

THE CONTINUING COMMITTEE

RULINGS – General

***abilities** – Personnel may have one or more abilities. Each keyword is an ability. Other abilities may be denoted by the words “when” or “Order”. They may also create a continuous effect with or without a condition. Skills are not abilities.

***attempting missions** – Below is the timing for mission attempts and response actions involving them.

1. Active player (AP) begins a mission attempt
 - a. AP announces where and by what means (normal or game text), showing required personnel, and announcing the difference between the number of personnel involved in the attempt and the number of dilemmas underneath the mission.
 - b. “When . . . begins a mission attempt” triggers process.
2. Draw Dilemmas
 - a. “When . . . about to draw dilemmas” triggers process.
 - b. Opponent (OP) draws dilemmas from his or her dilemma pile equal to the number announced (plus or minus any modifiers, minimum 0).
 - c. “When . . . drawn dilemmas” triggers process.
 - d. OP selects any number (0 or more) of dilemmas from those drawn, uses them to form the dilemma stack, and places the rest face up on the bottom of the dilemma pile.
 - e. “When . . . (choose/chosen) dilemmas” triggers process.
3. Facing Dilemmas
 - a. If there are no personnel still involved in the mission attempt, all remaining dilemmas in the dilemma stack are overcome.
 - b. “When . . . dilemma . . . about to (be) reveal(ed)” triggers process.
 - c. OP reveals the top card of the dilemma stack to AP.
 - d. “When . . . reveal” triggers process.
 - e. Cost-related response actions and cost-modifying dilemma gametext process.
 - f. Check dilemma for duplication, type, and cost. If it fails any of these, it is overcome. Otherwise, the dilemma’s cost is deducted from the total allowed.
 - g. “When . . . about to face . . . dilemma” triggers process.
 - h. “(When/While) . . . (face/facing) . . . dilemma” triggers and “(When/While) . . . is attempting a mission” triggers process and may be used at any time until dilemma is overcome or placed somewhere.
 - i. Process the dilemma’s non-cost-related gametext, one action at a time.
4. Overcoming Dilemmas
 - a. After all of a dilemma is processed, if the AP has not been instructed to place it somewhere, it is overcome.
 - b. Repeat the process beginning at “Facing Dilemmas”.
5. Once the dilemma stack is empty and no response actions adding dilemmas are used, it is time to complete the mission with the remaining unstopped personnel.
 - a. “(When/While) . . . is attempting a mission” triggers process and may be used until the end of the mission attempt.
 - b. AP shows all requirements needed to complete the mission. If he or she cannot, all of the personnel involved are stopped and all “When . . . fail a mission attempt” triggers and “When . . . mission attempt fails” triggers process.
 - c. If the AP does show all requirements, all “When . . . about to complete” triggers process, then the AP scores the points on the mission (or points in game text used to attempt and complete the mission, then “When . . . complete” triggers process. If the mission requirements change at any point during part 5, return to the beginning of part 5.

Current Rulings Document (1 March 2010)

Current Rulings are periodic updates to the Second Edition Rulebook, including changes, clarifications, and situations it does not address. Current Rulings are an official supplement to the Rulebook and should be used by tournament directors in making tournament rulings.

Answers given by official Continuing Committee representatives are not official until included in an official rules document such as the Current Rulings, Official Clarifications, or Official Rulings. Such answers are highly recommended for use by tournament directors, but the Tournament Director always has the final authority on rulings.

This document contains all Current Rulings issued since the Rulebook v3. Entries that are new, changed, or expanded since the last Current Rulings document are marked with an asterisk (*) before the topic. These rulings are effective immediately.

This document is divided into three sections. The first section covers general rulings, the second section covers card-specific rulings and the third section lists cards that have received errata.

dilemmas – Some dilemmas cause more than one personnel to be selected, killed, stopped, or placed in a brig. A dilemma that does this will select, kill, stop, or place those personnel in a brig as one action, unless they are listed as separate actions. Any response actions will only trigger once when multiple personnel are affected by a single action during a mission attempt.

For example: if Tragic Turn is on a mission and three personnel are selected to be killed by one action, only one additional personnel will be killed.

A dilemma’s instructions are broken down into actions. You may use applicable game text (“While . . . facing a dilemma”) only before or after any of these actions, not in the middle of one.

For example: A Klingon Matter reads: “Unless you have . . . randomly select a personnel. If that personnel has . . . , he or she is killed, then all your other personnel are stopped and this dilemma returns to its owner’s dilemma pile.”

Randomly selecting a personnel, killing that personnel, stopping all your other personnel, and returning this dilemma to its owner’s dilemma pile are the four actions. You can act before or after any of these actions, except for the last one, because once it is complete you are no longer facing the dilemma.

For example: Pinned Down reads: “Randomly select a personnel to be stopped . . . randomly select a second personnel to be stopped . . . randomly select a third personnel to be stopped.” Each instruction to “randomly select a [personnel] to be stopped” is a set of two actions and you can act before the random selection, after the random selection but before the personnel is stopped, or after the personnel is stopped.

missions – If more than one player has played a copy of the same mission, they are treated as separate missions. Cards at one copy of the mission are not considered to be at any other copy of the mission.

For example: If your personnel are on your copy of a planet, you may not initiate combat involving them and an opponent’s personnel on his or her copy of that planet.

requirements – A mission’s printed requirements are always active unless they are “replaced”.

All requirements on dilemmas and missions must be met, unless there is a condition on doing so. *For example: Personnel attempting a mission must use their skills and attributes to complete the mission, unless an opponent’s card has placed a cost on their use.*

response actions – Response actions triggered “when” personnel are “facing a dilemma” can only be used once per dilemma.

showing your cards – Any player may view any card in any discard pile or any card that has been removed from the game at any time.

skills – Whenever “all skills” are added to or subtracted from a card, all levels of those skills are added or subtracted

winning the game – A player wins the game when he or she:

- has 100 points (or more);
- commands at least one completed planet mission; and
- commands at least one completed space mission.

The game ends immediately when all three of these conditions are simultaneously met. (The active player does not finish the rest of his or her turn.)

The rest of the entry does not change.

RULINGS – Cards

A Klingon Matter – Whether or not a personnel is killed, if you do not meet the requirements, all of your other personnel are stopped.

Bio-neural Computer Core – That opponent only takes command of the personnel that are placed on his or her headquarters mission.

Crowd Control – This event can affect the cost of only a single personnel each turn.

For the Cause – This event does not allow a player to attempt an opponent's mission.

Jadzia Dax, Problem Solver – This personnel does not prevent an event from being destroyed. If her ability is used, it changes where the event is placed as a result of being destroyed or discarded.

James T. Kirk, Original Thinker – This ruling has been retracted.

Kira Nerys, Resourceful Prisoner – This personnel cannot remove herself from the game to place herself on a headquarters mission.

Nothing That Happens Is Truly Random – When you play this event, if you have more than one opponent, you choose which opponent will choose one of the revealed cards to be discarded.

Psychokinetic Control – Abilities on personnel that increase their attributes and are continuously activated before Psychokinetic Control is revealed will not be turned off by this dilemma. They will be unable to increase a personnel's attributes any further. If their effect decreases, they cannot increase again.

Quantum Filament – Quantum Filament's effect is suspended until it is verified that the dilemma that is about to be faced can actually be faced. Then Quantum Filament's effect happens before any effects from the revealed dilemma happen.

Rule of Acquisition #76 – This card can only return Rule cards that are in play to their owner's hand.
