to 0, it is destroyed. See **damage**.

human – See **species**, **timeline disruption**.

Hunter Gangs – See **zero**, **dilemma resolution** – **Targets**.

Husnock Outpost – You may seed more than one of these outposts at separate missions, but you may not build any additional ones during the game.

Hyper-Aging – See **quarantine**.

I Do Not Take Orders From You! – This interrupt cannot be used to kill Rogue Borg.

I.K.C. Bortas – Revised lore:

Flagship commanded by Gowron during the Klingon Civil War of 2367-68.

I.K.C. T'Ong – This ship can report to any **spaceline end**, in any quadrant. It may report

to a facility only if located at a spaceline end. The report with up to three personnel is *not* a **report with crew** action (full staffing is not required, and no equipment may report).

icons – In this Glossary, icons are represented by text in square brackets. Most icon abbreviations are listed in Appendix B; a separate full-color icon identification sheet is also available on www.decipher.com.

icons in game text – Game text may use an icon to refer to a trait of another card, such as a [Fed] personnel or a [Ref] card. Such a reference always refers to an icon in its normal location on a card, not to an icon within game text. For example, Q the Referee allows a [Ref] card to play for free, meaning any card identified by the [Ref] icon in its title bar (or with the icon added by Q the Referee). Saavik and Chula: Crossroads are not [Ref] cards, even though they have the [Ref] icon in their game text.

Iconia Investigation – Revised lore:

Neutral Zone Region • Iconia

immune – If a card is *immune* to another card, it may not be affected by that card in any way. For example:

- An Event card that is "immune to Kevin Uxbridge" may not be nullified by Kevin Uxbridge.

- When Adapt: Modulate Shields is played on a Vidlian Harvester, your Borg may not be stunned or mortally wounded using that weapon, and it may not be used to harvest their organs with Organ Theft.

Impersonate Captive – See **skills** – **modifying**.

impersonator – See **persona**, **infiltration icon**.

implant card – This phrase, used on Assimilation Table, refers to any card with the word "implant" in the title, such as Optical Implants.

Impose Order – After this mission has been solved, non-Borg players can "steal" its points back and forth from each other (slide the Mission card toward whomever stole the points last).

Impressive Trophies – See **selections**, **showing your cards**.

in orbit – A ship is *in orbit* or *orbiting a planet* when it is in space, undocked, at a planet location. A docked ship is not considered to be in orbit even if the facility is orbiting a planet.

in place of a card draw – See **card draw**.

in place of normal card play – See **card play**.

in play – A card is "in play" if it

- has been played or seeded face up; or
- has been exchanged for a card already in play; or
- has been activated by turning it face up (hidden agendas); or
- has been encountered like a dilemma or during a Q-Flash; or
- has been earned or acquired like an artifact (unless placed in the hand for later play); AND it has not left play.

A card in play may leave play by being discarded (to the **discard pile**, **bonus point area**, The Next Emanation, etc.), placed **out-of-play**, re-seeded (e.g., with Q-Type Android), relocated as a marker (e.g., a completed objective such as Assimilate Homeworld), or returned to a player's hand, draw deck, or side deck; it is then no longer "in play." (A card such as Jem'Hadar Shrouding may also specify that certain cards are not in play.) Any cards placed on (or under) or played on (or aboard) that card are treated likewise (except cards which are *exchanged* for a card in hand or *replaced* by another card, and cards which are protected from Borg timeline disruption; see **exchanging cards**, **Stop First Contact**).

Thus, a Personnel card is "in play" whether reported for duty, exchanged for another persona version, or recovered from an earned Cryosatellite. The personnel aboard a Cryosatellite are not "in play" until the Cryosatellite is earned and the personnel come aboard the ship. Personnel who are captured, in a Penalty Box, under The Nexus, "held" by a dilemma, or "lost" to Thine Own Self, are still in play.

Game text may say that a Personnel card placed in the point area is *in play for uniqueness only* – if non-universal, you may not report another copy of that personnel (or another version of that persona). Cards in **stasis** or in a **Temporal Rift** or Time Travel Pod are also considered in play for uniqueness only. The skills and other features of such cards may not be used. For example, Kai Opaka placed in your bonus point area with Duranja does not prevent Orb artifacts from being nullified; while in a Temporal Rift, 10 and 01 cannot nullify Computer Crash and The Emissary does not enhance the INTEGRITY of Bajorans in play. However, you may not play another copy of Kai Opaka, 10 and 01, or The Emissary (or any other version of the Benjamin Sisko persona) under these conditions.

When a personnel or ship leaves play, all previous effects on that card are cancelled (except use of a **once per game** function). If the same card is reported again, treat it as if it were a new copy of the card being reported. For example, replayed cards are "unstopped," a ship is undamaged and any RANGE used this turn is restored, a personnel is no longer affected by Frame of Mind, and one who has already "walked" this turn can walk again.

When an effect depends on another card "in play" or when another term not specifying "present," "with," or "location" is used, it may benefit from either player's card (unless "your" or "opponent's" is specified, as with Ressian Flute or Flaxian Assassin). Examples:

- Your opponent's Kareen Brian enhances your Ira Graves' skills.
- Your K'nera scores points if either player's Korris or Konmel is killed in battle.

Disabled cards and cards in play for uniqueness only cannot trigger such effects.

In the Zone – For this incident, the **points** you score during a turn are the net total of positive and negative points scored. The points that do not count toward winning are the last positive points scored during a turn in which you score more than 50 points. For example:

- You complete a mission for 45 points. Later that same turn, you complete a Cytherians dilemma for 15 points, for a total of 60 points. 10 of the 15 Cytherians points do not count toward winning.
- Reversing the previous example, you complete a Cytherians dilemma and then solve a 45-point mission on the same turn. 10 of the mission points do not count toward winning.
- Continuing the second example, you then score -5 points from The Higher... The Fewer in the same turn. You now have a net total of 55 points; 5 of the mission points do not count toward winning.

The effects of In the Zone, **Intermix Ratio**, and **Altonian Brain Teaser** are independent; each one could affect the same points. If you are affected by more than one of these cards, evaluate your points that count toward winning for each card separately; the lowest total is your current "points that count toward winning." Example:

- You are affected by both Intermix Ratio and In the Zone. You solve a mission for 30 points and earn a Ressian Flute with 9 Music personnel in play. Your actual score is 75. For In the Zone, 25 Ressian Flute points do not count toward winning, for a

"winning score" of 50. For Intermix Ratio, 15 points do not count towards winning, for a "winning score" of 60. In the Zone this limits you to 50 points counting toward winning.

- Next turn you score 15 bonus points for a total score of 90. For In the Zone, 25 points still do not count toward winning, for a "winning score" of 65. For Intermix Ratio, 30 bonus points do not count toward winning, for a "winning score" of 60. Now Intermix Ratio is the card that limits your score to 60 points toward winning.

incident – A card type similar to an Event card. It may play on and affect another card, or may play on the table to have a widespread effect on various aspects of the game. Most incidents have a lasting effect (unless the card is nullified or discarded according to its game text). A seedable incident may be seeded during any **seed phase** unless otherwise specified. Playing an Incident card uses your normal card play.

Incoming Message – Federation, etc. – See **outpost**.

Incoming Message: Attack Authorization –

If you use this interrupt to attack your own ship when using a Battle Bridge side deck, you may draw and use a current tactic. The single current tactic applies to both the attacking and defending ships. However, if either of your ships is damaged, damage is applied as usual from your *opponent's* Battle Bridge side deck (or rotation damage if he has no side deck). See **battle – ship**.

infiltration icon <Fed> <Klg> <Rom> <Baj> <Dom> – Your personnel who has a diamond-shaped infiltration icon may infiltrate your opponent's cards, if your opponent is playing that affiliation, in one of two ways:

- It may report to your opponent's side of the table, to a compatible facility (regardless of quadrant); or
- It may report for duty normally, and infiltrate later in the game, during either player's turn, if present with an opponent's crew or Away Team compatible with that affiliation.

If your opponent is not playing that affiliation, you may not infiltrate his cards with that personnel. See **playing an affiliation**.

When your personnel starts infiltrating, its affiliation changes to match that of the infiltration icon and it becomes an *infiltrator*.

- The infiltrator is part of your opponent's crew or Away Team, but is still under your control. For example, your opponent may not treat the infiltrator as "his personnel" to benefit from his hand weapons. (Your infiltrator may not take your equipment into your opponent's Away Team.)
- Your opponent may not treat your infiltrator as an intruder (e.g., his cards cannot initiate battle against your infiltrator, and vice versa). However, you may treat your infiltrator as an intruder for cards such as The Walls Have Ears.
- Whenever any of the opponent's personnel present take any action (e.g., beam, attempt a mission, initiate a personnel battle), your infiltrator may choose whether or not to participate (or to contribute to ship staffing requirements). He may also move independently, during your opponent's turn, by beaming, walking, etc. He may control the opponent's transporters and SHIELDS long enough to move or beam himself to, from, or between your opponent's ships, facilities, etc. He may not take any other actions unless specifically allowed by a card.

Your infiltrator stops infiltrating if he is "exposed" during either player's turn, either voluntarily; by a card such as Caught Red-Handed; by being present with any true or mirror **version** of the **persona** he or she is impersonating; or by returning to your own

crew or Away Team. When exposed, that personnel reverts to its previous affiliation and is no longer an infiltrator; if aboard the opponent's ship or facility, he becomes an intruder. He cannot infiltrate again until after being away from (not present with) all of the opponent's personnel.

If an incompatibility situation arises where your infiltrator would be placed under **house arrest** by your opponent, the infiltrator may choose to be exposed instead.

infiltrator – A personnel with an **infiltration icon** is not an infiltrator unless he is actually infiltrating the opponent's cards. A personnel who is infiltrating cannot oppose the opponent's cards unless allowed by a card. Mirror versions of personnel are not impersonators or infiltrators. See **persona – Mirror versions**.

insert into spaceline – When a card is allowed to be *inserted* into the spaceline, it may be placed at either end of the spaceline or between two cards already on the spaceline.

Intercept Maquis – See **WEAPONS**.

interceptor – Some ships of this class have a variable RANGE. For example, Bajoran and Alliance Interceptors have RANGE 5+X, where X=4 if moving within a region.

When you move one of these ships from a location in a **region of space** to another location in the same region, without "flying past" any location that is not part of the region (e.g., an inserted ♦ Space), your maximum available RANGE is 9 (less any RANGE already used that turn). At all other times (including when the ship is not moving), your maximum RANGE is 5, less the RANGE used that turn.

Thus, when moving from Kressari Rendezvous (Cardassia Region, span 2) to Establish Station (no region, span 5), your RANGE is 5 and will be exhausted by the move. When moving in the other direction, your RANGE is also 5, and at the end of the move your remaining RANGE is 3. If you then make a separate move from Kressari Rendezvous to the adjacent Orb Negotiations (Cardassia Region, span 4), your RANGE at the start of the move will be 7 (9 - 2 used), and at the end your remaining RANGE will be 3 (for further moving within the region).

Rebel Interceptor work the same way except RANGE is 6+X and X=3 if moving within a region.

Some interceptors also have the ability to take off or land once each turn. If another card allows the ship to land or take off, it does not use up the one landing or takeoff per turn allowed by the ship's own game text. For example, if Establish Landing Protocols is in play, the ship may land or take off once per turn using its own text, and land or take off once more per turn using the event's text (and using 1 RANGE).

Interlink Drone (Nine of Eleven) – This personnel enables **skill-sharing** within a **hive**.

Intermix Ratio – This event prevents bonus points in excess of your non-bonus points from counting toward a winning score (but does not cancel them). See **points, In the Zone**. Example:

You have 20 non-bonus points and 80 bonus points. 80:20 is greater than a 1:1 ratio, so the excess 60 bonus points do not count toward winning. A total of 40 points (20 non-bonus + 20 bonus) count toward winning. However, if you encountered the Dead End dilemma, you would pass it, because you actually have 100 points.

If you score another 30 non-bonus points, you now have 50 non-bonus points and 80 bonus points. The excess is now only 30 points, and 50 of the bonus points count toward winning, so you win with 100 points.

Your bonus point total is the total of your positive and negative bonus points; e.g., if you have 45 bonus points and then lose 10 points to Edo Probe, your bonus point total is 35. If your bonus point total is negative, you have no "excess bonus points" and the ratio will be negative (less than 1:1), so Intermix Ratio has no effect on your score.

Interrogation – You do not lose any points already scored with this event if the interrogated personnel is rescued. For example, if on three successive turns your opponent answers "Four," "Four," and "Five," you score a total of 12 points (1+1+10) and then return the captive to your opponent's outpost. See **Madred, outpost**.

interrupt – A card type which generally has a temporary impact on the game, and is then discarded (though a few remain in play permanently or until a **countdown** has expired). An interrupt does not use your normal card play. You may play as many interrupts as you like, during either player's turn, and at any time between other actions. Some Interrupt cards specify that they respond directly to another action, allowing them to literally "interrupt" that action (for example, to nullify it). See **actions – interrupting**.

Into the Breach – Because all damage is resolved as a group, this O-icon event will not repair a ship that has received enough damage to destroy it. It does not affect [Borg] ships or the Borg Ship dilemma.

intruder – Your personnel aboard a ship or facility controlled by your opponent is both an Away Team member and an intruder. Rogue Borg interrupts aboard any ship or facility are also intruders (unless **Lore Returns** makes them its crew). Intruders cannot attempt or scout missions.

Intruder Alert! – Activating this incident is not a valid response to the play of Rogue Borg. See **hidden agenda, Intruder Force Field, protecting cards**.

Intruder Force Field – When this event "reverses Telepathic Alien Kidnappers affecting you," interpret your opponent's Telepathic Alien Kidnappers as though you had played it. That is, *you* now guess a card type at the end of each of *your* turns and point to a card in your *opponent's* hand. Only one copy may affect Telepathic Alien Kidnappers each turn (the copy played by the opponent of the player using Telepathic Alien Kidnappers). See **cumulative**.

This event disables Rogue Borg unless there are at least three aboard your ship. This effect may be extended to personnel **intruders** with **Intruder Alert!**

invalid card plays – See **actions – step 2: responses**.

Invasive Beam-In – See **landed ship, Transporter Skill**.

invasive transporters – A type of ship's special equipment. It has no built-in functions, but is activated by the Invasive Beam-in card.

Investigate Incursion – This mission is worth extra points if an appropriate Borg-related card is at that spaceline location when the mission is solved. See **report with crew**.

Investigate Legend – When Aldea, the planet represented on this mission, is cloaked, cards may not beam to or from the planet and ships may not land or take off. Iconian Gateways, Dimensional Shifting, Love Interests, and other such forms of movement function normally. Turn the Mission card face down when it cloaks. The mission acts like a cloaked ship in terms of interactions with the "outside world." (See **cloaking and phasing**.) For example, the mission may be attempted or scouted while cloaked by an Away Team already on the planet; you may probe to assimilate the planet while it is cloaked if you have Borg on the planet surface (but not if all your Borg at the

location are on a ship in orbit). An outpost at this location is located in space and thus is not cloaked. See **points**.

The 2 Youth discarded to solve this mission can be part of the 3 Youth used to fulfill the first part of the mission requirements.

You may score a maximum of 15 points from Assign Mission Specialists, even if you solve with five different Youth mission specialists. Discarding a personnel card does not use its skill.

Investigate Shattered Space – Revised lore: **Neutral Zone Region • Near Neutral Zone**

Investigate Time Continuum – To complete this mission using the Time Travel Pod, you must play it as an interrupt on the mission and discard it.

Isabella – This interrupt does not affect [Borg] ships. The ship is destroyed at the end of the next turn of the player who plays the interrupt. See **nebula**.

Ishka – See **skills – modifying**.

Isolytic Burst – When this **tactic** is your current tactic and you **hit** your target, the current tactic is placed as the first damage marker. It kills one personnel with its damage text, plus an additional personnel according to its game text. Additional copies placed as damage markers take only one casualty.

Issue is Patriotism, The – This Q-icon interrupt forces you to initiate a battle *only* if opposing ships or Away Teams are already present together at any location; if not, discard the interrupt without effect. You are not required or allowed to move a ship or personnel to another location in order to initiate battle. "Opposing Away Teams" may include any two groups of opposing personnel, whether crew or Away Team.

Issue Secret Orders – This objective requires the owner of the ship and crew to use them to move to and attempt the targeted mission. The infiltrator's owner does not control the ship and crew. See **actions – required**.

The opponent must attempt the mission targeted by this objective "if possible." That means the mission must be attemptable by the opponent's affiliation and must not have been made unattemptable (e.g., with I Tried To Warn You).

In general, the entire crew must participate in the attempt. However, affiliated personnel cannot be forced to beam to Qualor II Rendezvous; since they would be placed in stasis upon beamdown, it is not possible for those personnel to attempt this mission.

Jake and Nog – This **dual-personnel card** cannot probe for Visit Cochrane Memorial because it contains only one human with ENGINEER x1/2. The other "half ENGINEER" is Ferengi species. However, they could build a Ferengi Trading Post if in Ferengi mode, because together they have one Ferengi-affiliation ENGINEER skill. See **skills**.

James T. Kirk – See **Captain's Order, helps**.

Ja'rod – See **skills**.

Jean-Luc Picard (First Contact) – This personnel is not **Borg**.

Jem'Hadar – See **ketracel-white icon**.

Jem'Hadar Warship – This ship may not carry any other ship unless a card specifically allows it (such as Engage Shuttle Operations: Dominion).

Juliana Tainer – This personnel is unaware that she is an android. She becomes aware if she is in a situation which either requires an android (and no other androids are present) or treats androids differently from regular personnel. Once she becomes aware, she can use her full CUNNING and STRENGTH but is "stopped" for the rest of that turn. Cards that affect androids affect her (making her aware) even if she is unaware that she is an

android. For example, she becomes Non-Aligned when **Lore's Fingernail** is in play.

"just" – See **actions – "just"**.

just encountered – See **actions – step 1: initiation**.

just initiated – See **actions – step 1: initiation**.

just played – A card has been "just played" when the card play has been initiated, but before it has its results. See **actions – step 1: initiation**.

Kahlest – This personnel's special skill works on herself as well as on others, giving her a STRENGTH of 6.

Kahn – See **any, does not work with, playing an affiliation**.

Kai Winn – See **characteristics**.

Kal-Toh – See **verification**.

Kazon – An **affiliation** and a **species**. The Kazon affiliation is composed of different sects, such as Kazon-Nistrim and Kazon-Ogla. The sects represent factions of the affiliation, not different species, e.g. Culluh and Karden belong to different sects, but are both Kazon species, while Seska (in Kazon affiliation mode) is a member of the Kazon-Nistrim sect but Cardassian species. See **battle – affiliation restrictions, affiliation and species**.

Kazon Collective, The – This incident's game text, allowing mixing with an additional affiliation, is active as soon as it is seeded. You do not have to declare a specific affiliation to mix with, or change it as a game action.

K'chiQ – This personnel cannot select a skill when recovered from a Cryosatellite, because she is not reporting for duty. At the start of your next turn you may change her "no skill" to any regular skill. See **report**.

Keldon Advanced – See **attribute enhancement, skills – using**.

Ketracel-White – This Equipment card prevents the **White Deprivation** incident from affecting [KW] personnel. It has a **countdown icon** [3] which counts down only if any [KW] personnel are present with the equipment (even if White Deprivation is not in play). If no [KW] personnel are present, all Ketracel-White cards stay at their current count. Unless *rationed* by a Vorta, all Ketracel-White cards present with any number of [KW] personnel count down at the end of each of your turns. For example, three Ketracel-White cards will all count down at the end of your turn, whether you have one [KW] personnel present or ten. At the end of the countdown, a Ketracel-White card self-nullifies and is discarded.

Rationing: If your Vorta is present with multiple Ketracel-White cards and at least one [KW] personnel at the end of your turn, he may "ration" them so only one counts down. Select one card to count down (turn it 90 degrees). The rest stay at their current count. You may select a different card each turn, leaving one countdown for each card "unused" so the card is not discarded. If you let any card count down for three turns, it self-nullifies and is discarded as usual.

Resetting: Primary Supply Depot and Remote Supply Depot both "reset" countdowns of Ketracel-White aboard. You must carry or beam unexpired cards from your ship to the outpost to reset the countdowns. While aboard the outpost, they count down normally at the end of your turn (if a [KW] personnel is present) but immediately reset.

ketracel-white icon [KW] – This icon on a personnel card indicates a dependence upon the isogenic enzyme known as "the white." If any player has **White Deprivation** in play, your [KW] personnel will battle and die at the start of each of your turns according to that incident's game text, unless prevented by **Ketracel-White** cards present.

Kevin Uxbridge – Errata:

Destroys Nullifies any one Event card in play (except for Treaty cards) OR any one artifact other card played in play as an Event card.

This interrupt may be played as a response to the play or activation of an event.

Kevin Uxbridge: Convergence – This interrupt nullifies all unprotected events at the spaceline location where it is played. It may be nullified by Q2. See **card titles, card types**.

Khitomer Research – Errata:

(Affiliation icons): [Rom] [Klg]

killed – See **discarding**.

Kira Nerys – This personnel's fourth skill is Navigation x2 and she is a former member of the Shakaar resistance cell. The Reflections foil version is misprinted ("Navigation" and "Skakaar").

Kivas Fajo – "NO INTEGRITY" on this personnel is an **undefined attribute**.

An "unduplicated artifact" is one that is not duplicated anywhere in play. An artifact just earned is not **present** unless it joins the crew or Away Team. Making "parallel use of opponent's Palor Toff" means that each time your opponent plays Palor Toff – Alien Trader, you must also use that card's game text, if possible (i.e., you must retrieve a non-Personnel card from your own discard pile). A Countermanda suspending your opponent's Palor Toff does not affect your discard pile.

Klaestron Outpost – This outpost does not provide a built-in treaty, nor does it require a treaty for use. Like all **multi-affiliation cards**, you must declare its affiliation when seeded or played (at a mission bearing that affiliation icon), and may switch the affiliation as a game action during play. At any time, personnel aboard and ships docked at the outpost must be compatible with the outpost's current affiliation.

Klingon – An **affiliation** and a **species**. See **affiliation and species, battle – affiliation restrictions**.

Klingon/Cardassian Alliance icon [KCA] – This icon indicates members of the dominant mirror universe power in the 24th century. It is a special staffing icon, and also has other uses defined by cards.

Klingon Civil War – Points scored with this event are based on the printed values of WEAPONS and SHIELDS on the Ship cards destroyed. No modifiers are applied.

Klingon Death Yell – Either player may play this interrupt when any Klingon with Honor dies, subject to normal timing rules. You do not need to actually yell to score the points.

♦ **Klingon Outpost** – See **outpost**.

Klingon Painstik – If this interrupt is played to prevent a unique personnel from being reported for duty again, it prevents reporting of any instance of that **persona**. Because **persona replacement** and **morphing** of one Founder into another are not reporting for duty, this interrupt will not prevent such exchanges from taking place.

Kova Tholl – Like all cards with a point box, this personnel is placed in your **bonus point area** if you score the points, and thus cannot be retrieved and replayed. You may play another copy.

Retaliation against an opponent's attack may include *returning fire* (see **battle – ship**), attempting to kill opposing personnel (e.g., by playing Phaser Burns or choosing to mortally wound an adversary; see **battle – personnel**), and *counter-attacking* on your next turn (see **battle**). If you return fire or attempt to kill opposing personnel during the battle, you may not score Kova Tholl's points. Once you score the points, you may not counter-attack.

Kressari Rendezvous – See **discarding**.

Kurlan Naikos – This artifact requires the original seven **personnel types** (OFFICER, ENGINEER, SCIENCE, MEDICAL, SECURITY, CIVILIAN, and V.I.P.). See **attribute modifiers**.

La Forge Maneuver – “If the next action is an attack against that ship” refers to the next action of the player who played this interrupt (or to an attack by a Borg Ship dilemma). If your opponent takes an action immediately after you play La Forge Maneuver on his ship, it does not cancel La Forge Maneuver’s effect.

Lack of Preparation – On this dilemma, “Non-Borg” and “Borg” refer to the player, who is “playing a non-Borg affiliation” or “playing Borg affiliation.” For a Borg player, the three required subcommand icons may be provided by one or more personnel. For example, the Borg Queen can overcome this dilemma. See **playing Borg**.

To get past this dilemma, the non-Borg player must have been able to meet the mission requirements when the **current mission attempt** began (not when the mission was first attempted).

Lal – See **report, skills – modifying**.

landed ships – A ship may not land unless allowed by its own text (e.g., Vulcan Lander) or that of another card (e.g., Engage Shuttle Operations, Establish Landing Protocols). Landing and taking off use **RANGE** only if specified by the card allowing it to land. For example, the Vulcan Lander uses 1 **RANGE** to land or take off; the Bajoran Interceptor uses none. See **carried ships**.

Unless a card (such as Orbital Bombardment or Breen CRM114) explicitly allows it, a landed ship may not attack or be attacked by a ship in orbit, and also may not attack or be attacked by an Away Team. A landed ship may not be targeted by any card that targets a ship, unless the card specifically allows it to **target** a landed ship. Thus, landed ships are immune to cards such as Temporal Rift, Loss of Orbital Stability, Wormholes, Warp Core Breach, Magic Carpet Ride OCD, Rogue Borg Mercenaries, etc.

Cards may beam to and from a landed ship even if a card (such as Invasive Transporters or Transport Drone) is required to enable the transport. Such cards do not target a ship but simply allow beaming through **SHIELDS**. Cards may report aboard a landed ship (if reporting is allowed by card text).

Lansor – When this personnel reports (or is seeded face up at an outpost in Warp Speed play), you may download Marika and/or P’Chan if each is not already **in play**. You must discard Lansor at the end of any player’s turn unless both Marika and P’Chan are **in play**. Either player’s Marika or P’Chan **in play** prevents a download and keeps Lansor from being discarded. Marika’s and P’Chan’s skills and restrictions work similarly.

Latinum Payoff – Revised text:

Plays if Greed aboard your ship when it destroys another ship in battle (once per destroyed ship). X=3 for each OFFICER aboard destroyed ship.

launching ships – See **carried ships**.

Launch Portal – This doorway allows you to launch any **carried ships** at the time you play the doorway, even without Engage Shuttle Operations **in play**. It may download Engage Shuttle Operations: Dominion. See **card titles, characteristics**. It does not allow you to break a **quarantine**.

When this doorway is played during a space mission attempt to launch some or all of the crew on a different ship, the ship with the larger crew must continue the mission attempt (owner’s choice if tied), if possible.

leader – A **leader for battle** (or for a card referring to a leader) is any personnel with Leadership skill or with OFFICER skill or

classification; or any personnel allowed by a card to act as a leader (e.g., Prepare Assault Teams). Being a leader does not confer Leadership skill on a personnel. A personnel such as Lon Suder who is allowed to initiate battle is not a leader.

The Borg affiliation may *not* use a leader instead of a [Def] personnel to initiate battle. However, for cards that specifically require a leader, the Borg must use a leader as defined above.

leaving play – See **in play**.

Line Must Be Drawn Here, The – See **hidden agenda**.

Li’seria – See **Son’s ships**.

Live Long and Prosper – If this interrupt returns to your hand a personnel who scores points upon dying (e.g., Aamin Marritza), you do not score the points.

location – There are two kinds of locations: spaceline locations (e.g., missions and Bajoran Wormhole) and timeline locations (e.g., Montana Missile Complex). Site cards are not “locations” for gameplay purposes. A card that refers specifically to spaceline locations (e.g., The Traveler) does not include time locations, and vice versa.

Locations may be planet [P], space [S], or “unspecified type” (created by cards such as Bajoran Wormhole, Black Hole, Gaps in Normal Space, or **Supernova**).

Cards may be “at the same location,” whether in space, aboard one or more ships, facilities, or sites, on a planet, in an Escape Pod, etc. (Cards seeded face down cannot affect or be affected by other cards at the same location until encountered or earned, or unless a card explicitly allows interaction with a seeded card.) Unless otherwise specified, this definition includes *both players’* ships and personnel, and no treaties are required for cards to be “at the same location.” See **present, here**. Examples:

- Zalkonian Vessel will kill either player’s John Doe.
- Ves Alkar can gain Diplomacy from an opponent’s female Empath.
- The two leaders for Arbiter of Succession may belong to either or both players.

Locutus’ Borg Cube – See **Borg Cube**.

Locutus of Borg – See **counterpart**.

Lon Suder – This personnel’s special skill allows him to initiate a personnel battle in place of a **leader**.

long-term effects – A long-term effect (on a personnel or ship) is one that lasts until the end of the turn or longer, or until cured or nullified. Examples are Brain Drain and REM Fatigue Hallucinations. The death of a personnel is not considered a long-term effect. See **discarding**.

Long-Range Scan Shielding – A type of ship’s **special equipment** which renders a ship immune to Long-Range Scan.

lore – This text, appearing on many card types, presents background information about the characters, ships, and other elements of the Star Trek universe. Lore sometimes contains terms that are relevant to gameplay, such as persona identification, matching commander information, species, ranks and titles, etc. However, mention in the lore of a term which is the name of a skill (such as Tal Shiar) does not confer that skill on a personnel and does not satisfy a requirement for that skill. See **skills – using, characteristics**.

Lore – When either player has this personnel **in play**, the **STRENGTH** of every Rogue Borg **in play** is doubled, and all numerical features of all **Crystalline Entity** dilemmas seeded or encountered by either player are doubled (see **dilemma resolution**). Two Lores **in play** do *not* quadruple Rogue Borg and Crystalline Entities. However, Lore and Crisis may each

double the **STRENGTH** of the same Rogue Borg. See **Rogue Borg Mercenaries, cumulative**.

Lore’s nemesis is Dr. Soong, Data (First Contact), and/or Data and Geordi (dual-personnel card). See **nemesis icon**.

Lore Returns – When you play this event on a ship, your **Rogue Borg** take control of (commandeer) that ship. They may move it and initiate battles regardless of staffing or leader requirements. The use of the name “Lore” in the game text is a reference to the event itself, not to the Lore personnel card.

Lore’s Fingernail – This event allows any android to report for duty as Non-Aligned. For example, with Lore’s Fingernail **in play** you may report Data to an outpost after Earth has been assimilated. See **loses affiliation, Stop First Contact, Juliana Tainer**.

lose the game – You may lose the game according to card text (e.g., Writ of Accountability, Devidian Door, Beyond the Subatomic) or if you seed or play a card as a **hidden agenda** when it does not have that icon. In each case (in a tournament), you receive a score of 0 (–100); your opponent receives a score of 2 (+100). If both players lose a game in this manner (e.g., one fails to show a Devidian Door and the other loses to Writ of Accountability), the game is scored as a true tie.

loses affiliation – This phrase on a card (such as Memory Wipe) means that conceptually the card’s affiliation icon(s) are replaced by the [NA] icon.

losing battle – See **battle – personnel, battle – ship**.

Loss of Orbital Stability – A **landed ship** or **docked ship** is immune to this interrupt. See **in orbit**.

Lumba – This personnel is male (he just *appears* female). See **skills – modifying**.

Madam Pulaski – This personnel’s special skill gives you additional points for each unique mission you solve which was seeded by *both* players (i.e., both players seeded a copy of the same mission), not all unique missions seeded by either player. She must be **in play** when the mission is solved (but need not be present).

Madred – This personnel does *not* have Obsidian Order skill. See **lore, skills – using, Non-Aligned**.

This personnel may add 1 to Interrogation or Torture only when Madred and the captive are both aboard the same outpost. If he adds 1 to **Interrogation**, you score 2 points each time your opponent resists interrogation, and 11 points if he complies and you return the captive to him. If he adds 1 to Torture, your opponent loses 1 extra point each turn (the point box reads –7; if Madred “adds 1” for each of the three turns of the countdown, your opponent loses a total of 10 points).

Magic Carpet Ride OCD – This artifact may relocate a docked (but not landed) ship at its location. If the ship is docked at its opponent’s Nor, its crew disembarked on the Nor are an Away Team and subject to relocation with the ship. Any Away Teams associated with the ship are relocated to the planet surface at the new location. See **Away Team and crew**.

The owner of this artifact must use its game text immediately upon either player earning or acquiring the artifact. If there is no ship at the location to relocate, or if he chooses not to do so, the artifact is discarded.

Major Rakal – Errata (lore):

Physically altered, the **half-Betazoid, half-human Deanna Troi** was coerced to assume the identity of a Tal Shiar major in the 2369 M’ret defection plot.

This personnel retains her [AU] icon. Her attribute adjustments in Federation mode are a special skill. See **Assign Support Personnel**.

Makbar – See **dilemma resolution**.

Make It So – This incident does *not* restore a ship's RANGE when it "unstops" the ship and crew.

Make Us Go – The ENGINEER who passes this dilemma is relocated from the ship or planet (even though at the same location). He may not use or share skills. See **quarantine**. If the dilemma is cured, the ENGINEER returns to the crew or Away Team that cures it (not necessarily to where it was encountered).

Mandarin Bailiff – You may "post bail" for this Q-icon dilemma by transferring **points** to your opponent even if your score is zero or less. This will give you a negative score. "Transferring points" means that you lose points, while your opponent gains points.

Manheim's Dimensional Door – When this doorway allows a card to be played during a "temporal hiccup," that card may itself be suspended and allow another card to be played, and so on. It is suggested that you take the suspended cards and put them in a stack. When no more temporal hiccups occur, resolve the suspended cards in order from the top of the stack to the bottom. Each card play may be responded to normally, and a card may be played that affects an earlier, suspended card play. See **actions – step 2: responses**. Example:

1. I play K'chiQ. You show a K'chiQ from hand; mine is suspended.
2. You play Palor Toff. I show a Palor Toff; yours is suspended.
3. I play Q's Tent. You show a Q's Tent; mine is suspended.
4. You play Q's Tent (the same one you showed earlier). I show no Q's Tent (my original one has been set aside and is not in my hand), so the card plays start to resolve.
5. Your Q's Tent resolves; you retrieve Wrong Door from your Tent.
6. I attempt to resolve my Q's Tent, but you respond with Wrong Door. I play Amanda Rogers to nullify your Wrong Door. My Q's Tent resolves and I retrieve a Countermanda.
7. You attempt to resolve Palor Toff. I play Countermanda, suspend your Palor Toff, and take three cards out of your discard pile. Your Palor Toff resolves; if no card remains to retrieve, simply discard Palor Toff.
8. My K'chiQ resolves and reports for duty. Treat this doorway as if it read, "...whenever any player has a card in hand matching one just played *face up* by opponent..." Thus, you may not use the Manheim effect when a hidden agenda is played (because it must be played face down, and is immune to "general use cards") or activated (because it was not "just played"). A "matching" card is a **copy**.

Marika – See **Lansor**.

Martia – See **shape-shifter**.

Martok – Revised text:

[SD] D'k Tahg

Masaka Transformations – If you have earned an artifact that is placed on the bottom of your draw deck due to this event, you may still play that artifact if you later draw it back into your hand. You must be able to verify that the copy you draw is the same copy that you placed under your deck.

Mask of Korgano, The – Playing this event on a unique personnel does not allow you to bring another copy of that personnel (or any other instance of the same **persona**) into play at the same time. The presence or absence of an [AU] icon does not affect the underlying persona.

Ma'sud – This personnel may download Ceti Eel to the adversary he just stunned only if your Khan is present, and only to a non-[Holo],

non-android personnel, as required by Ceti Eel's text.

matching affiliation – Two cards are of *matching* affiliation if their **affiliation icons** are the same. For example, if you have a Romulan/Cardassian treaty in play, your Cardassians *match* your Nor, but your Romulan and Non-Aligned cards do not (they are, however, **compatible**). If a site refers to a matching personnel, it means matching the affiliation of that facility. See **loses affiliation**.

When a Nor or ship is commandeered and its affiliation changes to match one of the commandeering personnel, treat it as though the new affiliation icon were printed on the card. For example, if you commandeer your opponent's Cardassian Terok Nor with a Romulan Away Team, it now conceptually has a Romulan icon; your Romulan cards now match the station's affiliation, while your opponent's Cardassian cards do not.

A personnel matches a mission's affiliation if he has one of the affiliation icons printed on the card (or added conceptually by a card such as Bribery or Arandis). A personnel matches a homeworld's affiliation if he is of the affiliation that belongs to that homeworld. For example, Cloaked Mission (Romulus) is the Romulan homeworld, but has a [Klg] affiliation icon. Gowron matches the mission's affiliation (icon), while Tomalak matches the homeworld's affiliation.

matching commander – A personnel is the matching commander for a ship if either the ship lore or the personnel lore states that the personnel *is* or *was* the *commander* or *captain* of the ship. (Also, a few personnel, such as Rinnak Pire and Regent Worf, have special game text that allows them to act as, or assign another personnel as, the matching commander of a ship.) For example, Jean-Luc Picard (Premiere) and Admiral Picard are both matching commanders for the U.S.S. *Enterprise*, while Jean-Luc Picard (First Contact) is the matching commander for the U.S.S. *Enterprise-E*. Both Jean-Luc Picards are matching commanders for the U.S.S. *Stargazer*.

When specified in the ship's lore, only the named personnel is the matching commander; another version of the persona with a different name, or an instance of a different persona, cannot serve as the matching commander. When specified in the personnel lore, no other versions of that persona (even with the same name) can serve as matching commander for a ship, and a ship must be specified by name (not by class). For example, The Emissary is not the matching commander for the U.S.S. *Defiant*; Commander Data is not the matching commander for the U.S.S. *Sutherland*; Jean-Luc Picard (Premiere) is not the matching commander for the U.S.S. *Enterprise-E*; Tomalak is not the matching commander of the D'deridex.

A statement that a ship "transported" or was "used by" a personnel does not qualify that personnel as the ship's matching commander. For example, Kivas Fajo and Gowron are *not* matching commanders for *Zibalian Transport* or *I.K.C. Buruk* respectively.

Unless otherwise specified (e.g., Cha'Joh), each ship can benefit from only one matching commander at a time. For example, the U.S.S. *Enterprise* does not gain +4 RANGE from Defiant Dedication Plaque with both Jean-Luc Picard (Premiere) and Admiral Picard aboard. The matching commander must not be disabled, in stasis, etc. (See **present**.)

Matching commanders are defined only for ships; facilities get no benefits for a commander mentioned in the personnel or facility lore.

Most matching commanders may be easily determined directly from the ship and/or personnel lore, following the rules given above. Two need clarification:

I.K.C. Bortas has revised lore (Gowron is its matching commander).

Tama: "Dathon, speaking first" is Tamarian for "commanded by Dathon."

Matthew Dougherty – See **helps**.

meeting requirements – You choose which personnel to use to meet mission and dilemma requirements, and in which order. Any "excess" personnel are not required to apply their skills, etc. toward meeting the requirements. Thus, a personnel with Picard's Artificial Heart will not die when facing a dilemma with a STRENGTH requirement if you can satisfy the requirement with other personnel in the Away Team.

Memory Wipe – This event implements a special play environment when playing Starter Deck II vs. Starter Deck II. You and your opponent must each seed the card and may not nullify it. This allows each player's cards of different affiliations to mix without having to use one or more Treaty cards.

It may also be used in the normal play environment for either function, but your opponent is not required to use it and either player is free to nullify it. See **Away Team and crew**, **loses affiliation**, **Stop First Contact**, **multi-affiliation cards**.

Mendak – See **Going to the Top, facility, characteristics**.

Menthath Booby Trap – Errata:

Place on ship; it cannot move. Unless MEDICAL present, one crew member killed (random selection). Discard with Ship can't move until 2 ENGINEER present aboard.

Mickey D. – This personnel automatically wins a Royale Casino side game for you if he is in your Away Team attempting the mission (not if he is in your hand).

Mila – This personnel cannot download an **artifact** used as equipment.

Mining Survey – If you add an affiliation icon to this mission (e.g., a [Fer] icon with Bribery), you may attempt it with that affiliation without controlling a Nor with Ore Processing Unit there.

Minuet – See **Bynars card**.

Miracle Worker – This skill includes **Transporter Skill**.

Mirasta Yale – This personnel may not be reported normally, by downloading, by Devidian Door, etc. She may *only* be brought into play by seeding like a dilemma under Malcor III (the mission First Contact). Unlike a personnel seeded like an artifact, she enters play immediately when **encountered** by an Away Team during a mission or scouting attempt, even though the mission is not solved, joining the Away Team, forming a separate Away Team, or being captured as appropriate (see **personnel – seeded**).

Mirror Image – When this hidden agenda event is activated in response to the play of one of the target cards, the target card immediately takes effect for all players. For example, if Kivas Fajo – Collector is played and Mirror Image is activated in response, each player must choose someone to draw 3 cards. If they both choose the *same* player, that player must draw 6 cards.

Revealing this event is not a valid response to your opponent encountering Thought Fire. See **actions – step 2: responses**.

This event is a successful probe for an [Ev] or [HA] icon, even though the icons appear reversed.

Mirror Quadrant – The Mirror Quadrant is composed of **missions** with the Mirror Quadrant M icon in their point box. These missions are also identified in their lore as belonging to the **mirror universe**.

Mirror Quadrant icon [MQ] – Personnel, ships, and facilities with this icon are native to the Mirror Quadrant. See **native quadrant**.

mirror universe – The mirror universe is represented by the Mirror Quadrant. (The normal universe is represented by the Alpha, Gamma, and Delta Quadrants.) In general, the Mirror Quadrant functions exactly like other quadrants (for example, to report a card to a facility or its site, both the card and the facility must be native to the quadrant; cards that allow travel between “normal” quadrants also allow travel to and from the Mirror Quadrant). Cards that are physically in one universe (on a spaceline) do not normally affect cards in the opposite universe. For example, closing Bajoran Wormhole: Mirror Universe does not affect movement through the Bajoran Wormhole between the Alpha and Gamma Quadrants.

However, when game text refers to cards *matching the affiliation of a homeworld* (or vice versa), it applies only to cards that also *match the universe of the homeworld*. For example, HQ: War Room on the mirror-universe Bajor will enhance the attributes of your [MC] Bajorans, but not your Alpha Quadrant Bajorans (regardless of which quadrant the personnel are located in); Homefront on mirror-universe Bajor will allow you to download only [MQ][Baj] SECURITY personnel; downloading cards with Defend Homeworld depends on your [MQ][Baj] card being attacked at mirror-universe Bajor; and Assimilate Homeworld requires a counterpart matching the homeworld’s universe and affiliation.

Also, if an Assimilate Homeworld objective is completed on Bajor in the mirror universe, mirror-universe Bajorans may not report to any outpost for the rest of the game, but normal-universe Bajorans are not affected and may still report to outposts in the normal universe.

Borg timeline disruption does not affect cards native to the mirror universe. See **Stop First Contact, Hero of the Empire**.

Some cards refer to “opposite quadrant;” the Alpha Quadrant is the opposite of the Mirror Quadrant, and vice versa. See **corresponding**.

mis-seeds – If you seed, under one mission:

- more than one **copy** of the same dilemma (or card seeded like a dilemma): the first has its normal effect, the second is a mis-seed.
- more than one artifact (whether duplicates or not): all your artifacts there are mis-seeds.
- more than one copy of a card seeded like an artifact (such as personnel at Rescue Prisoners): all copies are mis-seeds. (Personnel may not be seeded in duplicate, even if they have a universal icon.)

If you *and your opponent* each seed an artifact, or a copy of the same card, under one mission, each has its normal effect (unless it is not duplicatable; see **unique and universal**).

When a mis-seed is revealed during a mission, scouting, or commandeering attempt, it is placed **out-of-play**. Mis-seeds are not **encountered**; for example, a mis-seeded dilemma may not be replaced with a Q-Flash using Beware of Q.

You may deliberately mis-seed cards under a mission as a bluff. When discovered, such mis-seeds are placed out-of-play as usual. However, if you reveal your own mis-seeded card under any mission, you may not solve that mission (or complete any objective targeting it) for the rest of the game. (If you reveal your own mis-seeded card under **Empok Nor**, you may not commandeer that Empok Nor while it is uncontrolled.) Revealing your opponent’s mis-seeds, or your opponent revealing your mis-seeds, does not affect your ability to solve a mission or commandeer Empok Nor.

Mis-seeds include (but are not limited to) non-seed cards (such as Equipment cards) placed under a mission as a bluff, multiple copies of the same card seeded under one mission by a

single player, multiple artifacts seeded under one mission by a single player, space dilemmas seeded under planet missions (and vice versa), and personnel with no game text allowing them to seed (such as Mirasta Yale under a mission other than First Contact).

If cards you seeded legally become mis-seeds later in the game, they will not affect your ability to complete a mission. For example, using a Pla-Net to discard a Cryosatellite will not make any personnel seeded with the artifact prevent you from completing the mission (but you may not earn the personnel).

mission – A card type representing a location in space, in the present time of the Star Trek universe, where missions and objectives can be accomplished and battles may take place. There are three kinds of missions: space [S], planet [P], and **dual-icon missions** [S][P]. During the mission **seed phase**, missions are laid out in one or more **spacelines** representing different quadrants of the galaxy. A mission’s quadrant may be determined from its point box (if any). Gamma, Delta, and Mirror Quadrant missions have a Γ, Δ, or M symbol in their point boxes. Missions with no symbol (or no point box) are Alpha Quadrant missions. All missions may be seeded only on the appropriate spaceline. Missions without point boxes (including **Q’s Planet**) may not be seeded (or played) in any quadrant except Alpha. Missions (and other spaceline locations) may not be moved between quadrants by cards that relocate locations.

A mission’s lore may indicate that it belongs to a specific **region of space** (locations in the same region must be seeded adjacent to each other).

You may seed multiple copies of missions with the universal ♠ icon, but only one copy of a unique mission (without the icon); if a unique mission is a duplicate of one your opponent has seeded, stack your mission on top of his to form a single location.

Mission cards are designed with relevant information facing both players. A summary of the mission faces your opponent; complete information faces you. Sometimes the information facing your opponent is intentionally different from the information facing you. Unless otherwise specified by a card, each player is affected by the following only on the end of the mission facing him: mission requirements, special instructions (italic game text), affiliation icons (or other indication of who may attempt a mission), point box, and span. Thus, Construct Depot may not be attempted or scouted by the opponent, because the opponent’s end has no affiliation icons or text enabling an attempt, and no point box. Any information not normally included in the opponent’s mission summary, including quadrant icons, [S] and [P] icons, and the mission name and lore (including regions) apply to both players.

Icons (or game text) at each end of the Mission card indicate which affiliation(s) or other groups can attempt the mission. Game text also lists the requirements (skills, attributes, and other features) you must meet to complete (solve) the mission. (If there are no such icons or game text, or no requirements, that mission cannot be attempted.)

Game text in italic type on a mission card represents special instructions for use of the mission (not requirements for solving the mission). Unless the text specifies when it takes effect (e.g., “when mission solved”), it is always in effect. For example, no ship-to-ship beaming is allowed at any time at Quash Conspiracy, before or after the mission is solved. *All* special mission text applies even when the mission is attempted and solved with alternate requirements (e.g., Subjugate Planet). See **Reunion, mission attempt**.

You may not reduce a mission’s point value to less than zero (e.g., with The Sheliak and Hero of the Empire). A mission without a point box has no point value (it is undefined) and thus is not affected by cards that change mission point values.

mission II – (The following rules apply to standard constructed-deck play. Some special rules, described in the Warp Speed rules supplement, apply to Warp Speed sealed-deck format play.)

Each of these double-sided Mission cards has a built-in wormhole or outpost. (See **card type**.) They seed normally, and you may choose which side to have face-up initially. However, when you are using one or more double-sided missions, you must notify your opponent, and after you shuffle your mission stack he or she is allowed to see whether a double-sided card is on top and choose whether or not to cut the stack. See **Borg – Cooperation**.

Each Mission II represents the same location as the corresponding original mission. For example, Secret Salvage and Secret Salvage II both occur at Wolf 359. Thus, you may not include both versions in your mission selection and if one player seeds Secret Salvage and the other seeds Secret Salvage II, they must overlap each other because they are duplicates of Wolf 359. If you solve such a mission, you score the points on your Mission card. Cards that specifically work with the original mission work with the corresponding Mission II; for example, Timicin scores 10 points if he helps solve either Test Mission or Test Mission II. (“Typhon Expanse” and “Beta Stromgren” are corrections of misspellings on the original missions, and are the same locations as “Typhone Expanse” and “Beta Stromgen.”)

Built-in Outpost: Mission II outposts do not prevent you from seeding other outposts of the same affiliation. For example, you could seed one Secret Salvage II, one Explore Black Cluster II, and one Klingon Outpost card. However, you may not establish a regular outpost at a location where you have a face-up built-in outpost or vice-versa.

Cards that work with regular outposts, such as Spacedoor, work normally with built-in Mission II outposts. If the outpost is destroyed, any cards in play on the outpost are discarded when the mission is flipped over.

If a built-in outpost must be placed out-of-play (e.g., a Federation outpost when the Borg disrupt the timeline), the mission should be flipped to the back side, placing the outpost conceptually out-of-play (it may not be rebuilt for the remainder of the game).

To show that a ship is docked or that personnel are aboard a built-in outpost, place those cards so that the mission partially overlaps both the seed cards and your cards aboard or docked at the outpost.

Built-in Wormhole: You may move in either direction between your [Wmh] mission and a non-[Wmh] mission where you play a Wormhole interrupt. You may not move between your opponent’s [Wmh] mission and a non-[Wmh] mission. If your opponent nullifies your Wormhole interrupt, your ship does not move through the wormhole and you do not flip the [Wmh] mission. You may not discard a Space-Time Portal as the Wormhole interrupt (it may be discarded only as the second Wormhole interrupt of a pair).

If you move between two of your own [Wmh] missions, flip only one of them (your choice). If you move between your [Wmh] mission and your opponent’s [Wmh] mission, flip only your own mission.

mission attempt – Completing missions is the primary method of scoring points for all affiliations except Borg. You *attempt* a mission

by bringing one or more personnel to the mission location and encountering and resolving any dilemmas which may be present. If the personnel remaining after all dilemmas have been resolved have the skills, attributes, and other features required by the mission (or if you bring more personnel for another attempt), they complete (or “solve”) the mission and score its points. A mission may be solved only once per game.

For a **mission** to be attemptable, it must have mission requirements (either printed or added by an objective such as Establish Trade Route), plus one or more affiliation icons (either printed or added by a card such as Bribery) or game text indicating who may attempt the mission (e.g., “Any crew may attempt mission”), on the end of the Mission card facing you. Thus, you may not attempt ♦ Space or ♣ Nebula from either side, or Construct Depot from the opponent’s side. Artifacts seeded at an unattemptable mission may not be acquired.

To begin or continue a mission attempt, or to complete the mission, at least one crew or Away Team member must match one of the mission’s affiliation icons (if any); other (non-matching) personnel in the crew or Away Team can assist in the attempt. (Dual-icon missions require a matching personnel in both the crew and the Away Team. Also, to attempt a space mission, at least one crew member must match the ship’s affiliation. The ship does not have to be staffed for movement or match the mission’s affiliation.) If you lose all matching personnel during the mission attempt, the mission attempt ends. (However, if you remove all matching personnel during a dilemma encounter with a card that suspends play, such as Flight of the Intruder, but other non-matching personnel remain, the dilemma resolves normally with the remaining personnel before the attempt ends.)

If an Objective card requires a crew or Away Team of a specific affiliation to attempt or solve a mission, the crew or Away Team must include at least one member of that affiliation (but may include other affiliations unless otherwise specified). For example, Establish Dominion Foothold requires you to solve the mission with “your Dominion personnel.” A mixed Away Team of Cardassian, Non-Aligned, and Dominion personnel may solve the mission.

Either player may attempt a mission with appropriate personnel, regardless of who placed the card on the spaceline. Mission attempts may be made at scouted or unscouted locations, but may not be made at assimilated planets.

Planet missions can be attempted by an Away Team on the planet’s surface (outside a facility or landed ship). Space missions can be attempted by the entire active crew of one undocked ship. (**Dual-icon missions** require both a ship with crew in orbit and an Away Team on the planet.)

A mission attempt is a single action which may not be interrupted except by valid responses or actions that suspend play. See **actions – interrupting**. A mission attempt lasts from the time you announce you are attempting the mission until one of the following occurs:

- The entire crew or Away Team is “**stopped**”.
- No one remains in the crew or Away Team.
- A dilemma prevents the mission attempt from continuing (e.g., Radioactive Garbage Scow).
- All dilemmas are resolved but the crew or Away Team does not meet the requirements to solve the mission. (They are not “stopped” unless **Mission Debriefing** is in play.)
- The mission is solved.

Once the mission attempt is ended by one of these circumstances (except by solving the

mission), you may reattempt the mission on the same turn with “unstopped” personnel (and an “unstopped” ship for a space mission). This constitutes a *new* mission attempt, not a “continuation” of the attempt.

All Mission cards state what skills and other requirements are necessary to complete the mission. For example, if a planet mission requires Computer Skill x2, at least two personnel with Computer Skill (or one personnel with Computer Skill x2) must be present in the Away Team for you to complete the mission. However, the requirements for *completing* the mission need not be present in order for the crew or Away Team to *attempt* the mission (encounter dilemmas). (When a mission requires or allows you to discard cards as part of completing the mission, those cards must come from the crew or Away Team attempting the mission, not from your hand.) See **meeting requirements**.

When you meet the requirements for solving a mission, you first score any mission points, then resolve any special game text on that mission (or on any objectives targeting it), then earn and resolve any **artifacts** or cards seeded like artifacts. Equipment and artifacts that say “use as equipment” join your crew or Away Team; personnel that you seeded join your crew or Away Team (if compatible; otherwise they are under **house arrest** or form a separate Away Team); and personnel that your opponent seeded are captured. (See **capturing**. If scoring the mission points brings your score to victory conditions, the game ends immediately and you do not resolve any **artifacts**.)

A mission attempt may not be voluntarily aborted, either between dilemmas or before solving, unless specifically allowed by a card such as Mr. Garak. If you resolve all dilemmas and Q-Flashes and the remaining crew or Away Team meets the mission requirements, they must solve the mission (for example, they may not wait until a mission specialist joins the Away Team or crew for bonus points).

Once you complete a mission, its points are yours to keep. Cards which affect a mission’s points or attemptability (e.g., Supernova, Mordock, The Sheliak, Assimilate Planet) do not affect your score if they occur after the mission is completed (unless otherwise specified, as with I Tried to Warn You or Hero of the Empire).

Alternate mission requirements – A mission attempt using alternate requirements provided by an objective is exactly like any other mission attempt. You do not need to have the requirements in the Away Team (i.e., you can redshirt), and you score the point value of the underlying mission when you complete it. The mission cannot then be completed with its normal requirements.

In order to gain any additional benefits from such an objective (such as Establish Trade Route’s download of a Ferengi Trading Post and equipment upon completing the mission), you must complete the targeted mission using the objective’s alternate requirements.

If an objective allows a different affiliation to attempt a mission than the icons on the Mission card, only that affiliation may use the requirements provided by the objective.

mission attempt – example – The following example shows how to attempt a planet mission with dilemmas and artifacts present. (A space mission is attempted in a similar fashion, with an entire ship’s crew instead of an Away Team. See **dual-icon mission**.)

Select and beam your Away Team to the planet, or have them disembark from your landed ship or exit from a planet facility. (At a space mission, select one ship and crew to attempt the mission; undock and/or decloak or dephase the ship, if necessary.) Announce that you are attempting the mission.

Slide out the bottom seed card under the mission and turn it over. Look only at the bottom card. (If you encounter an **artifact** or a card seeded like an artifact, move it to the top of the seed card stack, sliding it just beneath the Mission card. Artifacts are not earned until the mission is completed.) If more than one copy of any card, seeded by the same player, is encountered under one mission, any copy after the first is placed **out-of-play** as a **misseed**.

Read the first Dilemma card aloud. (Dilemmas are intended to be read by the player encountering them.) Resolve the dilemma following the instructions under **dilemma resolution**. Failing to overcome a dilemma that has conditions immediately “stops” your Away Team and ends that mission attempt. A dilemma without conditions does not “stop” your crew or Away Team – they must continue the mission attempt unless otherwise specified.

- Personnel who die and ships or equipment that are destroyed are placed in your discard pile. (**Holographic personnel and equipment** are not killed or destroyed; they are *deactivated* instead.)
- Personnel may be chosen for death or other effects by random **selection**, opponent’s choice, or owner’s choice. See **ties**.
- In addition to dilemmas, you may encounter a Q-Flash doorway seeded like a dilemma. When you do, your crew or Away Team must collectively face a number of cards from your opponent’s **Q-Continuum side deck** equal to the number of personnel present.

Repeat this step for each dilemma (or Q-Flash) in turn until no more remain. Each dilemma must be resolved in turn before the mission can be completed.

Once you have resolved all the dilemmas under a mission, if your remaining “unstopped” personnel can meet the mission requirements, you score the mission points and earn any artifacts present. To score the mission and mark it complete, slide the Mission card toward yourself about one-half card length. The completed mission remains on the table as a spaceline location, but it cannot be attempted or scored again.

Your “unstopped” Away Team is free to beam back up to the ship and continue if desired. (Failing to complete the mission does not “stop” the Away Team.)

mission continues – See **dilemma resolution**.

Mission Debriefing – This event “stops” personnel after any **mission attempt**, whether successful or not. For example, if your Away Team resolves all dilemmas but cannot complete the mission, that mission attempt ends (unsuccessfully), and the Away Team is “stopped” if this event is in play. Additional personnel brought to the mission may complete the mission (and then will also be “stopped”), but the “stopped” personnel from the previous attempt may not assist them.

Mission Fatigue – While this dilemma is in play atop the mission, treat each subsequent dilemma or Q-Flash encountered as if it had the following text *before* its actual text: “Stops’ one personnel (random selection); cannot get past unless any other personnel remain.” (A Q-Flash will “stop” only one personnel, not one for each Q-icon card encountered.) In other words, the randomly selected personnel is not “stopped” until the dilemma is revealed and **encountered**, but you must have at least one personnel left to face the actual dilemma text.

Personnel are “stopped” normally (until start of next turn), not for the duration of the countdown. The subsequent dilemma is responsible for “stopping” the personnel, not the Mission Fatigue dilemma.

See **actions – step 1: initiation, combo dilemma**.

mission requirements – alternate – See **mission attempt**.

mission specialist – See **Assign Mission Specialists**.

mix – This term is interchangeable with *mix* and *cooperate*. When a card allows cards of different affiliations to *mix*, those cards are **compatible**.

Mobile Holo-Emitter – This Equipment card may be placed on a deactivated (disabled) **holographic personnel**. It is still being “worn” even if the hologram is deactivated. “While worn, does not count as an Equipment card” means it cannot be targeted as an Equipment card (e.g., it is immune to Disruptor Overload, Common Thief, stealing, etc.).

Mona Lisa – You are directly responsible for destroying this artifact if you play a card, such as Disruptor Overload, Plasma Fire, or Loss of Orbital Stability, with the intent of destroying the artifact or the ship it is on; or if you attack or return fire against a ship it is on, destroying that ship and the artifact. Playing a spaceline hazard, such as Subspace Warp Rift, which your opponent is not required to cross, does not count. If an outside force that neither player controls (such as a Borg Ship or a Subspace Warp Rift) destroys the ship, then no points are lost.

Montana Missile Complex – Seeding a *Phoenix* from **outside the game** beneath this **time location** is mandatory. If you do not have a *Phoenix* to seed, you may not play the time location.

“Once *Phoenix* has taken off or *Vulcan Lander* has landed here, nullifies Stop First Contact” means that all Stop First Contact objectives are nullified for the rest of the game (similar to the **once in play** rule). The *Phoenix* that takes off to nullify Stop First Contact must be the one seeded under the time location, not a played copy.

Mordock – If you participate in any battle at any time during the game (before or after you score points with Mordock), you lose any **bonus points** already scored with this personnel’s skill, and you may not score any further points from his skill. You have participated in a battle if you attack or are attacked by your opponent or another force (such as Rogue Borg or the Borg Ship dilemma), whether you return fire or not. If Mordock is killed, captured, loses his skill, etc., you keep the bonus points scored as long as you do not battle (but the points are still lost if you battle after he is killed).

Mortal Q – This personnel’s CUNNING of “Q” is an **undefined attribute**. It is not affected by the value of “Q” defined by Ar-Q-ologist or The Higher... The Q-er. See **skills, once in play**.

mortally wounded – See **stunned and mortally wounded**.

most cunning, strongest, highest total attributes, etc. – See **ties**.

movement – There are two kinds of movement:

- **Normal movement** – often indicated by the word “move.” This is the default type of movement when a card does not specify otherwise. “Stopped” cards cannot perform normal movement.

Normal ship movement includes using RANGE, landing, taking off, launching, loading, docking, undocking, **time travel** (Orb of Time, first function of Temporal Vortex), and use of cards such as Wormholes, Transwarp Network Gateways, and Bajoran Wormhole. Normal movement requires **full ship staffing**.

Normal personnel movement includes **beaming, walking** between sites, boarding and disembarking from a

docked, landed, or carried ship, entering and exiting from a planet facility, **time travel**, and placing a personnel on an Assimilation Table.

- **Relocation** – identified by the word “relocate” (Mysterious Orb, second function of Temporal Vortex) or by a euphemism such as “hurl” (Gomtuu), “transport” (Maman Picard), or “must follow” (Temporal Wake). Relocation does *not* require full ship staffing, and “stopped” cards may be relocated.

You may move a card any number of times during your turn (except by **walking**). Whenever a card or rule allows or requires your personnel to move (e.g., Security Office, Emergency Transporter Armbands, walking between sites), they may carry Equipment cards with them.

You may not transfer any card into space unless a card specifically allows you to do so (e.g., Airlock, Anti-Matter Pod).

Your staffed ship can move along your side of the spaceline in either direction. The distance your ship can move on one turn is limited by its RANGE. You determine how far it can travel by adding up the span numbers on each Mission card the ship moves to (or passes), not counting the location where it begins. For example, three consecutive missions A, B, and C on a spaceline have spans of 2, 4, and 3. A ship starting at mission A will use 7 RANGE to reach mission C, and 6 RANGE to return from C to A.

A ship does not have to move all of its RANGE on a turn. A ship can stop at each location as it moves, or it can “warp past” locations without stopping there (but still using RANGE). A ship flying by a location cannot affect, and is not affected by, cards at that location (unless the card says it affects ships passing by), even if an action suspends play at the moment the ship is passing the location. For example, if play is suspended when a ship is passing the ♠ Nebula mission and the opponent scores points while play is suspended, that ship does not face a dilemma.

You may move any number of ships on your turn, but they must move one at a time (not as a “fleet”).

See **movement between quadrants**.

movement between quadrants – Any game text which allows or requires a card to move directly from one location to another may potentially relocate or allow that card to move to a different quadrant. Examples of cards that can work across quadrants include Bajoran Wormhole, Mysterious Orb, Isonian Gateway, Transwarp Network Gateway, Go Back Whence Thou Camest, Where’s Guinan?, and Wormhole.

However, if game text uses the word **spaceline** or a reference to distance (e.g., nearest or farthest location, or a span) in this context, the movement is restricted to the current spaceline. In other words, “to any other spaceline location” means “to any other location on this spaceline,” “farthest planet” means “farthest planet on this spaceline,” etc. Examples of cards that are limited in this way include The Traveler, Where No One Has Gone Before, Magic Carpet Ride OCD, Dr. Q, Medicine Entity, Gomtuu, and Love Interest dilemmas. See **Hippocratic Oath**.

movement between time location and spaceline – See **time travel**.

Mr. Scott (The Motion Pictures) – This personnel’s special skill allows him to meet two staffing requirements: one using a staffing icon found on his card ([Cmd], [AU], or [CF]), and *any other* staffing requirement (whether he has that icon or not).

multi-affiliation cards – Multi-affiliation cards have two or more affiliation icons. Their skills and other features may differ according to their current affiliation “mode.” Declare the

affiliation of a multi-affiliation card when you seed or play it face-up (personnel or ship affiliation must be compatible with the facility where it reports; an outpost’s affiliation must match an affiliation icon on the mission) or when you earn it (if seeded under a mission).

A multi-affiliation card (including a **dual-personnel card**) may use only one affiliation at a time, but you may change its affiliation at **any time** (between other game actions), any number of times during the course of the game. For example, Lursa on the Sisters of Duras cannot be [Klg] while B’Etor is [Rom]; if Major Rakal encounters Zaldan while in [Fed] mode, she cannot change to [Rom] mode during the mission attempt.

When a multi-affiliation personnel is aboard your ship or facility, you may not change the affiliation of either the Personnel card or the ship/facility if it would cause that personnel to be placed under **house arrest**. You must remove the personnel from the ship/facility before changing its affiliation. You may not simultaneously change the affiliations of one or more Personnel cards, ships, and/or facilities; each change is a separate game action. Thus, if the Sisters of Duras are aboard the Cha’Joh, both in Romulan mode, you may not change either the Sisters of Duras or the Cha’Joh to Klingon mode without removing the Sisters first.

If a multi-affiliation personnel, whose features are dependent on their affiliation mode, is assimilated or made Non-Aligned (e.g., by Memory Wipe), they may still switch “modes” as a game action.

In the Voyager and later expansion sets, dual-affiliation cards are printed with two different border colors, one for each affiliation. The affiliation icon matching the border color appears on the left in each case. A card with one border color is a **copy** of the same card title with the other border color, and they have identical gameplay.

If a report or download requires a personnel’s affiliation to match a ship or facility, you must report or download the personnel in matching affiliation mode (without creating a **house arrest** situation). For example, to use Dominion War Efforts to download Dar without discarding **Assign Support Personnel**, you must download him in [Dom] mode to a [Dom] ship or facility. If you download him in [Hir] mode to a [Hir] ship or facility, you must discard Assign Support Personnel.

Multidimensional Transport Device – This equipment may be beamed along with the personnel it is affecting, or left behind. See **corresponding, mirror universe**.

multiple targets – See **battle – ship**.

Multiplexor Drone (Nine of Seventeen) – This personnel’s skill allows its ship to fire WEAPONS against multiple targets during a battle, if a current objective or other card (e.g., Gowron of Borg) allows targeting of multiple ships, or if returning fire or counter-attacking. For example, if your opponent attacked any of your forces on the previous turn, and he has two ships and an outpost at the location of that attack, your Borg Cube with a Multiplexor Drone and two other [DeF] Borg aboard may attack both ships and the outpost with 24 WEAPONS against *each* of the three targets. See **battle – ship – multiple targets**.

must do nothing but – See **actions – required**.

Mutation – This interrupt is discarded *after* you shuffle the top two cards of your discard pile into your draw deck or discard a card to draw two. See **actions – step 3: results**.

Mysterious Orb – See **HQ: Return Orb to Bajor, anywhere, Assimilate Counterpart**.

Naomi Wildman – This personnel doubles the first-listed skill of other personnel only if it a regular skill. See **skills, skills – modifying**.

Naprem – See **affiliation and ship origin**.

native quadrant – All personnel, ships, and facilities are native to the Alpha Quadrant, except those that have a gamma Γ, delta Δ, or mirror M icon. See **report, facility**.

native to this timeline – See **time location**.

Navigate Plasma Storms – This objective's probe result applies to each Badlands Region where there is a ship. Thus, for example, a facility in the mirror Badlands Region is not affected by a flare-up or maelstrom unless there is a ship there. A cloaked ship (but not a phased ship) in the Badlands triggers probing for, and may be damaged or destroyed by, this objective. See **cloaking and phasing**.

Near-Warp Transport – You may use this interrupt to transport through a Q-Net, but it does not allow you to overcome any obstacles to **beaming**. It may not target a **docked ship**.

nearest planet, etc. – See **ties**.

nebula – A location is a nebula if it has the word "nebula" in its card title or lore.

♦ **Nebula** – This mission may seed only in the Alpha Quadrant and is not attemptable (it has no mission requirements).

If you play Scan to initiate a ship battle at this mission location, you do not also get to scan a mission's seed cards.

Dilemmas may be seeded under this mission. If you have an undocked, uncloaked, unphased ship at the location with any crew aboard (not disabled, in stasis, or under house arrest) when your opponent scores points, that ship and crew must face the next dilemma under the mission. If you have more than one ship at the location, you choose which ship will face the dilemma. Docked ships, empty ships, and ships moving past the mission (even if points are scored while play is suspended) are not affected. This is not a **mission attempt**, does not require "unstopped" personnel, full staffing, or a personnel matching the ship's affiliation, and does not allow acquisition of artifacts seeded under the mission. See **movement**.

Needs of the Many, The – A Tactic card just placed as a damage marker is "about to destroy your ship" if that marker will reduce the HULL integrity to 0 or less. A dilemma is "about to destroy your ship" if your opponent is not using a Battle Bridge side deck and the dilemma damages an already-damaged ship a second time (or the Borg Ship dilemma is destroying it in battle); or if its direct effect is to destroy the ship rather than damage it (e.g., Cosmic String Fragment).

nemesis icon [Nem] – Nemesis icons identify a relationship between personnel and/or ships that lead to the destruction of one of the pair. Two cards that have a nemesis relationship will have icons of the same color but pointing in different directions.

If two or more personnel or ships with opposing nemesis icons are **present** with each other at the end of a player's turn, that player must choose one of them to be immediately killed (personnel) or destroyed (ships), regardless of ownership. (If a nemesis ship is cloaked or phased, it is not affected by – and cannot affect – an external nemesis.) This is not a battle.

For example, if your Pralor Unit 3947 is on a planet with your opponent's Cravic Unit 122 at the end of your turn, you must choose one of them to be discarded. If you have left your Pralor Unit 3947 aboard your Cravic Warship at the end of your turn, you must choose one to be discarded. (If you choose to destroy the ship, all personnel aboard – including Pralor Unit 3947 – will be killed.)

Neural Servo Device – See **control**.

Neutral – An affiliation consisting of only a few cards (not a full affiliation). While similar to **Non-Aligned**, neutral cards are neither an aligned affiliation nor Non-Aligned.

♦ **Neutral Outpost** – Errata:

Seed one at any [S] mission ~~Space location~~ OR build later at any [S] mission ~~a Space location~~ where you have any ENGINEER ~~is present. No repairs here. Does not repair ships.~~

See **repair**.

Nexus, The – This doorway destroys all ships present when it is placed on the far end of the **spaceline**; when it moves to a new location at the end of every turn; and whenever a ship moves to or appears at its location. (See **Borg Ship** for a definition of "appears at".) See **far end of spaceline**.

A player may relocate their personnel from under The Nexus either while it is on the spaceline or after it is placed on table. Personnel under The Nexus are **in play** and may use skills when appropriate, but may not initiate personnel battle.

Nightmare – This incident is not nullified if the number of cards in hand is momentarily reduced below the number of stored cards during the resolution of a card such as Masaka Transformations.

NO – Indicates an **undefined attribute**, as in "NO INTEGRITY."

No Way Out – This incident does not force you to initiate battle. If your personnel are involved in a battle while it is in play, mortally wounding or stunning is not optional.

If you use this incident to place a **dual-personnel card** in your point area, you score points only for the INTEGRITY of each individual on the card who has Honor x2. For example, if Sons of Mogh are killed in battle, you score points only for Worf.

See **in play**.

Non-Aligned – An affiliation. Non-Aligned (and Neutral) cards are **compatible** with (may mix and work with) cards of any affiliation (except Borg). Thus, personnel and ships of all affiliations may report for duty at Non-Aligned or Neutral outposts, but incompatible personnel or ships may not mix aboard or dock at the outpost at the same time. Non-Aligned and Neutral cards may initiate battle against any affiliation, including their own. In all other respects, the Non-Aligned and Neutral affiliations work exactly like other affiliations.

All Non-Aligned personnel of Cardassian or Ferengi species remain Non-Aligned by affiliation.

non-Federation, non-[Fed] – A non-[Fed] Away Team, crew, or force is one that contains no [Fed] cards.

Nor – Generic term for a Cardassian-origin mining station, a type of **facility**.

Nor, control of – See **facility**.

normal card play – See **card play**.

normal speed – See **actions – required**.

not duplicatable – See **unique and universal**.

not repeatable – See **combo dilemma**.

nullify – To nullify a card is to **cancel** and discard it. If a card is nullified before it resolves, the nullified card has no results. "Destroy" on a card means the same as "nullify" (except in the context of physical destruction such as battle, Black Hole, or Supernova). See **actions – step 2: responses**.

The effect of a card can be nullified without the card itself being nullified. For example, Hugh nullifies the attack of a Borg Ship dilemma, not the dilemma itself.

"May be nullified by..." – A card containing this phrase may be nullified by the card listed, as well as any other applicable nullifying cards. For example, Frigid is a Q-icon event which "may be nullified by Fire Sculptor." It may also be nullified by Kevin Uxbridge or by Q-Flash.

"May be nullified only by..." – A card containing this phrase cannot be nullified by any cards

other than the one listed. For example, interrupts may normally be nullified by Amanda Rogers. However, the Q-icon interrupt, Gift of the Tormentor, "may be nullified only by Countermanda," so it is immune to Amanda Rogers (and Q-Flash).

"May not be nullified." – A card containing this phrase may not be nullified by any card (unless another card specifically states that it nullifies that card by name). For example, Hide and Seek, when used as a Q-icon event, "may not be nullified." It cannot be nullified by Kevin Uxbridge, Mercy Kill, Q-Flash, or any other card that may normally nullify events or Q-icon cards.

Obelisk of Masaka – You may use this incident to download Masaka Transformations only during your own turn. It does not allow you to convert card draws to downloads; it limits the number of card draws you may convert to downloads using another card with such a function, such as the Borg Queen.

objective – A card type representing an assignment or task to perform, which may score points or provide other benefits. It may play on the table, or play on and affect another card. A seedable objective may seed during any **seed phase** unless otherwise specified. Playing an Objective card uses your normal card play.

An objective may require you to target (select) a ship, planet, personnel, etc. If the target of the objective is removed from play or becomes an invalid target, the Objective card is immediately discarded. Otherwise, the objective remains in play until nullified, discarded, or relocated according to its game text. Once an objective is completed or resolved and is relocated somewhere to mark this (e.g., Establish Gateway, Hero of the Empire), it may no longer be nullified.

Points for an objective with a point box are scored when the objective is successfully completed. Performing other listed results of the objective are additional results and have no effect on scoring the points.

A Borg player is limited to one Borg Use Only [BO] current objective at a time. Any player may have any number of non-[BO] objectives in play at a time.

Observe Ritual – This mission is not a **homeworld**.

Obsidian Order – See **skills – using**.

occupied ship – Your ship is *occupied* if you have any crew aboard. See **empty ship**.

Ocett – See **Non-Aligned**.

Ocular Implants – This event may be used to look at the **bottom seed card** under a planet mission only. The personnel "wearing" the Ocular Implants must be on the planet. See **present**.

Odo – See **equipment**.

off line – See **damage**.

Omega Particle – This event may play *only* on your outpost, even if downloaded with Harness Particle 010.

on planet – Cards which are in a planet facility or aboard a ship landed on a planet are also "on planet."

on table – A card that "seeds on table" or "plays on table" is placed in a special area on the table away from the spaceline. Cards on the spaceline are not considered to be "on table."

once each (every) turn – See **once per turn**.

once in play – When a card has an effect "once in play," that effect continues for the rest of the game, even after the card is no longer in play (unless another card specifically cancels the effect). For example, Mortal Q's restriction box says, "Once in play, your Q-Continuum is inactive." Even if Mortal Q is killed, your Q-Continuum remains inactive for the rest of the game. However, if you nullify (discard) your

Mortal Q with Immortal Again, your Q-Continuum is reactivated, as stated on Immortal Again. See **rest of game**.

once per game – When a card has an effect that may be used “once per game” (including special downloads), you may use that card’s effect only once during a game, no matter how many copies of that card you have in play during that game (even universal cards). For example, you may download Reflection Therapy only once per game with Suna’s skill, even if you play multiple copies of Suna. You and your opponent may each use such text once per game if you each control a copy of that card.

If the same “once per game” skill is included on different cards, you may use the skill once for each card; for example, you may use the ability to destroy seed cards once per game for Ajur and once per game for Boratus.

“Twice per game” and “thrice per game” work similarly – you may use such an effect only two or three times per game, regardless of how many copies of the card you have in play.

once per turn – A card whose effect is limited to use “once per turn,” “once each turn,” or “once every turn” can be used only once during a turn regardless of the number of copies of that card you have in play, except for cards with a universal ♠ icon and **cumulative** cards. Each copy of a ♠ or cumulative card may use a “once per turn” effect once during a turn.

One – This personnel shares skills from other Borg present (but they do not share his skills). See **skill-sharing**. He has built-in transporters, as stated in his lore, and needs no ship or facility transporters to beam. Like all personnel, he may carry equipment when beaming.

Open Diplomatic Relations – Each seeded copy of this objective allows you to seed one treaty during the doorway seed phase.

Operate Wormhole Relays – See **wormholes** – movement through.

Ophidian Cane – This artifact is played as a response to saying “Devidian Door,” allowing three Personnel and/or Equipment cards to be reported to the same destination.

opponent’s choice – See **selections**.

opposing – An *opposing* personnel, ship, or facility is one controlled by your opponent and which is not cloaked, phased, disabled, or in stasis. See **unopposed**, **Patrol Neutral Zone**.

opposite – See **persona**, **mirror universe**.

Ops – The affiliation of a personnel or ship downloaded to any site using this site’s text must match the affiliation of the Nor. A treaty makes cards **compatible** but not **matching affiliation**. You are not required to have a personnel in Ops in order to download a card to any site. Only the destination site must be **unopposed**.

A “card which may play there” is one which is allowed to play there by the text of the destination site (e.g., Security Office, “SECURITY-classification personnel and hand weapons may report here”), or by its own text (e.g., Weapons Locker “plays on ... Security Office”). If an additional card is required to allow the card to play there, it may not be downloaded (even if the additional card is present). For example, you may not download a non-SECURITY Bajoran to Security Office even if The Emissary is there; you may not download a Breen CRM114 to the Security Office even if a Breen or arms dealer is there.

Orb Negotiations – You may seed any number of *different* Orb artifacts (no duplicates) under this mission, in place of the single artifact normally allowed at a mission.

Orb of Prophecy and Change – On this artifact, “Insert it anywhere within your draw deck” refers to the top card of your draw deck that you just looked at, not the Orb itself.

orbiting – See **in orbit**.

Ore Processing Unit – If you commandeer your opponent’s DS9 with Klingons, it is under Klingon control. You may process ore (using the Process Ore objective) even if you have Bajorans aboard and a Klingon/Bajoran treaty in play, but only with a [Klg] ENGINEER or SECURITY personnel at this site. See **commandeering**, **facility** – *Control of facilities*.

Organ Theft – See **immune**.

Original Series icon [OS] – This icon appears on Personnel, Ship, Facility, Equipment, and other cards from the original *Star Trek* series, as well as a few cards from *Star Trek: Deep Space Nine*™. It is used as a special staffing icon and for other purposes defined by game text.

out-of-play – When directed to place a card *out-of-play*, place it in a pile separate from the discard pile. A card placed out-of-play may not be returned to the game by any means (except by reversal of a Black Hole). Discarded cards are not out-of-play (although they are not **in play**, either). When you place any card out-of-play (including unused seed cards), you must first show it to your opponent.

outpost – A kind of **facility**. An outpost is a space facility, even if located at a planet mission (it is in orbit of the planet).

The Bajoran, Cardassian, Federation, Ferengi, Klaestron, Klingon, and Romulan Outposts have errata, where XXX is the affiliation or species name (see also **Borg Outpost**, **Neutral Outpost**):
Seed one if playing XXX OR build later at any location where you have a XXX ENGINEER is present.

The card titles of the Bajoran, Borg, Cardassian, Federation, Ferengi, Husnock, Klaestron, Klingon, Neutral, and Romulan outposts have been revised to explicitly include the word “Outpost.” In addition, *all* outposts without an **Enigma** icon have an implied ♠ symbol in the card title. These revisions will be incorporated into any reprint of these cards. Thus, the card titled “♠ Klingon Outpost” from the Trouble With Tribbles preconstructed deck is the same card as the Premiere outpost titled “Klingon,” and you may seed only one.

If you have no outpost in play, no player may play a card requiring you to return a personnel or ship to your outpost (e.g., Rescue Captives with no Prepare the Prisoner in play, Incoming Message cards), nor may you choose an effect on a card that would require an outpost (e.g., replying “five” to Interrogation).

outpost – built-in – See **Mission II**.

Outpost Raid – “If at your outpost” means if you encounter this dilemma at a location where you have an outpost, whether it is a planet or space mission. “Outpost” does not include other types of facilities. Personnel aboard the outpost are not affected by the dilemma.

outside the game – A card brought in from *outside the game* may not be one of your cards currently **out-of-play** or a **copy** of one of those cards. Any cards added to your deck from outside the game (e.g., *Phoenix* seeded under Montana Missile Complex or the contents of a First Contact expansion pack added by Add Distinctiveness) must be removed at the end of the game, and your deck restored to its original condition.

overlays – Borg – See **assimilation – personnel**.

owner – The owner of a card is the player who originally stocked that card in their game deck. All cards temporarily controlled by the opponent (e.g., captured, commandeered, assimilated, stolen) are returned to their owner at the end of the game.

Palor Toff – Alien Trader – See **discard pile**.

Panel Overload – You may use only one copy of this incident to kill a Computer Skill personnel each time your opponent plays a Scan or Full Planet Scan. See **cumulative**.

Parallax Arguers – This interrupt has multiple functions. During initiation of the card play, you must declare which function of the interrupt you are using and meet any conditions for using that function. If you do not meet the conditions for that function, it is an invalid card play and the card returns to your hand. See **actions – step 1: initiation**.

The condition for using the first function of the card is that “that [the previous game action] was cool.” This means that *you say it was cool*, and your opponent *does not disagree with you*. (He does not have to actively agree.) The condition for using the second function of the card is that “you just argued” over the coolness of the last game action. This means that *you said it was cool*, and your opponent *disagreed*. No other “arguments” count for this card.

Here’s how to play Parallax Arguers (PA) for the first two functions:

1. Just after a game action is completed, say “That was cool,” and attempt to play PA. If your opponent does not disagree, carry out the results of the first function: place the PA in your bonus point area, with X=5. If your opponent disagrees, return the PA to your hand; it was an invalid card play (the condition was not met).
2. You now meet the conditions for the second function. *If you want to use that function*, say, “We just argued,” and play the PA. Carry out the results of the second function: play an Event card from your hand, and place the PA in your bonus point area with X=0. *If you do not want to use this function*, you don’t have to.

Here’s how the third function (nullifying another PA) works:

1. I play a PA (for coolness). X=5, but...
2. You respond by playing a PA to nullify my PA. Mine is discarded; for yours, X=10, but...
3. I respond by playing another PA to nullify yours. Yours is now discarded; for mine, X=15.

In other words, if we play a chain of PAs, each one nullifies the previous one, and the last player to play a PA scores a total of 5 points for each PA in the chain. All PAs except the last, unnullified one are discarded. The last one goes in its owner’s bonus point area.

Unless nullified, this interrupt is placed in your bonus point area regardless of its use, even if its point value is 0. (X=5, 0, or “opponent’s Arguers points + 5.”) Thus, it may not be retrieved and reused after using it to play an event.

Particle Fountain – You may play this interrupt only on a mission that you completed.

particle scattering device – A type of ship’s **special equipment**. It has no built-in function, but is activated by the Particle Scattering Field card.

passing locations – To “pass” or “fly by” a location (e.g., for Cargo Bay, Subspace Warp Rift, or Hail), your ship must move to it from one location and away from it to a different one, all using span numbers. The ship is not considered to pass a mission if it moves away from it back in the direction it came from (e.g., picking up someone stranded at the end of the spaceline), or if it moves to or from the mission without using span numbers (e.g., Wormhole).

Patrol Neutral Zone – Revised lore:
Neutral Zone Region • Nebula
There are “no opposing ships in Neutral Zone” if your opponent has no **opposing ships** (including landed and docked ships) at any location that is part of the Neutral Zone (see

regions of space). See **unopposed, cloaking and phasing**.

Paul Rice – This personnel may nullify one Echo Papa 607 Killer Drone per turn.

P'Chan – See **Lansor**.

Penalty Box – This Q-icon event is *not* a capturing-related card.

Persistence of Memory – This artifact “reverses” the effect of one of a number of cards. The following entries are the official definitions of “reverse” for the cards affected by Persistence of Memory:

Horga'hn – Artifact allows opponent to take double turns from now on. (Not cumulative.)

Thought Maker – Look at your draw deck for ten seconds and rearrange as desired.

Mona Lisa – If destroyed, the opponent of the player directly causing the destruction (if any) loses points. (Not duplicatable.)

Static Warp Bubble – You must discard one card before ending each turn. (Not cumulative.)

Kivas Fajo – Collector – Opponent chooses any player to immediately draw three new cards from the top of their draw deck. Discard event after use.

The Traveler: Transcendence – That player's opponent must draw one extra card at the end of each turn. Also, while in play, nullifies Static Warp Bubble. (Not cumulative.)

Devidian Door – Allows you to send a card “to the future.” Whether or not you currently have a Devidian Door in your hand, at any time say “Devidian Door” and take (from anywhere in play) one of your Personnel or Equipment cards to your hand. However, any time during your next turn, you must show opponent a Devidian Door from your hand and place it out-of-play, or you lose the game. (Note that you play Persistence of Memory on the “Devidian Door” announcement, not when the Doorway card is shown.)

Black Hole – Remains a location with span of 1. Every four full turns, inserts one new ♦ Space location from outside the game (regardless of out-of-play restrictions).

Alternates, first inserting one on your left, then on your right, and so on. (Not duplicatable.)

Supernova – Remove from mission (discard event). Everything previously destroyed there remains destroyed except Mission card (which is restored and may be attempted unless already solved).

Anti-Time Anomaly – Regenerates literally ALL personnel from discard piles (both players' cards) at the end of your third full turn, unless anti-time anomaly destroyed first. Players take turns placing their personnel anywhere personnel can normally exist in play (regardless of uniqueness and reporting restrictions).

persona – Two Personnel or Ship cards are instances of the same *persona* if they are duplicates (copies); or if they have the exact same card title; or if one has the other's name in boldface type in its lore; or if they both have the same *persona* name in boldface type in their lore. The presence or absence of [AU] icons does not determine whether two cards are instances of the same *persona*.

You may not have more than one instance of the same *non-universal* *persona* in play at the same time, including cards which have been captured, commandeered, assimilated, or are otherwise controlled by your opponent, unless a card specifically allows it. You *may* have multiple instances of a *universal* *persona* in play. See **unique and universal**. You and your opponent may each have a copy of the same *non-universal* *persona* in play. Examples:

Jean-Luc Picard (Premiere), Jean-Luc Picard (First Contact), Locutus of Borg, and Galen are all instances (different versions) of the same *persona* (the “Jean-Luc Picard”

persona). You may have only one of them in play at a time. Admiral Picard and Lt. (j.g.) Picard are instances of different *personas* (one from Barash's illusion, and one from an alternate timeline). You may have Jean-Luc Picard and Admiral Picard (for example) in play at the same time.

Starship Enterprise (The Trouble With Tribbles) and *Starship Enterprise* (The Motion Pictures) are two instances of the same ship *persona*; you may have only one in play at a time. *U.S.S. Enterprise* and *Future Enterprise* are instances of different *personas*; you may have both in play at one time.

You may have any number of copies of ♦ Linda Larson in play at the same time; they are all instances of the Linda Larson *persona*. Only one copy may probe (once per game) for Visit Cochrane Memorial if It's Only a Game is in play. You may also have any number of copies of ♦ *Starship Constitution* (The Trouble With Tribbles) and ♦ *Starship Constitution* (The Motion Pictures) in play at one time.

Two nonidentical instances of the same *persona* are *not* duplicates (e.g., for Doppelganger) or copies, and may not be substituted for **matching commanders**, mission requirements, etc., if they do not meet other applicable criteria (same name, matching commander lore, etc.). For example, The Emissary is not the matching commander for the *U.S.S. Defiant*, which states that Benjamin Sisko is its commander.

Some cards, such as Delta Quadrant Spatial Scission and Clone Machine, allow you to have more than one *copy* of a unique *personnel* (or ship) in play, but do not allow you to have more than one *version* of a unique *persona* in play. For example, if you have two copies of Tom Paris in play, you may not exchange one for a Captain Proton from your hand.

Treat non-duplicatable facilities in the same way, i.e., you may not have more than one instance of a non-duplicatable station “*persona*” (such as Deep Space 9 and Terok Nor) in play at the same time.

The *persona* rule does not apply to other card types such as events or interrupts. See **card titles**.

Persona replacement – When you have one version of a *personnel* or ship *persona* in play and a second version of that same *persona* in your hand, you may exchange them at the start of your turn for free. (Facilities may not be exchanged.) All cards aboard or played/placed on the first version (e.g., Orb Experience, Framed For Murder), and any rotation damage, are transferred to the second version, if applicable. Those cards not applicable return to their owners' hands. You may not replace the same *persona* more than once at the start of a turn. Replacing a *persona* is not a card play or reporting for duty. See **exchanging cards, in play**.

Persona replacements involving **dual-personnel cards** must exchange versions of both *personas* on that card. For example, you must replace Sisters of Duras with both Lursa and B'Etor (or vice versa).

To replace one version of a *persona* with another, the first version must have been originally played under, and still be under, your control (not your opponent's). Thus, you may not replace your *personnel* or ship which has been captured, commandeered, abducted, or assimilated; and you may not replace a Jean-Luc Picard you assimilated from your opponent with your Locutus of Borg. (You can still play your Locutus of Borg, because you did not play Jean-Luc Picard.) See **Add Distinctiveness**.

Impersonators – A *personnel* who has a **bold italic** “*persona* name” in its lore, and a diamond-shaped **infiltration icon**, is an

impersonator, not a true version of that *persona*. An *impersonator* may not be exchanged for any version of that *persona* and may not be substituted for a matching commander, mission requirement, or dilemma condition, cure, or nullifier. See **species**.

Mirror versions – A *personnel* who has a **bold italic** “*persona* name” in its lore, and a mirror quadrant icon, is a *mirror version*, not a true version of that *persona*. You may have both in play at the same time. Regular version(s) of a *persona* are called the *opposites* of the mirror version, and vice versa. For example, the mirror universe *personnel* Mr. Quark is the opposite version of Quark, Lumba, and Quark Son of Keldar, and he does not qualify as Quark unless the reference is to “any Quark.” A mirror version may not be exchanged for a regular version of that *persona* and may not be substituted for a matching commander, mission requirement, or dilemma condition, cure, or nullifier (unless the requirement is for “any [name]”).

personnel – A card type representing a character from the Star Trek universe. *Personnel* have eight different **classifications** and three **attributes** – INTEGRITY, CUNNING, and STRENGTH. These classifications and attributes, along with **skills** listed on the cards (e.g., Navigation or Stellar Cartography), are used to overcome dilemmas and complete missions. *Personnel* also may have icons indicating such features as ship-staffing ability, origination in an alternate universe or timeline, Orb experience, or membership in the Maquis. (**Borg** have no classifications, and have special *subcommander* icons.)

personnel – seeded – Some game text allows you to seed *Personnel* cards under a mission (e.g., Cryosatellite, Rescue Prisoners, Tori Ziyal, Q-Type Android). Such cards are seeded face-down, like artifacts, and are earned when the mission is solved or a Borg objective targeting the mission is completed (if the Survey Drone is present). (**Mirasta Yale** is an exception; she seeds like a dilemma and is earned when encountered.) Seeded *personnel* that you own join your crew or Away Team, if compatible; otherwise they are placed under **house arrest** (on a ship) or form a separate Away Team (on a planet). Seeded *personnel* owned by your opponent become your captives. See **capturing, mis-seeds**.

personnel movement – See **movement**.

personnel type – The eight *personnel* types are OFFICER, ENGINEER, MEDICAL, SCIENCE, SECURITY, V.I.P., CIVILIAN, and ANIMAL. All *personnel* types appear as **classifications**; some also appear as **skills**. If a card requires a *personnel* type without specifying either a classification or a skill, either will satisfy the requirement.

Phased Matter – Revised text:

Away Team is split into two Away Teams (owner's your choice). Only the smaller team may beam up. Larger team is phased and cannot beam until cured by ENGINEER and SCIENCE present in another Away Team on planet.

If you split the Away Team encountering this dilemma into two groups of equal size, designate one the “larger” group. If there is only one *personnel* in the Away Team, your two “groups” contain one and zero *personnel*. The smaller Away Team must continue the mission attempt (if possible).

Like phased ships, phased *personnel* are both invisible and untouchable. They are not affected by external phenomena (e.g., The Sheliak), and may not affect non-phased cards (e.g., engage in battle with non-phased cards, attempt or scout missions), but remain vulnerable to global effects caused by changes in the timeline (e.g., Anti-Time

Anomaly, Stop First Contact). See **cloaking and phasing**, **Thine Own Self**.

Phased personnel are initially unaffected by a Supernova, but will be killed upon exposure to space (except Borg or androids).

Phaser Burns – Errata:

If you have phasers or disruptors present during an **Away Team** a personnel battle, before a winner is determined randomly select two opposing **personnel stunned cards** to die.

Phasing – See **cloaking and phasing**.

phasing cloak – This **special equipment** allows a ship and its crew to go “out of phase” with the universe. The ship is both invisible and untouchable, and thus can fly through planets and other navigational obstructions. While phased, the ship receives a RANGE enhancement as indicated on the card providing the phasing ability. See **cloaking and phasing**.

Phoenix – This ship must be undocked to be in orbit of a planet and worth bonus points. If reported in space, it is considered conceptually to have already taken off and so cannot take off again if landed. “NO WEAPONS” is an **undefined attribute**. See **Montana Missile Complex**.

Picard's Artificial Heart – This Q-icon artifact can be stocked only in your **Q-Continuum side deck**. When your opponent encounters it, immediately seed it under the mission where encountered. Whenever the mission is completed (or scouted), you – the card's owner – always take it into your hand. See **meeting requirements**.

Plain, Simple Garak – This personnel's special skill allows you to perform a **persona** replacement at any time, rather than only at the start of your turn. He may be replaced only by another true version of the Elim Garak persona. (The [AU] Garak and [MQ] Security Chief Garak are *not* true versions of the Elim Garak persona.)

planet facility – A planet **facility** is any headquarters or station which says that it seeds or plays on a planet (whether it names a specific planet or not). *All* other facilities, including all outposts, are space facilities.

Plans of the Obsidian Order and Tal Shiar – The personnel with Obsidian Order or Tal Shiar skill must be at the mission location where you play your **Espionage card** for free. You do not need such a personnel in play to use the other functions of these objectives.

Plasma Fire – The ship is damaged by this event at the end of each of the **turns** of the ship's owner, beginning at the end of the owner's next turn.

play phase – After the seed phases are over, shuffle your draw deck and place it face down on the table. Draw seven cards to form your starting hand. (There is no limit to the number of cards you may hold in your hand during the game.)

The starting player (chosen before the seed phases began) takes the first turn, then players alternate **turns** until one player scores 100 points, or until both players' draw decks run out. See **winning the game**.

played as – See **card types**.

playing an affiliation (non-Borg) – You are “playing [affiliation]” or are an “(affiliation name) player” if you have played, seeded face-up, or seeded face-down and acquired, any personnel, ship, or facility of that affiliation, or used a multi-affiliation card you seeded or played in that affiliation mode at any time during the game, regardless of whether any such cards are still in play. Your opponent's cards that you control with Brainwash, Ceti Eel, etc., or that have been reported to you by The Naked Truth, do not cause you to be “playing that affiliation.” See **playing Borg**.

playing Borg – You are playing Borg (or are a “Borg player”) if you stock any [Borg]-affiliation personnel, ships, or facilities (or any [Borg Only] cards) in your game deck or in any side deck, even if you have not seeded or played them. If playing Borg, you may not stock any non-[Borg]-affiliation cards. You are not playing Borg if you stock non-[Borg]-affiliation Borg personnel such as One or Icheb.

point box – A point box on a card may contain a number (a point value) or a variable such as X or 10X. “A point box” is any point box regardless of its contents. “A point box with a number” is one with just a number and no variable.

When a card refers to a mission point box “showing at least 40 points,” it means the actual number printed on the card, not what the mission may be worth. Thus, the point box on Quest for the Sword always shows 40 points, even after The Sheliak arrives and makes the mission worth 0 points. Likewise, Reunion's point box never shows any points, although it may be worth 15 or 40 points.

points – “Scoring points” refers to any change in a player's score, either gaining or losing points. A card with a negative point value reduces your score by those points, possibly resulting in a negative score. For example, if your score is 0 and you score a dilemma with a –10 point value, your score is –10.

Points scored from Mission cards and [Borg Only] Objective cards are *non-bonus* points. Positive or negative points from *any* other source are *bonus points*.

When points are transferred between players, the changes in score are treated independently. For example, if you nullify a point loss from Mandarin Bailiff with Bribery, your opponent still gains points. If you are playing Borg and cannot gain bonus points, your non-Borg opponent will still lose them.

If a card, such as **Intermix Ratio** or **In the Zone**, says that certain points “do not count toward winning,” those points are not counted in your final score for the game (whether you win or lose), either for determining a winner and loser or for calculating differential. The points are not lost or cancelled, and still count for other purposes, such as passing Dead End.

pooling skills – See **Blood Screening**.

Post Garrison – See **cloaking and phasing**.

Prefix Code Transmission – You may play this interrupt on your ship if it is firing on a **multi-affiliation** ship that has an affiliation icon matching yours, even if the target is not currently in that mode.

Prepare Assault Teams – Activating this objective is a valid response to the initiation of personnel battle, activating all its text. You may download a weapon or use SECURITY as a leader even if you do not split your **Away Team**. If you split your personnel, each assault team must have at least one personnel card in it; it may not consist solely of Equipment cards. If you initiated the battle, your assault team that you choose to participate in the battle must contain a leader (unless counter-attacking).

Prepare the Prisoner – See **capturing-related**.

present – Your personnel and equipment are present together (or “with” each other) if they are in the same crew or **Away Team**. Personnel who are “stopped,” disabled, in stasis, or under house arrest form a separate crew or **Away Team** during your turn. (See **Away Team and crew**.)

Your personnel and equipment in a separate crew or **Away Team** may not contribute skills or enhance others to battle, to solve missions, or to overcome, nullify, or cure dilemmas or Q-icon cards during a mission attempt. They may

not trigger or be targeted by dilemmas or Q-icon cards encountered by the attempting **Away Team** or crew.

Your personnel are present with your opponent's personnel if they are on the same planet (but outside a facility or landed ship), or on the same ship, facility, or site.

You may not benefit from your opponent's personnel who are present with yours, unless a card affects “all” of a type of personnel present, but they may be adversely affected.

Examples:

- Your Kahlest increases the STRENGTH of your Klingons with Honor during a personnel battle or mission attempt only if she is participating in the battle or mission attempt.
- Your K'mtar's attributes are enhanced only by your Alexander Rozhenko in the same **Away Team** or crew.
- An android in stasis or under house arrest will not trigger, or be “stopped” by, Chinese Finger Puzzle.
- Your opponent's personnel may pass on a Coalescent Organism to one of your personnel on the same planet.
- Your opponent's Targ enhances STRENGTH of “all non-Targ Klingons...where present,” including your Klingons.

If a dilemma “holds” or otherwise separates part of a crew or **Away Team** (for example, Alien Abduction), your other personnel may be considered “present” for purposes of curing that dilemma, even during the mission attempt. “Aboard” (a ship or facility) is used interchangeably with “present” for many space dilemmas and other cards. For example, dilemmas which affect personnel “aboard” during a mission, scouting, or commandeering attempt affect only the crew participating in the attempt. Personnel on a ship or facility who are **intruders, disabled, or under house arrest** may be affected later by dilemmas that enter play or by other cards that affect personnel “aboard,” but they may not contribute traits or skills for staffing ships, for curing or nullifying dilemmas that have long-term effects, or for such cards as Paxan “Wormhole,” Defiant Dedication Plaque, Kurlan Naikos, or Navigate Plasma Storms. See “**stopped**.”

Your personnel (and equipment) are present with other cards (e.g., event, interrupt, or doorway cards, seeded cards outside the context of a mission attempt, dilemmas that enter play) if they are on a ship or space facility at the space location where the card is played or seeded (or where the card is moving down the spaceline); on the planet surface (outside a facility or landed ship) where the card is played or seeded; on a ship, facility, or site on which the card is played; or present with a personnel on which the card is played. A seeded card may not be nullified by a personnel “present” until it is encountered in a mission attempt. Examples:

- A personnel wearing Ocular Implants may look at a seed card under a planet mission if he is on the planet surface, and under a space mission if aboard a ship or facility at the location.
- Guinan may nullify Frame of Mind if she is in the encountering **Away Team** or crew, or (after the mission attempt) if she is present with the affected personnel. She may nullify The Whale Probe if she is in the encountering **Away Team** or, after it enters play, if she is aboard a ship or space facility at its location.
- The human ENGINEER who enables probing for Visit Cochrane Memorial must be on the planet surface, not in a landed ship or facility.
- Borg Nanoprobes can nullify Your Galaxy Is impure on the planet surface or aboard a ship at its location.

- John Doe can nullify an Espionage card on either a planet or space mission.

Two ships or facilities are present with each other if they are either in space at the same **location** or on the same planet. A ship is present at a site if it is docked at that site.

A ship is present at a mission if it is at the mission location. It is present for a mission attempt or dilemma encounter only if the crew of that ship is attempting the mission. (**Quantum Singularity Lifeforms** is an exception.)

An artifact just earned is not present (e.g., for Kivas Fajo or HQ: Return Orb to Bajor) unless it joins the crew or Away Team. Thus an Orb of Prophecy and Change is present with the Away Team when earned, but a Mysterious Orb or Horga'hn is not.

See **Away Team and crew, here, in play, location, "stopped."**

prevents – See **actions – step 2: responses.**

Primary Supply Depot – This outpost may be seeded at any non-homeworld Gamma Quadrant mission, regardless of affiliation icons. It may not be built later. See **repair, Ketracel-White.**

probing – Probing is a feature of some Objective and other cards which uses card icons to determine a randomized outcome. When a card requires or allows you to probe, you do so at the end of your turn (just before your card draw) by revealing and examining the top card of your draw deck, called the *probe card*. (If your draw deck is empty, you may not probe.)

- Start with the first icon in the objective's probe list. If that icon appears *anywhere* on the probe card (in game text, as a staffing icon, etc.), first replace the probe card on your draw deck and then execute the appropriate outcome for that icon. (Thus, if the outcome allows you to download a card from your draw deck, the probe card will be shuffled into the deck before you take your end-of-turn card draw.) If not, look for the second icon in the probe list, then the third, and so on. Always examine the icons in the *probe list* from top to bottom, and execute *only* the first appropriate outcome. The position of the icon on the *probe card* is irrelevant.

- If none of the icons in the probe list appear on the probe card, but the word "Otherwise" appears at the end of the probe list, replace the probe card on your draw deck and execute that outcome.

- If there are no icon matches and no "Otherwise" in the probe list, simply replace the probe card. This is defined as *probing with no outcome*.

Some probe outcomes "complete" the objective (e.g., the last outcome on Navigate Plasma Storms) and tell you to discard it or relocate it as a marker. Other outcomes allow the objective to remain in play (e.g., both of the outcomes on Promenade Shops). You may continue probing on successive turns until the objective is nullified, discarded, or completed.

As an example, Visit Cochrane Memorial has the following text:

[Fed], [Obj]: "Oooh." Draw one card.

[Ev], [Int]: "Aaaaah." Play one card.

[Fajo], [Eq]: "Wow!" Download one card.

[NA], [Door]: "I thought it'd be bigger." Discard one card.

The probe list consists of the icons. The outcomes are "Draw one card," "Play one card," and so on. If either the [Fed] or [Obj] icon appears *anywhere* on the probe card, replace the probe card on your draw deck and then execute the outcome "Draw one card." (You will draw the probe card.) This is the appropriate outcome, even if another icon, such as [NA], also appears on the probe card and regardless of the order in which those

icons appear. For example, if the probe card is Chakotay (either the gold-bordered or blue-bordered version), you execute the "Draw one card" outcome for his [Fed] icon. All outcomes allow you to continue to probe on each turn that you have an unopposed human ENGINEER present.

If two or more cards allow or require you to probe, announce all of them at once and reveal only one probe card (using it to resolve the probes in any order you wish). However, cards which instruct you to "immediately probe" are resolved individually, without waiting for the end of your turn.

If a Borg objective involves scouting a ship or location, you may probe only after **scouting** is complete, and not at the end of the same turn you completed scouting. Also, you may not probe to complete any Borg objective (except one that says "immediately probe") if your Borg participated in any battles at the location of the objective's target during your current turn or during your opponent's previous turn.

If a card has received errata that gives it a new icon, treat that card as if the icon were printed on it for purposes of probing. For example, **Tasha Yar – Alternate** is a successful probe for Under Fire.

See **Captain Proton cards, Mirror Image.**

Process Ore – See **Ore Processing Unit.**

Procurement Drone (One of Eleven) – This drone may steal *any* equipment card for the Borg to use, regardless of that equipment's affiliation restrictions. However, the Borg never use hand weapons. See **stealing.**

Proficiency Drone – See **Seven of Nine.**

Protect Shipment – See **WEAPONS.**

protecting cards – When a card, such as Ready Room Door or Intruder Alert, downloads and protects another card from nullification, the card is placed to protect the downloaded card only after the opponent declines or fails to nullify that event. A hidden agenda card may not be protected until after it has been activated.

Protouniverse – If you nullify this interrupt, the "Subspace Seaweed" dilemma is discarded also.

"Pup" – See **disabled, Birth of "Junior."**

Q – Revised text:

Unless 2 Leadership and INTEGRITY > 60, Q allows opponent to rearrange spaceline locations. Otherwise, discard all dilemmas seeded under here. Discard dilemma.

You may rearrange only the **spaceline** where this dilemma was encountered. Move each location card and all cards there (including ships and facilities) as a single unit. You may relocate a Q-Net between any two adjacent spaceline locations. **Regions of space** may be rearranged, breaking up the region.

Overcoming this dilemma allows you to discard only Dilemma cards seeded under the mission, not cards seeded like a dilemma (e.g., Q-Flash) or Q-icon dilemmas encountered during a Q-Flash.

Nullifying or discarding the Q dilemma (e.g., with Q2 or Mortal Q) does not overcome the dilemma or allow you to discard the other dilemmas seeded there.

Q-Continuum side deck – This **side deck** is made up of cards identified by the [Q] icon. You can have as many **Q-icon cards** in your side deck as you like, even duplicates. The side deck is activated during the doorway seed phase by a Q-Flash doorway seeded face up on top of the side deck.

Seed more Q-Flash doorways like dilemmas under any mission (no more than one per mission) to cause your opponent to face the cards in your Q-Continuum. (Additional Q-Flash doorways may be stocked in your draw deck or Q's Tent for nullifying Q-icon cards or

for seeding during the game using the objective Beware of Q.)

When your opponent encounters a Q-Flash under a mission, his crew or Away Team must collectively face a number of cards from your Q-Continuum side deck equal to the number of personnel present. (See **dual-icon mission**.) Draw and resolve Q-icon cards one at a time. If the same Q-icon card occurs more than once during a given Q-Flash, discard any duplicates without drawing more cards to replace them. (If you encounter one copy of a Q-icon dilemma seeded under a mission using Beware of Q, and another copy during a Q-Flash at the same mission, both cards have their effect.) When you have finished resolving the required number of cards, discard the Q-Flash doorway.

Your used Q-icon cards from your side deck do not go to your discard pile if you have a Q-Continuum side deck. Instead, whenever one of them is discarded or otherwise leaves the table, place it *face up* underneath your side deck. When your side deck runs out of face-down Q-icon cards, shuffle the face-up cards and place them face down again underneath your seeded Q-Flash doorway. (Q-icon cards that come into play from any source other than your Q-Continuum side deck, such as Q-icon dilemmas seeded under a mission with Beware of Q, are discarded normally after use, even if you also have a side deck.)

If an entire crew or Away Team is killed, captured, relocated, or otherwise unable to continue a Q-Flash, do not draw any remaining Q-icon cards. Unless otherwise specified, a Q-icon dilemma encountered during a Q-Flash does not "stop" a crew or Away Team that cannot meet its requirements.

You *never* encounter your own Q-Continuum side deck. If you encounter a Q-Flash, regardless of who seeded it, you encounter your opponent's Q-Continuum. If your opponent does not have a Q-Continuum side deck (or if its doorway is closed), discard that Q-Flash.

Q-Flash – This doorway seeds *like* a dilemma; it is not *used* as a dilemma and is not affected by cards that affect dilemmas. See **card types, Q-Continuum side deck.**

Q-icon cards – Cards identified by the special [Q] icon, representing actions of Q or one of the other Q entities, come into play only through a special **Q-Continuum side deck**, unless a card's text allows them to be used in another way (e.g., Q's Planet, Hide and Seek, Beware of Q). (If so, you do not need a Q-Continuum side deck, or any seeded Q-Flash doorways, to use these cards.)

Although labeled as interrupts, events, dilemmas, and other card types, they cannot normally be used the same way as other cards of those types. The objective card Beware of Q allows Q-icon dilemmas (but not other Q-icon card types) to seed as normal [S/P] dilemmas. Q-icon cards can be nullified in the normal ways (dilemmas by Q2, events by Kevin Uxbridge, and interrupts by Amanda Rogers) unless otherwise specified. See **nullify.**

A Q-icon card that contains the phrase "until any Q-Flash" has its effect only until the next Q-Flash card is played from a hand or encountered by any crew or Away Team, then is discarded.

Q-Net – This event affects only Ship cards. It has no effect on The Sheliak, the Borg Ship dilemma, Calamarain, The Nexus, etc. See **adjacent.**

Q-related dilemma – The phrase "Q-related dilemma" (on Q2 and Adapt: Negate Obstruction) refers to regular Dilemma cards with Q's name in the title, such as the Q dilemma, Q's Vicious Animal Things, and Q Gets the Point, and to any Q-icon Dilemma

card. A Q-Flash doorway is not a Q-related dilemma.

Q the Referee – When you use this incident to play a [Ref] card with a Hidden Agenda icon for free, you must show the card to your opponent to verify its [Ref] status before playing it face down on the table. Activating this incident does not suspend play and is not a valid response to any action. You may activate it only between other actions. The incident must already be face up before you may suspend play to download another [Ref] card. See **icons in game text**.

Q-Type Android – When your Personnel card is seeded by your opponent under Q's Planet with the second function of this Q-icon dilemma, it is no longer **in play** until earned when the mission is solved. See **personnel – seeded**. If two copies of the same personnel are seeded there, the second one encountered will be a **mis-seed** and placed out-of-play (if revealed by your opponent, he cannot solve the mission).

If a Borg is altered by this dilemma, their biological distinctiveness or species becomes android and their STRENGTH is +4 (but they are still Borg). A holographic personnel who is altered by this dilemma remains "hologram species;" it is now a hologram of an android with increased STRENGTH. If a **dual-personnel card** containing an android and a non-android is selected for the first function, the species of both personnel are altered. The android becomes human and the non-android becomes an android.

Q2 – See **Q, Q-related dilemma**.

Qapla'! – In Federation Standard, the title, lore, and game text of this interrupt would read:

SUCCESS!

When threatened, fight. When in doubt, surprise them. Brute strength is not the most important asset in a fight. Real power is in the heart. A Klingon does not run away from his battles.

If an opponent attacks you, during that battle your Klingons with Honor add INTEGRITY to STRENGTH. (Not cumulative.)

Q's Fantasy Women – Errata:

DILEMMA EVENT

This Q-icon card is an **EVENT** (as indicated by the game text "Discard event"), not a **DILEMMA**. See **helps**.

Q's Planet – This Q-icon mission is not seeded at the beginning of the game, but comes into play later. (See **Q-icon cards**.) You may stock it either in your **Q-Continuum side deck** or in your **Q's Tent**. When your opponent encounters this card from your Q-Continuum, you immediately insert it anywhere in the Alpha Quadrant spaceline, regardless of where it is encountered and even if there are no missions yet on that spaceline. Starting with your opponent, both players take turns placing seed cards under the mission (up to 3 each). You may not "pass" during the seeding until you have no cards left to seed. You may place seed cards only face down under the mission and all normal seeding and mis-seed rules apply.

If stocked in your Q's Tent, Q's Planet may be retrieved normally by playing a Q's Tent from hand (or by a card that allows it to be downloaded). You may insert it into the Alpha Quadrant spaceline as your normal card play (or play immediately if downloaded). Players then place seed cards as described above.

While it may not be nullified by a counter-card (such as Q-Flash), Q's Planet may be destroyed by a Supernova or Black Hole. Once destroyed, its game text requiring an additional 40 points to win is no longer in effect. See **nullify**.

Treat this mission like a unique mission in case of duplication. If you attempt to play a copy of Q's Planet when your opponent's copy is

already on the spaceline, place your copy on top of the one already in play. It is treated by both players as "their" mission for all purposes, including Fair Play. See **seed phases**. Like any unique mission, Q's Planet can be solved only once per game. If it is destroyed after being solved, any copy subsequently played by any player enters play already solved, and no cards may be seeded there.

Q's Tent – This doorway requires you to choose a target card to take into your hand as part of initiating the card play. Announce the play of Q's Tent (without naming a target card), look through your **Q's Tent side deck** and choose a card, and show it to your opponent, who may then respond by nullifying the Q's Tent or revealing a Computer Crash. See **actions – step 1: initiation**.

After you play this doorway, you may not draw any cards for the remainder of the turn. See **card draw**.

Q's Tent side deck – This **side deck** allows you to stock up to 13 different cards (no duplicates) which you can access during play. You may stock any card in your Q's Tent side deck except a Q-icon card (unless allowed by the card), or a Tactic, Tribble, or Trouble card. Cards that must normally be seeded (e.g., missions, dilemmas, and artifacts) can be placed in your Q's Tent, but you will not be able to use them unless a card allows it (Q's Planet, Hide and Seek, Starry Night, etc.). The side deck is activated during the doorway seed phase by a Q's Tent doorway placed face up on top of the side deck.

There are three ways to retrieve cards from Q's Tent:

- You may stock additional **Q's Tent** doorways in your draw deck. You may then play a Q's Tent doorway from your hand at any time during your turn (subject to normal timing rules) to take a card from your Q's Tent side deck (either randomly or selectively, as described on the card) into your hand. You may then play the card normally from your hand, whenever you may legally play that card. You may not play a Q's Tent from your hand if your Q's Tent side deck is empty.
- You may use a card that allows **downloading** to access cards stocked in your Tent.
- Some cards specifically allow you to take cards from Q's Tent (e.g., Q's Planet, Hide and Seek).

If the seeded Q's Tent doorway is closed, you may not retrieve cards from Q's Tent unless a card explicitly allows you to access a closed Tent.

quadrant rule – See **reporting for duty**.

Quantum Drone (Six of Eleven) – Revised text:

When on your ship, may download an Alternate Universe Door in place of one card draw.

Quantum Fissure – A cloaked or phased ship present does not keep you from passing this dilemma. See **cloaking and phasing**.

Quantum Singularity Lifeforms – Any ship of Romulan affiliation or origin at the mission location will trigger this dilemma (not just the ship attempting the mission). Only ships and personnel at the location when the dilemma is encountered (including personnel aboard a facility at the location) are placed in **stasis**; ships and personnel arriving later do not enter stasis. Any player may bring in a new **ENGINEER** or play **Emergency Transporter Armbands** to cure the dilemma and release all ships and personnel from stasis. See **affiliation and ship origin**.

Quantum Slipstream Drive – "Full RANGE", which must be available in order to use this event, includes a ship's printed RANGE plus enhancements. The ship must have nothing

reducing its RANGE and must have used no RANGE yet this turn.

quarantine – When a card places a ship, facility, or planet under quarantine, personnel may board the ship or facility, or beam to the planet, but none may leave except in the following circumstances:

If a dilemma instructs you to move or relocate a personnel (either as a condition for passing the dilemma or as part of the results), it requires you to move them out of a quarantine. For example, Love Interests, Hippocratic Oath, Make Us Go, Tarellian Plague Ship, and Abandon Ship! all override quarantines. Other card types, such as Mysterious Orb, do not override quarantines.

Quark's Bar – See **reporting for duty**.

Quark's Isolinear Rods – This incident nullifies cards preventing you from playing a Q's Tent *only* when you are actually playing one. For example, it will not nullify a Revolving Door on your Q's Tent side deck when you are trying to download a card from there.

Quash Conspiracy – This mission's special text "No ship-to-ship beaming" does not restrict beaming to and from an outpost or a dilemma (Tarellian Plague Ship).

Queen's Borg Cube – See **Borg Cube**.

Quinn – You may play up to three copies of this interrupt per game. Each copy is placed in your bonus point area (if successfully played) or in your discard pile (if nullified) after use. That is, one Quinn does not nullify three cards. See **once per game**.

Radioactive Garbage Scow – Revised text:

Place on spaceline here. Mission cannot be attempted where present. Ship with Tractor Beam and 2 ENGINEER can tow scow.

When this dilemma is encountered and placed on the spaceline, the mission attempt ends immediately. (It does not affect Borg scouting.) The ship and crew (or Away Team, when encountered on a planet in the Female's Love Interest & Garbage Scow combo dilemma) are not "stopped," because the dilemma has no conditions.

Rager – See **helps**.

Raise the Stakes – This event is banned from tournament play.

random selection – See **selections**.

ranks and titles – See **characteristics, matching commander**.

rationing – See **Ketracel-White**.

Reaction Control Thrusters – When you move a facility with this event, any docked ships are carried along (this is not normal ship movement), while undocked ships are left behind.

Reactor Overload – For this incident, you have "processed ore to draw two cards" if you create two card draws during one turn using the Process Ore objective, even if you convert one or more of those draws to downloads or other actions.

There are no conditions for placing this incident on a ship or facility for the second function. The incident is "used" and returns to hand even if there are no androids, [Holo] personnel, etc. aboard to affect.

Ready Room Door – You may dispose of this doorway in any of the three ways listed, whether it was used to download a **matching commander** or a Captain's Order. See **protecting cards**.

You may download another matching commander to a ship that already has one aboard (though the ship may not benefit from more than one, such as with Captain's Log).

Reassimilate Lost Drone – Once you achieve a successful probe for the first icon in this objective's probe list [Def], and abduct the target, you ignore that probe icon in

subsequent probes. Only the second outcome is relevant once the target has been abducted.

Rebel Interceptor – See **interceptor**.

Receptacle Stones – When you encounter a dilemma with this artifact in play, apply the dilemma first to your own ship, then to the opponent's ship, as if it had just encountered it at that ship's own spaceline location. Both [S] and [S/P] dilemmas encountered at a space mission affect the opponent's ship.

Recruit Mercenaries – The negative points for this event are scored ("paid") at the location where you download the mercenaries. See **Altonian Brain Teaser**.

Red Alert! – Revised text:

Plays on table. In place of your normal card play, you may report for duty any number of Ship, Personnel, and Equipment cards.

Interrupts may not be played between the individual cards reported, but each card play may be responded to appropriately. See **card play, actions – group, actions – "just"**.

reduced attribute – See **attribute modifiers**.

referee icon [Ref] – This icon is used by Q the Referee.

Reflection Therapy – This objective can change a regular skill that does not actually appear in a skills box, but was added by an Equipment card, Mot's Advice, etc. If the personnel is separated from the Equipment card, or Mot's Advice is nullified, discard the Reflection Therapy objective, because the target skill no longer exists.

The new skill may be selected only at the x1 level. If the replaced skill is at the x2 level, the entire skill is replaced. For example, you may change Honor x2 to Treachery. See **present, Assign Mission Specialists, skills – modifying**.

Refuse Immigration – See **WEAPONS**.

Regenerate – If seed cards such as dilemmas or artifacts are shuffled into your deck using this event, you may not use or discard them unless a card specifically allows it. See **discard pile, discarding**. The Regenerate card is discarded after the deck regeneration is complete.

Regent Worf – When this personnel assigns a new **matching commander** to a ship, this supersedes the ship's previous matching commander, if it had one. (The assigned personnel must match the ship's affiliation.) The assignment remains in effect until he reassigns it, even if Regent Worf is no longer aboard that ship or leaves play. Matching commander assignments are for specific copies of a Personnel card and a Ship card; they do not extend to other copies of a universal ship or personnel.

Reginald Barclay (The Borg) – This personnel scores **bonus points** only for missions you solve while he is **in play**.

regions of space – Certain mission locations are known to be in the same region of space (as defined in the mission lore). Also, other cards may form locations that belong to a region (e.g., the Alpha Quadrant end of the Bajoran Wormhole creates a location in the Bajor Region). Whenever a regional card is being added to the spaceline, it must be placed (or inserted) next to another location in the same region, if possible.

Some cards, such as ♦ Space, Gaps in Normal Space, Blade of Tkon, and the Q dilemma, allow non-regional locations to be inserted between regional locations. Such inserted cards are not considered to be part of the region (unless specified on the card). Thus, for example, a ship is "in the Neutral Zone" only when it is actually at one of the Neutral Zone mission locations listed below.

The following regions of space are defined for pre-Deep Space Nine cards: the Neutral Zone Region, consisting of **Covert Installation**,

Iconia Investigation, Investigate "Shattered Space," and **Patrol Neutral Zone;** and Sector 001 Region, consisting of **Espionage Mission (Earth)** and **Reunion (Mars)**. These missions have errata defining their regional status.

Beginning with the Deep Space Nine expansion, regional missions are clearly identified in the lore as regional (e.g., Alter Records, "Bajor Region • Bajor"). The following additional regions now exist: the Bajor Region, the Cardassia Region, the Badlands Region, the Demilitarized Zone, the Mirror Universe • Bajor Region, the Mirror Universe • Badlands Region, the Nekrit Expanse Region, and the Briar Patch Region.

related – See **equipment** (for **MEDICAL-related**, etc.), **Empok Nor-related**, **Q-related**, etc.

Release This Pain – St. John Talbot, General Korrd, and Caithlin Dar (unless they are also controlled by Release This Pain), cannot work with others controlled by this incident if incompatible with them.

Relics of the Chase – See **bonus point area**.

relocation – See **movement, movement between quadrants, time travel**.

REM Fatigue Hallucinations –

Entire crew or Away Team dies in three of your full turns unless 3 MEDICAL present OR ship returns to outpost first.

This dilemma affects *only* the crew or Away Team that attempted the mission and encountered the dilemma. It will not affect other personnel who later join the Away Team, or other crew members if the Away Team beams back to a ship.

Either cure (returning to and **docking** at an outpost, or bringing 3 MEDICAL to the affected personnel) earns the 5 point bonus. Returning to another type of facility does not count.

Remodulation – Errata:

Nullifies Adapt: ~~Neutralize-Weapon Modulate Shields~~. OR "Remodulates" your hand. Discard one or two cards and draw an equal ~~amount~~ number from the bottom of your draw deck.

Remote Supply Depot – This outpost may be built at any mission with a Dominion affiliation icon in either quadrant. It may not be seeded. See **repair, Ketracel-White**.

repair – If your ship's **damage** is indicated by your opponent's damage markers, you may remove one damage marker (random selection) at the end of each of your turns that ship remains docked at an outpost that makes repairs or a Docking Pylons site for the full turn.

Whenever a ship or facility is fully repaired by a card such as Defense System Upgrade, Exocomp, or Spacedock, remove all of its damage markers. Damage markers are also removed if the ship or facility leaves play for any reason (for example, being returned to hand or placed out-of-play).

If your ship's damage is indicated by card rotation (because your opponent is not using a Battle Bridge side deck), you may repair it by docking at an outpost that makes repairs or a Docking Pylons site for two of your full turns.

Any outpost can make repairs unless its text says it does not. A Spacedock played on a facility allows immediate repair of ships that dock there, even if the facility itself does not allow repairs. Facilities may be repaired only by a card that allows it, such as Defense System Upgrade.

replacing cards – See **exchanging cards**.

report – Personnel, Ship, and Equipment cards must normally *report for duty* to a **compatible** outpost, headquarters, site, or other place that allows reporting (i.e., personnel may not normally be reported directly aboard a ship or

to a planet). Place the card face up at the facility or site and announce the card name, then stack the card under the **facility** or on top of the site. Small **Tribble** cards may report "**anywhere**." You may not report any card (except a ship) into space.

When a *facility or its site* allows you to report a card for duty, you may do so only if that card and the facility are both in their **native quadrant**. (Equipment cards are native to all quadrants and thus may report to any appropriate facility that is in its native quadrant.) For example, your Morn may not report to Quark's Bar or download to Cargo Bay on Mirror Terok Nor. Also, when a site allows you to report (or download) cards, you may do so only if that Nor also has at least one docking site.

If the card allowing a card to report for duty is *not* a facility or site (such as The Emissary or Devidian Door), the card may report to any quadrant (even if it happens to be reporting aboard a facility) unless otherwise specified by the game text; and a docking site is not required on the Nor. Thus, you may report cards outside their native quadrant using cards such as Assign Mission Specialists, Assign Support Personnel, Spacedoor, Space-Time Portal (report with crew function), Sleeper Trap, Borg Cube, Temporal Micro-Wormhole, and Barzan Wormhole. (However, if a card requires that a card *match* the affiliation of a homeworld, it must also *match* the homeworld's universe. See **mirror universe**.)

A ship, even if landable, always reports in space (usually docked) unless a card specifically allows or requires it to report landed. For example, you may not report a Rebel Interceptor landed, but a Romulan Shuttle downloaded with Hidden Fighter *must* report landed ("Downloads ... to your Away Team on a planet").

Reporting a card is synonymous with playing a card. Any personnel, ship, or Equipment card "played" by any means (e.g., normal card play, Devidian Door, downloading into play) is "reporting for duty." Any action that may or must take place upon reporting takes place at the time of play.

Personnel seeded under a mission (e.g., with a Cryosatellite, under Rescue Prisoners, Mirasta Yale) have already conceptually reported for duty. Thus, they do not report for duty when acquired, but simply join your crew or Away Team (if your opponent seeded them, you capture them). See **personnel – seeded**. Actions dependent on reporting cannot take place.

Persona replacement is not a card play or reporting for duty, but an exchange for a personnel who already reported for duty. See **exchanging cards**.

Selected or shared features or skills do not exist until you have reported the personnel for duty. For example, a Soong-type Android may not report to a site allowing a certain classification to report, because it has no classification before reporting; skills are not shared by drones being reported to a hive with skill-sharing enabled, until after they have been reported. See **skills – modifying**.

See **showing your cards**.

report with crew – When a card allows a ship to *report with crew*, you may report the ship with any number of compatible Personnel and/or Equipment cards *from your hand* aboard (you may *not* download the cards unless specified). You must report at least enough personnel to meet the staffing requirements. Each card is reported as a separate sub-action of the *report with crew* group action, and may be responded to appropriately. See **action – group**.

Reporting with crew replaces your *normal card play*, except for the reports allowed by

Space-Time Portal, Sphere Encounter, and Barzan Wormhole. You may not replace an additional card play, such as one allowed by Delta Quadrant Spatial Scission

When a ship's text allows it to report with crew, you may not use that text in combination with game text allowing the ship to report in some other way. For example, if you download Bajoran Raider with Hidden Fighter, it may not report with crew.

If game text does not use the phrase *report with crew*, it is not a *report with crew* action, even if it allows you to report a ship with specified personnel aboard (e.g., I.K.C. T'Ong, Retask).

Reported Activity – Revised text:

Navigation + Honor x2 OR Navigation + ENGINEER x2

reporting for duty – See **report**.

required action – See **action** – **required**.

re-selecting skills – See **skills** – **modifying**.

Res-Q – See **discard pile**.

rescue – See **capturing**.

Resistance Is Futile – See **Harness Particle 010**.

responses – See **actions** – **step 2: responses**.

Ressikan Flute – This artifact is worth a variable number of points (it does not score points each turn), depending on the number of personnel with Music skill you have in play (not the number of Music skills). For example, if you have four personnel with Music skill in play when you earn the Flute, it is worth 20 points. If you report another Music personnel for duty, it is worth 25 points. If two of those personnel are killed, it will be worth only 15 points.

Two copies of a universal personnel with Music cannot both affect the value of the Flute at the same time. See **cumulative**.

rest of game – When a card has an effect that lasts for "rest of game," the effect continues even after the card is no longer in play (unless another card specifically cancels the effect). For example, Tomalak of Borg says, "For rest of game, all your ships have Cloaking Device." Your ships continue to have Cloaking Devices even if he leaves play. See **once in play**.

restriction box – Some personnel have limitations listed just above their skills in an area called a "restriction box." These are not skills and are not affected by cards that affect skills.

retaliation – See **Kova Tholl**.

Retask – When this event is played, any damage (either rotation damage or damage markers) on the Borg Ship dilemma is transferred to the Borg Cube. See **exchanging cards**.

Replacement of a Borg Ship dilemma with a downloaded universal ♠ Borg Cube and the seven specified **drones** is not a **report with crew** action; you may *not* report additional Borg (or Equipment cards) with the seven drones.

return to a facility – See **docking**.

return to hand – Cards that are returned to hand always return to their **owner's** hand. See **in play**.

Reunion – Revised lore:

Sector 001 Region • Utopia Planitia, Mars Station

If you solve this mission with the alternate requirements of Subjugate Planet, its point value (and therefore the STRENGTH requirement of the objective) still depends on whether you have Miracle Worker, Cantankerousness, and/or Spock present in the Away Team.

- If none are present: 0 points, STRENGTH>0 required.

- If one is present: 15 points, STRENGTH>30 required.
- If all three are present: 40 points, STRENGTH>80 required.

See **point box**, **mission attempt**.

reveal – When a card such as All Threes tells you to *reveal* cards, both players are allowed to see the cards.

reverse – When a card is *reversed*, that card has its game text conceptually changed to work in an opposite way. To ensure consistent gameplay, an official definition is established in each case. See **Intruder Force Field**, **Persistence of Memory**.

revised text – Cards with revised game text or lore (both errata and clarifications) are listed in Appendix A. See the Glossary introduction for more information on revisions and the individual Glossary entries for the actual revised text.

Revolving Door – See **doorway**.

Rituals of the Hunt – This incident is not discarded until after a capture is fully resolved, including any "just" action triggered by the capture. Thus, you may not use Hirogen Hunt's text to convert a Fajo's Gallery card draw to a download to immediately play another Rituals of the Hunt, because the incident is unique. See **actions** – "just".

Roger Maris Baseball Card – See **1962 Roger Maris Baseball Card**.

Rogue Borg Mercenaries – This interrupt may be played in multiples. The STRENGTH of each individual Rogue Borg depends on the number that are present together. For example, two Rogue Borg have a STRENGTH of 2 each; five have a STRENGTH of 5 each. If Croxis is in the group, he counts as a Rogue Borg and doubles the STRENGTH of each one in the group. In this group of five (four Rogue Borg Mercenaries plus Croxis), each Rogue Borg's STRENGTH is 10. If either player has the Personnel card Lore in play, each Rogue Borg's STRENGTH is also doubled. (In this example, each would have a STRENGTH of 20.)

The term "Rogue Borg" includes both Rogue Borg Mercenaries and Croxis. The term "Rogue Borg Mercenaries" includes only copies of the Rogue Borg Mercenaries Interrupt card.

Rogue Borg can play as a response to another Rogue Borg play, or as a response to the initiation of an automatic Rogue Borg battle at start of turn. Each of these Rogue Borg may be responded to individually (e.g., by Amanda Rogers). Once the player has "passed" (finished playing Rogue Borg), the entire group of Rogue Borg may be responded to (e.g., by Hugh). If not canceled, the result will then begin with the attack of the Rogue Borg in a normal personnel battle.

Rogue Borg can be played at other times in a new action. If played where the player has previously played Rogue Borg, the new ones will battle by themselves before joining with those other Rogue Borg at the end of the turn.

If the entire crew is killed, surviving Rogue Borg remain on the ship, but cannot use the ship unless the event **Lore Returns** is played.

Rogue Borg Mercenaries and Croxis are considered "rogue" and not part of any Borg collective. Thus, they affect Borg-affiliation cards normally.

Romulan – An **affiliation** and a **species**. See **affiliation and species**.

Romulan Ambush – The captive that you take with this interrupt is selected and relocated to your ship before the ship is destroyed. If the crew is saved with a card that plays during the destruction (such as Escape Pod), the captive is not saved. See **battle** – non-battle cards.

Royale Casino: Blackjack – See **Royale Casino side games**.

Royale Casino: Craps – If you can't show a Personnel card for this dilemma, your opponent wins the points. See **Royale Casino side games**.

Royale Casino: Slots – If Mickey D. is in the Away Team that encounters this dilemma, he wins 5 points. See **Royale Casino side games**.

Royale Casino side games – The attribute numbers on the Personnel cards in your hand, used in the Royale Casino dilemma "side games," are not affected by attribute modifiers such as Lower Decks or PADDs. See **variable attribute**, **Mickey D.**

Saavik – See **icons in game text**.

Sabotage Drone (Six of Seventeen) – While this personnel's special skill of reducing a ship's RANGE or WEAPONS may be used during the opponent's turn ("Once every turn..."), it may not interrupt a mission attempt. Thus, you may not use a Sabotage Drone downloaded to the opponent's ship with Undetected Beam-In to reduce the ship's RANGE before encountering Abandon Ship! See **actions** – **interrupting**.

Saltah'na Clock – While affiliation attack restrictions do not apply (i.e., any affiliation, including Borg, is required to initiate battle), this artifact does not allow or require you to attack your own cards. The requirement to initiate battle is a non-moving required action. See **actions** – **required**.

Any personnel aboard the affected ship or facility (whether crew or intruders) must, on their owner's turn, initiate either a ship battle or a personnel battle, depending on what is possible and/or appropriate. For example, if the Clock is on a ship with both a crew and intruders aboard, the crew, on its owner's turn, must initiate either a personnel battle against the intruders, or a ship battle against an opponent's ship or facility at its location (owner's choice). On the opponent's turn, his intruders must initiate a personnel battle against the crew.

Salvage Starship – Searching your opponent's discard pile for a ship is optional and has no effect on scoring the points for this objective. See **objectives**, **special equipment**.

Samaritan Snare – On this mission, the phrase "Federation must attempt mission if present" includes any ship and crew containing Federation cards, even if the ship itself is of a different affiliation. After the mission attempt has ended (even if unsuccessful), they are free to move away (even on a later turn), but are required to re-attempt the mission (if unsolved) each time they stop (or undock from a facility) at the location. See **actions** – **required**, **Treaty: Federation/Romulan/Klingon**.

Samuel Clemens' Pocketwatch – This artifact allows you to perform one action which *must* happen on your next turn (any action that is scheduled to happen, or which you are required to perform by a card or rule). It does not allow you to perform an optional action, such as playing a card. Examples:

- Drawing a card: You may take your next turn's mandatory end-of-turn card draw now. You may not then draw a card at the end of your next turn.
- Showing a Devidian Door: You are required to show the Door during your next turn, so you can use SCP to show it immediately.
- Countdown icons: Your card with a countdown icon must count down at the end of your turn, so you can use SCP to make it count down once now. It will then not count down at the end of your next turn.
- Time effects without a countdown icon (e.g., Temporal Rift, diseases): If the effect is scheduled to resolve on your next turn, you can use SCP to force it to resolve now. You may not "remove" a turn unless the effect is

scheduled to resolve on your next turn, because (unlike a countdown icon) nothing is scheduled to happen on your next turn.

- **Cytherians:** If your ship is affected by a moving required action such as Cytherians, you will be required to move it next turn. You may use SCP to move it now and may not move it again next turn.
- **Borg Ship dilemma and The Sheliak:** These cards must move down the spaceline at the end of your next turn, so you may give them an extra move this turn with SCP. They will not move at the end of your next turn, but they *will* still move on your opponent's intervening turn.

Scan – Revised text:

Glance at all seed cards located under one space mission for twenty seconds.

Science Lab – See **bottom seed card**.

Scorched Hand – See **counting cards**.

scoring points – See **points**.

scoring tournaments – See the official tournament guide.

Scout Encounter – If you download a scout ship (see **characteristics**) when your opponent encounters this dilemma, you must also download at least one compatible universal crew member. (This is not a **report with crew** action.) The downloaded ship may initiate battle (if the ship has a leader, a matching personnel, and no affiliation restrictions), move away (if the ship is staffed for movement), or do nothing. A landable ship may “move away” by landing on the surface of a planet at the same location but may not move to another location and then land. The ship and crew may not perform any other actions until your turn unless a card specifically allows it.

scouting locations – Unlike other affiliations, Borg never attempt missions. Instead, they use Objective cards to *scout* locations. Scouting conceptually represents overcoming resistance (encountering dilemmas and Q-Flashes) and gathering data.

Before you may scout a location, you must have an activated current objective targeting the location. A dual-icon mission may be targeted either as a space or a planet location, but only one Borg objective may be completed targeting that mission.

Begin scouting the location as you would begin a **mission attempt** with non-Borg: select and beam your Away Team (of any size) to a planet, or select a ship and crew at a space mission (both at a **dual-icon mission**), then announce that you are scouting the location. (While an objective that allows you to scout a planet location allows you to form Away Teams for that purpose, you may also use an Away Team already on the planet by other legal means, e.g., Emergency Transporter Armbands, and they may be joined by more of your Borg.)

Borg encounter and resolve dilemmas and Q-Flashes in the same way that non-Borg do during mission attempts (see **dilemma resolution**), subject to a few additional rules:

- When your Borg are confronted with a dilemma or Q-icon card which is point-related (and does not specify that it affects Borg), play out the card but ignore the points. (Discard the dilemma when you are done with it rather than placing it in your bonus point area.) If that card presents a choice, you must choose an option which is not point-related, if possible.
- Discard gender-related dilemmas such as Love Interests or Matriarchal Society.
- Any cards which specifically require or change classifications, such as Scottish Setter, do not affect Borg. However, a dilemma which specifies a personnel type, such as OFFICER, without specifying

classification or skill, *will* affect the Borg normally.

- Dilemma text such as “Abandon mission attempt...” or “Mission may not be attempted” does not affect Borg. Ignore such text, and discard the dilemma if it is wholly inapplicable. However, “Mission continues” means “Scouting continues” for Borg.

When Borg are scouting a location, any artifacts encountered there are moved to the back of the seed stack as usual. The Borg must complete an objective that allowed scouting of that location before the Survey Drone can acquire any **artifact(s)** present. (Picard's Artificial Heart is acquired by its owner upon completion of *scouting*. At a dual-icon mission, space-permissible artifacts may be acquired upon completion of a space objective; planet artifacts may be acquired only after completion of a planet objective.) If you have no Survey Drone on the planet (or aboard a ship at a space location) when you complete the objective, the artifacts are placed face up on the mission and may be acquired later by your Survey Drone or by any non-[Borg] personnel present. (However, the Survey Drone may not beam down to a planet without a card allowing him to do so. Once the objective is complete, it no longer allows scouts to beam to the planet.) Cards seeded like artifacts (e.g., seeded personnel) are acquired in the same way as artifacts.

Like mission attempts, a scouting attempt is one action that may not be interrupted (except by valid responses to dilemmas or Q-icon cards and by actions that suspend play), and may not be aborted unless the entire Away Team or crew is “stopped” or removed from the location.

After a scouting attempt is over (whether scouting is complete or not), your “unstopped” Borg are free to beam back up to the ship if desired, or remain to acquire artifacts, if any, when the objective is completed. If an objective requires that you have Borg or a counterpart “there” or “at that location” to probe, they need not be on the planet.

Scouting a location is complete when your turn ends if you have scouted it at least once, and no dilemmas or Q-Flashes remain to be encountered, even if no Borg remain or if they are “stopped” by the last dilemma. (A dilemma that has entered play, such as Friendly Fire or Cytherians, no longer remains to be **encountered**, and so does not prevent scouting from being complete.) Completion of scouting is permanent. Addition of a seed card (such as a Q-Flash, using Beware of Q) after scouting is complete has no effect on that status.

Your Borg must complete scouting before you may probe to determine your current objective's outcome. You may not probe on the same turn in which you completed scouting (except with Service the Collective). You also may not probe if your Borg participated in any battles at the targeted location during your current turn or during your opponent's previous turn. **Probing** takes place at the end of your turn.

When an objective calls for scouting a mission location, you must scout even if there are no dilemmas remaining when you begin scouting (because none were seeded, or your opponent cleared them during a mission attempt). In other words, you must bring one scout to a planet mission, or bring a ship and crew to a space mission, and announce that you are scouting that location. When that turn ends, scouting is complete.

When an objective requires you to target a mission “if not yet scouted,” it must be a mission which neither you nor your Borg opponent has *completed* scouting. The absence of dilemmas for other reasons (such

as a non-Borg opponent attempting the mission) does not mean the mission has been scouted. If your opponent completes scouting a mission *after* you have targeted it, it does not discard your objective.

An objective that allows you to scout a location requires you to complete scouting *for that objective* in order to probe to complete it. For example, if you scout a mission with Establish Gateway and resolve all dilemmas, then switch to another objective by downloading A Change of Plans in place of your normal card draw at the end of your turn, scouting is complete at the end of that turn for Establish Gateway, but not for the new objective. You must scout the mission again before scouting is complete for the new objective.

scouting ships – An Objective card may direct your Borg to scout a ship. Scouting a ship conceptually represents overcoming resistance and gathering data. Before you may scout a ship, you must have an activated current objective targeting the ship.

Begin scouting an enemy ship by beaming over a single scout. (If you already have one or more Borg aboard the ship from Undetected Beam-In, Borg Servo, counter-attacking, etc., they may scout the ship.) You must have a drone who allows you to beam through your opponent's SHIELDS. Until the objective is completed or discarded, if at any point you do not have an **active** Borg aboard the ship, you may beam another single scout aboard during your turn.

If your opponent attacks your scout during his turn, you may counter-attack during your next turn with any number of Borg (if the ship remains at the location of the attack). Those Borg are free to remain on the enemy ship.

Scouting an enemy ship is complete at the end of your turn if you have any **active** Borg aboard that ship. Your Borg must complete scouting before you may probe to determine your current objective's outcome. You may not probe on the same turn you completed scouting, or if your Borg participated in any battles at the location of the targeted ship during your current turn or during your opponent's previous turn. Once scouting is complete, you do not have to complete scouting again (with another delay before probing) if your scout is killed before you can probe (though you must meet the requirements of the objective, such as having Computer Skill aboard). **Probing** takes place at the end of your turn.

Seal Rift – This mission allows [AU] cards to report there without requiring an Alternate Universe Door or other doorway allowing [AU] cards to play.

Search For Weapons – This mission's special text (“May seed hand weapons here”) does not allow you to seed the Varon-T Disruptor in addition to another artifact. While the Varon-T Disruptor is a **hand weapon**, the mission text does not override the “one artifact per mission” rule.

Search for Rebels – See **card titles, Caretaker's Array, Navigate Plasma Storm**.

Secret Agent Julian Bashir – This personnel prevents *all* your personnel where he is present (including himself) from being captured.

Secure Station – See **WEAPONS**.

Security Office – See **movement**.

seed deck – Your seed deck may include several types of seed cards.

- It may include up to 30 of the following: Dilemma and Artifact cards, plus any other cards which are allowed or required by game text to be seeded, such as certain Facility, Doorway, Objective, Incident, and Event cards. (If you seed any card that is not a seed card, it is a **mis-seed**.)

- It may include up to six Site cards, which seed for free (i.e., in addition to the 30 cards in the first category).
- It *must* include exactly six Mission cards, which also seed for free. Each of your six missions must be different, except for those that are universal (their card title begins with the universal ♠ symbol).

Your mission and site cards which seed for free must be kept separate from your 30 "counted" seed cards throughout the seed phases. Site cards included in the "seed for free" portion of your seed deck may not be mis-seeded under a mission as a bluff or misrepresented as possible seeds during the dilemma phase, but may *only* be seeded on a Nor or placed out-of-play at the end of the seed phases. If you choose to include sites in your 30 "counted" seed cards, they may *only* be mis-seeded as a bluff or placed out-of-play. Moving Site cards between the "seed for free" and "counted" portions of your seed deck is an illegal change to your deck.

All cards that you seed (or "place during the seed phase") are counted as seed cards unless a card or rule specifically states that they seed for free. Thus, the personnel seeded with a Cryosatellite, the doorways that activate your side decks (but not the contents of the side decks), Data's Body, etc., all count toward your maximum of 30.

When a seeded card allows a download during the seed phase (e.g., Assign Mission Specialists, Ultimatum), the downloaded cards are *not* seed cards; they come from your draw deck or Q's Tent.

See **counting cards**.

seed phases – There are four seed phases that must occur in sequence: the doorway phase, mission phase, dilemma phase, and facility phase (called the "outpost phase" on some cards).

During each phase, players take turns seeding cards on the table. The starting player goes first in each phase. Each time it is your turn, you may either seed a card or say "pass." As soon as both players pass consecutively, that phase ends (even if you wanted to seed more cards in that phase).

Before the seed phases begin, shuffle any side decks you have.

Doorway Phase – You and your opponent take turns placing seedable doorways (such as the Alternate Universe Door), and any other cards that may or must seed during this phase (such as Open Diplomatic Relations), on the table, on top of **side decks**, or elsewhere, as specified by the card's game text. See **Alternate Universe icon**.

Mission Phase – You and your opponent create from one to four lines of Mission cards, called **spacelines**. Each spaceline represents a different *quadrant* of the galaxy. The spacelines function like a gameboard where your other cards will move and interact.

Shuffle your six missions and place them face down in a temporary pile; your opponent does likewise. If you are the starting player, draw the top mission from your pile and place it face up on the table. Take turns with your opponent placing each successive mission face up on either end (your choice) of the spaceline appropriate for that mission. A mission's quadrant and spaceline may be determined from its point box (if any). Gamma, Delta, and Mirror Quadrant missions have a Γ, Δ, or M symbol in their point boxes. Missions with no symbol are Alpha Quadrant missions. You may not pass until you have no missions left to seed. (A mission that says it may be inserted in the spaceline may be placed anywhere within or on the end of the spaceline.) See **regions of space**.

Missions without the universal ♠ symbol in their title are unique and not duplicatable. When you attempt to seed a non-universal

mission that is already represented on the spaceline, place your copy on top of the one already seeded (leaving half of your opponent's copy exposed). The mission is treated by both players as "their" mission for all purposes; each player ignores the "opponent's end" of the cards. (The completed spaceline will have one fewer mission.) The mission may only be completed once. See **unique and universal**.

Dilemma Phase – You and your opponent seed dilemmas and artifacts face down under missions. If you are the starting player, insert one card of your choice face down beneath any mission, then take turns until you and your opponent consecutively pass. Whenever you seed a card beneath a mission, that card always goes on the bottom of any other cards already stacked there. (Thus, when you attempt a mission during the play phase, you will slide out the bottom card – the last one seeded – and encounter it first.) The rules for seeding cards during this phase are as follows:

- Planet dilemmas and artifacts seed under any mission with a planet icon.
- Space dilemmas seed under any mission with a space icon.
- Space/planet dilemmas seed under any mission.
- You may not seed more than one copy of any card under the same mission.
- You may seed as many different dilemmas as you like under each mission, but only *one* artifact (unless a card states otherwise, such as Cryosatellite or Orb Negotiations). If you illegally seed two or more artifacts at the same location, *all* of your artifacts there are considered mis-seeded.
- Some game text allows you to seed Personnel or Equipment cards beneath missions. Such cards are seeded face-down, like artifacts, and are earned when you solve the mission (except **Mirasta Yale**).
- You may seed **Q-icon** dilemmas under missions *only* when you have previously seeded the Objective card Beware of Q, or if the card's text says it may be seeded (such as Hide and Seek).

Any cards seeded under missions other than described above are **mis-seeds** and are placed **out-of-play** when revealed.

Facility Phase – After the dilemma phase is completed, you and your opponent take turns establishing seedable outposts, headquarters, and stations (and any related sites) in their **native quadrant**. Place each of your Facility cards face up in front of a mission on your side of the spaceline.

Facilities – See **facility** for rules on seeding different types of facilities (number, location).

Sites – You may seed up to six sites during the facility phase. Each site may be added to any appropriate station, as indicated on the lower left of the Site card, no matter which player seeded that station. (The six sites seed for free. You may not seed additional sites as part of your 30 seed cards.) Sites must be arranged in the modules specified on each **site** card.

While you are not required to seed or play any specific sites on a Nor, all reporting, docking, repair, and other functions are enabled by site text (not the Nor itself). Also, reporting to any site is allowed *only* if that Nor also has at least one docking site.

Other Seeding Rules

- Some cards have text that specifies that they seed during a different phase than usual for the card type.
- A few Event, Objective, Incident, and other cards have game text which allows them to seed. Unless they specify a particular phase (or require a facility or other card already seeded), you may seed such cards during

any seed phase.

- Cards seeded under a mission and cards with a **hidden agenda** icon always seed face down. All other cards seed face up.
- When a card seeded face-up allows an immediate download during the seed phase, the downloaded cards come from your draw deck or Q's Tent (they are not seed cards).
- Regardless of which phase it is or which type of card is being seeded, you and your opponent always take turns seeding or passing. For example, during the mission phase your opponent might seed a mission, then you might seed an objective, then your opponent might seed his next mission. You may *not* seed multiple cards at once (e.g., a group of dilemmas, multiple sites at a Nor, or a Cryosatellite and its contents).
- The only actions you may take during the seed phases are seeding cards and carrying out game text that takes place immediately upon seeding a card face-up, such as downloading Bajoran Wormhole with Ultimatum or an Emblem card with Disrupt Alliance. You may not activate a hidden agenda or use special download icons or "play phase" game text such as effects that suspend play or may happen "at any time" or "each turn."
- After all the seed phases are over, show any unused seed cards to your opponent and then place them **out-of-play**.

seeds or plays – Cards with this phrase may be seeded during any part of the seed phase (unless they belong to a specific phase, such as doorways) or may be stocked in your draw deck to play normally. Alternate seeding cards normally, regardless of the seed phase or card type being seeded. Cards with a hidden agenda [HA] icon *must* be seeded face down and cannot be activated until after the seed phase. All other "seeds or plays" cards must seed face up.

Seismic Quake – See **zero**.

Seize Wesley – This interrupt may not be played as a response to your opponent encountering the Ktarian Game dilemma. The ship must be "under the influence" of the dilemma, which occurs only if the remaining crew (after one is disabled) does not have CUNNING>30 or an android to cure the dilemma.

selections – Many dilemmas and other cards require one or more cards to be selected from a crew or Away Team, from other cards in play, or from your hand. Selections may be random, opponent's choice, or owner's choice.

Random selection: When game text specifies that a card is to be chosen by *random selection*, shuffle together all eligible cards, hold them so the faces of the cards cannot be seen, and let your opponent draw a single card, at random, from this group.

Opponent's choice: When game text or a rule states that a card is selected by *opponent's choice*, your opponent may examine all of your cards in the group fully (look at each entire card) before making the selection, even if only some of them meet specified criteria. For example, when you encounter Impressive Trophies, your opponent may examine all the cards in your crew or Away Team before choosing a captive meeting either of the listed criteria. See **showing your cards, ties**.

If a selection method is not specified by the card or by a rule, it is the choice of the player who played the card or who encountered the dilemma or Q-icon card. For example, when you play Brain Drain ("Removes all skills and CUNNING from any one personnel."), you choose the personnel. When you encounter the Tarellian Plague Ship dilemma (which kills your crew "unless MEDICAL 'beams over' (discarded) to Tarellians)," you select which MEDICAL to discard.

See **dual-personnel cards**.

Senior Staff Meeting – This interrupt is played “just before” a mission attempt; once played, neither you nor your opponent may take any other action before the attempt begins (except valid responses, such as Amanda Rogers). If nullified, you must still begin the mission attempt and may not play another Senior Staff Meeting.

The first attempt of a mission made by *any* player is “the initial attempt” of that mission. If your opponent has already attempted the mission, you may not play this interrupt for your first attempt.

If the first seeded card is a Q-Flash, then it is not discarded and has its normal effect. However, if a Q-icon dilemma is encountered within the Q-Flash, it is discarded as “the first dilemma encountered.” If no dilemma is encountered during the initial mission attempt (e.g., you encounter only a Q-Flash and no Q-icon dilemmas are faced), then no results are obtained from the interrupt. It does not carry over to another attempt. **Mis-seeds** are not encountered.

If the first dilemma encountered is a **combo dilemma**, only the first part of the combo is conceptually discarded. The crew must immediately face the second part.

Sense the Borg – Errata:

Plays if a Borg ship, Borg personnel, Borg Ship dilemma or Rogue Borg just entered play. Download to **hand** Weak Spot OR Hugh OR Borg Neuroprocessor OR Ready Room Door.

Seska – See Kazon.

Seven of Nine (The Borg) – This personnel may apply one, two, or all three of its subcommand icons (OR its [Borg] icon) toward staffing a Borg ship. See **Activate Subcommands, drone**.

Seven of Nine (Voyager) – This [NA][Fed] personnel is both human and Borg species. She is not a **drone**. See **affiliation and species, assimilation – personnel, Lack of Preparation, species**.

shape-shifter – This **characteristic** includes all changelings, and any other personnel identified in their lore as having shape-shifting ability (e.g., allasamorphs and chameleoids). “Shape-shifter” is not a species.

Sheliak, The – This dilemma is not a Ship card and is not affected by cards that affect ships (Q-Nets, etc).

“Mission then = zero points” applies only to an uncompleted mission. If you have already scored the mission points, you do not lose them when The Sheliak arrives at the mission. It has no effect on what the **point box** of the mission shows. The mission is *worth* 0 points. Only outposts, stations, and Away Teams are destroyed (not headquarters or ships).

Sherlock Holmes – You must have fewer cards in hand than your opponent to use this personnel’s special skill. If you choose to use the special skill, you must continue drawing cards until your hand equals opponent’s (or your draw deck is exhausted).

SHIELDS – See **attributes, battle – ship**.

ship – A card type. Ships carry personnel and equipment to mission locations and engage in battle. Ships have three **attributes** – RANGE, WEAPONS, and SHIELDS – which determine how far they may move each turn, as well as their offensive and defensive capabilities. Some ships also have **special equipment**, such as a Tractor Beam or Cloaking Device, and/or special game text, such as a special download or “El-Aurians may report aboard.”

ship attribute enhancements – See **attribute enhancements**.

ship class – A **characteristic** identified in a ship’s class box (directly under the card

image). “UNKNOWN CLASS” is not a distinct ship class.

ship equipment – See **special equipment**.

ship movement – See **movement**.

ship origin – See **affiliation and ship origin**.

ship staffing – Staffing requirements for each ship are listed on the card, usually as icons. (Non-icon staffing requirements include specific skills, such as Empathy x2, a species of personnel, such as a Vulcan, or a **characteristic**, such as “Think Tank personnel.”) Any **compatible** personnel can be used to meet a ship’s listed crew requirements, but at least one crew member of **matching affiliation** must be on board. (If a ship lists no specific staffing requirements, any one personnel of **matching affiliation** can fly it.) Staffing icon requirements must be met by personnel. For example, you may not use the [OS] icon on a Classic Tricorder to staff a Starship Constitution.

Normal staffing icons include command ability [Cmd], staff ability [Stf], and Borg subcommand [Com] [Nav] [Def] icons. A personnel with a [Cmd] icon can substitute for a [Stf] icon for ship staffing only (not for other purposes that specify a [Stf] icon, such as a dilemma). Other staffing icons may not substitute for [Cmd] or [Stf] icons.

Special staffing icons include any icon used to staff a ship, except the normal staffing icons listed above and affiliation icons (e.g., the [NA] icons on Zalkonian Vessel). Current special staffing icons include: [AU] [CF] [EE] [OCD] [OS] [KW][KCA][TE][Maq].

One personnel cannot supply more than one staffing icon requirement, even if the personnel has more than one of the required icons, unless a card text specifically allows it (such as **Seven of Nine**). Therefore, a Borg Cube normally requires seven personnel to staff it, even if the Queen or Locutus is aboard. A dual-personnel card has only one affiliation icon, which may be used for staffing by either of the personnel. For example, Third and Fourth may contribute one [Com] icon and one [Borg] icon toward staffing a Borg Cube.

Ships must be fully staffed:

- to perform normal **movement**;
- for any other card or rule that specifies it, such as the **report with crew** rule.

Other ship functions do not require full staffing. A ship must have at least one personnel of **matching affiliation** aboard for normal movement or to attempt a mission, initiate battle, or fire WEAPONS.

If a ship loses one of its required crew, it will be stalled (unable to move) until appropriate reinforcements can be brought aboard. A stalled ship is not “stopped” and can still beam Away Teams, attack and defend itself, or attempt the mission at its location.

ship types – See **characteristics**.

Shipwreck – See **attribute enhancements**.

showing your cards – When playing any card face up, you must announce the card’s name and show that card to your opponent. Afterwards, your opponent may only see your Personnel and Equipment cards when necessary, such as during personnel battle, for an “opponent’s choice” selection or when you must prove you have a particular skill, staffing icon, etc. He may see your ships only when they are undocked, uncloaked, and unphased, or when you must verify attributes and staffing requirements for battle, movement, etc. See **facilities**.

A card requires revealing your cards if it says so explicitly (e.g., Long-Range Scan, or an “opponent’s choice” dilemma) or if it allows the opponent to target one of a group of cards in a non-random manner (e.g., Brain Drain, Assimilate Counterpart, or Eliminate Starship).

When required to reveal your cards, you need only reveal those portions of the cards necessary for the situation. For example, when a card is played that allows the opponent to target a personnel non-randomly, you need reveal only the names and locations of the personnel; to verify that you can overcome a dilemma, only the relevant skills, attributes, etc. However, if a card allows “opponent’s choice” of personnel to be affected (including, for dilemmas only, a tie for “most CUNNING,” etc.), he may look at the entire card. See **selections, ties**.

Although a hidden agenda card is played face down, you must show it to your opponent if you download it or if you wish to play it for free (for example, using Q the Referee).

If the conditions for playing a card in your hand depend upon your opponent’s cards, you may ask them to reveal whether they meet those conditions. (You must show the card which requires that information.) Examples:

- If you have Thine Own Self in hand, you may ask your opponent how many personnel are in their Away Team.
- If you have a Dal’Rok in hand, you may ask your opponent to reveal the location of their Orb Fragment in play.
- If you have Outgunned in hand, you may ask your opponent to reveal the total SHIELDS of their only undocked ship at a location.

side deck – Side decks are optional customized decks of cards separate from, and in addition to, your normal game deck. Each side deck is shuffled and placed face down on the table, then activated or “opened” during the doorway seed phase by a Doorway card. This Doorway card is placed face up on top of the side deck and counts as one of your seed cards (the face-down cards in the side deck are not seed cards and do not count toward the **30/30 rule**). The four types of side decks are the **Q-Continuum, Q’s Tent, Battle Bridge, and Tribble side decks**. You may use any or all of these side decks in the same game, but you may have only one side deck of each type in play.

Discarded cards from your **Q-Continuum side deck, Battle Bridge side deck, and Tribble side deck** do not go to your **discard pile**, but instead are discarded by placing them face up under the side deck. (When face-up cards are encountered in one of those side decks, shuffle the face-up cards and place them face down under the seeded doorway.)

You may not look through the cards in any side deck unless a card allows you to. For example, playing a Q’s Tent doorway allows you to look through your Q’s Tent to choose a target card.

Whenever you “draw” a card from a side deck, it is not defined as a **card draw** for purposes of cards affecting card draws (e.g., Subspace Schism). When a card just drawn from a side deck is played (e.g., your current tactic, a Q-icon card during a Q-Flash, or a Tribble or Trouble card), it is not defined as a **card play** for purposes of cards affecting card plays (e.g., 211th Rule of Acquisition, Goddess of Empathy).

side game – See **Royale Casino side games**.

Sigmund Freud – [AU] personnel and equipment may report to this personnel only if another card allows [AU] cards to enter play.

Sisko 197 Subroutine – See **your**.

Sisters of Duras – Because these personnel do not work with Klingons who have Honor, you may not give either of them the skill of Honor with Reflection Therapy. See **dual-personnel cards, multi-affiliation cards**.

site – A card type representing rooms and other areas inside a Nor where personnel can report for duty, walk around, perform various tasks, and engage in hand-to-hand combat

with enemy personnel; and docking areas where ships can report for duty and be repaired. Each Site card states what kind of cards may report there, such as personnel of a specific classification, **equipment** that is "related" to a specific personnel type, or ships with a certain number of staffing icons.

Your seed deck may include up to six sites, which seed for free during the facility **seed phase** (even if the Nor seeded in an earlier phase). Any site may play during the play phase, using your normal card play.

All sites added to each station are arranged side-by-side in a straight line next to that station. Each site indicates which level of the station it belongs to (Ops Module, Promenade, Habitat Ring, or Docking Ring), and the sites must be kept together on the table in this order (from left to right). When placing a site on the table, you may insert it between other sites, as long as you obey this grouping system.

By default, sites are "unique per station." That is, each station is limited to one of each kind of site card. However, some sites are ♦ **universal** and thus may exist in multiple on each station.

skill-sharing – Some cards, such as the Interlink Drone and the Borg Vinculum, allow your Borg to *share* skills. (Cards that allow personnel to *add* skills from other personnel, such as Vulcan Mindmeld or Classic Communicator, do not enable skill-sharing.) All regular **skills** are shared, including those that do not actually appear in skills boxes, such as the selected skill of the Borg Queen and the classifications of assimilated personnel which have been converted into skills. Sharing skills is not optional.

Example: you have an Away Team on a planet consisting of two Borg:

Bio-med Drone, [Com], Biology, MEDICAL Tactical Drone, [Def], SECURITY

and you have a Borg ship orbiting that planet with the following crew:

Borg Queen, [Com][Nav][Def], Empathy as "selected" skill

Gibson (assimilated), [Def], OFFICER, Navigation x2

Astrogation Drone, [Nav], Navigation, Computer Skill

Guard Drone, [Nav], MEDICAL, Computer Skill

Interlink Drone, [Com], No regular skills but enables sharing in same hive.

Identify the highest individual level of each different *regular* skill among all of these Borg. (Special **skills** may not be shared.) In this example, these skills are Biology, MEDICAL, SECURITY, Empathy, OFFICER, Navigation x2, and Computer Skill. Thus, each of these seven Borg has every one of these skills (not just the [Com] Borg).

Now suppose the Bio-med Drone is killed. Because there is no longer a [Com] Borg on the planet, only the five crew members on the ship share skills (they each have Empathy, OFFICER, Navigation x2, Computer Skill, and MEDICAL).

A Borg does not have shared skills until after it reports for duty. Skill-sharing does not work between cloaked or phased ships.

skills – A *skill* is anything that appears in the skills box of a personnel card, including **personnel types** such as ENGINEER. (The personnel type that appears in the **classification** box is not a skill.) "All skills" refers to everything in a personnel's skills box, including skills conceptually added by another card. See **skills – modifying, skills – using**.

Regular skills are one- or two-word skills, such as Physics or Stellar Cartography. *Special skills* are usually explained in a sentence with a period at the end, such as "Orb artifacts may not be nullified." Special download skills,

preceded by the special download icon ▼, and skills with negative modifiers, such as Mortal Q's Leadership -1, are also defined as special skills.

When a personnel is assimilated, their classification becomes their first-listed skill (unless that personnel type already appears as a skill, in which case that skill's level is increased by one).

First-listed skill – A personnel's "first-listed skill" is the first skill printed in the skill box (whether a regular or special skill); or that skill as transformed by another card; or (if assimilated) its former classification. When a first-listed skill is "lost" (e.g., to a dilemma), the skill becomes conceptually blank or "no skill" (the second skill does not "slide over" to become a new first-listed skill).

For example, Seskal is an OFFICER-classification personnel with SCIENCE, Stellar Cartography, and Anthropology skills. His "first-listed skill" is:

- Normally: SCIENCE
- After assimilation: OFFICER
- When present with a Science Kit: SCIENCE x2
- After changing SCIENCE to Biology with Reflection Therapy: Biology
- After being selected for Rascals: Youth
- While aboard a ship affected by Tsiolkovsky Infection: no skill

If a personnel has no first-listed skill because it has been removed by a dilemma, he is not affected by subsequent cards affecting the first-listed skill, and no other personnel has "the same first-listed skill" for purposes a dilemma such as The Clown: Playing Doctor. Most skills are preceded by a red [Skill] • icon. However, the number of skills a personnel has is not necessarily the same as the number of skill dots on the Personnel card. Skill dots are not gained or lost when skills are added or removed by a card; Juliana Tainer has four regular skills and one special skill, but only two skill dots; and special download skills have a triangular icon instead of a dot. When a card such as Assimilate Counterpart refers to the number of [Skill] icons on a personnel, use the actual number of skill dots printed on the card. (If a card has errata, which are official changes, use the number of skill dots specified by the errata. See **Tasha Yar – Alternate, T'Pol**.)

Skill Multipliers – A skill with an integral multiplier (x2, x3) is a single skill at a high level (not two or three skills). For example, when a card causes a personnel to lose his first-listed skill of Diplomacy x2, all Diplomacy is lost (it is not reduced to Diplomacy). If a personnel has Diplomacy as a skill and adds another Diplomacy by mindmelding, they combine to give Diplomacy x2. A skill with a fractional multiplier (x1/2) does not satisfy a requirement for that skill. For example, a personnel with Leadership x1/2 cannot solve a mission that requires Leadership, and does not count as a leader in battle. If he is present with another personnel with Leadership x1/2, together they have a full Leadership skill for these purposes.

Negative Skills – A skill with a negative modifier, such as Valeris's Diplomacy -3, is defined as a special skill (not a regular skill with a multiplier).

skills – modifying – Some cards may add, remove, or modify skills.

Removing Skills – When a card, such as Frame of Mind or Impersonate Captive, removes a personnel's skills, both regular and special skills are removed.

Selecting, Adding, Doubling, and Sharing Skills – When a card allows you to select (e.g., K'chiQ, Lal, Reflection Therapy, Frame of Mind), add (e.g., Vulcan Mindmeld), double (e.g., Ishka), or share (e.g., Interlink Drone) personnel skills, you may select, add, double,

or share only regular skills. If a skill is already present in the skills box, the level of that skill is increased; skills not already present in the skills box are conceptually added to the end of the skills box for purposes of cards such as Fightin' Words. For example, if Lt. D'Amato (Geology x2, Archaeology) adds Geology with a Classic Tricorder, his skills will be Geology x3, Archaeology; if instead he adds Physics, his skills will be Geology x2, Archaeology, Physics.

Selected or shared features or skills do not exist until you have reported the personnel for duty. See **reporting for duty, skill-sharing**.

When *adding* or *doubling* skills (or replacing one personnel's skills with another's, as with Impersonate Captive), skill multipliers are retained. For example, if Sarek mindmelds with Riva, Sarek would have the following skills: Diplomacy x5, Mindmeld. (See **Vulcan Mindmeld**.)

When *selecting* skills, you may select a skill only at the x1 level, and when a card requires you to select two or more skills (e.g., Lal), you may not pick the same skill twice. Thus, if Deanna Troi (First Contact) and Sarek were present when Lal was reported, she could gain any two of the following skills: Diplomacy, Empathy, Navigation, or Mindmeld. She could not choose Deanna's special skill or choose Diplomacy twice, nor could she choose Sarek's Diplomacy x3. Similarly, K'chiQ can select Diplomacy (but not Diplomacy x2), and Reflection Therapy can replace Diplomacy x2 with Honor (but not Honor x2).

When selecting skills for the Borg Queen, K'chiQ, Frame of Mind, etc., valid choices include any personnel type except ANIMAL and any regular skill that exists in the game. Currently, the following are all selectable as skills:

CIVILIAN, ENGINEER, MEDICAL, OFFICER, SCIENCE, SECURITY, V.I.P., Anthropology, Acquisition, Archaeology, Astrophysics, Barbering, Biology, Cantankerousness, Computer Skill, Cybernetics, Diplomacy, Empathy, Exobiology, FCA, Geology, Greed, Guramba, Honor, Klingon Intelligence, Law, Leadership, Mindmeld, Miracle Worker, Music, Navigation, Obsidian Order, Orion Syndicate, Physics, Resistance, Section 31, Smuggling, Stellar Cartography, Tal Shiar, Transporter Skill, Treachery, and Youth.

Reselecting Skills – You may re-select the added skill for only one Classic Tricorder, one Classic Medical Tricorder, and one Classic Communicator each turn, regardless of how many copies of each you have in play. See **once per turn**. Re-selecting is executing orders and may not interrupt another action (e.g., you may not re-select during a mission attempt).

skills – using – In general, your personnel's skills may be used only during your own turn. Using skills is an action (except applying **automatic modifiers** such as "Attributes all +5 if with Toral" or "Suspends effect of Doppelganger where present"). Thus, during your opponent's turn, you may use skills that represent valid responses (e.g., "May replace anyone randomly selected to die here") or that specifically allow use during the opponent's turn (e.g., special downloads, "Once every turn, may 'pounce'.", "May be replaced by another version at any time"). Examples of skills that may *not* be used during your opponent's turn include "Once each turn, may reprogram any androids present" and "Once per game, may kill any one personnel present." See **turn, actions – taking turns**.

If a card requires a personnel type such as MEDICAL without specifying either a classification or a skill, either will suffice. A requirement for a multiple level of a skill, such as Navigation x2, may be satisfied by any

combination of Navigation skills on one or more personnel (unless "a personnel with Navigation x2" is specified).

When a card such as Keldon Advanced requires a skill, such as Obsidian Order, it must be supplied by a personnel who has that skill in its skills box. Mention of the term in the lore is not equivalent to having the skill. For example, Jaron does not have Tal Shiar skill.

solve – Solving a mission means completing that mission, by meeting the mission requirements. Solving a mission is a sub-action of a **mission attempt**.

Son'a ships – See **attribute enhancement**.

Soong-type android – One type of **android**; any personnel identified in its lore as a "Soong-type android" or as created by Dr. Noonien Soong.

❖ **Soong-type Android** – See **ANIMAL, gender, report**.

❖ **Space** – This mission counts as half a card. In other words, two ❖ Space missions plus five other missions count as six missions. (Other universal missions count as a full card.) It is not attemptable. See **mission attempt**.

"May insert into spaceline" means that you may seed this mission anywhere on the Alpha Quadrant spaceline, either between two missions already seeded, or at either end of the spaceline as usual. It does not allow you to add the mission to the spaceline during the game. If inserted into a region, it does not become part of that region. See **regions of space**.

Span calculations are based on the number of directly adjacent universal mission cards (not just ❖ Space missions). The maximum span for one ❖ Space card is 5.

space – transferring cards into – You may not beam, report, or otherwise transfer any card (except a ship) into space unless a card specifically allows you to do so (e.g., Airlock, Anti-Matter Pod).

space facility – See **facility**.

Space-Time Portal – This doorway allows you to seed [AU] dilemmas, artifacts, or other seed cards. It does not allow seeding of [AU] cards that are not normally seedable, such as personnel or ships (unless another card makes them seedable, such as Cryosatellite). See **Alternate Universe icon**.

It allows you to play only one [AU] card per turn, even if you have multiple Space-Time Portals in play (see **once per turn**). Its text does not restrict a seeded Alternate Universe Door, which allows you to play multiple [AU] cards each turn (e.g., interrupts, doorways, or multiple card plays allowed by a card such as Red Alert!).

Because this doorway allows you to seed or play only one [AU] card per turn, you may seed only one [AU] card under Q's Planet, and only if you have not already played an [AU] card that turn.

You may discard the doorway from the table "at any time" for any one of its functions – during either player's turn, before or after your card play or executing orders, between other actions or as a valid response to an action. It is *not* a valid response to the initiation of a battle or the encounter of a dilemma; thus, you may not escape from battle or a dilemma encounter by returning a ship to your hand. See **actions – interrupting, actions – step 2: responses**.

You may report an [AU]-icon ship with [AU] crew by discarding a Space-Time Portal even if you have already played the one [AU] card allowed by the Portal for the turn. (See **report with crew**.) An Alternate Universe Door may be downloaded only for one of the "play" functions of that doorway; it may not be downloaded "onto the table." A Space-Time Portal discarded to "play as a second Wormhole interrupt" may be nullified by

Amanda Rogers. It is still a Doorway card, and may be closed (if the Wormholes are kept open with Operate Wormhole Relays). See **card types**.

Spacedock – This event will **repair** any of your ships that docks at the outpost where the Spacedock is played, even if the outpost itself does not repair ships. It plays *only* on a outpost unless downloaded by Construct Starship.

Spacedoor – This doorway seeds *only* on an outpost (not other types of facilities). When you return an **empty ship** to hand, any cards aboard (equipment) or played on it (such as events) are also returned to their owners' hands. See in **play**. If this doorway is closed by another card, such as Revolving Door, do not flip over the Spacedoor.

You may seed more than one Spacedoor, but you cannot overhaul or download more than one ship per turn. You may download only one ship in place of your normal card play, even if you have **Red Alert!** in play. See **card play**.

You may not use the discard for a Static Warp Bubble or other card to also re-open a Spacedoor. See **discarding**.

spaceline – Mission cards are seeded to form one or more spacelines, representing different quadrants of the galaxy. Gamma, Delta, and Mirror Quadrant missions have a Γ , Δ , or M symbol in their point boxes. Missions with no symbol are Alpha Quadrant missions. All missions may be seeded only on the appropriate spaceline. Spaceline locations may not be moved between quadrants by cards that relocate locations.

The effects of a card which references the "spaceline" apply only to the quadrant where it is played or encountered. For example, you may rearrange only the spaceline (quadrant) where your opponent failed a Q dilemma; The Traveler allows a ship to move only within one spaceline. See **movement between quadrants, time travel**.

Cards "on the spaceline" include ships, facilities, and personnel on the spaceline (and cards played on them). Cards that seed or play "on table" are not on the spaceline. When a card plays at a "spaceline end," it plays at the last location on either end of that spaceline. It does not form another location. **Time locations** are not on the spaceline.

Spatial Rift – If the two personnel randomly selected by this dilemma do not meet the first conditions (combined CUNNING>14), they are discarded, the rest of the crew or Away Team is "stopped," and the dilemma is replaced under the mission. You do not face the second set of conditions (Astrophysics and 2 ENGINEER) unless you pass the first set.

special download – See **downloading – special download**.

special equipment – When a card refers to a ship's "special equipment," this means ship systems expressed as a phrase of just a few words. Special equipment currently includes Cloaking Device, Energy Dampener, Holodeck, Invasive Transporters, Long-Range Scan Shielding, Particle Scattering Device, Phasing Cloak, Tractor Beam, MEDICAL (U.S.S. Pasteur), and Stellar Cartography (U.S.S. Excelsior).

Regular transporters (which all ships have unless otherwise specified), special downloads, and other game text on the ship card, usually expressed as a sentence with a period, are not special equipment. For example, the U.S.S. Stargazer's text ("Once each game, may be taken from discard pile to hand.") is not special equipment.

special staffing icon – See **ship staffing**.

species – For most personnel, their images (and affiliation) indicate their species. For example, a Federation or Non-Aligned

personnel who appears to be human is assumed to be of human species; a Klingon-affiliation personnel who appears to be Klingon is assumed to be Klingon species, etc.

However, a personnel may appear to be one species, while their lore or a [Holo] icon indicates they are of another species. For example, in their lore Roga Danar and Lal, who appear human, are identified as Angosian and **android**; Riker Will, who appears Bajoran, is identified as human; and Lovok Founder, who appears Romulan, is identified as a changeling. **Holographic personnel** are considered to be of "hologram species" regardless of their appearance or lore. The species established by the lore or [Holo] icon applies for cards such as Hate Crime.

"Terran" personnel are human. Calandra, Hannah Bates, and Lakanta are human. Marouk, Riva, and Vektor are humanoid (not human). ("Humanoid" is not a distinct species.)

A personnel of mixed species is considered to be a member of both species. For example, Alexander Rozhenko is both human and Klingon. K'mtar, on the other hand, is considered Klingon (because he appears Klingon, and his lore does not state otherwise), even though he is actually Alexander Rozhenko from the future. Borg and former Borg are considered to be both Borg species and their species of origin.

A term such as Klingon usually applies either to affiliation or to species. See **affiliation and species**.

Sphere Encounter – See **report with crew**.

Spot – This personnel's STRENGTH is an **undefined attribute**. See **ANIMAL**. Whenever Spot is killed, if she has any lives remaining she immediately pops back to life at the same place, but is "stopped." Any cards played on Spot are not nullified by her first eight deaths.

St. John Talbot – See **Release This Pain**.

staffing – See **ship staffing**.

start of turn – See **turn**.

starting the game – The game begins by choosing a starting player using any mutually agreeable method. Each game consists of four **seed phases** followed by the **play phase**. The starting player goes first in each seed phase and takes the first turn in the play phase.

stasis – A personnel or ship in stasis is conceptually in "suspended animation." They remain in stasis until released as specified by the card that placed them in stasis.

Cards in stasis may not be used in any way (including game text, attributes, icons, lore, skills, ship equipment, traits such as gender, species, or matching commander status, etc.), and are considered in **play** for uniqueness only. They may not perform any actions and may not be moved or beamed.

For example, a Treachery personnel in stasis would not allow you to download personnel there with Recruit Mercenaries; an android in stasis aboard a ship at Paxan "Wormhole" cannot prevent that ship from being relocated; and Borg personnel may not be reported to a Borg Cube in stasis using the ship's game text. If personnel who are not in stasis are aboard a ship in stasis (e.g., because a Cyber Drone was aboard when the ship entered stasis), they cannot move the ship, or beam off using that ship's transporters.

Cards in stasis may not be targeted in ship battle and are excluded from personnel battle (and may not be randomly selected to die).

Cards or rules that have a global effect, such as Anti-Time Anomaly and Borg timeline disruption, affect cards in stasis normally. No other cards may affect or play on a card in stasis unless they specifically permit it (e.g., Dead In Bed). (If a personnel worth bonus

points when killed, such as Aamin Marritza, is killed while in stasis, the stasis effect ends when he is killed and the points are scored.)

Cards aboard a ship in stasis are also in stasis (unless prevented by the Cyber Drone). A card already in play on a card in stasis is suspended, unless its game text affects a player or other cards not in stasis. For example, if a ship is in stasis, an Aphasia Device will not disable personnel aboard, and cards with a countdown icon or effect (e.g., Ketracel-White, REM Fatigue Hallucinations) will not count down on that ship. However, Writ of Accountability affects a player, so it is not suspended if the personnel it is played on enters stasis.

Static Warp Bubble – See **The Traveler: Transcendence, discarding**.

station – A type of facility.

stealing – You may not “steal” Equipment cards, even if unattended, unless a card allows it, such as Reginod or HQ: Return Orb to Bajor. When a card allows you to steal Equipment cards, they come under your control and you use them as your own, disregarding **affiliation and species** requirements for use (e.g., “Klingon use only”). (However, a card which enhances only Klingons, for example, still enhances only Klingons, and other requirements for use of the equipment must still be met. For example, a Romulan Cloaking Device only functions on a Romulan ship, or an [OS] ship with 2 ENGINEER aboard.) You cannot steal cards that you control. All “stolen” cards are returned to their owners at the end of the game. See **Procurement Drone**.

Stefan de Seve – See **Assign Support Personnel**.

Stolen Attack Ship – See **affiliation and ship origin**.

Stop First Contact – This objective (or Build Interplexing Beacon) disrupts the timeline with the following effects:

“*Timeline disrupted in 2063*” – If the Borg change history by completing a Stop First Contact or Build Interplexing Beacon objective, the timeline is disrupted and Federation history ceases to exist. Cards which cease to exist include

- humans, including Borg whose biological distinctiveness indicates that they were originally “human species” (but not “humanoids”), and
- [Fed]-affiliation cards (including multi-affiliation cards, regardless of current mode), such as personnel, ships, and facilities.

However, things from other universes and in other times are not affected by this timeline disruption; thus, the following cards are *protected*:

- Cards which are at a time location or which are time traveling into the future (e.g., Temporal Rift or Time Travel Pod).
- Cards with an [AU] icon or a [MO] icon.

If a non-human personnel’s [Fed] affiliation is “lost” (e.g., to Memory Wipe or Frame of Mind) and the personnel “becomes Non-Aligned,” they are also protected from timeline disruption. See “**loses affiliation**.”

Except for cards which are protected, all humans and [Fed] cards in play (in any quadrant) and in both players’ hands, draw decks, side decks, discard piles, etc., must be placed out-of-play. (Reshuffle where appropriate.) If any cards which do not cease to exist are aboard (or played on) a ship or facility which ceases to exist, those cards return to owner’s hand.

“stopped” – Cards may be “stopped” in certain situations.

- Encountering a dilemma with conditions that the crew or Away Team can’t overcome “stops” that entire Away Team or ship and crew. (See **dilemma resolution**.)

- Participating in a battle “stops” all cards involved in the battle.

- Carrying (and then dropping) or beaming a **Tribble** card “stops” the personnel who did so.

- Some cards may explicitly “stop” one or more personnel or ships.

Cards that are “stopped” may not be beamed, move, walk, cloak, phase, participate in a battle, staff a ship, or participate in a mission, commandeering, or scouting attempt. (Personnel selectively “stopped” by a dilemma form a separate group and no longer participate in the mission attempt.) Cards may target “stopped” cards, as long as they do not require them to take any of these actions. For example, you may relocate a “stopped” ship with Magic Carpet Ride OCD (see **movement**), but you may not play Emergency Transporter Armbands on your “stopped” personnel, because they may not beam.

Cards that are “stopped” may perform other actions and use skills. For example, a “stopped” personnel may operate transporters to beam “unstopped” cards, use a downloading skill, contribute traits or skills for such cards as Paxan “Wormhole,” Defiant Dedication Plaque, Kurlan Naikos, Navigate Plasma Storms, or Ketracel-White, and (if Borg) share skills with the hive. (See **present**.) Also, whenever “stopped” cards are attacked, they are “unstopped” for the duration of that battle and may defend themselves.

“Stopped” cards become “unstopped” automatically at the start of the next turn, unless a longer period is specified. When a card “stops” personnel for a specific duration (e.g., Parallel Romance, Chinese Finger Puzzle), they may still be “unstopped” by other cards (e.g., Distortion of Space/Time Continuum, Deanna Troi).

When an entire Away Team or crew is “stopped” by failing to overcome a dilemma with conditions (e.g., Chula: The Dice), by a dilemma that does not have conditions, but specifically says it “stops” an entire Away Team or crew (e.g., Sarjenka), or by participating in battle, any Equipment cards in that Away Team or crew are also “stopped.” When specific members of a crew or Away Team are “stopped” by a dilemma or other card that specifically “stops” only selected personnel (e.g., Lineup), any Equipment cards are not “stopped” (even if the selected personnel are the only ones in the Away Team or crew).

Some additional notes:

- Failing to complete a mission after resolving the dilemmas does not “stop” the crew or Away Team.
- Using up its maximum RANGE does not “stop” a ship.
- Your cards aboard your “stopped” ship are also “stopped.”
- During a mission, commandeering, or scouting attempt, “stopped” personnel cannot contribute traits or skills to trigger, overcome, nullify, or cure dilemmas. See **present**.

Storage Compartment Door – Drawing the three cards allowed by this doorway is **executing orders** and must take place after the card play segment of your **turn**. The cards drawn are not part of your hand and must be either played or discarded (face up under your **Tribble side deck**) immediately. See **card draw, card play, tribble**.

Study Plasma Storm – This mission’s special text, “Computer Skill required to use any equipment here,” applies both to **Equipment** cards and ship **special equipment**.

If Computer Skill is not present on the ship, Ketracel-White cards cannot be used at this location and thus do not prevent white deprivation. Because the **Ketracel-White** is not being used, it does not count down.

Study Protonebula – This mission is a **nebula**. The owner of this mission, if playing [Borg] affiliation, may not normally use the special text allowing the download of One because they may not stock a non-[Borg] personnel. See **Borg – Cooperation**.

stunned and mortally wounded – Stunned and mortally wounded personnel may still modify other personnel (for example, by adding to their attributes), but may not use other skills (e.g., stunned MEDICAL personnel cannot run the Genetronic Replicator; a stunned Elim Garak may not avoid the random selection of a personnel to be killed). See **battle – personnel**.

Subjugate Planet – You may not download a Remote Supply Depot if you already have a facility at this objective’s target location. See **dual-icon mission, mission, Reunion, mission attempt**.

Subspace Schism – This interrupt may be played to affect any **card draw** a player makes during a turn (including end-of-turn card draws and Warp Speed evening up). It may not be played on a card drawn for an opening hand.

“**Subspace Seaweed**” – See **Protouniverse**.

Subspace Transporter – If the personnel beamed aboard an opponent’s ship using this event takes a captive (e.g., Ilon Tandro, or using Captured), you may not beam the captive back. Only your Treachery personnel (and any equipment he is carrying) may be beamed. See **capturing**.

Subspace Warp Rift – A ship that stops at the location of this event to avoid damage is not “stopped” (e.g., it may initiate battle or attempt a mission). A ship that is relocated to or from the location of this event does not incur damage. See **passing locations, movement**.

Suna – See **once per game**.

superlatives – See **ties**.

Supernova – This event plays *only* on a Mission card, not on any other location. The mission is not discarded, but remains underneath for span reference only, leaving a spaceline **location** of unspecified type (neither [P] nor [S]). *None* of its game text, icons, card title, etc. remain in effect other than the span. For example, if Wormhole Negotiations is destroyed, you can no longer play a Barzan Wormhole to report ships at that location.

Any cards not affected by Supernova (e.g., staffed Gomtuu, completed Borg objectives), and any cards in play on them, are not discarded.

Tox Uthat’s stipulation that you “may play Supernova on a later turn” is a restriction; you may not play Supernova on the same turn you play Tox Uthat even if you have an extra card play or download.

If a mission was assimilated before being destroyed, reversing the effects of Supernova with **Persistence of Memory** does not unassimilate the mission (just as it does not “unsolve” a mission previously solved). Therefore it still cannot be solved or targeted for assimilation again.

If a mission that corresponds to a time location in play is destroyed by this event, the time location is unaffected. See **Temporal Vortex**.

Once this event has resolved and destroyed all cards at the mission location, nullifying it with Kevin Uxbridge or moving it with Dr. Q, Medicine Entity has no effect.

support personnel – See **Assign Support Personnel**.

Survey Drone (Sixteen of Nineteen) – This personnel’s special skill allows it to acquire artifacts that have been placed on top of the mission where a [BO] objective has been completed (or artifacts that could not be acquired when a mission was solved because of The Charybdis). It may not acquire artifacts

that are still seeded under a mission or steal artifacts in play. See **scouting locations**.

suspends play – A card which specifically says it “suspends play” may be played at any time during the play phase (even during your opponent’s turn) and may interrupt and temporarily suspend any action. Using a special download icon also suspends play. After the card play or special download has resolved, the suspended action resumes. See **downloading – special download, actions – interrupting**.

If no action is in progress, an action that *may* suspend play (such as using a special download icon) does not suspend anything. You may not suspend play during the seed phases.

Symbiont Diagnosis – See **homeworld**.

tactic – A card type which comes into play only through a special **Battle Bridge side deck** (you cannot stock Tactic cards in your draw deck or your Q’s Tent). Tactic cards increase your offensive and/or defensive capabilities during ship battles and also indicate specific damage affecting your opponent’s ships and facilities.

If a card (e.g., Make It So, Falar) allow you to download a Tactic card, it may be downloaded only from your Battle Bridge side deck and only at the start of battle (when Tactic cards would normally be drawn). A Tactic card may not be downloaded as a damage marker.

Some Tactic cards (e.g., Breen Energy-Dampening Weapon, Chain Reaction Pulsar) have game text starting with a phrase like “Requires a ship with ... firing.” Unlike most tactics, which work for any ship but give bonuses for particular kinds of ships (see **affiliation and ship origin**), these tactics cannot be used as your current tactic unless you have the required ship firing in the battle.

When damage text takes a casualty, the personnel is selected from all appropriate personnel aboard the ship, including intruders.

Tal Shiar – See **skills – using**.

Talosian Cage – See **selections, showing your cards**.

Tama – The lore on this ship is written in Tamarian. The phrase “Dathon, speaking first” means that Dathon is its captain and thus its **matching commander**.

Tamarian-related dilemmas – See **Dathon**.

Tantalus Field – You may not use this artifact to kill a personnel if either the artifact or the potential victim is aboard a cloaked or phased ship. See **cloaking and phasing**.

Tarchannen Study – See **dual-icon missions**.

Tarellian Plague Ship – Revised text:

Entire crew immediately dies from plague unless MEDICAL “beams over” (discarded) to Tarellians. Discard dilemma.

An OFFICER with a Medical Kit overcomes this dilemma if both cards “beam over” (are discarded). Borg may overcome this dilemma by “beaming over” a [Com] Borg with shared MEDICAL skill. (The requirement for a MEDICAL to “beam over” is not a choice; it is a condition for overcoming the dilemma.) A holographic MEDICAL may “beam over” to pass this dilemma only if wearing a Mobile Holo-Emitter (both are discarded). See **holographic personnel and equipment**.

Barclay Transporter Phobia is a valid response to an attempted “beaming.” If the first MEDICAL is prevented from beaming over, another MEDICAL may be selected to do so.

This dilemma is assumed to provide transporters if your crew or Away Team does not have them available, but it cannot overcome obstacles to beaming such as Distortion Field.

See **Quash Conspiracy, quarantine**.

Targ – See **ANIMAL**.

target – Act of selecting and identifying a particular thing such as a card, discard pile, draw deck, player, etc. for a purpose specified by a card or rule. Also, the thing that is targeted. A card does not have to explicitly use the word “target” to target something. Targets are selected during the initiation step of an action. You cannot target an action. For example, Barclay Transporter Phobia targets a personnel, randomly selected from a group that is beaming. It does not target the beaming action itself. See **showing your cards, actions – step 1: initiation**.

Tasha Yar – Alternate – Errata:

Armed with [SD] Starfleet Type II Phaser

This personnel has only two red [Skill] • icons.

Tekeny Ghemor – See **playing an affiliation**.

Telepathic Alien Kidnappers – Using this event, you guess a **card type** at the end of each of your **turns**, just before your card draw. See **Intruder Force Field**.

When you have this event and any card forcing your opponent to reveal his hand (e.g., Alien Probe, Ferengi Bug) both in play, you must allow your opponent to shuffle and conceal his hand before you make the selection.

Temporal Causality Loop – If one of the actions to be undone by this dilemma cannot be undone, then the results of the action are left intact. If the action was initiated by a card play, that card returns to your hand. For example, if you played a Scan card, you cannot “undo” having seen the seed cards under the mission, but the Scan card returns to your hand. If you played a Regenerate to shuffle your discard pile into your draw deck, the draw deck remains intact (because you cannot separate the cards), and the Regenerate returns to your hand.

Temporal Micro-Wormhole – This doorway does not allow you to download personnel (other than Dr. Telek R’Mor) or give permission to play a card. It provides a destination for reporting a personnel (e.g., one played as your normal card play, or downloaded with another card that does not provide a destination, such as the last function of Defend Homeworld).

A personnel reported to your ship using this doorway may mix even with an affiliation that personnel normally **does not work with**. See **compatible**. However, the doorway does not allow you to stock Borg-affiliation cards in a non-Borg deck, or vice versa. (See **Borg – Cooperation**.) The allowance for a personnel to mix with your other affiliations “for rest of game” applies only to the copy of the personnel you reported aboard your ship (not to additional copies or other versions of the persona). If that copy leaves play, the effect does not apply to the same or another copy of the card reported again normally. See **once per game**.

If you download Dr. Telek R’Mor with this doorway, you may use the doorway’s text to report him aboard any of your ships and allow him to mix with all your affiliations (discard the doorway), or his own text to report him aboard your compatible ship without “mixing” permission (do not discard the doorway).

Temporal Narcosis – See **double turn, Horga’hn**.

Temporal Rift – This interrupt is *not* a valid response to battle or a dilemma, and may not be used to “escape” them. It may not target a **docked ship** or carried ship. See **actions – step 2: responses**.

Cards may not be played on a ship in a Temporal Rift, and you may not discard a Space-Time Portal to return the ship to hand. A card in a Temporal Rift is **in play** for uniqueness only; it is not in the present, so cards like Anti-Time Anomaly cannot affect it. Countdown effects and icons, such as Plasma Fire or Ketracel-White, also do not count

down while a ship is in a Temporal Rift. The same rules also apply to a ship affected by a Time Travel Pod. See **time travel, Black Hole**.

Temporal Vortex – When played for its last function, this doorway relocates only one ship, one time. Although it has a countdown icon, it cannot perform any additional relocations during the countdown. (Play the doorway on the ship, and discard it at the end of the countdown.)

If played on a Borg Ship when encountered, the dilemma does not attack (so your cards are not “stopped”), nor does it attack when it reappears after the countdown expires or if the doorway is “closed.”

If a mission that corresponds to a time location in play is destroyed by a Supernova, the location remains the “**corresponding** spaceline location” for time travel using this doorway.

Temporal Wake – This interrupt may not target a **docked ship** or carried ship to force it to follow a time-traveling ship.

Terok Nor – See **Deep Space 9**.

Terraforming Station – This station allows you to “terraform” (redefine) the requirements of a planet mission for a subsequent game with the same opponent. You may choose to replace each requirement with another requirement of the same type. You may replace **personnel types** with personnel types, other regular **skills** with regular skills that are not personnel types, and attributes with attributes. In addition, you may redefine the name of a Personnel, Equipment, or Artifact card. You may *not* redefine numbers, icons, or special requirements such as “3 [AU] icon Personnel,” or create redundant requirements (such as “Treachery + Treachery”).

For example, if a mission requires “MEDICAL + Guinan + CUNNING > 30” it could be changed to “SECURITY + Spock + INTEGRITY > 30.” The redefinition works for both ends of the mission. The mission loses the redefinition after your next game with the same opponent, even if you don’t use that mission.

You must define the new requirements immediately after the game ends. In tournament play, give the redefinition to the tournament director in writing, before the cards are removed from the spaceline; it will affect a later match in that same tournament, if you play the same opponent. A redefinition of mission requirements made outside of a specific tournament *cannot* affect a match within that tournament.

Terran – See **species**.

Terran Empire icon [TE] – This icon indicates Terrans (and their allies) from the mirror universe. It is a special staffing icon, and also has other uses defined by cards.

Terran Rebellion HQ – When this facility is in play at the Search for Rebels mission location, that location becomes a **homeworld** for all Federation cards with a [TE] Terran Empire icon, and thus may be targeted by cards such as Assimilate Homeworld and Gold-Pressed Latinum. To “match the affiliation of the homeworld,” a personnel card must have [Fed], [TE], and [MQ] icons.

Tetryon Field – A ship without Navigation aboard must stop moving at the location of this event and cannot move for the remainder of the turn, but is not “stopped” (e.g., it may initiate battle or attempt a mission).

The – Card titles starting with “The” are sorted under the second word of the card title (e.g., The Big Picture is under “Big”).

there – See **here**.

Theta-Radiation Poisoning – Only one Medical Kit is required aboard the ship or outpost affected by this dilemma to prevent

any personnel from dying at the end of each turn.

Thine Own Self – Revised text:

Plays on opponent's one- or two-person Away Team on a planet (unless in a facility). Away Team is "lost" (place under mission). Capture (or opponent rescues) by solving mission.

This interrupt remains on the "lost" Away Team until they are rescued or captured. See **discarding**. The "lost" personnel are still an Away Team and are vulnerable to cards such as Anti-Time Anomaly, Risky Business, or Dal'Rok, but they cannot use any skills or features (as if disabled). They are placed under the mission only as a marker of their "lost" status and are not considered seed cards that can be discarded with Ajur or Boratus. A "lost" Borg scout may not be retrieved when the Borg complete their objective. See **Away Team and crew**.

You may play this interrupt on personnel phased by the Phased Matter dilemma. You may not play it on an Away Team at a time location, because it requires you to place them under a mission.

Third of Five – See **drone**.

Thought Fire – Revised text:

If The Traveler: Transcendence is affecting you, all crew or Away Team members with (CUNNING+INTEGRITY)<12 are killed unless Empathy present.

thrice per game – Three times per game. See **once per game**.

ties – When a dilemma specifies a superlative such as "strongest," "most CUNNING," or "highest total attributes," and there is a tie, the opponent of the player encountering the dilemma gets to choose (unless the dilemma states otherwise). See **selections**.

To determine such things as "nearest planet" and "far end of **spaceline**," compare the number of *cards* in each direction; if there is a tie, then compare the total *span* in each direction. If still a tie, the opponent chooses.

ties (scoring) – See the official tournament guide.

time location – A card type representing a location in the past or future of the Star Trek universe. Time locations may be [S] or [P] locations. A time location is not a mission or spaceline location, but it has a corresponding mission identified by the lore of both cards. For example, the mission Agricultural Assessment corresponds to the time location Sherman's Peak; both are located at Sherman's Planet. You may not seed or play a time location unless the corresponding spaceline location is in play.

A time location is placed by itself on the table, creating its own planet or space location separate from the spacelines. The card may have special instructions to be carried out when it is seeded or played; if you cannot carry out all instructions, you may not seed or play the time location. Playing a time location uses your normal card play.

Cards that affect the mission, such as Supernova or Black Hole, have no effect on the time location. Cards at the time location are not at the corresponding mission and cannot attempt it. Ships and personnel may travel between the time location and the mission using a card that allows **time travel**.

The cards listed on a time location as "native to this timeline" may be reported directly to the location if it is in play. You may choose to report personnel on the surface of a planet time location, aboard any of your compatible ships or facilities at the time location, or aboard any opponent's facility there that you are allowed to use (e.g., Deep Space Station K-7). You may report a ship or facility in space at the location (in orbit of a planet). When reported in this manner, you do not need an

open doorway, such as an Alternate Universe Door, to allow you to report these **Alternate Universe icon cards**.

You are not required to have the time location in play to use cards native to that location, or to report them to that time location if it is in play. They may be reported normally to a facility on the spaceline, or by any other legal reporting method, if you have an open Doorway card which allows [AU] cards to play.

Time To Reconsider – You may play this interrupt to "stop" your ship and crew on your turn, but it will have no effect on an opponent's ability to counter-attack on his turn (because it only prevents a counter-attack "this turn"). If you attacked your opponent this turn, you may play the interrupt on your ship during his turn to prevent him from counter-attacking.

time travel – There are two forms of time travel.

- **Movement** between a **time location** and a spaceline is possible only via a pair of Wormhole interrupts, a Q-related "relocator card" such as Where's Guinan or Jealous Amanda, or any card that specifically states that it allows such movement, such as Temporal Vortex or Orb of Time. Cards such as Iconian Gateway, which do not so specify, do not allow time travel.

Time travel is not restricted to "corresponding spaceline location" unless specified. For example, the Orb of Time allows you to move from any spaceline location (in any quadrant) to any timeline location, or vice versa; or between two time locations.

- Temporal Rift and Time Travel Pod represent a different form of time travel, moving from the present into the future while remaining at the same physical location. The ship and all cards aboard are **in play** for uniqueness only, and are not affected by cards that resolve while the ship has "disappeared," such as Anti-Time Anomaly, Stop First Contact, or Supernova.

Time Travel Pod – This artifact refers to the full turns of the player whose ship the card is played upon. See **Investigate Time Continuum**, **Temporal Rift**, **time travel**.

timeline disruption – The existence of **time locations** makes it possible to conceptually go back in time and alter history in such a way that you change conditions in the present. This will typically have a dramatic effect on the game. The effects of Stop First Contact and Build Interplexing Beacon are described under **Stop First Contact**. The effects of other timeline-disrupting cards, such as **Hero of the Empire**, are described on the card.

Timicin – See **helps**.

timing – See **turn**, **actions**.

Tomalak of Borg – See **counterpart**, **rest of game**.

Tommygun – See **holographic personnel and equipment**.

Tongo – To "declare a move" for this incident, you must have a bet to show. There is no winner or loser if your opponent has no bet (they must show their hand to verify this) or if there is a tie for highest total attributes.

Toral – See **skills**.

Torture – See **Madred**.

tournament scoring – See the official tournament guide for details of scoring victory points and differential. Also see **points**, **bonus points**, **winning the game**.

towing – A ship may not tow anything unless a card allows it, such as Activate Tractor Beam or Radioactive Garbage Scow. When a ship towing another ship or Scow moves or relocates in any way (e.g., through the Bajoran Wormhole, with Wormholes, The Traveler, time travel, etc.), the towed ship is also moved or

relocated. A ship in tow cannot tow another ship. A towed ship may cloak (but not the towing ship). See **cloaking and phasing**, **tractor beam**.

Tox Uthat – If you use this artifact to allow the play of a **Supernova**, it is discarded even if the Supernova is nullified. See **actions – step 1: initiation**.

T'Pan – Errata:

- **SCIENCE** • **Mindmeld**

This personnel has two red [Skill] • icons and is not a mission specialist.

tractor beam – A type of ship's **special equipment**. A tractor beam has no built-in functions, but is activated by other cards, such as Activate Tractor Beam, Engage Shuttle Operations, and Ship Seizure. See **towing**.

Transporter Drones – This Equipment card's STRENGTH cannot be used outside of battle or modified by cards that affect personnel STRENGTH. It is not a weapon.

Transporter Mixup – Because a group of personnel beams simultaneously, all four of the personnel discarded by this incident are considered to leave play simultaneously (the cards are still placed in the discard pile one at a time so the opponent can see them). See **exchanging cards**.

Transporter Skill – When using a card (such as Invasive Beam-in) requires Transporter Skill aboard a ship, the Transporter Skill personnel must remain on the ship to operate the transporters. See **Miracle Worker**, **trible**.

transporters – All ships and facilities have transporters unless otherwise specified. You may not operate your opponent's transporters unless you are allowed to use his facility (except when infiltrating; see **infiltration icon**). Transporters are not **special equipment**. See **beaming**.

Transwarp Drone (Two of Nineteen) – This personnel may download one doorway or interrupt whose title includes "Transwarp," i.e., Transwarp Network Gateway (doorway) or Transwarp Conduit (interrupt).

Transwarp Network Gateway – Revised text:

Seed one during facility phase on any spaceline end OR play on any spaceline location where you have a [Nav] Borg. Any player may play a Transwarp Conduit (or another copy of this doorway) to allow moving any or all of that player's ships ...

To move ships through Transwarp Network Gateways, there must already be in play two copies of this doorway at different locations. You must play another Transwarp Network Gateway doorway or a Transwarp Conduit interrupt each time you wish to move a ship (or group of ships) through the gateway network. This does not use any of the ship's RANGE, but is still normal ship **movement**, requiring full staffing. Playing a Transwarp Network Gateway requires a [Nav] Borg present even when download (e.g., with the Borg Outpost's special download icon). See **spaceline**.

Traveler, The – This personnel's skill enables normal ship **movement** requiring full staffing, similar to the Wormhole interrupt, but is restricted to the current **spaceline**.

Traveler: Transcendence, The – This event nullifies all Static Warp Bubbles in play or played later, either yours or your opponent's.

treaties – Treaty cards make one player's cards of two or more different affiliations **compatible** and allow them to mix and cooperate. They do not change any card's affiliation or make them **matching affiliation**. If a treaty is destroyed, incompatible personnel aboard a ship or facility are placed under **house arrest**.

Treaties do not "chain." If you have Treaty: Federation/Bajoran and Treaty: Federation/Klingon in play, your Bajorans may not mix with your Klingons. You must also play

Treaty: Bajoran/Klingon for all three groups to mix.

A "Federation treaty" is any treaty which includes the Federation as one of the parties. For example, Treaty: Federation/Klingon and Organian Peace Treaty are both Federation treaties as well as Klingon treaties.

Treaty: Federation/Romulan/Klingon – You may not use this event's provisions if you have any side deck in play (even if closed or empty), including a Battle Bridge side deck. Only your Federation, Romulan, and Klingon affiliations are restricted from attempting your opponent's missions; your personnel and ships of all other affiliations may attempt any of your opponent's missions that has an appropriate icon or text.

Playing an **Espionage** card will not permit you to attempt an opponent's mission while this treaty is in play. However, a required action (such as Samaritan Snare) may compel you to attempt an opponent's mission despite the treaty restriction. See **actions – required**.

tribble – A card type which comes into play only through a **Tribble side deck**. Tribble cards represent single tribbles and groups of 10, 100, 1,000, etc. They may *report* or *breed* as noted on each card.

You may play one Tribble card each turn per group of your tribbles (whether the cards were drawn from your side deck or downloaded by playing a Storage Compartment Door). All of your tribbles on one ship, facility, site, or planet are one group. Reporting a 1 Tribble or 10 Tribbles card where there are no tribbles creates a new group; you may not play another Tribble card to that group on that turn.

You must have at least the required number of tribbles present to breed tribbles. (You may not breed tribbles from your opponent's tribble group.) For example, the 100 Tribbles card "Breeds from 10 tribbles." You must have at least 10 tribbles present (either ten 1 Tribble cards or one 10 Tribbles card) to play a 100 Tribbles card to that group. When you breed a tribble card, the tribbles required to breed that card remain in play.

The *small* Tribble cards – 1 Tribble and 10 Tribbles – may be carried like equipment by either player's personnel. Each personnel may carry only one small Tribble card; when they eventually "drop" it, they are "stopped." He is not required to put it down while he performs other actions, such as attempting a mission.

The *large* Tribble cards – 100 Tribbles and greater – may not be carried, but may be beamed by any Transporter Skill personnel. Each personnel may beam up to one large Tribble card for each unit of that skill they have, then that personnel is "stopped" and may beam no more Tribble cards that turn. You may lower the SHIELDS of your Nor to beam large Tribble cards. Although small Tribble cards may not be beamed, you may beam the personnel who are carrying them (this does not require Transporter Skill and does not "stop" anyone).

You may beam large tribble cards between your opponent's ship and your own ship (if a card, such as the Transport Drone or Invasive Beam-In, allows you to beam cards through SHIELDS). Your opponent must allow you to see the tribble cards to select one or more for beaming.

Each denomination of Tribble card (e.g., 1 Tribble) comes in multiple versions, with different images and card numbers, and a different special colored icon such as Go, Poison, and so on. All versions of a denomination are treated as the same card in the Star Trek Customizable Card Game (they are not cumulative); the special icons are used in the Tribbles Customizable Card Game™. (Tribble cards from the Tribbles Customizable Card Game may not be used in the Star Trek

Customizable Card Game, because they have no game text allowing them to play.)

Tribble Bomb – Your Barry Waddle must be at the same location as your tribble group to allow you to play this incident (not just to play it for free).

This incident cannot be moved except as allowed by Trouble... in the Transporters, even when Tribble cards from the tribble group where it is played are carried or beamed.

Tribble side deck – This **side deck** is made up of **Tribble** and **Trouble** cards. You can have as many Tribble and Trouble cards in your side deck as you like, even duplicates. The side deck is activated during the doorway seed phase by a Storage Compartment Door card placed face up on top of the side deck. The **Storage Compartment Door** allows you to draw and play (or discard) up to three cards from your side deck during each of your **turns**.

Your Tribble and Trouble cards are not part of your normal hand, and thus are not affected by cards such as Alien Probe and Energy Vortex. Whenever a card from your Tribble side deck is discarded or otherwise leaves the table, place it *face up* underneath your side deck. When your side deck runs out of face-down cards, shuffle the face-up cards and place them face down again underneath your seeded Storage Compartment Door.

trouble – A card type which comes into play only through a **Tribble side deck**. You may play Trouble cards only where you have tribbles present. You may play one Trouble card each turn per group of your tribbles. Each Trouble card lists the minimum number of tribbles required to "activate" portions of its game text. If you do not have the minimum number present, the Trouble card stays in play, but its game text is inactive. If you have no tribbles present with a Trouble card, it is discarded.

Whenever any of your Tribble cards (or your Tribble Bomb) are moved, any or all of your Trouble cards present may go along with them.

tripling – see **doubling**.

Trouble ... on the Bridge – When this Trouble card is present with at least 1,000 tribbles on a ship with more than 10 personnel in its crew, that crew may not attempt missions.

Trust Me – A Borg player may use this Q-icon event to place non-Borg personnel or ships in his discard pile and may use them normally if retrieved to hand, but they may not mix with his Borg.

Tsiolkovsky Infection – Errata:

(Not cumulative.)

See **skills**.

turn – Players alternate taking turns throughout the play phase. During your turn you will do up to five things, in this order:

1. Perform any actions required or allowed by game text that says it takes place at "start of turn."
2. Play a card from your hand. This "normal card play" is optional. All cards except interrupts and doorways may be played only at this time, even those that play "for free," unless a card specifically allows a card play at another time.

During this segment of your turn, you may take no actions other than:

- playing and downloading cards;
- actions that **suspend play**;
- actions that may occur at **any time** (including activating hidden agendas and playing interrupts and doorways); and,
- sub-actions of these actions.

Any other action advances you to the "execute orders" segment of your turn, after which you may no longer play cards (except interrupts and doorways).

3. Execute orders. This generally means

moving and/or using cards already on the table, and is also optional. See **executing orders**.

4. Perform any actions required or allowed by game text that says it takes place at "end of turn." (**Probing** is also defined as an end-of-turn action unless otherwise specified.)
5. Draw a card from your draw deck to your hand. This is mandatory and signals the end of your turn. See **card draw**. If you are prevented from drawing a card (for example, by the game text of Q's Tent or the Ops site, or because there are no cards left in your draw deck), then you simply announce when you are done with your turn.

Game text that says it may be used "at any time" may be used out of the normal turn order, or during your opponent's turn, even if the card type is normally playable only during your own turn (e.g., an event or doorway). However, such game text may not interrupt an unrelated action. See **actions – interrupting**.

You may choose the order of start-of-turn and end-of-turn actions. For example, you may process ore either before or after a Rogue Borg battle; you may probe either before or after counting down countdown icons or moving a Borg Ship dilemma. No other actions may take place between start-of-turn or end-of-turn actions, other than valid responses. However, your normal card draw (or any action that replaces it), is always the last action of your turn. (In **Warp Speed** format, evening up is the last action, immediately following your card draw.)

If a card such as 35th Rule of Acquisition allows you to draw a card at "end of each turn" when conditions are met (but does not say it is an extra or additional card draw), it is the result of an "end-of-turn" action, which must take place before your normal card draw which ends your turn. However, if a card allows an "extra" or "additional" card draw at the end of your turn (e.g., The Traveler: Transcendence or Quark's Bar), it is a modification to your normal card draw, and thus is not an "end-of-turn" action.

Your separate Away Teams merging at the end of your turn and "stopped" cards becoming "unstopped" at the start of a turn are not actions. They are changes of status that occur automatically when a turn ends or starts.

A few other uses of the term "turn" are clarified below:

- A "full turn" is one complete turn of one player, from beginning to end, not including the current turn.
- "Owner's turn" refers to the owner of the card being *affected*, rather than the card *played*.
- "Every turn" means every turn of both players.
- "Each turn" means each turn of the subject of the game text (skipping the other player). The subject player is usually indicated by a word such as "you," "opponent" or "owner." ("You" or "your" refers to the person playing the card or encountering the dilemma.) It may also be implied by game text instructing the person who played the card to take specific actions. If no player is specified or implied, then the subject of the game text is the player whom it affects. If it affects both players equally, the subject is the person who played or encountered the card.

Examples:

- Temporal Rift: "Ship ... must reappear here after two of your full turns." The subject is the person who played the interrupt.
- Hyper-Aging: "Away Team... dies at the end of your third full turn." The subject is the player encountering the dilemma.

- Warp Core Breach: "Ship explodes at end of owner's next turn." The subject is the owner of the ship.
 - Telepathic Alien Kidnappers: "At end of each turn, guess a card type..." The subject is the person who played the card, who is instructed to guess a card type.
 - Plasma Fire: "Fire damages ship at end of next turn." The subject is the owner of the ship.
- Turret** – See in play.
- twice per game** – See **once per game**.
- Twin Mistresses of Evil, The** – Each of the personnel on this **dual-personnel card** may double the regular skills of only one Tom Paris or Harry Kim present. See **skills** – **modifying**.
- Two-Dimensional Creatures** – Revised text:
Place on ship. Empaths aboard are disabled. Ship can't move until SCIENCE and ENGINEER aboard, discarding dilemma and curing empaths.
- Type 18 Shuttlepod** – This ship may report with crew to the location of your *Defiant*-class ship, in space (not aboard). The requirement for Navigation skill applies only to personnel, not to Equipment cards.
- Ultimatum** – To score points with this objective, at least one of your ships firing WEAPONS in the battle that destroys the ship must be a Dominion ship. See **affiliation and ship origin**.
- undefined attribute** – If a card has an *undefined attribute* (e.g., Mortal Q's CUNNING of Q, Kivas' Fajo's "NO INTEGRITY" or Spot's STRENGTH, which is not a number but is explained in the skills box), it is treated as zero for purposes of comparisons or totalling attributes. Undefined attributes cannot be modified with other cards. For example, Kivas Fajo will be killed by the Firestorm dilemma, but his INTEGRITY is not enhanced by Kukalaka.
- A "disabled ship attribute" (for the dilemma "Pup") is treated as an undefined attribute. A **variable attribute** is not undefined unless it is unusable for some reason.
- Undetected Beam-In** – If your opponent encounters this dilemma, you may download up to four Borg drones (to the planet, if any, or to any ship or facility at the location). If you download them to a ship or facility controlled by your opponent, the drones are intruders.
- Rogue Borg Mercenaries** downloaded through this dilemma battle for the first time at the start of the next turn, even if more Rogue Borg are played normally on the current turn. They may play only on an **occupied ship**.
- unique and universal** – *Universal* personnel, ships, sites, missions, and time locations are those with the four-diamond ♠ universal symbol at the beginning of the card name. (Universal facilities will also be marked with the ♠ symbol in future printings.) Those *without* the ♠ universal symbol are *unique* (unless they have an **Enigma icon** ★). All other card types are universal unless marked "Unique" or "Not duplicatable."
- Each player may have only one copy of a particular unique (or Enigma) personnel or ship (or of the same **persona**) or non-duplicatable facility in play at any time. Any number of copies of a universal personnel, ship, or facility may be in play at the same time.
 - Unique sites are "unique per station." That is, each Nor is limited to one of each kind of Site card. Universal sites may exist in multiple on each Nor.
 - Unique missions (including **Q's Planet**) and time locations are *not duplicatable*. There may be only one copy of a time location in play at a time, for both players. Unique missions are stacked to create a single location. Each player may seed more than one copy of any universal mission.
- Each player may have multiple copies of a facility, artifact, dilemma, objective, etc. in play at a time, except for cards marked "Unique" or "Not duplicatable" in their game text.
- When any card marked "Unique" in its game text, or any unique or Enigma personnel or ship, is **in play**, another copy or instance of the same persona may not be played by the same player, and if another copy belonging to the same player is encountered (e.g., dilemmas), earned (e.g., artifacts), or activated (e.g., hidden agendas) by any player, that copy is discarded.
- When any card marked "Not duplicatable" in its game text (or any unique time location) is in play, another copy may not be seeded or played by any player, and if another copy is encountered, earned, or activated by any player, that copy is discarded. When a player seeds any unique mission which has already been seeded on the spaceline, the second copy is stacked atop the first to create a single location. See **Deep Space 9, seed phase**.
- Unity Drone (Two of Seventeen)** – This personnel allows your Borg to share CUNNING in the **hive**. Example: You have an Away Team on a planet consisting of three Borg, with a total CUNNING of 15:
Bio-Med Drone, [Com], CUNNING 5
Tactical Drone, [Def], CUNNING 5
Talon Drone, [Def], CUNNING 5
You have a Borg ship at a neighboring spaceline location with the following crew aboard, with a total CUNNING of 17:
Astrogation Drone, [Nav], CUNNING 7
Guard Drone, [Def], CUNNING 5
Unity Drone, [Com], CUNNING 5
If you bring the ship to the planet location (in the same hive), the CUNNING of the ship's crew is added to the total CUNNING of the Away Team, giving the Away Team a total CUNNING of 32 when facing a dilemma. Likewise, the Away Team's CUNNING is added to that of the ship's crew, so the crew has an effective total CUNNING of 32. This has no effect on the CUNNING of each individual Borg.
- If the Bio-Med Drone is now killed, so there is no longer a [Com] Borg on the planet, the Away Team now has a total CUNNING of only 10, and the ship's crew has a total CUNNING of only 17.
- universe** – See **mirror universe**.
- universal** – See **unique and universal**.
- unopposed** – Your personnel are *unopposed* if your opponent has no personnel present with them on a planet, ship, facility, or site. Your ship is unopposed if your opponent has no ships at the same spaceline or timeline location. A site is unopposed if your opponent has no docked ships or personnel at that site. Cards that are cloaked, phased, disabled, or in stasis do not oppose. See **opposing, Patrol Neutral Zone**.
- until any Q-Flash** – See **Q-icon cards**.
- U.S.S. Danube** – Errata:
Reports for free to **Runabout Docking Pads**.
- U.S.S. Dauntless** – This ship may be fully staffed by Arturus even if it is in Federation affiliation mode.
- U.S.S. Enterprise-B** – See **attribute modifiers**.
- U.S.S. Enterprise-C** – This ship can report to any location, in either quadrant, or to a time location. It may report to a facility, but cannot avoid being damaged. If your opponent is using a Battle Bridge side deck, he applies default damage (two damage markers) when you report the ship. If reported with crew via Space-Time Portal, damage is applied to the ship before the crew is reported aboard (no casualties will occur).
- U.S.S. Excelsior** – This ship has **special equipment** providing one Stellar Cartography skill. This skill may be used to overcome space dilemmas or satisfy requirements of space missions.
- U.S.S. Pasteur** – This ship has **special equipment** providing one MEDICAL skill. This MEDICAL may be used as one of the seven personnel types required by the Kurian Naikos. The U.S.S. Pasteur's nemesis is the I.K.C. Chang. See **nemesis icon**.
- U.S.S. Yangtze Kiang** – This ship is **compatible** with the Bajoran affiliation. It may be staffed by Bajoran-affiliated personnel (without a matching Federation personnel), and reported and docked at a Bajoran facility. It is still a Federation ship and must abide by Federation attack restrictions.
- use** – See **equipment**.
- Valeris** – See **infiltration icon, skills**.
- Vantika's Neural Pathways** – A mission specialist affected by this dilemma remains a mission specialist, with a skill of Treachery x2. See **Assign Mission Specialists**.
- variable attribute** – Some personnel have an X in one of their attribute boxes, with a corresponding special skill such as "X=2 or 7". Each time you need to know the value of a variable attribute (even when the card is in hand, such as for a Royale Casino dilemma), the owner of the card may choose one of the listed values at that time. Whenever the special skill is unusable (for example, because of Brain Drain or Hate Crime), the attribute is an **undefined attribute**, treated as zero.
- verification** – When a card or rule requires you to perform some action which you are unable to complete, your opponent must be allowed to verify that you are unable to do so. For example, if you cannot play a card when required to by a card such as Visit Cochrane Memorial or Energy Vortex, your opponent may look at your hand to verify that you are unable to do so. See **showing your cards**.
- version** – A "version" of a personnel refers to any *true* version of that specific **persona**. For example, Elim Garak, Elim, Mr. Garak, and Plain, Simple Garak are all versions of the Elim Garak persona. Thus, Plain, Simple Garak may be replaced at any time by Elim Garak, Elim or Mr. Garak. Garak and Security Chief Garak are not true versions of the Elim Garak persona, and may not replace Plain, Simple Garak.
- Vic Fontaine** – This personnel's downloading skill does not supply a destination for the downloaded card, so it must be played or reported where it could normally be played or reported. His skill may be used once per game per dilemma *title* (e.g., if he has downloaded a card when your personnel are "stopped" by Sarjenka, he cannot download again when they are "stopped" by another copy of Sarjenka at another mission). He cannot download an **artifact**. See **Mission Fatigue**.
- victory conditions** – See **winning the game**.
- Victory Is Life** – See **helps**.
- Vidiiian** – An **affiliation** and a **species**. See **affiliation and species**.
- Vidiiian Boarding Claw** – If your Vidiiian Cruiser that allowed you to play this incident leaves your control (e.g., commandeered or assimilated) or leaves play, discard the Vidiiian Boarding Claw.
- Vidiiian Harvester** – See **immune**.
- Vidiiian Sodality, The** – This incident's game text, allowing mixing with an additional affiliation, is active as soon as it is seeded. You do not have to declare a specific affiliation to mix with, or change it as a game action.
- Vorgon Raiders** – See in play, **stealing**.
- Voyager stand-alone formats** – When playing Voyager stand-alone Warp Speed and full game formats, you may use any cards with

a *Star Trek: Voyager* logo (including those found in First Anthology, the Official Tournament Sealed Deck, Blaze of Glory, Mirror, Mirror, Holodeck Adventures, and The Motion Pictures) as well as any missions with a Delta Quadrant icon.

VR Headset – This Equipment card aboard your [Dom] ship does not allow you to download a Vorta as its matching commander using Ready Room Door. The Vorta is not the matching commander until he is present with the VR Headset.

Vulcan Mindmeld – Revised text:

Plays at any location. Each of your Mindmeld personnel there may select another of your personnel present and add that personnel's skills to their own until end of turn.

This interrupt adds only regular (not special) skills. (See **skills – modifying**.) Your Mindmeld personnel may meld with any personnel, including androids and holograms. The personnel need not remain together after the meld to use their added skills.

Mindmeld may not be “chained.” If Sarek melds with Riva, and Spock melds with Sarek, Spock gains only Sarek's Diplomacy x3 and Mindmeld; he does not also gain Riva's Diplomacy x2.

Vulcan Nerve Pinch – Revised text:

Plays at start of personnel battle. Your Vulcans and Soong-Type Androids may each place one opposing personnel or Rogue Borg (random selection) in stasis until end of your next turn.

Wajahut – See **once per game, movement**.

Wake of the Borg, The – This interrupt does not destroy landed, cloaked, or phased ships. See **landed ships, cloaking and phasing**.

walking – Your personnel aboard a Nor may move (“walk”) from site to site, individually or as a group, and they may carry Equipment cards with them. Move the personnel or group along the row of sites, one site at a time, until they reach their destination. (They must actually “pass by” each site in turn; they do not relocate from site to another.) They may walk along more than one site each turn; however, as soon as they stop at any site, for any reason, they may not walk again that turn (although they may perform other actions, such as boarding a ship docked there).

Example: you have the following sites on your Nor, in order: Ops, Security Office, Guest Quarters, Ore Processing Unit, Docking Pylons. Your personnel may walk from Ops to Docking Pylons on one turn, moving from one site to the next in turn, and may board your ship docked at Docking Pylons. But if they stop to pick up a hand weapon from the Security Office, they may not walk any further this turn. Likewise, if two [Cmd] personnel walk from Ops to Guest Quarters and stop while you download a personnel there with Going To The Top, the [Cmd] personnel may not walk further this turn.

Entering or exiting from a docked or landed ship or planet facility is not “walking.”

Walls Have Ears, The – See **infiltration icon, intruder**.

Warp Core Breach – This event does not affect [Borg] ships.

Warp Speed – The following special rules apply to the constructed and sealed deck Warp Speed formats. For more details, see the separate Warp Speed rules sheet.

Deckbuilding: Your deck must follow the 10/20 rule – no more than 10 cards in the **seed deck** (plus up to three missions, which seed for free), and no fewer than 20 cards in the **draw deck**. Your 10 seed cards may include one Personnel, Ship, or equipment card to be seeded face up aboard your outpost, or one ship to be seeded face up at the Caretaker's Array. You may seed no more than one outpost of any kind.

Seed Phase: You choose the order for seeding your missions (they are not shuffled), ignoring regions of space. If you seed an outpost, it must be at your left-most mission, regardless of what that mission is (e.g., you may ignore the seeding location requirement on a Nekrit Supply Depot). Players alternate seeding missions from the starting player's left to his right. Duplication of unique missions between players is allowed (they are not stacked).

Each player may seed up to four different cards under each mission. Batch seeding under missions is mandatory.

Play Phase: Warp Speed adds the following rules:

- Each player may make up to two normal card plays each turn.
- All non-Borg affiliations are allowed to mix and cooperate as if there were a universal treaty in effect. (A matching personnel is still required for staffing ships, mission attempts, etc.) A player using [Borg]-affiliation cards may not stock any non-Borg-affiliation personnel, ships, or facilities in their game deck.
- Non-Borg affiliations have no affiliation attack restrictions. Normal attack restrictions apply to the Borg affiliation.
- Ignore quadrant reporting restrictions and Alternate Universe icons. That is, when reporting to a facility, you are not restricted to reporting personnel and ships only in their native quadrant, and no doorway is required for playing [AU] cards. You must still meet any stated native quadrant requirements to use a card such as Home Away From Home or Delta Quadrant Spatial Scission.
- [Holo] icons on *personnel cards* are ignored for all purposes in Warp Speed. Holographic personnel move normally and die rather than deactivating; any other card referring to a [Holo] icon does not affect (and is not affected by) a [Holo] personnel. For example, in Warp Speed it is not possible to score the extra points for a [Holo] personnel on Answer Distress Signal.
- A player may not attempt their opponent's mission, or target it with a Borg objective.
- If either player has Red Alert! in play, it applies to both players.
- At the end of each of your turns, you must draw one card (plus any extra draws allowed or required by a card such as The Traveler: Transcendence or Ancestral Visions). Then, if you do not hold exactly seven cards in your hand, you must “even up” by drawing or discarding cards to bring your hand back to seven (if possible). Card draws required to “even up” your hand may not be converted to downloads. If you use game text that says “draw no cards this turn,” you may not draw cards to “even up” your hand.
- If necessary, each player will “regenerate” their draw deck once per game. The first time you need to draw a card and cannot, take all the cards from your discard pile that *report for duty* (personnel, ships, and equipment) and reshuffle them to replenish your draw deck. (Leave the non-reporting cards in your discard pile.)

Winning: Games have a 30-minute time limit. The first player to solve one of their planet missions and one of their space missions (or, if playing Borg, to complete an objective targeting one of their space missions and an objective targeting one of their planet missions) scores a full win.

If no player achieves a full win (either because time runs out or because both players exhaust their draw decks again after regenerating), then a modified win is awarded to the player who solved the most missions. If the players have solved the same number of missions, then a modified win goes to the player with

the most points. (If players are tied for both missions and points, this is a true tie.)

Differential is calculated normally (as stated in the Tournament Guide). If you achieve a Full Win with a lower score than your opponent, your differential is +1 and your opponent's is -1.

Warped Space – The owner of this mission uses the span of 5, and the opponent uses the span of 1. Any card that moves like a ship with RANGE, such as Calamarain or The Sheliak, uses the span on the end toward the moving card's owner.

Wartime Conditions – This event may be played on any turn after the initial attack (not necessarily immediately after the attack). It applies to both players while in play.

We Look For Things – When you discard this incident to “acquire” a card enhancing the attributes of an opposing ship, you must immediately place the card in play. An Equipment card is relocated to your Pakled ship; an Event card is played on your side of the table or on one of your suitable ships at the location, as appropriate.

Weak Spot – See **attribute enhancements**.

WEAPONS – You cannot use your ship's or facility's WEAPONS for any purpose unless it is uncloaked, unphased, and undocked, its WEAPONS are greater than zero, and you have a **matching** personnel aboard. (If the facility is a Nor, the matching personnel must be in Ops.) “Using WEAPONS” includes satisfying the requirements of any card requiring WEAPONS, such as Outgunned or Refuse Immigration.

To fire its WEAPONS in battle, the ship or facility must not be “stopped.” (A card targeted by an attack is automatically “unstopped” and thus may return fire.) Unless returning fire or counter-attacking, the ship or facility must also have a **leader** (Borg must have a [Def] Borg instead) in its crew, and must not have any affiliation attack restrictions that prevent it from firing at the target. (If the firing card is a Nor, the personnel required above must be in Ops.)

If the requirements to solve a mission include ship's WEAPONS above a certain level (e.g., Ambush Ship), and it does not say “total WEAPONS;” then the single attempting ship must provide the WEAPONS requirement. If the requirements to attempt or solve a mission include “total WEAPONS” above a certain level (e.g., Intercept Maquis), that total may be provided by any of your compatible ships at that location.

Whale Probe, The – This dilemma places cards in **stasis** when it is first placed on the mission; when it moves to a new location at the end of every turn; and when any ship or personnel moves to or appears at its location. See **far end of spaceline, Borg Ship** (for definition of “appears at”).

Where No One Has Gone Before – Only one copy of this event is needed to affect both spacelines. However, it does not allow **movement between quadrants**.

White Deprivation – Personnel who have a [KW] icon suffer “white deprivation” when this incident is in play, unless they have **Ketracel-White** Equipment cards present to prevent it.

Your white-deprived personnel will attack even captives (belonging to either player) if present. You may not prevent them from fighting by using cards such as Emergency Transporter Armbands, Prepare Assault Teams, I'm a Doctor Not a Doorstop, Smoke Bomb, etc.

When your own personnel are attacking each other, even though they are separate assault teams they are still a single crew or Away Team. Thus, cards that affect the battle (such as hand weapons) apply to both teams. Echo

Papa 607 Killer Drones do not participate in battles caused by white deprivation.

One Ketracel-White card in a crew or Away Team prevents white deprivation for any number of [KW] personnel.

A disabled Jem'Hadar (including a captive) cannot initiate battle, but if white-deprived is still subject to death by random selection.

winning battle – See **battle – personnel, battle – ship**.

winning the game – Players take turns until one player scores 100 points (the normal victory conditions) and is declared the winner, or until both players' draw decks run out (at which point the player with the most points is declared the winner).

Some cards, such as Q's Planet and The Big Picture, may alter the victory conditions of the game for one or both players. The first player to achieve or exceed his victory conditions is the winner. If both players achieve their victory conditions simultaneously, the player with the most points is the winner.

Some cards or actions may cause you to **lose the game**.

Wormhole – This interrupt plays "just as [a ship] begins to move," that is, after any optional responses to the initiation of movement and just after the results step of the movement action begins. The movement action may be any normal ship **movement**, including time travel, e.g., with the first function of Temporal Vortex. Thus, a response to the initiation of movement (e.g., Establish Tractor Lock to prevent movement) cannot play after the ship has moved through Wormholes. Also, a ship wormholed to the location of a hazard such as a Borg Ship dilemma or Paxan "Wormhole" need not stop at that location and can continue to move away from the hazard (RANGE permitting). Wormholes allow movement between quadrants or **time travel** between the spaceline and a time location (or between two time locations); the **movement** uses no RANGE. Thus, you may move your ship with Wormholes even if it has no RANGE remaining (but not if affected by a card that says the ship may not move) or if there is no adjacent location to move to. The ship must be fully staffed.

The same player must play both Wormholes (i.e., your opponent may not "complete" your Wormhole with his own to redirect your ship). If your second Wormhole is nullified, the first is also nullified unless you immediately play another Wormhole.

A ship always emerges from a Wormhole in space, not landed or in any other place such as a shuttlebay. This interrupt may not be played on a **docked ship** (as it undocks).

A Wormhole interrupt may also be used with the built-in Wormhole on a planetary **Mission II** card.

See **Space-Time Portal, Operate Wormhole Relays**.

wormholes – movement through – Moving through a pair of Bajoran Wormhole doorways, or a pair of Wormhole interrupts kept open by Operate Wormhole Relays, can be part of a single movement action to the mouth of the wormhole and through it (continuing along the spaceline upon exit if Wormhole Navigation Schematic is played at Bajoran Wormhole).

worth points – A card that is "worth points" while some condition is met does not score those points each turn; it scores positive points when the condition is first met and scores negative points if there is a change in that status. For example, you score 20 points once with Dr. Tolian Soran, when he is placed under The Nexus. If he leaves The Nexus, you score -20 points because he is no longer worth points.

Writ of Accountability – Activating this incident to place it on a [Fer] FCA personnel already in play is a valid response to any of the actions that cause your opponent to lose the game. Activating it to download an FCA personnel is *not* a valid response to those actions and thus may be done only after your opponent's action is complete, and only if your opponent did not already win the game by completing his action.

For purposes of this incident, you have not used your own dilemma to score points if your opponent's action directly caused you to score points from that dilemma. For example, if your opponent "posts bail" for a captive taken by your Mandarin Bailiff, or his personnel dies with your Vendetta in play on it, you did not use that dilemma to score points.

If you score points by wagering a dilemma with Dabo, you have used that dilemma to score points. See **Horga'hn, winning the game, stasis**.

you – See **your**.

You Dirty Rat – The shape-shifter morphed by this interrupt may not be targeted by anything (not just in battle).

your – "Your" personnel, ship, or facility is one that you control, even temporarily. For example, you may play Auto-Destruct Sequence on your opponent's ship that you control using Alien Parasites. You may not play Sisko 197 Subroutine on the Ops of an Empok Nor that you seeded but have not yet commandeered.

On other cards (events, interrupts, dilemmas, etc.), "you" or "your" in game text refers to the player who played a card or who encountered a dilemma or Q-icon card. For example, if your opponent encounters your dilemma that refers to "three of your full turns," it means your opponent's turns; but if you play Beyond the Subatomic, "Discard from top of your draw deck" refers to you.

See **owner**.

Your Galaxy Is Impure – This dilemma may be nullified by Borg Nanoprobes if present when encountered, or later, after it has been placed on the mission.

Yuta – The personnel discarded by this dilemma dies. The death is a "random selection." If no personnel matches the number chosen, the dilemma is discarded.

Zaldan – Revised text:

Unless 2 Treachery OR a disruptor OR Wesley Crusher OR Exobiology present, kills two Away Team members who have Diplomacy (random selection).

zero – Zero is an even number.

Zon – Revised text:

May nullify Nausicaans dilemma where present.

**APPENDIX A:
CARDS WITH REVISED TEXT**

All cards with errata or revised text are listed here, except those with minor typographical corrections or changes made for wording consistency. See the individual entries for the actual revisions.

Adapt: Negate Obstruction
 Alien Abduction
 Amanda Rogers
 Amanda's Parents
 Anti-Time Anomaly
 Assign Mission Specialists
 Assimilate Planet
 Assimilate Starship
 Bajoran Resistance Cell
 Birth of "Junior"
 Borg Cube, Locutus' Borg Cube,
 Queen's Borg Cube
 Borg Outpost
 Captain's Log
 Cargo Rendezvous
 Chinese Finger Puzzle
 Clan People
 Covert Installation
 Cryosatellite
 Diplomatic Conference
 Disruptor Overload
 Distortion Field
 Distortion of Space/Time Continuum
 Docking Pads
 Edo Probe
 Emergency Transporter Armbands
 Ensign Tuvok
 Espionage Mission
 Establish Gateway
 Fair Play
 Firestorm
 Frame of Mind
 Full Planet Scan
 Garak
 Holo-projectors
 I.K.C. Bortas
 Iconia Investigation
 Investigate "Shattered Space"
 Kevin Uxbridge
 Khitomer Research
 Latinum Payoff
 Major Rakal
 Martok
 Menthar Booby Trap
 Neutral Outpost
 Outpost (8 outposts listed with similar errata)
 Patrol Neutral Zone
 Phased Matter
 Phaser Burns
 Q
 Q's Fantasy Women

 Thought Fire
 T'Pol
 Transwarp Network Gateway
 Tsiolkovsky Infection
 Two-Dimensional Creatures
 U.S.S. Danube
 Vulcan Mindmeld
 Vulcan Nerve Pinch
 Zaldan
 Zon

**APPENDIX B:
ICON LEGEND**

[AU] Alternate Universe
 [Bar] Barash
 [BO] Borg use only
 [CF] Classic Films
 [Cmd] Command
 [Com] Communication subcommand (blue)
 [Def] Defense subcommand (red)
 [DQ] Delta Quadrant
 [EE] U.S.S. Enterprise-E
 [GQ] Gamma Quadrant
 [Holo] Holographic re-creation
 [HA] Hidden Agenda
 [KW] Ketracel-White
 [KCA] Klingon/Cardassian Alliance
 [Maq] Maquis
 [MQ] Mirror Quadrant
 [Nav] Navigation subcommand (green)
 [Nem] Nemesis
 [OCD] Optical Compact Disk
 [Orb] Orb
 [OS] Original Series
 [P] Planet
 [Q] Q-Icon card
 [Ref] Referee
 [Rule] Ferengi Rule of Acquisition
 [Skill] Skill dot
 [S] Space
 [S/P] Space/Planet
 [SD] Special download
 [Stf] Staff
 [TE] Terran Empire
 [Tri] Tribble
 [Tro] Trouble
 [univ] Universal
 [3] Countdown box
 [35 Pts] Point box

Affiliation Icons

[Baj] Bajoran
 [Borg] Borg
 [Car] Cardassian
 [Dom] Dominion
 [Fed] Federation
 [Fer] Ferengi
 [Hir] Hirogen
 [Kaz] Kazon
 [Klg] Klingon
 [NA] Non-Aligned
 [Neu] Neutral
 [Rom] Romulan
 [Vid] Vidian

Infiltration Icons

<Baj> Bajoran
 <Dom> Dominion
 <Fed> Federation
 <Klg> Klingon
 <Rom> Romulan
